THE SECOND EDITION.

LONDON:

PRINTED FOR J. JOHNSON, IN ST. PAUL'S CHURCH-VARD.

1795.

ADVERTISEMEN'T.

THIS hiftory, taking in fuch a variety of facts and opinions, has grown under my hand; efpecially as in writing I cannot avoid entering into fome defultory difquifitions, and defcriptions of manners and things which, though not firicity neceffary to elucidate the events, are intimately connected with the main object; I have also been led into feveral theoretical invefligations, whilf marking the political effects that naturally flow from the progress of knowledge. It is probable, therefore, that this work will be extended to two or three more volumes, a confiderable part of which is already written.

PREFACE.

THE revolution in France exhibits a fcene, in the political world, not lefs novel and interesting than the contrast is striking between the narrow opinions of superstition, and the enlightened fentiments of masculine and improved philosophy.

To mark the prominent features of this revolution, requires a mind, not only unfophifticated by old prejudices, and the inveterate habits of degeneracy; but an amelioration of temper, produced by the exercise of the most enlarged principles of humanity.

The rapid changes, the violent, the bafe, and nefarious affaffinations, which have clouded the vivid prospect that began to spread fpread a ray of joy and gladness over the gloomy horizon of oppression, cannot fail to chill the fympathizing boson, and palfy intellectual vigour. To sketch these vicifitudes is a task fo arduous and melancholy, that, with a heart trembling to the touches of nature, it becomes necessary to guard against the erroneous inferences of sensibility; and reason beaming on the grand theatre of political changes, can prove the only fure guide to direct us to a favourable or just conclusion.

This important conclusion, involving the happiness and exaltation of the human character, demands ferious and mature confideration; as it must ultimately fink the dignity of fociety into contempt, and its members into greater wretchedness; or elevate it to a degree of grandeur not hitherto anticipated, but by the most enlightened statefmen and philosophers.

Contemplating then these flupendous events with the cool eye of observation, the judge-5 ment, ment, difficult to be preferved unwarped under the preffure of the calamitous horrours produced by defperate and enraged factions. will continually perceive that it is the uncontaminated mafs of the french nation, whole minds begin to grafp the fentiments of freedom, that has fecured the equilibrium of the ftate; often tottering on the brink of annihilation; in fpite of the folly, felfifinefs, madnefs, treachery, and more fatal mock patriotifm, the common refult of depraved manners, the concomitant of that fervility and voluptuoufnefs which for fo long a fpace of time has embruted the higher orders of this celebrated nation.

By thus attending to circumftances, we fhall be able to difcern clearly that the revolution was neither produced by the abilities or intrigues of a few individuals; nor was the effect of fudden and fhort-lived enthufiafm; but the natural confequence of intellectual improvement, gradually proceeding to perfection viii

in the advancement of communities, from a flate of barbarism to that of polished society, till now arrived at the point when sincerity of principles seems to be hastening the overthrow of the tremendous empire of superstition and hypocrify, erected upon the ruins of gothic brutality and ignorance.

CONTENTS.

BOOKI.

CHAPTER I.

Introduction. Progrefs of fociety. End of government. Rife of political difcuffion among ft the french. Revolution in America. Virtue attempted to be built on false principles. The croifades, and the age of chivalry. Administration of Richelieu, and of Cardinal Mazarin. Theatrical entertainments, and dramatic poets of the french-Moliere,-Corneille,-Racine. Louis XIV. The regency.-Louis XV. page 1.

CHAP. II.

Marie-Antoinette. Louis XVI. Administration of Necker, and of Calonne. Notables convened. Calonne difgraced,—and obliged to flee the kingdom. His character. Causes of the enslaved state of Europe. P. 33.

CHAP. III.

Administration of de Brienne. Dissolution of the notables. Land tax and stamp duty recommended by them, them, but refused to be fanctioned by the parliament. Bed of justice. The parliament banished to Troyes, —but soon compromised for its recall. Struggles of the court party to prevent the convacation of the states-general. Banishment of the duke of Orleans, and two spirited members of the parliament. Cour pleniere. Remarks on the parliaments. Imprisonment of the members. Deputies of the Province of Britanny sent to the Bastille. The soldiery let loose upon the people. p. 48.

CHAP. IV.

Necker recalled. His charafter. Notables convened a fecond time. Coalition of the nobility and clergy in defence of their privileges. Provincial affemblies of the people. Political publications in favour of the tiers-etat. General reflections on reform,—on the prefent ftate of Europe,—and on the revolution in France. P. 59.

 \boldsymbol{B} O O KII.

CHAP. I.

Retrospective view of grievances in France—the nobles —the military—the clergy—the farmers general. Election of deputies to the states-general. Arts of the courtiers. Assembly of the states. Riots excited at Paris. Opening of the states-general. The king's speech. Answer to it by the keeper of the seals. feals. Speech of Mr. Necker. Contest respecting the mode of affembling. Tacit establishment of the liberty of the press. Attempt of the court to restrain it. The deputies declare themselves a national affembly. p. 75.

CHAP, II.

The national affembly proceed to business. Opposition of the nobles, bishops, and court. A seance royale proclaimed, and the ball of the affembly furrounded by foldiers. The members adjourn to the tennis court, and vow never to separate till a constitution should be completed. The majority of the clergy and two of the nobles join the commons. Séance royale. The king's speech. Spirited behaviour of the asfembly. Speech of Mirabeau. Perfons of the deputies declared inviolable. Minority of the nobles join the commons. At the request of the king the minority of the clergy do the fame,-and are at length followed by the majority of the nobles. Character of the queen of France,-of the king,-and of the nobles. Lectures on liberty at the palais royal. Paris furrounded by troops. Spirit of liberty infused into the foldiers. Eleven of the french guards imprisoned because they would not fire on the populace, and liberated by the people. Remonstrance of the national affembly. The king proposes to remove the affembly to Noyon, . or Soiffons. Necker difmiffed. City militia proposed. The populace attacked in the garden of the Thuilleries by the prince of Lambefc. NoEturnal orgies at Versailles. p. 109. CHAP.

CONTENTS.

CHAP. III.

Preparations of the parifians for the defence of the city. The guards, and city watch join the citizens. The armed citizens appoint a commander in chief. Condust of the national affembly during the difturbances at Paris. They publish a declaration of rights, and offer their mediation with the citizens,—which is haughtily refused by the king. Proceedings at Paris on the 14th of July. Taking of the bastille. The mayor shot. Proceedings of the national affembly at Versailles. Appearance of the king in the affembly. His speech. p. 165.

CHAP. IV.

Reflections on the conduct of the court and king. Injurious confequences of the complication of laws. General diffusion of knowledge. State of civilization amongst the ancients. It's progress. The croisades, and the reformation. Early freedom of Britain. The british constitution. State of liberty in Europe. Russia. Decline of the Aristotelian philosophy, Descartes. Newton. Education improved. Germany. Frederick II. of Prussia. p. 215.

BOOK III.

CHAP. I.

A deputation of the national affembly arrives at Paris. Baillie chofen mayor, and La Fayette commander in chief chief of the national guards. Refignation of the ministry. Necker recalled. The king visits Paris. Character of the parisians. The revolution urged on prematurely. Emigrations of several of the nobility and others. Calonne advises the french princes to stir up foreign powers against France. Foulon killed. p. 241.

CHAP. II.

The duke of Liancourt chosen president. The people arm for the defence of the country. The municipal officers appointed under the old government superseded by committees. Some people treacherously destroyed by springing a mine at a civic feast. The genevese resident taken up by the patrole. The french suspicious of the designs of Britain. Necker returns. General annesty resolved by the electors of Paris. Debate on a declaration of rights. Declaration of rights separate from the constitution determined on. Sacrifices made by the nobles, clergy, Sc. p. 263.

CHAP. III.

Reflections on the members of the national affembly. Seceffion of feveral pfeudo-patriots. Society ripe for improvement throughout Europe. War natural to men in a favage state. Remarks on the origin and progress of fociety. The arts—property—inequality of conditions—war. Pitture of manners in modern France. p. 295.

xiii

BOOK IV.

CONTENTS,

X.V

B O O K IV.

CHAP. I.

Opinions on the transactions of the fourth of August. Disorders occasioned by those transactions. Necker demands the assembly's sanction to a loan. A loan decreed. Tithes abolished. Debate on the declaration of rights. The formation of a constitution. Debate on the executive power. The suspensive veto adopted. Pretended and real views of the combination of despots against France. Debate on the constitution of a senate. Means of peaceably effecting a reform should make a part of every constitution. P. 313.

CHAP. II.

Observations on the veto. The women offer up their ornaments to the public. Debate whether the spanish branch of the Bourbons could reign in France. Condust of the king respecting the decrees of the fourth of August. Vanity of the french. Debates on quartering a thousand regulars at Versailles. Individuals offer their jewels and plate to make up the deficiency of the loan. The king sends his rich service of plate to the mint. Necker's proposal for every citizen to give up a fourth of his income. Speech of Mirabeau on it. His address to the nation. P. 359.

CHAP. III.

CHAP. III.

Reflections on the new mode of raising supplies. No just system of taxation yet established. Paper money. Necessity of gradual reform. p. 388.

B O O K V.

CHAP. I.

Errour of the national affembly in neglecting to fecure the freedom of France. It's conduct compared with that of the american ftates. Neceffity of forming a new conftitution as foon as an old government is destroyed. The declaring the king inviolable a wrong measure. Security of the french against a counter-revolution. The slight of the king meditated. p. 399-

CHAP. II.

Entertainment at Versailles. The national cockade trampled under foot. A mob of women proceed to the hotel-de-ville—and thence to Versailles. The king's reply to the national affembly's request, that he would fantion the declaration of rights and the first articles of the constitution. Debates on it. Arrival of the mob at Versailles. The king receives a deputation from the women, and fantions the decree for the free circulation of grain. The effembly fummoned. La Fayette arrives with the parisian militia. The palace attacked by the mob—who are dispersed

CONTENTS.

dispersed by the national guards. Reflections on the conduct of the duke of Orleans. p. 420.

CHAP. III.

The mob demand the king's removal to Paris. This city described. The king repairs to the capital, efcorted by a deputation of the national assembly and the parisian militia. The king's title changed. Proceedings of the national assembly. Reflections on the declaration of rights. p. 470.

CHAP. IV.

Progrefs of reform. The encyclopedia. Liberty of the prefs. Capitals. The french not properly qualified for the revolution. Savage compared with civilized man. Effects of extravagance—of commerce—and of manufactures. Excuse for the ferocity of the parifians. p. 492.

HISTORICAL AND MORAL VIEW

OF THE

FRENCH REVOLUTION,

BOOK I.

CHAPTER I.

INTRODUCTION. PROGRESS OF SOCIETY. END OF CO-VERNMENT. RISE OF POLITICAL DISCUSSION AMONGST THE FRENCH. REVOLUTION IN AMERICA. VIRTUE ATTEMPTED TO BE BUILT ON FALSE PRINCIPLES. THE CROISADES, AND THE AGE OF CHIVALRY. ADMINI-STRATION OF RICHELIEU, AND OF CARDINAL MAZA-RIN. THEATRICAL ENTERTAINMENTS, AND DRAMATIC POETS OF THE FRENCH,-MOLIERE,-CORNEILLE,-RA-CINE. LOUIS XIV. THE REGENCY. LOUIS XV.

WHEN we contemplate the infancy of man, his gradual advance towards maturity, his miferable weaknefs as a folitary being, and the crudenefs of his first notions respecting the nature of civil fociety, it will not appear extraordinary, that the acquirement of political knowledge has been fo extremely flow; or that public happiness has not been more rapidly and generally diflused.

The perfection attained by the ancients, it is true, has ever afforded the imagination of the poetical historian a theme to deck with the choicest flowers of rhetoric; though the cool investigation of facts feems clearly to prove, that the civilization of the world, hitherto, has confifted rather in cultivating the tafte, than in exercifing the understanding. And were not these vaunted improvements also confined to a finall corner of the globe, whilft, the political view of the wifeft legislators feldom extending beyond the fplendour and aggrandizement of their individual nation, they trampled with a ferocious affectation of patriotism on the most facred rights of humanity? When the arts flourished in Greece, and literature began to fhed it's blandifhments on fociety, the world was moftly inhabited by barbarians, who waged eternal war with their more polished neighbours, the imperfection of whole government fapping it's foundation, the feience of politics necessarily received a check in the bud-and when we find, likewife, the roman empire crumbling into atoms, from the germ of a deadly malady implanted

planted in it's vitals; whilft voluptuoufnefs ftopped the progrefs of civilization, which makes the perfection of the arts the dawn of fcience; we fhall be convinced, that it demanded ages of improving reafon and experience in moral philofophy, to clear away the rubbifh, and exhibit the first principles of focial order.

We have probably derived our great fuperiority over those nations from the discovery of the polar attraction of the needle, the perfection which aftronomy and mathematics have attained, and the fortunate invention of printing. For, whilst the revival of letters has added the collected wifdom of antiquity to the improvements of modern refearch, the latter most useful art has rapidly multiplied copies of the productions of genius and compilations of learning, bringing them within the reach of all ranks of men : the fcientific discoveries also have not only led us to new worlds; but, facilitating the communication between different nations, the friction of arts and commerce have given to fociety the transcendently pleasing polish of urbanity; and thus, by a gradual foftening of manners, the complexion of focial life has been completely changed. But the remains of fuper-B 2 flition. fition, and the unnatural diffinction of privileged claffes, which had their origin in barbarons folly, ftill fettered the opinions of man, and fullied his native dignity; till feveral diffinguished english writers discuffed political fubjects with the energy of men, who began to feel their firength; and, whilst only a rumour of these fentiments roused the attention and exercised the minds of some men of letters in France, a number of ftaunch disputants, who had more thoroughly digested them, fled from oppression, to put them to the test of experience in America.

Locke, following the track of these bold thinkers, recommended in a more methodical manner religious toleration, and analyzed the principles of civil liberty: for in his definition of liberty we find the elements of *The Declaration of the Rights of Man*. which, in spite of the fatal errours of ignorance, and the perverse obstinacy of selfission function of the theory of verting fublime theories into practical truths.

The revolution, it is true, foon introduced the corruption, that has ever fince been corroding british freedom.—Still, when the rest of Europe groaned under the weight of the most unjust and cruel laws, the life and property perty of englishmen were comparatively fafe; and, if an impress-warrant respected the diftinction of ranks, when the glory of England was at stake, splendid victories hid this flaw in the best existing conflictution; and all exultingly recollected, that the life or liberty of a man never depended on the will of an individual.

Englishmen were then, with reason, proud of their conftitution; and, if this noble pride have degenerated into arrogance, when the cause became less conspicuous, it is only a venial lapse of human nature; to be lamented merely as it stops the progress of civilization, and leads the people to imagine, that their ancestors have done every thing possible to secure the happiness of society, and meliorate the condition of man, because they have done much.

When learning was confined to a finall number of the citizens of a ftate, and the inveftigation of it's privileges was left to a number ftill fmaller, governments feem to have acted, as if the people were formed only for them; and, ingenioufly confounding their rights with metaphyfical jargon, the luxurious grandeur of individuals has been fup-B 3 ported ported by the milery of the bulk of their fellow creatures, and ambition gorged by the butchery of millions of innocent victims.

The most artful chain of despotifim has ever been supported by false notions of duty, enforced by those who were to profit by the cheat. Thus has the liberty of man been restrained; and the spontaneous flow of his feelings, which would have fertilized his mind, being choked at the fource, he is rendered in the fame degree unhappy as he is made unnatural. Yet, certain opinions, planted by fuperstition and despotifin, hand in hand, have taken fuch deep root in our habits of thinking, it may appear daringly licentious, as well as prefumptuous, to observe, that what is often termed virtue, is only want of courage to throw off prejudices, and follow the inclinations which fear not the eye of heaven, though they fhrink from cenfure not founded on the natural principles of morality. But at no period has the feanty diffusion of knowledge permitted the body of the people to participate in the difcuffion of political fcience; and if philosophy at length have simplified the principles of focial union, fo as to render them eafy to be comprehended by every fane and

and thinking being; it appears to me, that man may contemplate with benevolent complacency and becoming pride, the approaching reign of reafon and peace.

Befides, if men have been rendered unqualified to judge with precifion of their civil and political rights, from the involved flate in which fophifticating ignorance has placed them, and thus reduced to furrender their reafoning powers to noble fools, and pedantic knaves, it is not furprizing, that fuperficial obfervers have formed opinions unfavourable to the degree of perfection, which our intellectual faculties are able to attain, or that defpotifin fhould attempt to check the fpirit of inquiry, which, with coloffian flrides, feems to be haftening the overthrow of oppreflive tyranny and contumelious ambition.

Nature having made men unequal, by giving ftronger bodily and mental powers to one than to another, the end of government ought to be, to deftroy this inequality by protecting the weak. Inftead of which, it has always leaned to the opposite fide, wearing itself out by difregarding the first principle of it's organization.

It appears to be the grand province of government, though fcarcely acknowledged, fo to hold the balance, that the abilities or riches of individuals may not interfere with the equilibrium of the whole. For, as it is vain to expect, that men should master their passions during the heat of action, legislators should have this perfection of laws ever in view, when, calmly grasping the interest of humanity, reason affures them, that their own is best fecured by the fecurity of the commonweal. The first focial fystems were certainly founded by passion; individuals wishing to fence round their own wealth or power, and make flaves of their brothers to prevent encroachment. Their descendants have ever been at work to folder the chains they forged, and render the usurpations of strength fecure, by the fraud of partial laws: laws that can be abrogated only by the exertions of reafon, emancipating mankind, by making government a fcience, inftead of a craft, and civilizing the grand mafs, by exercifing their understandings about the most important objects of inquiry.

After the revolution in 1688, however, political questions were no longer discussed in

England

England on a broad fcale; because that degree of liberty was enjoyed, which enabled thinking men to pursue without interruption their own business; or, if some men complained, they attached themselves to a party, and descanted on the unavoidable misery produced by contending passions.

But in France the bitterness of oppression was mingled in the daily cup, and the ferious folly of superstition, pampered by the sweat of labour, stared every man of sense in the face. Against superstition then did the writers contending for civil liberty principally direct their force, though the tyranny of the court increased with it's vicious for.

Voltaire leading the way, and ridiculing with that happy mixture of fatire and gaiety, calculated to delight the french, the inconfiftent puerilities of a puppet-flow religion, had the art to attach the bells to the fool's cap, which tinkled on every fide, roufing the attention and piquing the vanity of his readers. Rouffeau alfo ranged himfelf on the fame fide; and, praifing his fanciful flate of nature, with that interefting eloquence, which embellifhes reafoning with the charms of of fentiment, forcibly depicted the evils of a prieft-ridden fociety, and the fources of oppreffive inequality, inducing the men who were charmed with his language to confider his opinions.

The talents of these two writers were particularly formed to effect a change in the sentiments of the french, who commonly read to collect a fund for conversation; and their biting retorts, and flowing periods, were retained in each head, and continually slipped off the tongue in numerous sprightly circles.

In France, indeed, new opinions fly from mouth to mouth, with an electrical velocity, unknown in England; fo that there is not fuch a difference between the fentiments of the various ranks in one country, as is obfervable in the originality of character to be found in the other. At our theatres, the boxes, pit, and galleries, relifh different fcenes; and fome are condefcendingly born by the more polifhed part of the audience, to allow the reft to have their portion of amufement. In France, on the contrary, a highly wrought fentiment of morality, probably rather romantic than fublime, produces a burft of

(11)

of applause, when one heart seems to agitate every hand.

But men are not content merely to laugh at opprefion, when they can fcarcely catch from his gripe the neceffaries of life; fo that from writing epigrams on fuperflition, the galled french began to compole philippics against despotism. The enormous and iniquitous taxes, which the nobles, the clergy, and the monarch, levied on the people, turned the attention of benevolence to this main branch of government, and the profound treatife of the humane M. Quefnai produced the fect of the *economifls*, the first champions for civil liberty.

On the eve of the american war, the enlightened administration of the comptroller general Turgot, a man formed in this school, afforded France a glimpse of freedom, which, streaking the horizon of despotism, only served to render the contrast more striking. Eager to correct abuses, equally impolitic and cruel, this most excellent man, suffering his clear judgment to be clouded by his zeal, rouzed the ness of wass, that rioted on the honey of industry in the sufficient of court favour; and he was obliged to retire from the

4

the office, which he fo worthily filled. Difappointed in his noble plan of freeing France from the fangs of defpotifm, in the courfe of ten years, without the miferies of anarchy, which make the prefent generation pay very dear for the emancipation of posterity, he has nevertheles greatly contributed to produce that revolution in opinion, which, perhaps, alone can overturn the empire of tyranny.

The idle caprices of an effeminate court had long given the tone to the awe-ftruck populace, who, flupidly admiring what they did not underftand, lived on a vive le roi, whilf his blood-fucking minions drained every vein, that fhould have warmed their honeft hearts.

But the irrefiftible energy of the moral and political fentiments of half a century, at laft kindled into a blaze the illuminating rays of truth, which, throwing new light on the mental powers of man, and giving a frefh fpring to his reafoning faculties, completely undermined the ftrong holds of prieftcraft and hypocrify.

At this glorious cra, the toleration of religious opinions in America, which the fpirit of the times, when that continent was peopled with

with perfecuted europeans, produced, aided, not a little, to diffuse these rational sentiments, and exhibited the phenomenon of a government established on the basis of reason and equality. The eyes of all Europe were watchfully fixed on the practical fuccefs of this experiment in political fcience; and whilft the crowns of the old world were drawing into their focus the hard-earned recompence of the toil and care of the fimple citizens, who lived detached from courts, deprived of the comforts of life, the just reward of industry, or, palsied by oppression, pined in dirt and idleness; the anglo-americans appeared to be another race of beings, men formed to enjoy the advantages of fociety, and not merely to benefit those who governed; the use to which they had been appropriated in almost every state; confidered only as the ballast which keeps the vessel fteady, neceffary, yet despised. So confpicuous in fact was the difference, that, when frenchmen became the auxiliaries of those brave people, during their noble ftruggle against the tyrannical and inhuman ambition of the british court, it imparted to them that ftimulus, which alone was wanting to give wings to freedom, who, hovering over France, led

led her indignant votaries to wreak their vengeance on the tottering fabric of a government, the foundation of which had been laid by benighted ignorance, and it's walls cemented by the calamities of millions that mock calculation—and, in it's ruins a fyftem was entombed, the most baneful to human happines and virtue.

America fortunately found herfelf in a fituation very different from all the reft of the world; for fhe had it in her power to lay the first stones of her government, when reason was venturing to canvass prejudice. Availing herfelf of the degree of civilization of the world, she has not retained those customs, which were only the expedients of barbarism; or thought that constitutions formed by chance, and continually patched up, were superiour to the plans of reason, at liberty to profit by experience.

When fociety was first regulated, the laws could not be adjusted fo as to take in the future conduct of it's members, because the faculties of man are unfolded and perfected by the improvements made by society : confequently the regulations established as circumstances required were very imperfect. What What then is to hinder man, at each epoch of civilization, from making a fland, and new modelling the materials, that have been haftily thrown into a rude mafs, which time alone has confolidated and rendered venerable?

When fociety was first fubjugated to laws, probably by the ambition of fome, and the defire of fafety in all, it was natural for men to be felfish, because they were ignorant how intimately their own comfort was connected with that of others; and it was also very natural, that humanity, rather the effect of feeling than of reason, should have a very limited range. But, when men once see, clear as the light of heaven,—and I hail the glorious day from afar !—that on the general happines depends their own, reason will give strength to the fluttering wings of passion, and men will " do unto others, what they wish they should do unto them."

What has hitherto been the political perfection of the world? In the two most celebrated nations it has only been a polish of manners, an extension of that family love, which is rather the effect of fympathy and fellish passions, than reasonable humanity. And in what has ended their so much extolled patriotism? patriotifm? In vain glory and barbarity every page of hiftery proclaims. And why has the enthulialm for virtue thus paffed away like the dew of the morning, dazzling the cyes of it's admirers? Why ?—becaufe it was factitious virtue.

During the period they had to combat against oppression, and rear an infant state, what inftances of heroifm do not the annals of Greece and Rome difplay! But it was merely the blaze of paffion, "live fmoke;" for after vanquishing their enemies, and mak ing the most astonishing facrifices to the glory of their country, they became civil tyrants, and preyed on the very fociety, for whole welfare it was easier to die, than to practife the fober duties of life, which infinuate through it the contentment that is rather felt than feen. Like the parents who forget all the dictates of justice and humanity, to aggrandize the very children whom they keep in a flate of dependence, these heroes loved their country, because it was their country, ever flowing by their conduct, that it was only a part of a narrow love of themfelves.

It is time, that a more enlightened moral love of mankind fhould fupplant, or rather fupport fupport physical affections. It is time, that the youth approaching manhood should be led by principles, and not hurried along by fensations—and then we may expect, that the heroes of the prefent generation, still having their monsters to cope with, will labour to establish such rational laws throughout the world, that men will not rest in the dead letter, or become artificial beings as they become civilized.

We must get entirely clear of all the notions drawn from the wild traditions of original fin : the eating of the apple, the theft of Prometheus, the opening of Pandora's box, and the other fables, too tedious to enumerate, on which priefts have erected their tremendous structures of imposition, to persuade us, that we are naturally inclined to evil: we fhall then leave room for the expansion of the human heart, and, I truft, find, that men will infenfibly render each other happier as they grow wifer. It is indeed the neceffity of fliffing many of it's most spontaneous desires, to obtain the factitious virtues of fociety, that makes man vicious, by depriving him of that dignity of character, which refts only on truth. For it is not paradoxical to affert, that the focial virtues

are nipt in the bud by the very laws of fociety. One principal of action is fufficient-Respect thyself-whether it be termed fear of God-religion; love of juffice-morality; or, felf-love-the defire of happinefs. Yet, how can a man respect himself; and if not, how believe in the existence of virtue; when he is practifing the daily fhifts, which do not come under the cognifance of the law, in order to obtain a respectable situation in life? It feems, in fact, to be the bufiness of a civilized man, to harden his heart, that on it he may fharpen the wit; which, affuming the appellation of fagacity, or cunning, in different characters, is only a proof, that the head is clear, becaufe the heart is cold.

Befides, one great caufe of mifery in the prefent imperfect flate of fociety is, that the imagination, continually tantalized, becomes the inflated wen of the mind, draining off the nourifhment from the vital parts. Nor would it, I think, be firetching the inference too far, to infift, that men become vicious in the fame proportion as they are obliged, by the defects of fociety, to fubmit to a kind of felfdenial, which ignorance, not morals, prefcribes.

But these evils are passing away; a new spirit has gone forth, to organise the bodypolitic; and where is the criterion to be found. to estimate the means, by which the influence of this fpirit can be confined, now enthroned in the hearts of half the inhabitants of the globe? Reafon has, at laft, fhown her captivating face, beaming with benevolence; and it will be impoffible for the dark hand of defpotifm again to obfcure it's radiance, or the lurking dagger of fubordinate tyrants to reach her bofom. The image of God implanted in our nature is now more rapidly expanding; and, as it opens, liberty with maternal wing feems to be foaring to regions far above vulgar annoyance, promifing to shelter all mankind.

It is a vulgar errour, built on a fuperficial view of the fubject, though it feems to have the fanction of experience, that civilization can only go as far as it has hitherto gone, and then muft neceffarily fall back into barbarifm. Yet thus much appears certain, that a flate will infallibly grow old and feeble, if hereditary riches fupport hereditary rank, under any defcription. But when courts and primogeniture are done away, and fimple equal laws are eftablished, what is to prevent each generation C_2 from from retaining the vigour of youth ?—What can weaken the body or mind, when the great majority of fociety must exercise both, to earn a fubfistence, and acquire respectability?

The french revolution is a ftrong proof how far things will govern men, when fimple principles begin to act with one powerful fpring against the complicated wheels of ignorance; numerous in proportion to their weakncis, and conftantly wanting repair, because expedients of the moment are ever the fpawn of cowardly folly, or the narrow calculations of felfishness. To elucidate this truth, it is not necessary to rake among the ashes of barbarous ambition; to show the ignorance and confequent folly of the monarchs, who ruled with a rod of iron, when the hordes of curopean favages began to form their governments; though the review of this portion of hiftory would clearly prove, that narrownefs of mind naturally produces ferocioufnefs of temper.

We may boaft of the poetry of those ages, and of those charming flights of imagination, which, during the paroxysms of passion, flash out in those single acts of heroic virtue, that throw a lustre over a whole thoughtles life;

but

but the cultivation of the understanding, in spite of these northern lights, appears to be the only way to tame men, whole reftleffnels of spirit creates the vicious passions, that lead to tyranny: and cruelty. When the body is ftrong, and the blood warm, men do not like. to think, or adopt any plan of conduct, unless broken-in by degrees: the force that has often spent itself in fatal activity becomes a rich fource of energy of mind.

Men exclaim, only noticing the evil, against the luxury introduced with the arts and fciences; when it is obvioufly the cultivation of these alone, emphatically termed the arts of peace, that can turn the fword into a ploughshare. War is the adventure naturally purfued by the idle, and it requires fomething of this fpecies, to excite the ftrong emotions necessary to roufe inactive minds. Ignorant people, when they appear to reflect, exercise their imagination more than their understanding; indulging reveries, inftead of purfuing a train of thinking; and thus grow romantic; like the croifaders; or like women, who are commonly idle and reftlefs.

If we turn then with difgust from enfanguined regal pomp, and the childifh rareethows fhows that amufe the enflaved multitude, we fhall feel ftill more contempt for the order of men, who cultivated their faculties, only to enable them to confolidate their power, by leading the ignorant aftray; making the learning they concentrated in their cells, a more polifhed inftrument of oppreffion. Struggling with fo many impediments, the progrefs of ufeful knowledge for feveral ages was fcarcely perceptible; though refpect for the public opinion, that great foftner of manners, and only fubftitute for moral principles, was gaining ground,

The croifades, however, gave a fhake to fociety, that changed it's face; and the fpirit of chivalry, affuming a new character during the reign of the gallant Francis the firft, began to meliorate the ferocity of the ancient gauls and franks. The *point d'honneur* being fettled, the character of a *gentleman*, held ever fince fo dear in France, was gradually formed; and this kind of baftard morality, frequently the only fubfitute for all the ties that nature has rendered facred, kept thofe men within bounds, who obeyed no other law.

The fame fpirit mixed with the fanguinary treachery of the Guifes, and gave fupport to the (23)

the manly dignity of Henry the fourth, on whom nature had beftowed that warmth of conflitution, tendernels of heart, and rectitude of understanding, which naturally produce an energetic character.—A fupple force, that, exciting love, commands efteem.

During the ministry of Richelieu, when the dynasty of favouritifm commenced, the arts were patronized, and the italian mode of governing by intrigue tended to weaken bodies, polified by the friction of continual finesse. Diffimulation imperceptibly slides into falfhood, and Mazarin, diffimulation perfonified, paved the way for the impoling pomp and falle grandeur of the reign of the haughty and inflated Louis 14th; which, by introducing a tafte for majeftic frivolity, accelerated the perfection of that species of civilization. which confifts in the refining of the fenfes at the expence of the heart; the fource of all real dignity, honour, virtue, and every noble quality of the mind. Endeavouring to make bigotry tolerate voluptuoufnefs, and honour and licentiousness shake hands, fight was lost of the line of diffinction, or vice was hid under the mask of it's correlative virtue. The glory of France, a bubble raifed by the heated breath

(24)

of the king, was the pretext for undermining happines; whilf politeness took place of humanity, and created that fort of dependance, which leads men to barter their corn and wine, for unwholesome mixtures of they know not what, that, flattering a depraved appetite, destroy the tone of the stomach.

The feudal tafte for tournaments and martial feafts was now naturally fucceeded by a fondnefs for theatrical entertainments; when feats of valour became too great an exertion of the weakened mufcles to afford pleafure, and men found that refource in cultivation of mind, which renders activity of body lefs neceffary to keep the ftream of life from ftagnating.

All the pieces written at this period, except Moliere's, reflected the manners of the court, and thus perverted the forming tafte. 'That extraordinary man alone wrote on the grand fcale of human paffions, for mankind at large, leaving to inferiour authors the tafk of imitating the drapery of manners, which points out the *coftume* of the age.

Corneille, like our Dryden, often tottering on the brink of abfurdity and nonfenfe, full of noble ideas, which, crouding indiffinctly on his fancy, he expresses obscurely, still delights his readers by sketching faint outlines of gigantic passions; and, whils the charmed imagination is lured to follow him over enchanted ground, the heart is sometimes unexpectedly touched by a sublime or pathetic fentiment, true to nature.

Racine, soon after, in elegant harmonious language painted the manners of his time. and with great judgement gave a picturefque caft to many unnatural fcenes and factitious fentiments: always endeavouring to make his characters amiable, he is unable to render them dignified; and the refined morality. fcattered throughout, belongs to the code of politeness rather than to that of virtue *. Fearing to ftray from courtly propriety of behaviour, and shock a fastidious audience, the gallantry of his heroes interests only the gallant, and literary people, whose minds are open to different species of amusement. He was, in fact, the father of the french stage. Nothing can equal the fondness which the french

• What elfe could be expected from the courtier, who could write in these terms to madame de Maintenon: God bas been so gracious to me, madam, that, in whatever company I find myself, I never have occusion to blush for the gospel or the king. french fuck in with their milk for public places, particularly the theatre; and this tafte, giving the tone to their conduct, has produced fo many ftage tricks on the grand theatre of the nation, where old principles vamped up with new fcenes and decorations, are continually reprefented.

Their national character is, perhaps, more formed by their theatrical amufements, than is generally imagined ; they are in reality the fchools of vanity. And, after this kind of education, is it furprifing, that almost every thing is faid and done for ftage effect? or that cold declamatory extafies blaze forth, only to mock the expectation with a show of warmth?

Thus fentiments fpouted from the lips come oftner from the head than the heart. Indeed natural fentiments are only the characters given by the imagination to recollected fenfations; but the french, by the continual gratification of their fenfes, fliffle the reveries of their imagination, which always requires to be acted upon by outward objects; and feldom reflecting on their feelings, their fenfations are ever lively and transitory; exhaled by

(27)

by every passing beam, and diffipated by the flightest storm.

If a relifh for the broad mirth of funcharacterize the lower clafs of englifh, the french of every denomination are equally delighted with a phofphorical, fentimental gilding. This is conftantly obfervable at the theatres. The paffions are deprived of all their radical ftrength, to give fmoothnefs to the ranting fentiments, which, with mock dignity, like the party-coloured rags on the fhrivelled branches of the tree of liberty, fluck up in every village, are difplayed as fomething very grand and fignificant.

The wars of Louis were, likewife, theatrical exhibitions; and the bufinefs of his life was adjufting ceremonials, of which he himfelf became the dupe, when his grandeur was in the wane, and his animal fpirits were fpent *. But, towards the clofe even of his reign, the writings of Fenelon, and the converfation of his pupil, the duke of Burgundy, gave rife to different political difcuffions, of which the theoretical

• For example, the reception of a portugueic adventurer, under the character of a perfian ambassiador. A farce made by the court to rouze the blunted fenses of the king. theoretical balis was the happinels of the people—till death, fpreading a huge pall over the family and glory of Louis, compassion draws his faults under the fame awful canopy, and we fympathize with the man in adversity, whole prosperity was pestiferous.

Louis, by impofing on the fenfes of his people, gave a new turn to the chivalrous humour of the age: for, with the true fpirit of quixotifm, the french made a point of honour of adoring their king; and the glory of the grand monarque became the national pride, even when it coft them most dear.

As a proof of the perversion of mind at that period, and the false political opinions which prevailed, making the unhappy king the flave of his own despotisin, it is sufficient to felect one anecdote.

A courtier affures us,* that the moft humiliating circumftance that ever happened to the king, and one of those which gave him most pain, was the publication of a memorial circulated with great diligence by his enemies throughout France. In this memorial the allies invited the french to demand the affembling of their ancient *flates-general*. They tell

* Memoires du marechal de Richelieu.

(29)

tell them, " that the ambition and pride of " the king were the only caufes of the wars " during his reign; and that, to fecure them-" felves a lafting peace, it was incumbent on " them not to lay down their arms till the " ftates-general were convoked."

It almost furpasses belief to add, that, in fpite of the imprisonment, exile, flight, or execution of two millions of french, this memorial produced little effect. But the king, who was feverely hurt, took care to have a reply written *; though he might have comforted himfelf with the recollection, that, when they were last assembled, Louis XIII difmissed them with empty promises, forgotten as foon as made.

The enthulialin of the french, which, in general, hurries them from one extreme to another, at this time produced a total change of manners.

During the regency, vice was not only barefaced, but audacious; and the tide completely turned: the hypocrites were now all ranged on

• In this reply will be found many of the reafons, that have been lately repeated; and fome (a proof of the progrefs of reafon), which no one had the audacity to repeat, when flanding up in defence of privileges. on the other fide, the courtiers, labouring to fhow their abhorrence of religious hypocrify, fet decency at defiance, and did violence to the modesty of nature, when they wished to outrage the squeamiss puerilities of superflition.

In the character of the regent we may trace all the vices and graces of falfe refinement; forming the tafte by deftroying the heart. Devoted to pleafure, he fo foon exhausted the intoxicating cup of all it's fweets, that his life was fpent in fearching amongst the dregs, for the novelty that could give a gasp of life to enjoyment. The wit, which at first was the zest of his nocturnal orgies, foon gave place, as flat, to the groffest exceffes, in which the principal variety was flagitious immorality. And what has he done to refcue his name from obloquy, but protect a few debauched artifts and men of letters? His goodness of heart only appeared in fympathy. He pitied the diftreffes of the people, when before his eyes; and as quickly forgot these yearnings of heart in his sensual ftye.

He often related, with great pleasure, an anecdote of the prior de Vendôme, who 2 chanced chanced to pleafe a mistress of Charles II, and the king could only get rid of his rival by requesting Louis XIV to recall him.

At those moments he would beftow the warmest praises on the english constitution; and feemed enamoured of liberty, though authorifing at the time the most flagrant violations of property, and defpotic arts of cruelty. The only good he did his country * arole from this frivolous circumstance; for introducing the fashion of admiring the english, he led. men to read and translate some of their mafculine writers, which greatly contributed to roufe the fleeping manhood of the french. His love of the fine arts, however, has led different authors to ftrew flowers over his unhallowed duft-fit emblem of the brilliant qualities, that ornamented only the foil on which they grew.

The latter part of the reign of Louis XV is notorious for the fame atrocious debaucheries, unvarnished by wit, over which modesty would

• It is well known, that for a long time he wished to convoke the states-general; and it was not without difficulty, that Dubois made him abandon this design. During the year 1789, a curious memorial has been reprinted, which he wrote on this occasion; and it is, like the author, a model of impudence. would fain draw a veil, were it not neceffary to give the last touches to the portrait of that vile despotism, under the last of which twenty-five millions of people groaned; till, unable to endure the increasing weight of oppression, they rose like a vast elephant, terrible in his anger, treading down with blind fury friends as well as foes.

Impotence of body, and indolence of mind, rendered Louis XV the flave of his miftreffes, who fought to forget his naufeous embraces in the arms of knaves, who found their account in careffing them. Every corner of the kingdom was ranfacked to fatiate thefe cormorants, who wrung the very bowels of induftry, to give a new edge to fickly appetites; corrupting the morals whilft breaking the fpirit of the nation.

CHAP. II.

(33)

CHAPTER II.

MARIE-ANTOINETTE. LOUIS XVI. ADMINISTRATION OF NECKER, AND OF CALONNE. NOTABLES CONVENED. CA-LONNE DISGRACED,—AND OBLIGED TO FLEE THE KINGDOM. HIS CHARACTER. CAUSES OF THE EN-SLAVED STATE OF EUROPE.

DURING this general depravation of manners, the young and beautiful *dauphine* arrived; and was received with a kind of idolatrous adoration, only to be feen in France; for the inhabitants of the metropolis, literally speaking, could think and talk of nothing else; and in their eagerness to pay homage, or gratify affectionate curiosity, an immense number were killed.

In fuch a voluptuous atmosphere, how could she escape contagion? The profligacy of Louis XIV, when love and war were his amusements, was soberness, compared with the capricious intemperance of the inebriated imagination at this period. Madame du Barry was then in the zenith of her power, which quickly excited the jealous of this princess, whose strongest passion was that intolerable family pride, which heated the blood of the

(34)

whole houfe of Auftria. An inclination for court intrigue, under the mafk of the moft profound diffimulation, to preferve the favour of Louis XV, was inftantly called into action; and it foon became the only bufinefs of her life, either to gratify refentment, or cheat the fatiety, which the continual and unreftrained indulgence of pleafure produced.

Her character thus formed, when the became abfolute mistress, the court of the paftive Louis, not only the most diffolute and abandoned that ever difplayed the folly of royalty, but audacioufly negligent with refpect to that attention to decency, which is neceffary to delude the vulgar, was deferted by all perfons, who had any regard for their moral character, or the decorum of appearances. Constrained by the etiquette, which made the principal part of the impofing grandeur of Louis XIV, the queen wished to throw afide the cumberfome brocade of ceremony, without having difcernment enough to perceive, that it was necessary to lend mock dignity to a court, where there was not fufficient virtue, or native beauty, to give intereft or respectability to fimplicity. The harlot is feldom fuch a fool as to neglect her merètricious

meretricious ornaments, unless the renounces her trade; and the pageantry of courts is the fame thing on a larger feale. The lively predilection, likewife, of the queen for her native country, and love for her brother Jofeph, to whom the repeatedly fent confiderable fums, purloined from the public, tended greatly to infpire the most ineffable contempt for royalty, now stript of the frippery which had concealed it's deformity: and the fovereign difgust excited by her ruinous vices, completely destroying all reverence for that majesty, to which power alone lent dignity, contempt foon produced hatred.

The infamous transaction of the necklace, in which she was probably the dupe of the knaves she fostered, exasperated also both the nobility and the clergy; and, with her mesfalinian feasts at *Trianon*, made her the common mark of ridicule and staire.

The attention of the people once roufed was not permitted to fleep; for fresh circumstances daily occurred, to give a new spring to discussions, that the most iniquitous and heavy taxes brought home to every bosom; till the extravagance of the royal family be-

(36)

came the general fubject of sharpening execrations.

The king, who had not fufficient refolution to support the administration of Turgot, whom his difpolition for moderation had chosen, being at a loss what measures to take, called to the helm the plaufible Necker, He, only half comprehending the plans of his able predeceffor, was led by his vanity cautioully to adopt them; first publishing his Comte-rendu, to clear the way to popularity. This work was read with aftonifhing rapidity by all ranks of men; and alarming the courtiers, Necker was, in his turn, difmiffed. He retired to write his observations on the administration of the finances, which kept alive the fpirit of inquiry, that afterwards broke the talisman of courts, and showed the disenchanted multitude, that those, whom they had been taught to refpect as fupernatural beings, were not indeed men-but monfters; deprived by their station of humanity, and even fympathy.

Several abortive attempts were then made by two fucceeding minifters, to keep alive public credit, and find refources to fupply the expenditure of the ftate, and the diffipation of the the court, when the king was perfuaded to place the fpecious Calonne at the head of these embarrass

During the prodigal administration of this man, who acted with an audacity peculiar to the arrogance common in men of fuperficial yet brilliant talents, every confideration was facrificed to the court; the fplendid folly and wanton prodigality of which eclipfing all that has been related in hiftory, or told in romance, to amuse wondering fools, only ferved to accelerate the deftruction of public credit, and haften the revolution, by exciting the clamourous indignation of the people. Numberless destructive expedients of the moment brought money into the flate coffers, only to be diffipated by the royal family, and it's train of parafites; till all failing, the wifh of ftill fupporting himfelf in a fituation fo defirable as that of comptroller general of the finances, determined him to convene an affembly of notables : whofe very appellation points them out as men in the ariftocratical intereft.

Louis XVI, with a confiderable portion of common fenfe, and a defire to promote useful reformation, though always governed by those around him, gave without hefitation the neces-

fary

fary orders for calling together the affembly, that afforded the wearied nation the moft pleafing profpect, becaufe it was a new one; but conveyed to their aftonished minds at the fame time the knowledge of the enormity of a *deficit*, which a feries of vice and folly had augmented beyond all precedent.

The immoralities of Calonne, however, had created a general diffrust of all his defigns; but with an overweening prefumption, the characteristic of the man, he still thought, that he could dexteroufly obtain the fupplies wanted to keep the wheels of government in motion, and quiet the clamours of the nation, by propoling the equalization of taxes; which, humbling the nobility and dignified clergy, who were thus to be brought down from their privileged height, to the level of citizens. could not fail to be grateful to the reft of the nation. And the parliaments, he concluded, would not dare to oppose his fystem, left they fhould draw on themfelves the diffruft and hatred of the public.

Without canvaffing Calonne's intentions, which the most enlarged charity, after his former extravagance, can fcarcely suppose to have been the interest of the people, moderate

men imagined this project might have been productive of much good; giving the french all the liberty they were able to digeft; and, warding off the tumults that have fince produced fo many difastrous events, whilst coolly preparing them for the reception of more, the effervescence of vanity and ignorance would not have rendered their heads giddy, or their hearts favage. Yet fome fenfible observers, on the contrary, rather adopted the opinion, that as the people had difcovered the magnitude of the *deficit*, they were now perfuaded, that a fpecific remedy was wanting, a new constitution; to cure the evils, which were the excrefcences of a gigantic tyranny, that appeared to be draining away the vital juices of labour, to fill the infatiable jaws of thoufands of fawning flaves and idle fycophants. But though the people might, for the prefent, have been fatisfied with this falutary reform, which would gradually have had an effect, reasoning from analogy, that the financier did not take into his account, the nobility were not fufficiently enlightened to liften to the dictates of justice or prudence. It had been, indeed, the fystem of ministers, ever fince Richelieu, to humble the nobles, to increase the power of D 4

(40)

of the court; and as the ministry, the generals, and the bishops, were always noble, they aided to support the favourite, who depressed the whole body, only for the chance of individual preferment. But this bare-faced attempt to abolish their privileges raised a nest of hornets about his ears, eager to secure the plunder on which they lived; for by what other name can we call the pensions, places and even estates of those who; taxing industry, rioted in idleness duty free *?

* Since the conftituent affembly equalized the impost, Calonne has boafted, that he proposed a mode of levying equal taxes; but that the nobility would not listen to any fuch motion, tenacioufly maintaining their privileges. This blind obitinacy of opposing all reform, that touched their exemptions, may be reckoned among the foremost causes, which, in hurrying the removal of old abufes, tended to introduce violence and diforder .- And if it he kept in remembrance, that a conduct equally illiberal and difingenuous warped all their political fentiments, it must be clear, that the people, from whom they confidered themfelves as feparated by immutable laws, had cogent grounds to conclude, that it would be next to impossible to effect a reform of the greater part of those perplexing exemptions and arbitrary customs, the weight of which made the peculiar urgency, and called with the most forcible energy for the revolution, Surely all the folly of the people taken together was lefs reprehenfible, than this total want of discernment, this adherence to a prejudice, the jaundiced perception of contumclious ignoAn approaching national bankruptcy was the oftenfible reafon affigned for the convening of the *notables* in 1787; but the convocation, in truth, ought to be afcribed to the voice of reafon, founded through the organ of twentyfive millions of human beings, who, though under the fetters of a deteftable tyranny, felt, that the crifis was at hand, when the rights of man, and his dignity afcertained were to be enthroned on the eternal bafis of juffice and humanity.

The notables, once affembled, being fenfible that their conduct would be infpected by an awakened public, now on the watch, fcrupuloufly examined into every national concern; and ferioufly inveftigated the caufes, that had produced the *deficit*, with fomething like the independent fpirit of freemen. To their inquiries, however, the minifter gave only the

rance, in a class of men, who from the opportunity they had of acquiring knowledge, ought to have acted with more judgment. For they were goaded into action by inhuman provocations, by acts of the most flagrant injustice, when they had neither rule nor experience to direct them, and after their temperance had been destroyed by years of fufferings, and an endless catalogue of reiterated and contemptuous privations.

evalive reply, 6 that he had acted in obedience to the pleafure of the king:' when it was notorious to all Europe, that his majefty was merely a cypher at Verfailles; and even the accufation brought against Calonne, by La Fayette, of exchanging the national domains, and appropriating millions of it's revenue to gratify the queen, the count d'Artois, and the reft of the cabal, who kept him in place, was generally believed. In fact, the ftate had been fleeced, to fupport the unremitting demands of the gueen; who would have difmembered France, to aggrandize Austria, and pamper her favourites. Thus the court conniving at peculation, the minister played a fure game; whilst the honest labourer was groaning under a thousand abuses, and yielding the folace of his industry, or the hoards, which youthful ftrength had referved for times of fcarcity or decrepit age, to irritate the inereasing wants of a thoughtless, treachcrous princefs, and the avarice of her unprincipled agents.

This artful, though weak, machiavelian politician fuffered no other perfon to approach the king; who, feduced into confidence by his colloquial powers, could not avoid being dazzled

dazzled by his plaufible fchemes. He had, neverthelefs, a powerful enemy to contend with, in M. de Breteuil ; who, having gratified fome of the little pallions of the dauphine, during her first struggles for dominion, was now protected by the abfolute power of the queen. Endeavouring to measure his strength with her's, the minister was discomfited: and the whole fwarm of flatterers, who had partaken of the fpoil of rapine, were instantly alert to open the eyes of Louis, over which they had long been feattering poppies, and foon convinced him of the perfidy of his favourite; whilft the two privileged orders joined their forces, to overwhelm their common enemy, attending to their vengeance at the very time they followed the dictates of prudence.

The accufations of La Fayette ferved, perhaps, as the oftenfible reafon with the public, and even with the king; yet it can hardly be fuppofed, that they had any effect on the cabal, who invented, or connived at the plans neceffary to raife a continual fupply for their pleafures. The fact is, that, most probably being found unequal to the task, or no longer choosing to be a docile instrument of mischief, he was thrown as unsit for use. Difgraced, he quickly retired to his effate; but was not long permitted to ftruggle with the malady of exiled minifters, in the gloomy filence of inactivity; for, hearing that he had been denounced by the parliament, he fled in a transport of rage out of the kingdom, covered with the execrations of an injured people, in whose hatred, or admiration, the mellowed shades of reflection are feldom seen.

The extravagance of his administration exceeded that of any other fcourge of France; yet it does not appear, that he was acluated by a plan, or even defire, of enriching himfelf. So far from it, with wild prodigality he feems to have fquandered away the vaft fums he extorted by force or fraud, merely to gratify or purchase friends and dependents; till, quite exhausted, he was obliged to have recourse to Necker's scheme of loans. But not possessing like him the confidence of the public, he could not with equal facility obtain a prefent fupply, the weight of which would be thrown forward to become a ftumblingblock to his fucceffors. Necker, by the advantageous terms which he held out to moneyholders, had introduced a pernicious fystem of stock-jobbing, that was flowly detected, becaufe

becaufe those who could best have opened the eyes of the people were interested to keep them clofed.-Still Calonne could not induce the fame body of men to truft to his offers: which, not choosing to accept, they made a point of difcrediting, to fecure the interest and exorbitant premiums that were daily becoming due.

With an uncommon quickness of comprehenfion, and audacity in purfuing crude fchemes, rendered plaufible by a rhetorical flow of words, Calonne, a strong representative of the national character, feems rather to have wanted principles than feelings of humanity; and to have been led aftray more by vanity and the love of pleafure, which imperceptibly finooth away moral reftraints, than by those deep plans of guilt, that force men to fee the extent of the mifchief they are hatching, whilft the crocodile is ftill in the egg. Yet, as mankind ever judge by events, the inconfiderate prefumption, if not the turpitude of his conduct, brought on him universal cenfure : for, at a crifis when the general groans of an oppreffed nation proclaimed the difeafe of the state, and even when the government was on the verge of diffolution, did he not wafte

walte the treasures of his country, forgetful not only of moral obligations, but the ties of honour, of that regard for the tacit confidence of it's citizens, which a statesman ought to hold facred? fince which he has been carefied at almost every court in Europe, and made one of the principal agents of defpotifm in the croifades against the infant liberty of France.

Reflecting on the conduct of the tools of courts, we are enabled in a great measure to account for the flavery of Europe; and to difcover, that it's milery has not arisen more from the imperfection of civilization, than from the fallacy of those political fystems, which neceffarily made the favourite of the day a knavish tyrant, eager to amafs riches fufficient to fave himfelf from oblivion, when the honours, fo hardly wreftled for, fhould be torn from his brow. Besides, whilst ministers have found impunity in the omnipotence, which the feal of power gave them, and in the covert fear of those who hoped one day to enjoy the fame emoluments, they have been led by the prevalence of depraved manners, to the commiffion of every atrocious folly. Kings have been the dupes of ministers, of mistreffes, and

and fecretaries, not to notice fly valets and cunning waiting-maids, who are feldom idle; and thefe are most venal, because they have least independence of character to support; till in the circle of corruption no one can point out the first mover. Hence proceeds the great tenacity of courts to support them; hence originates their great objection to republican forms of government, which oblige their ministers to be accountable for delinquency; and hence, likewise, might be traced their agonizing fears of the doctrine of civil equality.

(48)

CHAPTER III.

ADMINISTRATION OF DE BRIENNE. DISSOLUTION OF THE NOTABLES. LAND TAX AND STAMP DUTY RECOMMENDED BY THEM, BUT REFUSED TO BE SANCTIONED BY THE PARLIAMENT. BED OF JUSTICE. THE PARLIAMENT BANISHED TO TROYES,-BUT SOON COMPROMISED FOR IT'S RECALL. STRUGGLES OF THE COURT PARTY TO PREVENT THE CONVOCATION OF THE STATES-GENERAL. BANISHMENT OF THE DUKE OF ORLEANS, AND TWO SPIRITED MEMBERS OF THE PARLIAMENT. COUR PLE-NIERE. REMARKS ON THE PARLIAMENTS. IMPRISON-MENT OF THE MEMBERS. DEPUTIES OF THE PROVINCE OF BRITANNY SENT TO THE BASTILLE. THE SOLDIERY LET LOOSE UPON THE FEOPLE.

AFTER the difinifion of Calonne, M. de Brienne, a man whofe talents Turgot had overrated, was now chofen by the queen, becaufe he had formerly feconded her views, and was ftill the obfequious flave of that power, which he had long been courting, to obtain the fo much envied place of minifter. Having taken more pains to gain the poft than to prepare himfelf to fulfil it's functions, his weak and timid mind was in a continual tumult ; and he adopted with head-long confusion the taxes propofed by his predeceffor ; becaufe money muft be had, and he knew not where to turn to procure it by an unhacknied mode of extortion.

The notables were now diffolved; and it would have been a natural confequence of the difinition of the minister who affembled them, even if their spirited inquiries had not rendered their prefence vexatious to the court. This, however, was an impolitic measure; for they returned highly difgusted to their respective abodes, to propagate the free opinions, to which refertment and argumentation had given birth.

Before the breaking up of the notables, they were nevertheless prevailed upon to recommend a land and ftamp tax; and the edicts were sent to the parliament to be enregistered. But these magistrates, never forgetting that they enjoyed, in virtue of their office, the privileged exemption from taxes, to elude fanctioning the first, which was to have been an equal impost, took advantage of the public odiousness of the second; thus avoiding, with a show of patriotism, an avowed opposition to the interest of the people, that would clearly have proved, how much dearer they held their own.

The gaudy and meretricious pageantry of the court was now displayed, to intimidate the parliament, at what was termed a bed of justice, though in reality of all justice a folemn mockery; and, whilst pretending to confult them, the edicts were enregistered by a mandate of state. The parliament, in the mean time, making a merit of necessity, declared, that the right of fanctioning the impost belonged only to the states-general, the convocation of which they demanded. Provoked by their flurdy opposition, the court banished them to Troyes; and they compromifed for their recall by enregistering the prolongation of the deuxieme vingtieme, a cowardly defertion of their former ground.

A century before (a proof of the progrefs of reafon) the people, digefting their difappointment, would have fubmitted, with brutal acquiefcence, to the majeftic WILL of the king, without daring to fcan it's import; but now, recognizing their own dignity, they infifted, that all authority, which did not originate with them, was illegal and defpotic, and loudly refounded the grand truth—That it was neceffary to convoke the ftates-general. The government, however, like a 3 dying wretch cut off by intemperance, whilft the luft of enjoyment still remaining prompts him to exhaust his strength by struggling with death, fought fome time longer inaufpicioufly for existence, depending on the fuccour of the court empirics, who vainly flattered themfelves, that they could prevent it's diffolution. From the moment, indeed, that Brienne fucceeded Calonne, all the machinery, which the demon of defpotifm could invent, was put in motion, to divert the current of opinion, bearing on it's fair bofom the new fentiments of liberty with irrefiftible force, and overwhelming, as it fwelled, the perifhing monuments of venerable folly, and the fragile barriers of fuperstitious ignorance.

But fupplics were ftill wanting; and the court, being fruitful in ftratagems to procure a loan, which was the neceffary lever of it's infidious defigns, coalefced with fome of the members of the parliament, and the agreement was to have been ratified in a séance royale. Yet, as the parliament had determined to be governed by a clear majority, the fcheme of the keeper of the feals, who intended to have the bufinefs hurried over without telling the votes, was completely defeated.

The difcovery of this unfair attempt made the indignant magistrates, glad to feize an occasion to recover their popularity, maintain with boldnefs their own character, and the interest of the people. The duke of Orleans, alfo, fomewhat tauntingly fuggesting to the king, that this was only another bed of justice, was exiled, with two other members, who had remonstrated with courage. These magistrates, now become the objects of public adoration, were confidered by the grateful public as their only bulwark against the attacks of the miniftry; which continued to harrafs invention, to contrive means to counteract a concurrence of circumstances, that were driving before them all opposition.

The court, for I confider the government, at this period, completely at an end, continued to ftumble out of one blunder into another, till at laft they refted all their hopes on the popular reforms projected by Brienne, in conjunction with Lamoignon, a man with more ftrength of character, to cajole the people and crush the parliament. Several ftrokes, the feeble blows of angry men, who wished ftill to retain the ftolen sweets of office, were aimed at this body, calculated to mislead the people, who were also promised a reformed code of penal laws. But the time when partial remedies. would have been eagerly fwallowed was paft, and the people faw diffinctly, that their will would foon be law, and their power omnipotent. But the minister, Brienne, not aware of this, to fteer clear of further opposition, proposed the plan of a cour pléniere : an heterogeneous affembly of princes, nobles, magistrates, and foldiers. A happy substitute, as he imagined, for the parliament; and which, by reftoring the ancient forms of the kings of France, would awe and amufe the people. He did not confider, that their minds were now full of other objects, and their cnthufiasm turned into another channel.

This conduct proved more deftructive to the court than any former folly it's advifers had committed. Imbecility now characterized every measure. The parliament however fell into the fnare, and forfeited the efteem and confidence of the people by opposing fome popular edicts; particularly one in favour of the protestants, which they themselves had demanded ten years before, and to which they now objected, only because it came from another quarter. Yet the court, regardles of E 3 experience experience, endeavoured to reftore it's credit by perfecution; whilft, making all the clafhing movements that fear could dictate to manifeft it's power and overawe the nation, it united all parties, and drew the whole kingdom to one point of action.

The defpotic and extravagant fteps taken, to give efficiency to the cour pléniere, awakened the fenfibility of the most torpid; and the vigilance of twenty-five millions of centinels was rouled, to watch the movements of the court, and follow it's corrupt ministers, through all the labyrinths of fophiftry and tergiversation, into the very dens of their nefarious machinations. To prevent the different parliaments from deliberating, and forming in confequence a plan of conduct together, the edict to fanction this packed cabinet was to be prefented to them all on the fame day; and a confiderable force was affembled, to intimidate the members, who should dare to prove refractory. But, they were forewarned in time, to avoid being furprifed into acquiescence : for, having received. an intimation of the defign, a copy of the edict had been purloined from the prefs, by means of the univerfal engine of corruption, money. Warmed

Warmed by the difcovery of this furreptitious attempt to cheat them into blind obedience, they bound themfelves by an oath, to act in concert; and not to enregister a decree, that had been obtained through a medium, which violated the privilege they had usurped of having a fhare in the legiflation, by rendering their fanction of edicts necessary to give them force: a privilege that belonged only to the states-general. Still, as the government had often found it convenient to make the parliaments a fubstitute for a power they dreaded to fee in action, these magistrates fometimes availed themfelves of this weakness, to remonftrate against oppression; and thus, covering usurpation with a respectable veil, the twelve parliaments were confidered by the people as the only barriers to refift the encroachments of despotifin. Yet the fagacious chancellor L'Hôpital, not deceived by their accidental usefulness, guarded the french against their illegal ambition: for was it not a dangerous courtefy of the people, to allow an aristocracy of lawyers, who bought their places, to be as it were the only reprefentatives of the nation? Still their refiftance had frequently been an impediment in the way of tyranny, and now provoked a difcuffion, E A which

which led to the most important of all queftions--namely, in whole hands ought the fovereignty to refl?-who ought to levy the impost, and make laws ?----and the answer was the universal demand of a fair representation. to meet at flated periods, without depending on the caprice of the executive power. Unable to effect their purpose by art or force, the weak ministry, stung by the disappointment, determined at least to wreak their vengeance on two of the boldest of the members. But the united magistrates disputing the authority of the armed force, it was necessary to fend to Verfailles, to make the king fign an express order; and towards five o'clock the next morning the fanctuary of justice was profaned, and the two members dragged to prifon, in contempt of the visible indignation of the people. Soon after, to fill up the measure of provocations, a deputation fent by the province of Brittany, to remonstrate against the establishment of the cour pléniere, were condemned to filence in the Baffille.

Without money, and afraid to demand it, excepting in a circumlocutory manner, the court, like mad men, fpent themfelves in idle exertions of firength: for, whilft the citizens of Paris were burning in effigy the two obnoxious ministers, who thus outraged them in the perfon of their magistrates, they were delivered up to the fury of the hired flaves of despotiss, and trampled under foot by the cavalry; who were called in to quell a riot purposely excited.

Cries of horrour and indignation refounded throughout the kingdom; and the nation, with one voice, demanded juftice—Alas! juftice had never been known in France. Retaliation and vengeance had been it's fatal fubfitutes. And from this epoch we may date the commencement of those butcheries, which have brought on that devoted country fo many dreadful calamities, by teaching the people to avenge themselves with blood!

The hopes of the nation, it is true, were ftill turned towards the promifed convocation of the ftates-general; which every day became more neceffary. But the infatuated minifters, though unable to devife any fcheme to extricate themfelves out of the crowd of difficulties, into which they had heedlefsly plunged, could not think of convening a power, which they forefaw, without any great

(58)

great stretch of fagacity, would quickly annihilate their own.

The ferment, mean time, continued, and the blood that had been fhed ferved only to increase it; nay, the citizens of Grenoble prepared with calmness to result force by force, and the myrmidons of tyranny might have found it a ferious contest, if the intelligence of the difmission of the ministers had not produced one of those moments of enthusiasm. which by the most rapid operation of fympathy unites all hearts. Touched by it, the men who lived on the wages of flaughter threw down their arms, and melting into tears in the embraces of the citizens whom they came to murder, remembered that they were countrymen, and groaned under the fame oppreffion: and, their conduct, quickly applauded with that glow of fenfibility which excites imitation, ferved as an example to the whole army, forcing the foldiers to think of their fituation, and might have proved a falutary lesson to any court less depraved and infensible than that of Verfailles.

(59)

CHAPTER IV.

WECKER RECALLED. HIS CHARACTER. NOTABLES CON-VENED A SECOND TIME. COALITION OF THE NOBI-LITY AND CLERGY IN DEFENCE OF THEIR PRIVI-LEGES. PROVINCIAL ASSEMBLIES OF THE PEOPLE. POLITICAL PUBLICATIONS IN FAVOUR OF THE-TIERS-ETAT. GENERAL REFLECTIONS ON REFORM,-ON THE PRESENT STATE OF EUROPE,-AND ON THE REVOLUTION IN FRANCE.

SUCH were the measures purfued to examplerate a people beginning to open their eyes, and now clamouroufly demanding the reftitution of their long-estranged rights; when the court, having in vain attempted to terrify or deceive them, found it expedient to ftill the ftorm by recalling Necker. This man had the confidence of France, which he in fome degree merited for the light he had thrown on the state of the revenue, and for the system of economy, that he had endeavoured to adopt during his former administration : but unfortunately he did not posses talents or pelitical fagacity fufficient to pilot the flate in this perilous feafon. Bred up in a countinghouse, he acquired that knowledge of detail, and attention to little advantages, lo necessary when

(60)

when a man defires to amafs riches with what is termed a fair character: and, having accumulated a very large fortune by unremitting industry; or, to borrow the commercial phrafe, *attention to the main chance*, his houfe became the refort of the men of letters of his day.

The foibles of a rich man are always fostered, fometimes perhaps infenfibly, by his numerous dependents and visitants, who find his table amufing or convenient. It is not then fuprizing, that, with the abilities of a tolerable financier, he was foon perfuaded, that he was a great author, and confummate statesiman. Besides, when the manners of a nation are very depraved, the men who wifh to appear, and even to be, more moral than the multitude, in general become pedantically virtuous; and, continually contrafting their morals with the thoughtlefs vices around them, the artificial, narrow character of a fectary is formed; the manners are rendered stiff, and the heart cold. The dupes also of their flimfey virtue, many men are harfhly called hypocrites, who are only weak; and popularity often turns the head giddy, that would would have foberly fulfilled the common duties of a man in the shade of private life.

Having adopted with a timid hand many of the fagacious plans of his model, the clear headed, unaffected Turgot, Necker was confidered by the greater part of the nation as a confummate politician : neither was it furprizing, that the people, fnatched from defpondency, fhould have miftaken the extent of his political knowledge, when they had eftimated it by that of the greateft ftatefman, which France, or, perhaps, any other country, ever produced.

Having written on a fubject, that naturally attracted the attention of the public, he had the vanity to believe, that he deferved the exaggerated applause he received, and the reputation of wife, when he was only fbrewd. Not content with the fame he acquired by writing on a fubject, which his turn of mind and profession enabled him to comprehend, he wished to obtain a higher degree of celebrity, by forming into a large book various metaphysical shreds of arguments, which he had collected from the converfation of men, fond of ingenious fubtilities; and the ftyle, excepting fome declamatory paffages, I

(62)

passages, was as inflated and confused as the thoughts were far fetched and unconnected *.

As it is from this period, that we must date the commencement of those great events, which, outrunning expectation, have almost rendered observation breathless, it becomes neceffary to enter on the tafk with caution ; as it ought not to be more the object of the historian to fill up the sketch, than to trace the hidden fprings and fecret mechanism, which have put in motion a revolution, the most important that has ever been recorded in the annals of man. This was a crifis that demanded boldnefs and precifion; and no man in France, excepting Necker, had the reputation of possessing extensive political talents; because the old system of government fcarcely afforded a field, in which the abilities of men could be unfolded, and their judgment matured by experience. Yet, whilft the kingdom was in the greatest fermentation, he feems to have thought of none but those timid half-way measures, which always prove difastrous in desperate cases, when the wound requires to be probed to the quick.

The

Importance of religious opinions.

The old government was then only a vaft ruin ; and whilft it's pillars were trembling on their baseless foundations, the eyes of all France were directed towards their admired minister. In this situation, with all his former empiricism he began his fecond career, like another Sangrado. But the people could no longer bear bleeding-for their veins were already fo lacerated, it was difficult to find room to make a fresh incision; and the emollient prescriptions, the practice of former times, were now infufficient to ftop the progrefs of a deadly difcase. In this fituation, listening to the voice of the nation, because he was at a lofs what ftep to take to maintain his popularity, he determined to haften the convocation of the states-general : first recalling the exiled magistrates, and reftoring the parliaments to the exercise of their functions. His next care was to diffipate all apprehenfion of a famine; a fear that had been artfully excited by the court agents, in order to have a pretext to form magazines of provision for an army, which they had previoufly refolved to affemble in the vicinity of Paris.

Thus far he feems to have acted with fome degree of prudence, at least; but, inattentive

(64)

to the robust firength which the public opinion had then acquired, he wavered as to the mode of conftituting the states-general, whils the parliament passed a decree to prevent their assessment of the parliament passes of the prevent their did in 1614. This obstinate pretention to legislate for the nation was no longer to be tolerated, when they opposed the wisses of the people: yet, with the common instinct of corporate bodies, they wrapped themselves up in the precedents that proved their winding-scheet, provoking universal contempt; for the herculean force of the whole empire was now clearing away every obstacle to freedom.

At this critical moment, the minister, enjoying great popularity, had it in his power, could he have governed the court, to have fuggested a fystem, which might ultimately have proved acceptable to all parties; and thus have prevented that dreadful convulsion, which has shook the kingdom from one extremity to the other. Instead of that, he convened a second time the *notables*, to take their opinion on a subject, respecting which the public had already decided, not daring himself to fanction it's decision. The strongest proof proof he could give, that his mind was not fufficiently elaftic to expand with the opening views of the people; and that he did not poffels the eye of genius, which, quickly diftinguishing what is poffible, enables a statefman to act with firm dignity, resting on his own centre.

Carried away by the general impulsion, with the inconfiderate fervour of men, whole hearts always grow hard as they cool, when they have been warmed by fome fudden glow of enthuliafm or fympathy, the notables showed, by their subsequent conduct, that, though they had been led by eloquence to fupport fome queftions of a patriotic tendency, they had not the principles neceffary to impel them to give up local advantages, or perfonal prerogatives, for the good of the whole community, in which they were only eventually to share. Indeed romantic virtue, or friendfhip, feldom goes further than professions; because it is merely the effect of that fondness for imitating great, rather than acquiring moderate qualities, common to vain peoplc.

The notables had now two effential points to fettle; namely, to regulate the election of

(66)

the deputies, and how they were afterwards to vote. The population and wealth of feveral provinces, from commercial advantages and other caufes, had given a new face to the country fince the former election; fo much fo, that, if the ancient division were adhered to, the reprefentation could not fail to be very unequal. Yet if the natural order of population were followed, the grand question of voting by orders or by voices feemed to be prejudged by the great increase of the members of the *tiers-etat*.

The nobles and the clergy immediately rallied round the ftandard of privileges, infifting, that France would be ruined, if their rights were touched: and fo true were they now to their infulated intereft, that all the committees into which the notables were divided, excepting that of which monfieur was prefident, determined against allowing the tiers-etat that increase of power necessary to enable them to be useful. Whilft, however, thefe difputes and cabals feemed to promife no fpeedy determination, the people, weary of procrashination, and difgusted with the obftacles continually thrown in the way of the meeting of the states-general, by a court that was

was ever fecretly at work, to regain the trifling privileges, which it pretended to facrifice to the general good, began to affemble, and even to decide the previous queftion, by deliberating together in feveral places. Dauphine fet the example; and the three orders uniting fketched a plan for the organization of the whole kingdom, which ferved as a model for the other provincial states, and furnished grounds for the conflituent affembly to work on when forming the conftitution. Though the rumour was fpread abroad, the court, ftill fo ftupidly fecure as not to fee, that the people, who at this period dared to think for themfelves, would not now be noofed like beafts, when ftrength is brought into fubjection by reafon, beheld with wonder the arrival of deputations from different quarters. and heard with aftonishment the bold tones of men speaking of their rights, tracing society to it's origin, and painting with the most forcible colours the horrid depredations of the old government. For after the minds of men had been fatigued by the ftratagems of the court, the feeble measures of the minister, and the narrow, felfish views of the parliaments, they examined with avidity the pro-F 2 ductions

ductions of a number of able writers, who were daily pouring pamphlets from the prefs, to excite the *tiers-etat*, to affert it's rights on enlarged principles, and to oppofe vigoroufly the exorbitant claims of the privileged orders, who ftood up for ancient ufurpations, as if they were the natural rights of a particular genus of man. Those of the abbé Sieyes and the marquis de Condorcet were the most philosophical; whils the unctuous eloquence of Mirabeau softened these dry researches, and fed the flame of patriotifm.

In this pofture of affairs, Necker, perceiving that the people were grown refolute, prevailed on the council to decree, that the number of the deputies of the *tiers-etat* should be equal to that of the two other orders taken together: but whether they were to vote by chambers, or in the fame body, was still left undetermined.

The people, whofe patience had been worn out by injuries and infults, now only thought of preparing inftructions for their reprefentatives.—But, inftead of looking for gradual improvement, letting one reform calmly produce another, they feemed determined to ftrike at the root of all their mifery at once:

the united mifchiefs of a monarchy unre-Arained, a priefthood unneceffarily numerous, and an over grown nobility : and thefe hafty measures, become a subject worthy of philofophical investigation, naturally fall into two diffinct fubjects of inquiry.

1st. If, from the progress of reason, we be authorized to infer, that all governments will be meliorated, and the happiness of man placed on the folid bafis, gradually prepared by the improvement of political fcience: if the degrading diffinctions of rank born in barbarism, and nourished by chivalry, be really becoming in the effimation of all fenfible people fo contemptible, that a modeft man, in the course of fifty years would probably blufh at being thus diffinguished: if the complexion of manners in Europe be completely changed from what it was half a century ago, and the liberty of it's citizens tolerably fecured : if every day extending freedom be more firmly established in confequence of the general diffemination of truth and knowledge: it then feems injudicious for statesmen to force the adoption of any opinion, by aiming at the fpeedy deftruction of obflinate prejudices; because these premature reforms, inftead of promoting, deftroy the comfort F 3

of

(70)

of those unfortunate beings, who are under their dominion, affording at the fame time to defpotifm the ftrongest arguments to urge in opposition to the theory of reason. Besides, the objects intended to be forwarded are probably retarded, whilst the tumult of internal commotion and civil discord leads to the most dreadful confequence—the immolating of human victims.

But, 2dly, it is neceffary to observe, that, if the degeneracy of the higher orders of fociety be fuch, that no remedy lefs fraught with horrour can effect a radical cure; and if enjoying the fruits of ulurpation, they domineer over the weak, and check by all the means in their power every humane effort, to draw man out of the state of degradation, into which the inequality of fortune has funk him ; the people are justified in having recourse to coercion, to repel coercion. And, further, if it can be ascertained, that the filent fufferings of the citizens of the world under the iron feet of oppression are greater, though lefs obvious, than the calamities produced by fuch violent convulsions as have happened in France; which, like hurricanes whirling over_the face of nature, ftrip off all it's bloom-

ing graces; it may be politically just, to purfue fuch meafures as were taken by that regenerating country, and at once root out those deleterious plants, which poifon the better half of human happiness. For civilization hitherto, by producing the inequality of conditions, which makes wealth more defirable than either talents or virtue, has fo weakened all the organs of the body-politic, and rendered man fuch a beaft of prey, that the ftrong have always devoured the weak till the very fignification of juffice has been loft fight of, and charity, the most specious fystem of flavery, fubftituted in it's place. The rich have for ages tyrannized over the poor, teaching them how to act when poffeffed of power, and now must feel the confequence. People are rendered ferocious by mifery; and mifanthropy is ever the offspring of difcontent. Let not then the happiness of one half of mankind be built on the mifery of the other, and humanity will take place of charity, and all the oftentatious virtues of an universal aristocracy. How, in fact, can we expect to fee men live together like brothers, when we only fee mafter and fervant in fociety? For till men learn mutually to affift without governing each other, little F 4 can

(72)

can be done by political affociations towards perfecting the condition of mankind.

Europe will probably be, for fome years to come, in a ftate of anarchy; till a change of fentiments, gradually undermining the ftrongholds of cuftom, alters the manners, without roufing the little paffions of men, a pack of yelping curs pampered by vanity and pride. It is in reality these minor paffions, which during the fummer of idleness mantle on the heart, and taint the atmosphere, because the understanding is ftill.

Several acts of ferocious folly have juftly brought much obloquy on the grand revolution, which has taken place in France; yet, I feel confident of being able to prove, that the people are effentially good, and that knowledge is rapidly advancing to that degree of perfectibility, when the proud diffinctions of fophifticating fools will be eclipfed by the mild rays of philofophy, and man be confidered as man-acting with the dignity of an intelligent being.

From implicitly obeying their fovereigns, the french became fuddenly all fovereigns; yct, becaufe it is natural for men to run out of one extreme into another, we fhould guard against

against inferring, that the spirit of the moment will not evaporate, and leave the diffurbed water more clear for the fermentation. Men without principle rife like foam during a ftorm fparkling on the top of the billow, in which it is foon abforbed when the commotion dies away. Anarchy is a fearful state, and all men of fenfe and benevolence have been anxioufly attentive, to obferve what ufe frenchmen would make of their liberty, when the confusion incident to the acquisition should subfide : yet, whilft the heart fickens over a detail of crimes and follics, and the underftanding is appalled by the labour of unravelling a black tiffue of plots, which exhibits the human character in the most revolting point of view; it is perhaps, difficult to bring ourfelves to believe, that out of this chaotic mafs a fairer government is rifing than has ever fhed the fweets of focial life on the world.---But things must have time to find their level.

.

HISTORICAL AND MORAL VIEW

QF THE

FRENCH REVOLUTION.

BOOK II.

CHAPTER I.

RETROSPECTIVE VIEW OF GRIEVANCES IN FRANCE-THE NOBLES-THE MILITARY-THE CLERGY-THE FARMERS GENERAL. ELECTION OF DEPUTIES TO THE STATES-GENERAL. ARTS OF THE COURTIERS. ASSEMBLY OF THE STATES. RIOTS EXCITED AT PARIS. OPENING OF THE STATES-GENERAL. THE KING'S SPEECH. ANSWER TO IT BY THE. KEEPER OF SPEECH OF MR, NECKER. THE SEALS, CONTEST RESPECTING THE MODE OF ASSEMBLING. ESTABLISHMENT OF THE LIDERTY OF THE PRESS. ATTEMPT OF THE COURT TO RESTRAIN IT. THE DEPUTIES DECLARE THEMSELVES A NATIONAL AS-SEMBLY.

BEFORE we enter on the grand bufinefs produced by the meeting of the ftates-general, it is neceffary to take a retrofpective glance over the oppreffions of which frenchmen fo loudly complained; and, whilft we trace their juftnefs, the queftion will only be, why they did not fooner raife their fhoulders to heave

(76)

heave off the mighty load. To afcertain this truth, we need not enter into deep researches, though it may be difficult to collect all the parts of the feudal chain, which linked the despotism of fixty thousand nobles, who not only exercifed all the tyranny that the fystem authorized, but countenanced the still more extensive depredations of their numerous dependents. What, indeed, could equal the flavery of the poor hufbandman; not only pillaged by the tythe and game laws, but even obliged to let whole flocks of pigeons devour his grain, without daring to deffroy them, becaufe those pigeons belonged to the chateau; and afterwards forced to carry the fcanty crop to be tolled at the mill of monfeigneur, which, to follow a frenchman's staff of life through all it's stages of taxation, must then be baked at the privileged oven?

It would be captious, perhaps, to dwell on fome of the abominable tenures of perfonal fervitude, which, though grown obfolete, were not abrogated; efpecially as more fpecious, if not lefs grinding, not lefs debafing exactions were in force, to deprave every moral moral feeling of the two divisions of fociety; the governing, and governed.

When chafed from the country, of which the chief charm is independence, by fuch worrying reftraints, a man wifhed to purfue any occupation in a town, he must previously purchafe a patent of fome privileged perfon, to whom this tax had been fold by a farmergeneral, or the parasite of a minister.

All lived by plunder; and it's univerfality gave it a fanction, that took off the odium, though nothing could varnish the injustice. Yet, fuch was the infentibility of the great, the pleafures thefe extortions procured were not less grateful to the senses, because paid by the fweat of industry .--- No; like Vefpafian's obnoxious tax, money was money; and who cared on what it was levied? Thus the rich neceffarily became robbers, and the poor thieves. Talking of honour, honefty was overlooked; and, cuftom giving a foft name to different atrocities, few thought it a duty to inveftigate difregarded principles; or to relinquish their share of the plunder, to fatisty a romantic fingularity of opinion, which excited ridicule rather than imitation.

The military, a peft in every country, were here alfo all noble, and leagued with a hundred thousand privileged perfons, of different descriptions, to support their prerogative of receiving a revenue, which was a dead weight on agriculture; whilst they were not obliged, in a direct way, to advance any thing towards defraying the public expenditure.

The gabelle, the corvée, the obligation to fupply horses to transport the troops from one part of the kingdom to another, even when most necessary at the farm; clogs on hufbandry, equally unjust and vexatious; were riveted only on the ankles of labour. Activity then being continually damped by fuch various refrictions, inftead of being braced by encouragement, an invincible impediment was thrown in the way of agricultural improvements; for each individual, infulated by oppreffion, lived, frictly speaking, from hand to mouth; not caring to store up comforts, at the expence of extraordinary toil, when the enjoyment depended on fo many cafualties. Yet, never beginning to be fensible of the effect, the people were not, probably, aware of the cause; and only exclaimed against new impositions,

impositions, because they did not think sufficiently deep to detect the old.

Befide which, France maintained two hundred thousand priefts, united in the fame spirit of licentious fields; who indulged themfelves in all the depraved pleasures of cloaked immorality, at the fame time they embruted the people by fanctifying the most diabolical prejudices; to whose empire every confideration of justice and political improvement was facrificed.

Added to evils of this magnitude, there were the canker-worms that lurked behind monastic walls. For fixty thousand perfons, who by renouncing the world cut the thread of nature, ferved as a prop to the priesthood that enjoyed more than a fourth of the produce of all France; independent of the eftates it possefied, which were immense. And this body of men, the leeches of the kingdom, the idols of the ignorant, and the palladium of tyranny, contributed not a farthing to the fupport of the hydra, whom they were anxious to protect, as a guard to themfelves. Oftentatiously boasting of their charity, whilst revelling on the fpoil of fraud, by a facrilege the most nefarious, their whole lives were a mockery

mockery of the doctrines, which they taught, and pretended to reverence. Befide thefe, and other vexations, almost innumerable, one entangled in another; each petty monopoly contributed to firengthen the massive fabric of despotism, which reared it's head in defiance of time and reason. Much, indeed, depended on the caprice of the individuals of the privileged orders, whom the court could actuate at will, giving them occasionally a sop to filence any peevish growl.

There were also the farmers general, with their army of fifty thousand collectors, who, by their manner of levying and amaffing the revenue, gave an additional gripe to an oppreffion, the most wringing that could be invented, becaufe it's very principles led to the excreife of the vileft peculation; and impunity was fecured by a coalition of robbers, that multitude of men in office, whofe families and flatterers all lived, and fattened on the fpoil of their continual war with justice. And, whilft the intereft of the people was continually facrificed by the parliaments, the inferiour courts of law were still more venal, because composed of those litigious practitioners.

tioners, who thicken like spawn on putrid bodies, when a state is become corrupt.

Such were the grievances !--Such the impolitions, ' that, taken together, levied a tax on the kingdom,' fays Rabaud, 'which the imagination is afraid to calculate.' This body of men we may confider as conftituting France, till the great bulk of the people, who were flaves and dwarfs, burfting their fhackles and rifing in ftature, fuddenly appeared with the dignity and pretentions of human beings : Ycs; with the fame feelings; or perhaps ftronger, becaufe more natural; and claiming equal rights with those nobles, who, like the giants of old, were only great by the courtefy of the imagination. Who is fo callous to the interest of humanity as to fay it was not a noble regeneration? Who is fo benumbed by felfish fears, as not to feel a glow of warmth, at feeing the inhabitants of a vaft empire exalted from the lowest state of beastly degradation to a fummit, where, contemplating the dawn of freedom, they may breathe the invigorating air of independence; which will give them a new conftitution of mind? Who is fo much under the influence of prejudice, as to infift, that frenchmen are a diffinct G

diffinct race, formed by nature, or by habit, to be flaves; and incapable of ever attaining those noble fentiments, which characterize a free people? When the dawn of them appeared confpicuously at the elections for the states-general, which were the preparatory struggles to make a change of opinion produce an essential alteration in government.

Six millions of men were now in motion to choofe the deputies, and prepare their inftructions; and in thefe affemblies the commons commenced their political career; difcuffing, on new ground, fubjects that quickly became the only interefting topics throughout the kingdom.

In fome few places, the three orders meeting together feemed to decide the important queftion refpecting the equality of the reprofentatives; but, in general, the firft two chambered themfelves to guard tenacioufly their trembling prerogatives; and the third, with a cautious jealoufy, to demand the redrefs of grievances, which they could fearcely expect the others to denominate by fo harfh a name.

Great decorum reigned in the chamber of the nobility, though split into various ranks; the lower of which had ill brooked, for a long time, the overbearing infolence of those princes and peers, who haughtily contested every step of honour. Still all agreed, to resign their pecuniary privileges, and joined in vague terms, with the public voice, to demand a constitution.

The fame divisions produced more visible effects amongst the clergy: for confiderable tumults were the confequence of the struggle of the parish-priest, the commons of this order, to have their due weight in the scale; and their success feemed a sure prognostic of the turn things were going to take in the nation. In fact, every diocess was become the centre of a petty despotism, more galling than the great, because at each man's elbow; and the parish-priests, who were not in the high road to preferment, most oppressed, led the van in the new contest for equality; whilst disressed for the mitre paved the way to a contempt for the crown.

Indivisible as had hitherto been the clerical body, the indecent pride of the dignitaries of the church, at this juncture, produced the fchism, which induced the majority of the clergy to fide with the people; whilst only a G_2 finall

fmall minority of the nobility deferted the common caufe of the party. The parishpriests, in fact, appeared, from the time of their election, a corps in referve for the thirdeftate; where they fought for the confequence they were denied in their own chamber, finding themfelves more nearly allied by intereft. as well as inclination, to this order than to the rich pastors, who, separating the sheep from the goats, bade them fland aloof, as poffeffing lefs riches-the holinefs of that body, as of all others. The electing of fo many of the inferiour clergy, in fpite of the menaces and intrigues of their numerous fuperiours, was a striking proof, that the power of the church was in the wane; and that the people were beginning to feel their own ftrength. The diffurbances at this time feemed the rumbling of the approaching tempeft; and orators, formed in thefe provincial assemblies, to figure afterwards in national, were encouraged by applaufe to perfevere.

Having the fame mark in view, an uniformity of fentiment breathed throughout the inftructions of the third-eftate; principally levelled at the privileges of the two other orders: for on these abuses the most popular publications publications had hinged, rivetting conviction in the minds of the fuffering people. A celehrated pamphlet, written by the abbé Sieyes, went through fixty editions; and the duke of Orleans, piqued at the royal family, took great pains to fpread abroad opinions, which were far from being congenial with his own; thus, with purblind ambition, labouring to overturn a court, the ruins of which have rebounded on his own head.

But the temper of the nation, fore with fuffering, and warmed by these discussions, fo ran a-head of their judgment, as to lead the electors, with hafty zeal, to inftruct their representatives, to demand the immediate fuppreflion of a hoft of abufes, without guarding against the confequences .-- Such, unfortunately, is always the conduct purfued by exasperated passions; for, during the rage to correct abuses, one is, too frequently, only exchanged for another. So difficult is it to imprefs the falutary leffons of experience on irritated minds !---And fo apt are men, in the moment of action, to fly from one extreme to the other, without confidering, that the firongest conviction of reason cannot quickly change a habit of body; much lefs the man-G₃ ners

(86)

ners that have been gradually produced by certain modes of thinking and acting.

With one voice, however, the whole nation called for a conflitution, to establish equal rights, as the foundation of freedom; and to guard against the depredations of favourites, whether they attacked perfon or property. So that the liberty of the prefs, and the abolition of lettres de cachet, were, in general, the articles that followed the politive injunction of confining the right of taxation to the representative body of the nation. The inftitution of juries was recommended, and the deputies were requefted to take into confideration, whether the number of capital punishments could not be leffened, or totally abolifhed; remarks were made on the evil tendency of lotteries, and on the vexatious impediments thrown in the way of trade, by barriers and monopolies. In fhort, against the tyranny and injuffice of the court, the nobility, and the clergy, all remonstrated; unmasking one fpecies of oppreffion, and dilating on another; yet, among these numerous animadversions, prayers and praises alone were addreffed to the king; and nothing like a glance at republicanifm

publicanism rendered their fincerity doubtful.

To divert the gathering florm from breaking over their heads, the cabal determined to reft all their hopes on the aid of the foreign troops; which they were collecting from different parts of the kingdom, not caring to trust to the french foldiery, who were assuming the character of citizens. Mean while, with the usual chicanery of courtiers, they continued to amuse the deputies, till they could crush them at once; and effectually blaft the hopes of the people. The human heart is naturally good, though fo often the dupe of paffion .- For though it's feelings be fophisticated, or stifled; though the head contrives the blackeft machinations; even in the filence of folitude, who will whifper to himfelf that he is a villain? Will he not rather try, like Milton's devil, to find out a damned plea of neceffity, to cover his guilt ?- paying homage, in fpite of himfelf, to the eternal juffice he violates under the pretext of felfprefervation. But, it is not alone the virtues of man, those changing hues, of which the colour is undecided, that proclaim his native dignity. No; his vices have the fame flamp of the G 4 divinity :

divinity: and it is neceffary to pervert the understanding, before the heart can be led astray. Men, likewise; indolently adopt the habits of thinking of their day, without weighing them. Thus these very courtiers, who could coolly contemplate the massacre, which must be the consequence of assembling the foreign troops, because it was a continuance of the established course of things, have fince started, probably with real horrour, from the contemplation of the butcheries, which their very tenacity produced. Such is the deceitfulness of the human heart, and so necessary is it to render the head clear to make the principles of action pure.

The deputies, however, who were moftly collected from remote parts of the country, had become in their villages the hale fons of independence. And, though the french mania, of adoring their monarch, extended to every part of the kingdom, it only gave hilarity to the cheering glafs at the homely tables of which they were mafters; or activity to the dance, that was a real burft of animal fpirits. Very different from the lafcivious provocations to vice, exhibited at the opera, which, by deftroying the focial affections tions that attach men to each other, stiffe all public fpirit; for what is patriotifm but the expansion of domestic sympathy, rendered permanent by principle? Befides, the writings that had awakened the fpirit of these men had a little inebriated their brain. Such is, for the most part, the baneful effect of eloguence. that, perfuading inftead of convincing, the glory of the enthuliafm it infpires is fullied by that falle magnanimity, which vanity and ignorance continually miftake for real elevation of foul; though, like the fcorching rays of the fun after rain, it dries into sterility the heart, whofe emotions are too quickly exhaled.

The courtiers, defpifing their rufficity, and ftill confidering the people as ciphers, continued to discharge the usual routine of office, by adjusting the ceremonials of reception; all which tended to infult the third-eftate, and fhow, that the deputies of the privileged orders were to be still treated as if they were a diftinct class of beings. The infolence of fuch proceedings could not fail to provoke the honeft indignation, and pique the vanity of thofe, who had been difcuffing on a broad fcale the rights of man : whilft a little difconcerted

certed by the ceremony that conftrained them, they were obliged, every moment, to recolleft, that they were the equals of these courtiers; and blushed even to own to themselves, that they could for an inftant have been awed by fuch childish pomp. Nor were they more aftonished at the pageantry of Versailles, than difgusted with the haughtiness of a court, whole magnificence was a proof how much they had impoverished the people, who now demanded emancipation. Full, therefore, of the new notions of independence, which made them fpurn at every idea of a diffinction of men, they took advantage of the majority accorded them by the council, and began to rally their forces. Perceiving alfo, as they acted decidedly, that they poffeffed the confidence of the people, who, forgetting vive le roi, exclaimed only vive le tiers-etat !--they every day became more firm.

The courtiers immediately fixed on a house of rendezvous, where they were regularly to concert the best measures to crush the rising power of the commons; and these, not without a portion of the mistruss, which characterizes the nation, assembled in different places, till a mutual interest united them in that that chosen by the deputies from Brittany, The difrespect, likewise, which the orders relative to their dress announced, prepared them for the contempt they were destined to receive, when separated like the indian cass, amongst whom a man sears to be polluted by the touch of an inferiour: for true to the inveterate prejudice in favour of precedents*, the nobility were gaudily caparifoned for the show, whils the commons were stupidly commanded to wear the black mantle, that diftinguishes the lawyers. But, the tide of opinion once turned, every thing contributes to accelerate it's course.

Before the meeting of the flates-general, the queftion that was firft to agitate the various interefts, whether they were to vote by orders or poll, had been fo thoroughly difcuffed, that it made, in many of the inftructions, one of the foremost articles. For it was evident to the nation, were the different orders allowed to affemble in their feparate chambers, each invested with the old privilege of putting a negative on the decisions of the other

• The code of étiquette', fays Mirabeau, ' has been the hitherto the facred fire of the court and privileged orders.' other two, that they fhould be gulled with promifes of reform, whilft the coffers of the court were replenished with a show of legality. It was, in fact, prudent in the court party to maintain this ground, because it appeared to be the only way to render abortive all the plans of reformation that struck at their authority. This then was the prefatory business, by which they were to measure their strength; and, would to God ! the vigour manifested on this occasion had always been displayed by the representatives of those misled people.

We have feen the plots of this weak, headftrong cabinet every where defeated, and traced their bloody footfteps; but we shall find them still true to their fcent, having recourfe again to violence, when fraud was of no avail.

To furnish a pretext to introduce adroitly a confiderable military force, at the time of the affembling of the states-general, two or three riots had been excited at Paris, in which many of the thoughtless populace were killed. One in particular, though still involved in the states of mystery, occasioned great confusion and

(93)

and confiderable flaughter, just at the eve of their meeting.

A refpectable manufacturer in the fuburbs of Paris, with the faireft character, employed a number of poor, whom he paid liberally; yet against this man some idle stories were industriously circulated, well contrived to mislead and exasperate the people, because they touched their vanity, and their most prefling want, the want of bread. The fcarcity, real or factitious, of this article, has always been taken advantage of by those who wished to excite tumults in Paris; and at this juncture the duped parifians role, at the infligation of the court agents, to deftroy themfelves. The riot was permitted to get a-head before any ferious attempts to quell it were taken, which rendered the interference of a little army, the point aimed at, neceffary; and established an opinion, that the turbulent mob required to be awed by the prefence of troops, whilft the ftates-general deliberated.

During this effervescence, or, at least, when it was fubliding, the states-general was opened, the 5th of may, 1789, by a speech from the throne, to which courtiers, in the usual phrascology

phraseology, would naturally tack the epithet-gracious. The king commenced with a heartless declaration of his fatisfaction at feeing himfelf furrounded by the reprefentatives of the people; and then enumerating the heavy debts of the nation, a great part of which had been accumulated during his reign, he added one of those idle falsehoods, which swelled his declamation without throwing dust into any one's eyes, that it was in an honourable cause; when it was notorious, that the cause ought to have been reckoned most diffionourable, if power had not hitherto been the true philosopher's stone, that transmuted the basest actions into sterling honour. He afterwards alluded to the fpirit of innovation, that had taken possession of the minds of the people, and the general difcontent that agitated the nation: but, in the true cant of courts, dictating whilft complimenting, he affured them, that he depended on their wifdom and moderation; concluding with the words of courfe, the humble fervant of kings, a declaration of his attachment to the public welfare.

The difregarded speech of the keeper of the seals was, like the reply usually made to the king's, in the house of commons in England, land, merely an echo of his majefty's, recommending moderation in the measures adopted to reform the abuses of government, with the necessary quantum of panegyric on the goodness of the king.

Attention and applaufe, however, awaited Necker, though followed by wearinefs and difgust. He spoke for three hours, introducing, with his cuftomary pomp of words, a number of trivial observations; trying thus to escape, in a mist of rhetorical flourishes, from the fubject he feared to bring forward, bccaufe he was equally apprehensive of offending the court, and defirous of maintaining his reputation with the people. Not a word was uttered relative to the fole right of the flates-general to levy taxes, the first demand of the nation. And men who for fome time had been talking of nothing but liberty and reform, were aftonished, and diffatisfied, that he avoided all mention of a new conftitution. Leaning to the fide of the privileged orders, he afferted, that the mode of deliberating and voting in feparate allemblies was the pillar of the nation-yet, cautioufly adding a falvo, to have a pretext to use another language fhould it be neceffary, he remarked,

(96)

remarked, that fometimes it was better to poll. This ill-timed management naturally difpleafed both parties, as is always the cafe, when men of weak, compound characters, who have not the courage to act right, want effrontery to brave the cenfure, that would follow an open avoyal of their undecided opinions; or rather, their determination to keep well with the ftrongest. Dwelling on the arrangement of the finances, he affured them, that a public bankruptcy might cafily be avoided ; and that even the *deficit*, which had been exaggerated by France, and Europe, was only fifty-fix millions; and would appear of lefs confequence, when they recollected, that, fince his administration, the revenue was augmented twenty-five millions. It is true, that, on entering into details, the greater part of this fum was found to be still in perspective; and at the same time was to be raifed by taxes, which all good citizens hoped would foon difappear. In fhort, the french, after applauding with rapture this brilliant bird's-eye view, observed, with the shrug of *fang froid*, ' that these hypothetical · refources were merely faith and hope, on ' condition that they fhould be charitable.' With

With refpect to the abolifhing of privileges, that warred with humanity, he made use of fome of the fame species of jesuitical arguments, which are employed by the opposers of the abolition of the infamous traffic for flaves; that, as these privileges were a kind of property, it was necessary to find out a compenfation, an indemnity, before they could be done away—with justice.

Thus has the fpirit of juffice-it is difficult to keep down indignation when attacking fuch fophifms-been always outraged by the mock respect of felfishness; for, without parrying off tergiverfation, it is fufficient to prove, that certain laws are not just, becaufe no government had a right to make them; and, though they may have received what is termed a legal fanction during the times of ignorance, " the duty lies in the breach and not in the observance." Besides, these pitiful arguments are an infult to the common fenfe, and to the diffrefs of a people .--- Where, indeed, could the french, or english, find a fund to indemnify the privileged orders or the planters? The abuses then, must continue to the end of time-out of fheer refpect to the facrednefs of public faith !

Thus fpoke the king and Necker; but these addresses, instead of conciliating, only rendered both parties more obftinate; fo that the fmothering difpute refpecting the manner of voting broke out immediately, when they met to conftitute themfelves a legal affembly. For the next day, even the deputies of the third-eftate repaired to the common hall, and agreed, that the three orders should proceed to verify their powers together; clearly perceiving, that, were the orders once allowed to do bufiness feparately, an union would be impracticable, and all their efforts to obtain a conftitution null, should they attempt to make equality of rights the bafis. The nobility and clergy not joining the commons, they refolved to renew their meeting the following morning; only as an aggregate of individuals, who had no power to act, not having yet a political character. This very contest feemed to call upon them to fupport their claim to equality, because it emphatically warned them, that all their operations would be rendered perfectly nugatory, should they permit the orders to be a check on each other. The most fensible men of the commons being of opinion, that all expectations of a permanent reform

reform were chimerical, unlefs the whole reprefentation was formed into an indivisible affembly, encouraged the more undecided to perfevere; though the nobles fignified to them, the 13th, that they had afcertained the legality of their election.

The clergy, however, divided in their intereft, proceeded with more caution; and the most discerning of them, perceiving that their order was becoming obnoxious to the people, who now deified the third eftate, propofed a committee of conciliation, with a view, as they pretended, to promote a good underftanding between all parties. The king alfo, in his turn, when the nobles rejected the mediation of the clergy, offered a plan of accommodation; a mighty nothing, that the court brought forth .-- But this tub, thrown out to the whale, did not divert the attention of either party from the main object; though the nobles, many of whom were in the fecret of the approach of the army, fhould things be carried to extremes, pretended to acquicfce; yet guarding carefully at the fame time all their ancient pretentions : and this infincerity drew on them the universal odium they mcrited, mixed with the contempt which ineffectual H 2

effectual flruggles always produce. Concilia. tory measures, in fact, were only a folemn farce at this time; though the clergy, rather infidioufly, to ingratiate themfelves with the people, lamenting the high price of bread, requested, that deputies from the three orders fhould meet to deliberate how this grievance might be leffened. The deputies of the commons, with becoming dignity, tempered with prudence, adhered to their point; and dexteroufly parrying off the artful ftroke levelled at their popularity, they reprefented to the clergy, that this was another powerful motive, to make them entreat all parties to rally round the fame point, to remedy evils, which excited equal fympathy in their bosoms.

The inactivity occafioned by these disputes could not fail to inflame the public mind, especially as fresh publications were daily affording it fuel. For the liberty of the press was now tacitly established, and the freest fentiments uttered, with the heat of superficial knowledge, in defiance of court manifestoes. Still, as a proof that the court merely endured, for a feason, what they could not prevent, the journal of the proceedings of the statesgeneral was stopped, by an express order; to evade which it was continued in the form of letters from Mirabeau to his conftituents.

This prohibition was probably dictated by a defire of keeping the provinces quiet in the fupor of ignorance, in which they had fo long dozed; but it was injudicious to awaken attention by rigorous steps, that, quickly abandoned, had the very contrary effect, exciting, inftead of intimidating, the fpirit of opposition. In reality, the eyes of all France were at prefent directed towards the commons. The hopes of the nation refted on their magnanimity; and the future happiness of millions depended upon their perfeverance. It was in this flate of things, that they afforded a convincing proof to the whole world, and to posterity, that vigour and precision alone are requifite in the representatives of a people, to give dignity to their proceedings, and to fecure them against the machinations of all the combined powers of defpotifm.

Almost five weeks having elapfed, and the patience of the nation being quite exhausted by the delay, the commons refolved to prefent an address to the king, written by Mirabeau, explanatory of their motives, and then to pro-H $_3$ cced ceed to bufinefs. But, previoufly, they fent a deputation to the other orders, for the laft time, to invite them once more to repair to the common-hall, that their powers might be verified together; adding, that in default of their appearance, they fhould conftitute themfelves, and act accordingly. This determination was a deadly blow to the power of the two other chambers, and ftruck directly at the root of all diffinction.

The nobles, whofe inveterate pride and ignorance had prevented them from joining the third-cflate at the first affembling of the deputics, now faw with difmay, that their power and influence, like the musty rolls of their pedigree, were mouldering into common duft. The clergy, however, more adroit, or rather a few of the parochial priefts, by degrees, attended the fummons, and repaired to the hall. There can be little doubt, but that the commons, at the first meeting, and for a long time after, would gladly have coalefced with the nobles; by which means the latter would have retained many of their privileges, and preferved a weight in the nation, neceffary to hinder that preponderance, on the fide of the people, which it was eafy

to forefee would be productive of many excelles. This conclusion continual experience warranted : becaufe it generally happens, that men, who are not directed by practical knowledge, in whatever bufiness they engage, run precipitately from one extreme to the other. And certainly, from the flate of fervility in which the french nation was funk, retaliation was to be expected; or, at leaft, dreaded, from unbridled liberty. Like boys difmiffed from school, they might with to afcertain their freedom by acts of mifchief; and by flowing a total difregard of the arbitrary commands, that kept down their fpirits without excreifing their understandings. However, the flupid arrogance of the nobles flript them, before the time reafon would have determined, of those idle diffinctions of opinion, the fymbols of barbarifm, which were not completely worn out of efteem.

The minister, still afraid to act independent of the court, blamed this spirited conduct of the commons, as an act of temerity, which the king ought not to fanction. Yet they, firm and resolute, though fearing that the court, like a dying favage, mortally wounded by his enemy, might, during the agonies of H 4 death, death, aim a desperate stroke at them, took the most prudent precautions, to avoid exasperating the falling foe. But these mild resolutions having been mistaken by the infatuated nobles, who confounded the true fortitude of moderation with cowardice, the die was cast, and the deputies declared themselves a NA-TIONAL ASSEMBLY.

Enthulialin fired every heart, and extended itfelf like thought from one end of the kingdom to the other. The very novelty of this measure was fufficient to animate a people lefs volatile than the french; and, perhaps, it is impossible to form a just conception of the transports which this decision excited in every corner of the empire. Europe also heard with astonishment what refounding through France excited the most lively emotions; and posterity must read with wonder the recital of the follies and atrocities committed by the court and nobles at that important crifis.

The Social Contract of Rouffean, and his admirable work on the origin of the inequalities amongst mankind, had been in the hands of all France, and admired by many, who could not enter into the depth of the reasoning, ing. In fhort, they were learned by heart, by those whose heads could not comprehend the chain of argument, though they were fufficiently clear to feize the prominent ideas. and act up to their conviction. Perhaps, the great advantage of eloquence is, that, impreffing the refults of thinking on minds alive only to emotion, it gives wings to the flow foot of reafon, and fire to the cold labours of invefligation: Yet it is observable, that, in proportion as the underflanding is cultivated, the mind grows attached to the exercise of inveftigation, and the combination of abftract ideas. The nobles of France had alfo read thefe writings for amufement; but they left not on their minds traces of conviction fulliciently firong to overcome those prejudices felf-interest rendered fo dear, that they eafily perfuaded themfelves of their reafonablenefs. The nobility and clergy, with all their dependents under the influence of the fame fentiments, formed a confiderable proportion of the nation, on the reft of which they looked down with contempt, confidering them as mercly the grafs of the land, neceffary to clothe nature; yet only fit to be trodden under foot. But these despised people 2

people were beginning to feel their real confequence, and repeated with emphasis the happy comparison of the abbé Seives, ' that • the nobility are like vegetable tumours, " which cannot exist without the sap of the ' plants they exhauft.' Nevertheless, in treating with the nobles, the angles of pride. which time alone could have fmoothed filently away, were, perhaps, too rudely knocked off, for the folly of diffinctions was rapidly wearing itself out, and would probably have melted gradually before the rational opinions, that were continually gaining ground, fructifying the foil as they diffolved; inftead of which it was drifted by a hurricane, to fpread destruction around as it fell.

Many of the officers, who had ferved in America during the late war, had beheld the inhabitants of a whole empire living in a ftate of perfect equality; and returned, charmed with their fimplicity and integrity, the concomitants of a just government, erected on the folid foundation of equal liberty, to fcan the rectitude, or policy of a different fystem. Convinced of their inutility as nobles, thefe, when fired with the love of freedom, feconded the views of the commons with heart and voice,

voice. But the fycophants of the court, and the greater part of the nobility, who were grofsly ignorant of every thing that was not comprised in the art of living in a continual round of pleafure, infenfible of the precipice on which they were ftanding, would not, at first, recede a fingle step to fave themselves; and this obflinacy was the chief caufe that led to the entire new organization of the conflitution, framed by the national affembly. The french in reality were arrived, through the vices of their government, at that degree of falle refinement, which makes every man, in his own eyes, the centre of the world; and when this grofs felfifhnefs, this complete depravity, prevails in a nation, an abfolute change must take place; because the members of it have loft the cement of humanity, which kept them together. All other vices are, properly speaking, superfluous strength, powers running to wafte; but this morbid fpot fhows, that there is death in the heart. Whatever, indeed, may be the wifdom or folly of a mixed government of king, lords, and commons, is of no confequence in the prefent history; because it appears fufficiently obvious, that the aristocracy of France deftroyed

ftroyed itfelf, through the ignorant arrogance of it's members; who, bewildered in a thick fog of prejudices, could difcern neither the true dignity of man, nor the fpirit of the times.

It also deferves to be noted, that the regeneration of the french government, at this crifis, depended on the fortitude of the national affembly at the outfet of the contest; for, if the court party had prevailed, the commons would have rested in their usual flate of infignificancy, and their whole proceedings proved only a folemn farce. They would have wrapped themfelves up in their black mantles, like the herd of undertaker's men at a funeral, merely to follow with fervile sthe idle cavalcade to it's resting place; and the people would only have feen their ancient tyranny revive, tricked out in new habiliments.

(109)

CHAPTER II.

THE NATIONAL ASSEMBLY PROCEED TO BUSINESS. OF-POSITION OF THE NOBLES, BISHOPS, AND COURT. A SEANCE ROYALE PROCLAIMED, AND THE HALL OF THE ASSEMBLY SURROUNDED BY SOLDIERS. THE MEMBERS ADJOURN TO THE TENNIS COURT, AND VOW NEVER TO SEPARATE TILL A CONSTITUTION SHOULD BE COMPLETED. THE MAJORITY OF THE CLERGY AND TWO OF THE NOBLES JOIN THE COM-MONS. SEANCE ROYALE. THE KING'S SPEECH. SPI-RITED BEHAVIOUR OF THE ASSEMBLY. SPEECH OF MIRABEAU. PERSONS OF THE DEPUTIES DECLARED INVIOLABLE. MINORITY OF THE NOBLES JOIN THE COMMONS. AT THE REQUEST OF THE KING, THE MI-LENGTH FOLLOWED BY THE MAJORITY OF THE NOBLES-CHARACTER OF THE QUEEN OF FRANCE, -- OF THE KING,---AND OF THE NOBLES. LECTURES ON LIBERTY AT THE PALAIS ROYAL. PARISSURROUNDED BY TROOPS. SPIRIT OF LIBERTY INFUSED INTO THE SOLDIERS. LLEVEN OF THE TRENCH GUARDS IMPRISONED DE-CAUSE THEY WOULD NOT FIRE ON THE POPULACE. AND LIBERATED BY THE PEOPLE. REMONSTRANCE OF THE NATIONAL ASSEMBLY. THE KING PROPOSES TO REMOVE THE ASSEMBLY TO NOYON, OR SOISSONS. NECKER DISMISSED. CITY MILITIA PROPOSED. THE POPULACE ATTACKED IN THE GARDEN OF THE THUILLERIES BY THE PRINCE OF LAMBESC. NOC-TURNAL ORGIES AT VERSAILLES.

THE third-eftate, having conftituted themfelves a national affembly, now proceeded to bufinefs, with calm prudence, taking into confideration the urgent neceffities of the ftate. Clofely

(110)

Clofely also attending to their instructions. they first pronounced, that all taxes not enacted by the confent of the representatives of the people were illegal; and afterwards gave a temporary fanction to the prefent levies, to avoid diffolving one government before they had framed another. They then turned their attention to the object next in importance, and declared, that, as foon as, in concert with his majefty, they fhould be able to fix the principles of national regeneration, they would employ themfelves to examine and liquidate the national debt; mean time the creditors of the flate were declared to be under the fafe-guard of the honour of the french nation. These decrees concluded with a refolve, that the affembly, now become active, fhould dedicate it's first moments to inquire into the caufe of the fcarcity that afflicted the kingdom; and to fearch for a remedy the most prompt and effectual.

The nobles, bifhops, and, in fact, the whole court, now ferioufly began to rally all their forces; convinced that it was become neceffary, to oppose their united firength against the commons, to prevent their carrying every thing before them.

The

The chamber of the clergy had been engaged for feveral days, in difcuffing the queftion, where they fhould verify their powers. A number of them, during this difcuffion, appear to have advanced, feeling their way; for when they now came to divide, the majority decided to join the national affembly.

Alarmed by the profpect of this junction, one of the members of the chamber, which almost arrogated to itself the prerogative of legislation, that of the nobles, proposed an address to the king, befeeching him to diffolve the states-general; whils the cause of the people was there vigorously supported by a minority, feeble as to numbers, but powerful in argument, animated by the popularity, which their bold declaration could not fail to produce during the reign of enthusias.

This was a moment pregnant with great events. The court ftill trufted to fubterfuge, and, holding the reprefentatives of the people in fuperlative contempt, affected in fome degree to yield to the prayer of the nation; though fignifying, that the king was the only fountain of juffice, and that he would grant every thing which his faithful fubjects could reafonably demand. A trick as palpable as the

(112)

the defign was flagrant; for at the inftant they were pretending to fee fome reafon in their requisitions, they were guarding against their obtaining the only thing that could fecure their rights, an equal reprefentation; holding for this purpole mifchievous councils, composed of characters most obnoxious in the eyes of the people. In these meetings it was refolved, to amufe the commons, until the army could be affembled; and then, in cafe of obflinacy, they would draw on themfelves the confequence. Accordingly the 20th of june, the day on which the majority of the clergy was to join the commons, the herald proclaimed a *féance royale*; and a detachment of guards furrounded the hall of the national affembly, to take care (fuch was the shallow pretext) that it fhould be properly prepared for the reception of the king. The deputies came to the door at the ufual hour; but only the prefident (Baillie) and the fecretaries were permitted to enter to take away their papers; and they faw, that the benches were already removed, and that all the entrances were guarded by a great number of foldiers.

Courage is foldom relaxed by perfecution; and the firm and fpirited proceedings of the affembly on this day, gave the decided blow (113)

to the ftratagems of the court. During the first tumult of furprise, it is true, some of the deputies talked of going immediately to Marly, to invite the king to come among them, and in a truly paternal manner to unite his power with their's to promote the public good; and thus by an energetic appeal to his heart and understanding, to convince him that they fpoke the language of truth and reafon. En others, more experienced in ministerial wiles, calmly advised to adjourn the fittings to the neighbouring tennis-court. For they knew, that the hearts of courtiers are fortified with icy prejudices; and that, though a moment of fympathy, a flow of life-blood, may thaw them at the inflant, it is only to render them more hard, when the glow of genial heat is paffed.

Affembled at the tennis-court, they encouraged each other; and one mind actuating the whole body, in the prefence of an applauding crowd, they joined hands folemnly, and took God to witnefs, that they would not feparate, till a conftitution should be completed. The benedictions that dropped from every tongue, and sparkled in tears of joy from every eye, giving fresh vigour to the

(114)

the heroifm which excited them, produced an overflow of fenfibility that kindled into a blaze of patriotifm every focial feeling. The dungeons of defpotifin and the bayonets fharpened for maffacre, were then equally difregarded even by the most fearful; till, in one of those instants of disinterested forgetfulness of private pursuite, all devoted themselves to the promotion of public happiness, promifing to refift, to the laft extremity, all the efforts of fuch an inveterate tyranny. The absent deputies were sent for; and one, who happened to be fick, had himfelf carried to unite his feeble voice with the general cry. The very foldiers alfo, difobeying their officers, came to be willing centinels at the entrance of the fanctuary of liberty, eagerly imbibing the fentiments, which they afterwards fpread through their garrifons.

This indignity offered to the third-eftate could not fail to excite new fenfations of difguft at Paris; and give a fresh spring to the animation of the people at large. Yet, this spirited behaviour of the commons excited only supercilious contempt at court. For the gay circles there were so far such in fastidious delicacy, and squeamish respect for polished manners, manners, that they could not even discover magnanimity in the conduct of a peafant, or a shopkeeper; much less grandeur in an affembly regardlefs of ceremonials. And not to be deficient themfelves in these respects, the feance royale was put off another day, in order that the galleries, which had been crected for the accommodation of spectators by the national affembly, might be removed.

This was another injudicious step on the part of the cabinet; because it afforded time for the clergy to unite with the commons, who were in fearch of a place fufficiently capacious to contain fuch a body. At length, collected in a church, the clergy, with feveral bishops at their head, and two nobles of Dauphiné, joined them; and the place, feeming to reflect a fanctity on their union, tended to confolidate, under a nobler concave, the resolution taken in the tennis-court.

The following day, the *féance royale* really took place, with all the exteriour fplendour ufually exhibited at thefe fhows; which hitherto could fcarcely be termed empty, because they produced the defired effect. But the public, having their attention turned to T 2 other

(116)

other things, now viewed with contempt, what had formerly infpired almost idolatrous respect. The deputies of the third estate were again ordered to enter by a separate door, and eventlost a considerable time standing exposed to a heavy shower. The people, who were totally dxcluded, formed themselves into groups, making indignant comments on the repeated affronts offered to their representatives, whose minds likewise recoiled at the idle attempt to impress them with an opinion of their infignificancy; when the very pains taken to do it proclaimed their growing importance in the state.

The object of the king's fpeech, on this occasion, was to annul the whole proceedings of the national affembly, and to hold out certain benefits, as lures to fubmission, which the king meant to grant to the people; as if, observes Mirabeau, 'the rights of the people, ' were the favours of the king.' A declaration: of his fovereign will and pleasure was then read, in which, making an infidious attempt to withdraw from the affembly the confidence of the public, he declared, that, if they abandoned him, he would provide for the happines of his people, without their af-3

fulance, knowing the purport of the inftructions given to the deputies. The first article of the king's benevolent intentions, was to grant to the flates-general the power of furvishing supplies; carefully specifying, however, that it was to confift of the three orders, who were to vote according to the ancient mode. Some other falutary plans of reform were also brought forward; but always with artful modifications, that would enable the old abuses to keep a fure footing. For example, the taxes were to be levied equally; yet a cautious respect for property fanctioned almost every other feudal privilege; and the absolute abolition of lettres de cachet,* though his majefty withed to fecure perfonal freedom, was hinted at as incompatible with public fafety, and the prefervation of the honour of private families. The liberty of the prefs was allowed to be neceffary; but the flates gencral were requested to point out a mode of rendering it compatible with the refpect due

• Under the reign of Louis XV two hundred and thirty thousand *lettres de cachet* had been issued; and after this, who will affert, that this was not an inveterate evil, which ought to be eradicated; for it is an infult to human reason, to talk of the modification of such abuses, as seem to be experiments to try how far human patience can be stretched. to religion, to morality, and to the honour of the citizens. The tenour of all the reft of the articles was the fame; commencing with a plan of reform, and concluding with the ifs and buts, that were to render it void.-Then, winding round to the grand object of the meeting, the king terminated his difcourfe, with faying, forgetful that this was not the period to imagine himfelf reigning at Conflantinople, 'I command you to feparate im-' mediately, and to attend, each of you, to-' morrow, at the chamber appropriated for ' your order, there to refume your fittings; • and I have commanded, in confequence, the ' grand mafter of the ceremonies to order the " halls to be prepared."

The majority of the nobles, and the minority of the clergy, obeyed this peremptory order, and obfequioufly followed the king, like the trained horfes of his court. The members of the national affembly, however, remained fitting, preferving a filence, more menacing and terrible, than the *I will*, or *I* command, of the cabinet; when the grand mafter of the ceremonies entered, and addreffing himfelf to the prefident, reminded him, in the king's name, of the order given to feparate rate immediately. The prefident answered, ' that the affembly was not conftituted to re-' ceive orders from any perfon;' but Mirabeau, who thought this reply too tame, ftartcd up, and addreffing the meffenger, faid: ' yes; we have heard the intentions which ' the king has been induced to utter; and you ' cannot be his organ in this affembly.-You, ' who have neither feat, nor right to fpeak, ' ought not to remind us of his difcourfe. ' However, to avoid all equivocation or de-' lay, I declare to you, that if you are charg-' ed to make us go from hence, you should ' demand orders to employ force; for only ' the bayonet can oblige us to quit our places.' It is difficult to conceive the ardour infpired by this prompt eloquence. It's fire flew from breaft to breaft, whilft a whifper ran round, that what Mirabeau had just uttered, gave a finishing ftroke to the revolution.

A warm debate enfued; and the affembly declaring their adherence to their former decrees, the abbé Siéves faid, in his dry, cogent manner: ' gentlemen, you are to day what ' you were yesterday.' A motion was then made, by Mirabeau, who fuggested, as a prudent precaution against the measures of a defperate perate cabal, that the perfon of each deputy should be pronounced inviolable; and, after a flight difcuffion, it was carried unanimoufly.

From this moment we may confider the nation and court at open war. The court had at their command the whole military force of the empire, amounting, at least, to 200,000 men. The people, on the contrary, had only their bare arms, invigorated, it is true, by the new-born love of freedom, to oppose to the various weapons of tyranny. But the army, partaking of the common mifery, were not deaf to the complaints or arguments of their fellow citizens: and they were particularly led to confider them with complacency, because a just apprehension, or prudent forefight, had induced many of the popular affemblies, to infert a claufe in their instructions, recommending, that the pay of the foldiers thould be augmented. Thus recognized as fellow citizens, this class of men, whom it had been the policy of the defpots of Europe to keep at a diftance from the other inhabitants, making them a diffinct clafs, to opprefs and corrupt the reft, began to feel an interest in the common cause. But the court, who

(I2I)

who either could not, or would not, combine thefe important facts, raihly precipitated themfelves into the very quickfand, into which they were vainly endeavouring to drive the commons.

As Necker had not attended in his place, at the feance royale, it gave colour to the rumour, which had for fome time prevailed, that he purposed to retire from the ministry : fo that, when the king returned, he was followed by an immenfe crowd, who could not conceal their discontent. Under the influence also of the fame fear, a number of the deputies haftened to Necker, to entreat him not to refign. And the confernation increasing, the queen, who has ever been the first to defert her own plans, when there appeared a fhadow of perfonal danger, fent for him; and, the better to cover the project of the cabinet, prevailed on him not to quit his post. The object of the cabinet he either had not the penetration to difcover; or he had not fufficient magnanimity to refign a place, that gratified equally his pride and his avarice. This meafure tended to tranquillize the minds of the people, though it was undermining their cause ; for trusting to the integrity of this minister.

nister, who promised, ' to live or die with ' them,' they did not perceive, that he wanted the energy of foul necessary to enable him to act up to the principles he professed. However, the caufe of liberty, as circumstances have proved, did not depend on the talents of one or two men .- It was the fiat of the nation; and the machinations of the tyrants of Europe have not yet been able to overturn it; though falfe patriots have led them, in their ardour for reform, to the commission of actions the most cruel and unjust. Every thing was effected by natural caufes; and we shall find, if we take a curfory view of the progrefs of knowledge, that it's advance towards fimple principles is invariably in a ratio, which must speedily change the tangled system of european politics.

The *féance royale* produced fo little effect, that the affembly, as if their fittings had never been interrupted, met the next day at the old hall; and the day after, the minority of the nobles. which confifted of forty-feven members, came to incorporate themfelves with the commons. All of thefe, and particularly the duke of Orleans, who led them, acquired by this popular conduct, the love and confidence of the nation. How far they merited it, deceiving the public, or themfelves, their future conduct will best explain.

The interesting events, in fact, which almost daily occurred, at the commencement of the revolution, fired the fancies of men of different descriptions; till, forgetting every felfish confideration, the rich and poor faw through the fame focus. But, when the former had time to cool, and felt more forcibly than the latter the inconveniences of anarchy, they returned with fresh vigour to their old ground; embracing, with redoubled ardour, the prejudices which paffion, not conviction, had chafed from the field, during the heat of action. This was a ftrong reinforcement for the ftaunch ariftocrats; becaufe thefe were moftly good, but fhort-fighted people, who really wifhed, that justice might be established, as the foundation of the new government, though they flinched when their prefent eafe was difturbed; and it was necessary to give more than good wifhes.

This minority of nobles must certainly be allowed to have acted more prudently than their peers; and feveral of them, the most respectable men of that class, both in talents and morals,

morals, were probably actuated by half comprehended principles. The great body of the nobles, neverthelefs, and the minority of the clergy, continued to meet in different chambers, where their idle deliberations marked their decayed influence. For, fhrinking into nothing, their prefent ftruggles to regain their power were as fruitless, as their former efforts had been prefumptuous. Yet the jealoufies and contumely of the nobility continued to agitate the commons; who, animated by a confcioulness of the justice of their cause, and feeling, that they poffeffed the confidence of the public, determined to proceed with the objects of their meeting, without the concurrence of the first order; proving to them, when it was too late to preferve their factitious diffinctions, that their power and authority were at an end. In vain were they told, that they were acting contrary to their true intereft, and risking the falvation of their privileges. In vain did one of the moft moderate of the deputies * remonstrate with them, on what, most probably, would be the confequence of their obflinacy. No argument could move them; and, blind to the danger

* Count Lally Tolendal.

with which they were threatened, they perfifted to attend their councils, without any determinate rule of action. It is true, the duke of Luxembourg declared, in a private committee held by the king, the 26th of june. that ' the division of the orders would con-' troul the exorbitant claims of the people, • and preferve those of the monarch; united,' added he, ' they know no mafter, divided, ' they are your fubjects :' and he concluded, with emphatically faying, that ' it would fave • the independence of the crown, and flamp * with nullity the proceedings of the national " affembly.' Thefe were manly, though not patriotic fentiments; and if the court had rallied round them, and defended them to the laft extremity, they would at any rate have prevented their difgrace, by avoiding the crooked path of treachery. But abandoning all dignity of conduct, they trufted to the art of manœuvring, which defeated by the people, they were left entirely at their mercy.

With refpect to the improvement of fociety, fince the deftruction of the roman empire, England feems to have led the way, rendering certain obstinate prejudices almost null, by a gradual change of opinion. This obfervation,

fervation, which facts will fupport, may be brought forward, to prove, that just fentiments gain footing only in proportion as the understanding is enlarged by cultivation, and freedom of thought, instead of being cramped by the dread of bastilles and inquisitions. In Italy and France, for example, where the mind dared to exercife itfelf only to form the tafte, the nobility were, in the ftricteft fenfe of the word, a caft, keeping aloof from the people; whilft in England they intermingled with the commercial men, whofe equal or fuperiour fortunes made the nobles overlook their inequality of birth : thus giving the first blow to the ignorant pride that retarded the formation of just opinions respecting true dignity of character. This monied interest, from which political improvement first emanates, was not yet formed in France; and the ridiculous pride of her nobles, which led them to believe, that the purity of their families would be fullied, if they agreed to act in the fame fphere with the people, was a prevailing motive, that prevented their junction with the But the more licentious part of commons. the clergy, who followed with a truer fcent their own interest, thought it expedient to espoule, I

(127)

espouse, in time, the cause of the power, from whence their influence derived its greatest force; and from which alone they could hope for support. This schifm proved, as it promised, dangerous to the views of the court.

The defertion of the clergy rendered the nobility ^utrageous, and haftened he crifis when the .mportant conteft was to be brought to an iffue.— Then it was that the king perceived how contemptible his undecided conduct had been, and exclaiming, it is faid confidently, ' that he remained ALONE in the ' midft of the nation, occupied with the efta. ' blifhment of concord.' Vain words! and this affectation was particularly reprehenfible, becaufe he had already given orders for the affembling of the foreign troops: the object of which was to eftablifh concord with the point of the bayonet.

This total want of character caufed him to be flattered by all parties, and trufted by none. Infignificancy had diftinguished his manners in his own court. Actions without energy, and profeffions without fincerity, exhibiting a conduct deftitute of fleadines, made the cabinet concert all their measures regardles of

his opinion, leaving to the queen the task of perfuading him to adopt them. The evil did not rest even here; for the different parties following feparate views, the flexibility of his temper led him to fanction things the most at variance, and most dangerous to his future honour and fafety. For it appears obvious, that whatever party had prevailed, he could only be confidered as an inftrument; which, becoming ufcless when the object should be achieved, would be treated with difrefpect. Periods of revolution drawing into action the worft as well as the beft of men; and as audacity, in general, triumphs over modeft merit, when the political horizon is ruffled by tempeft; it amounted to a moral certainty, that the line of conduct purfued by the king would lead to his difgrace and ruin.

Seeing, however, that the people were unanimous in their approbation of the conduct of their reprefentatives, and watchful to difcover the defigns of their enemics; it could not but occur to the cabinet, that the only way to lull attention to fleep, was to affect to fubmit to neceffity. Befides, fearing, if they continued to refort to their different chambers, that their plot would take wind before all (129)

all the agents were affembled, a fresh inflance of diffimulation evinced, that their depravity equalled their stupidity. For the king was now prevailed on to write to the presidents of the nobility, and the minority of the elergy, requesting them, to represent to those two orders the necessity of uniting with the third, to proceed to the discussion of his proposals, made at the *seance royale*.

The clergy immediately acquiefced; but the nobility continued to oppofe a junction fo humiliating, till the court invented a pretext of honour to fave the credit of their meck dignity, by declaring, that the life of the king would be in imminent danger, fhould the nobles continue to refift the defire of the nation. Pretending to believe this report, for the fecrct of the cabinet was buzzed amongst them, and appearing to wish to bury all rivalry in royalty, they attended at the common hall, the 27th. Yet even there, the first ftep they took was to enter a protest, in order to guard against this concession being made a precedent.

A general joy fucceeded the terrour which had been engendered in the minds of the people by their contumelious perverfeneis; and K the (130)

the parifians, cherishing the most fanguine expectations, reckoned, that an unity of exertions would fecure to them a redrefs of grievances.

It is perhaps unneceffary to dwell, for a moment, on the infenfibility of the court, and the credulity of the people; as they feem the only clues, that will lead us to a precife difcrimination of the caufes, which completely annihilated all confidence in the ministers, who have fucceeded the directors of those infamous measures, that fwept away the whole party; meafures which involved thousands of innocent people in the fame ruin, and have produced a clamour against the proceedings of the nation, that has obfcured the glory of her labours. It is painful to follow, through all their windings, the crimes and follies produced by want of fagacity, and just principles of action. For inftance, the feance royale was held on the 23d, when the king, not deigning to advise, commanded the deputies to repair to their different chambers; and only four days after he implored the nobility and clergy to wave every confideration, and accede to the wifh of the people. Acting in this contradictory manner, it is clear, that the cabal thought

(131)

thought only of rendering fure the decided blow, which was to level with the duft the power, that extorted fuch humiliating conceffions.

But the people, eafy of belief, and glad to be light-hearted again; no fooner heard that an union of the orders had taken place, by the defire of the king, than they hurried from all quarters, with good-humoured confidence, called for the king and queen, and teftified, in their prefence, the grateful joy this acquiescence had inspired. How different was this frankness of the people, from the close hypocritical conduct of the cabal!

The courtly, dignified politeness of the queen, with all those complacent graces which dance round flattered beauty, whose every charm is drawn forth by the confcious fields of pleasing, promised all that a fanguine fancy had pourtrayed of future happiness and peace. From her fascinating fimiles, indeed, was caught the careless hope, that, expanding the heart, makes the animal spirits vibrate, in every nerve, with pleasure :--yet, so fimiled but to deceive; or, if the felt fome touches of sympathy, it was only the unifon of the moment.

(132)

It is certain, that education, and the atmofphere of manners in which a character is formed, change the natural laws of humanity; otherwife it would be unaccountable, how the human heart can be fo dead to the tender emotions of benevolence, which most forcibly teach us, that real or lafting felicity flows only from a love of virtue, and the practice of fincerity.

The unfortunate queen of France, befide the advantages of birth and ftation, polieffed a very fine perfon; and her lovely face, fparkling with vivacity, hid the want of intelligence. Her complexion was dazzlingly clear; and, when the was pleafed, her manners were bewitching; for the happily mingled the most infinuating voluptuous fortnefs and affability, with an air of grandeur, bordering on pride, that rendered the contraft more firiking. Independence alfo, of whatever kind, always gives a degree of dignity to the micn; fo that monarchs and nobles, with moft ignoble fouls, from believing themfelves fuperiour to others, have actually acquired a look of fuperiority.

But her opening faculties were poifoned in the Lud; for before the came to Paris, the had already

already been prepared, by a corrupt, Supple abbé, for the part she was to play; and, young as the was, became to firmly attached to the aggrandizement of her house, that, though plunged deep in pleafure, fhe never omitted fending immense funs to her brother, on every occasion. The perion of the king, in itfelf very difgufting, was rendered more fo by gluttony, and a total difregard of delicacy, and even decency in his apariments: and, when jealous of the queen, for whom he had a kind of devouring paffion, he treated her with great brutality, till fhe acquired fufficient fineffe to fubjugate him. Is it then furprizing, that a very defirable woman, with a fanguine conflictution, fhould fhrink abhorrent from his embraces; or that an empty mind fhould be employed only to vary the pleasures, which emasculated her circean court? And, added to this, the hiftories of the Julias and Meffalinas of antiquity, convincingly prove, that there is no end to the vagaries of the imagination, when power is unlimited, and reputation fet at defiance.

Loft then in the moft luxurious pleafures, or managing court intrigues, the queen became a profound diffembler; and her heart K 3 hardened

hardened by fenfual enjoyments to fuch a degree, that when her family and favourites ftood on the brink of ruin, her little portion of mind was employed only to preferve herfelf from danger. As a proof of the justness of this affertion, it is only neceffary to obferve, that, in the general wreck, not a fcrap of her writing has been found to criminate her; neither has the fuffered a word to escape her to exafperate the people, even when burning with rage, and contempt. The effect that adversity may have on her choked understanding time will flow *; but during her profperity, the moments of languor, that glide into the interffices of enjoyment, were passed in the most childish manner; without the appearance of any vigour of mind, to palliate the wanderings of the imagination,-Still fhe was a woman of uncommon address; and though her conversation was insipid, her compliments were fo artfully adapted to flatter the perfon fhe wifhed to pleafe or dupe, and fo eloquent is the beauty of a queen, in the eyes even of fuperiour men, that the feldom failed to carry her point when she endeavoured

• This was written fome months before the death of the gueen,

deavoured to gain an afcendancy over the mind of an individual. Over that of the king the acquired unbounded fway, when, managing the difguft fhe had for his perfon, fhe made him pay a kingly price for her favours. A court is the beft fchool in the world for actors; it was very natural then for her to become a complete actrefs, and an adept in all the arts of coquetry that debauch the mind, whilft they render the perfon alluring.

Had the haplefs Louis poffeffed any decifion of character, to fupport his glimmering fense of right, he would from this period have chosen a line of conduct, that might have faved his life by regulating his future politics. For this returning affection of the people alone was fufficient to prove to him, that it was not eafy to eradicate their love for royalty; becaufe, whilft they were contending for their rights with the nobility, they were happy to receive them as acts of benchicence from the king. But the education of the heir apparent of a crown must necessarily destroy the common fagacity and feelings of a man; and the education of this monarch, like that of Louis XV, only tended to make him a fenfual bigot.

Κ4

Priefts

Priests have, in general, contrived to become the preceptors of kings; the more furely to support the church, by leaning it against the throne. Besides; kings, who without having their understandings enlarged, are set above attending to the forms of morality, which sometimes produce it's spirit, are always particularly fond of those religious systems, which, like a sponge, wipe out the crimes that haunt the terristied imagination of unsound minds.

It has been the policy of the court of France, to throw an odium on the underftanding of the king, when it was lavishing praifes on the goodnefs of his heart. Now it is certain, that he poffeffed a confiderable portion of fenfe, and difcernment; though he wanted that firmness of mind, which conftitutes character; or, in more precise words, the power of acting according to the dictates of a man's own reason. He was a tolerable fcholar; had fufficient patience to learn the english language; and was an ingenious mechanic. It is also well known, that in the council, when he followed only the light of his own reason, he often fixed on the most fage measures, which he was afterwards persuaded to abandon. But death feems to be the fport of

of kings, and, like the roman tyrant, whofe folitary amufement was transfixing flies, this man, whofe milkineis of heart has been perpetually contraited with the pretended watrinefs of his head, was extremely fond of feeing those grimaces, made by tortured animals, which roufe to pleafure fluggifh, grofs fenfations. The queen, however, prevailed on him not to altempt to amuse her, or raise a forced laugh, in a polite circle, by throwing a cat down the chimney, or fhooting an harmlefs afs. Taught alfo to diffemble, from his cradle, he daily practifed the defpicable fhifts of duplicity; though led by his indolence to take, rather than to give the tone to his domincering parafites.

The french nobility, perhaps, the most corrupt and ignorant fet of men in the world, except in those objects of taste, which consolution fift in giving variety to amusement, had never lived under the controul of any law, but the authority of the king; and having only to dread the Bastille for a little time, should they commit any enormity, could not patiently prook the restraints, the better government of the whole fociety required. Haughtily then difregarding the fuggestions of humanity, and even prudence, they determined to fubvert every thing, fooner than refign their privileges; and this tenacity will not appear aftonifhing, if we call to mind, that they confidered the people as beafts of burden, and trod them under foot with the mud. This is not a figure of rhetoric; but a melancholy truth ! For it is notorious, that, in the narrow ftreets of Paris, where there are no footways to fecure the walkers from danger, they were frequently killed, without flackening, by the leaft emotion of fellow-feeling, the gallop of the thoughtlefs being, whofe manhood was buried in a factitious character.

I shall not now recapitulate the feudal tyrannies, which the progress of civilization has, rendered nugatory; it is sufficient to observe, that, as neither the life nor property of the citizens was secured by equal laws, both were often wantonly sported with by those who could do it with impunity. Arbitrary decrees have too often assumed the facred majesty of law; and when men live in continual fear, and know not what they have to apprehend, they always become cunning and pusillanimous. Thus the abject manners, produced by despotism of any species, feem to justify tify them, in the eyes of those who only judge of things from their present appearance. This leads, likewise, to an observation, that partly accounts for the want of industry and cleanliness in France; for people are very apt to sport away their time, when they cannot look forward, with some degree of certainty, to the consolidation of a plan of future ease.

Every precaution was taken to divide the nation, and prevent any ties of affection, fuch as ought always to unite man with man, in all the relationships of life, from bringing the two ranks together with any thing like equality to confolidate them. If, for inflance, the fon of a nobleman happened fo far to forget his rank, as to marry a woman of low birth; what mifery have not those unfortunate creatures endured !--- confined in prifons, or hunted out of the common neft, as contagious intruders. And if we remember alfo, that, while treated with contempt, only a twentieth part of the profit of his labour fell to the share of the husbandman, we shall cease to inquire, why the nobles opposed innovations, that must necessarily have overturned the fabric of despotisin,

The inveterate pride of the nobles, the rapacity of the clergy, and the prodigality of the court, were, in fhort, the fecret fprings of the plot, now almost ripe, aimed at the embryo of freedom through the heart of the national affembly. But Paris, that city which eontains fo many different characters—that vortex, which draws every vice into it's centre—that repository of all the materials of voluptuous degeneracy—that den of fpies and affassins—contained likewife a number of enlightened men, and was able to raife a very formidable force, to defend it's opinions.

The cabinet faw it's rifing fpirit with fufpicion; and, reforting to their old wiles, produced a fearcity of bread, hoping that, when the people fhould be difheartened, the approaching army under Broglio would bring the whole affair to a fpeedy iffue. But circumftances feemed favourable to the people; for the electors of Paris, after they had chofen their deputies, the election having been protracted very late, continued to meet at the *Hôtel-dc-Ville*, to prepare the inftructions, which they had not time to digeft before the affembling of the ftates-general. (141)

At this junclure alfo, a fpacious fquarz, equally devoted to bufinefs and pleafure, called the Palais Royale, became the rendezvous of the citizens. There the most spirited gave lectures, whilft more modeft men read the popular papers and pamphlets, on the benefits of liberty, and the crying oppreffions of abfolute governments. This was the centre of information; and the whole city flocking thither, to talk or to liften, returned home warmed with the love of freedom, and determined to oppose, at the risk of life, the power that fhould ftill labour to enflave them -and when life is put on the cafl, do not men generally gain that for which they ftrive with those, who, wanting their enthusiafm, fet more value on the flake?

The turbulence of the metropolis, produced in great meafure by the continual arrival of foreign troops, furnifhed, neverthelefs, a plaufible pretext for blockading it; and thirtyfive thoufand men, at leaft, moftly confifting of huffars and mercenary troops, were drawn from the frontiers, and collected round Verfailles. Camps were traced out for ftill more; and the pofts, that commanded the roads leading to Paris, were filled with foldiers. The

(142)

The courtiers, then unable to reprefs their joy, vaunted, that the national affembly would foon be diffolved, and the rebellious deputies filenced by imprifonment, or death. And fhould even the french foldiers abandon them, among whom there were fome fymptoms of revolt, the court depended on the foreign troops, to ftrike terrour into the very heart of Paris and Verfailles. The gathering army was already a very formidable force; but the fpirit of enthuliafin, and a keen fenfe of injuries, rendered more fharp by infults, had fuch an effect on the people, that, inftead of being intimidated, they coolly began to prepare for defence.

All had heard, or were now informed, of the efforts made by the americans to maintain their liberty.—All had heard of the glorious firmnefs of a handful of raw boftonian militia, who, on Bunker's-hill, refifted the britifh difciplined troops, crimfoning the plains of Charles-town with the blood of the flower of their enemy's army. This leffon for tyrants had refounded through the kingdom; and it ought to have taught them, that men determined to be free are always fuperiour

(143)

periour to mercenary battalions even of veterans.

The popular leaders had alfo taken the furest means to ingratiate themselves with the foldiery, by mixing with them, and continually infinuating, that citizens ought not to allow the base ministers of power, to treat them like paffive instruments of mischief. Befides, it was natural to expect, that the military, the most idle body of men in the kingdom, should attend to the topics of the day, and profit by the difcuffions, that diffeminated new political principles. And fuch an influence had the arguments in favour of liberty on their minds, that, fo early as the 23d of june, during a flight riot, two companies of the grenadiers refused to fire on the people, whom they were fent to difperfe. But these symptoms of refractoriness roused the refentment of the court, inflead of putting it on it's guard : confequently feveral were fent to prifon, and the troops were confined to their barracks; yet, regardlefs of thefe orders, they came in crowds to the Palais Royale, a day or two after, eager to unite their voices with the general fhout, vive la nation, which fpoke the prefent fentiments of the people.

(144)

people. The regiments of french, alfo, that now arrived, to be flationed with the foreign troops round Paris, were conducted to this hot-bed of patriotifm; and, meeting with the most cordial reception, they listened with interest to the lively representations of the enormities committed by their old government, and of the meannels of those men, who could live on the bread earned by butchering their fellow citizens.

Whilf these opinions were taking root, the people heard, that eleven of the french guards, confined in the abbey, because they would not obey the order to fire on the populace, were to be transferred to the *Bicetre*, the most ignominious of all the prisons. The contest now commenced; for the people hastened to deliver them, and, forcing their way, emancipated their friends; and even the hussians, who were called out to quell the disturbance, laid down their arms. Yet, attentive to justice, they fent back to confinement a foldier, who had been previously committed by the police, for fome other misdemeanour.

Exafperated as they were, the people, not yet become lawlefs, guarded the men they had refeued; whilft they fent a deputation to

the

(145)

the national affembly, to intercede with the king in their behalf. This fpirited, yet prudent, behaviour produced the defired effect : and the affembly named a certain number of the deputies, who with fcrupulous decorum were to demand this grace of the king : and he accordingly granted their pardon, laying a cautious stress on it's being the first request made by the affembly. But it was fill queftionable, whether this extorted act of lenity were not done, like the other actions of the court, only to blind the preparations that were making, to humble effectually the foldiery, the metropolis, and the affembly.

During this period of general fufpicion, the prefence of fuch a confiderable force, as now was encamped on every fide of the capital, particularly alarmed the electors, who held their deliberations very conftantly to watch over the public peace; and, in order to avert the threatening ftorm; they proposed raising the city militia. Yet, before they determined, they fent to apprife the national affembly of their intention; withing the king to be informed, that, if an armed force were neceffary to fecure the public tranquillity, the citizens themfelves were the most proper perfons L

(146)

perfons to be entrusted with the commiffion.

The unfettled flate of Paris, now fuffering from a fcarcity of bread, furnished, however, a plaufible pretext for the augmentation of the troops, which increased the calamity. ' When it is with the greatest difficulty,' fays one of the electors, ' that we can procure · provision for the inhabitants, was it necef-' fary to increase the famine and our fears, by ⁶ calling together a number of foldiers, who were difperfed through all the provinces? . These troops,' he adds, ' were defined to guard the frontiers, whilft the reprefenta-' tives of the nation are deliberating on the ⁶ formation of a conflictution. But this confli-' tution, defired by the king, and demanded • by all the provinces of France, has to cope " with dangerous interiour enemies."

The national affembly, likewife, could not but perceive, that more foldiers were flationed near them, than would have been fufficient to repel a foreign invalion; and Mirabeau, with his ufual fervour, animated them to action, by a lively picture of their fituation. • Thirty-five thousand men,' he observed, ' are • now distributed between Paris and Verfail-* les :

(147)

les: and twenty thousand more are expected. Trains of artillery follow them; ^t and places are already marked out for bat-They have made fure of all the teries. ' communications .- All our entrances are in-' tercepted; our roads, our bridges, and our ^e public walks, are changed into military posts. The notorious events, the fecret orders, and precipitate counter-orders-in fhort, preparations for war, ftrike every 'eye, and fill with indignation every heart. 'Gentlemen, if the queftion were only the 'infulted dignity of the affembly, it would demand the attention of the king himfelf; for should he not take care, that we be ' treated with decency, fince we are deputies • of the nation from which his glory emanates, ' which alone conftitutes the fplendour of the 'throne ?- Yes; of that nation, who will ' render the perfon of the king honourable in ' proportion as he refpects himfelf? Since his " wish is to command free men, it is time to ' banish the old odious forms, those infulting ' proceedings, which too eafily perfuade the courtiers, who furround the prince, that ' royal majefty confifts in the abafing relation 'of mafter and flave; that a legitimate and beloved L 2

(148)

^c beloved king ought on all occafions to fhow ' himfelf with the afpect of an irritated tyrant; ' or, of those usurpers condemned by their ' melancholy fate, to miftake the tender and flattering fentiments of confidence.-And ' who will dare to fay, that circumstances ' have rendered neceffary thefe menacing ' meafures? On the contrary, I am going to ' demonstrate, that they are equally useles ' and dangerous, confidered either with refpect ' to good order, the quicting of the public, or ' the fafety of the throne : and, far from ap-' pearing the fruit of a fincere attachment to ' the perion of the monarch, they can only ' gratify private paffions, and cover perfidious ' defigns. Undoubtedly I do not know every ' pretext, every artifice of the enemies of re-' formation, fince I cannot divine with what ' plaufible reafon they have coloured the ' pretended want of troops, at a moment, ' when not only their inutility, but their ' danger ftrikes every mind.

With what eye will the people, harraffed
by fo many calamities, fee this fwarm of idle
foldiers come to difpute with them their
fordel of bread? The contrast of the plenty
enjoyed by one, with the indigence of the
i

other; of the fecurity of the foldiers, to ' whom the manna falls, without it's being 'necessary for them to think of to-merrow, ' with the anguish of the people, who obtain 'nothing but by hard labour and painful ' fweat; is fufficient to make every heart fink ' with defpondency. Added to this, gentle-'men, the prefence of the troops heats the ' imagination of the populace; and, by con-' tinually prefenting new fears, excites an ' universal effervescence, till the citizens are ' at their very fire-fides a prey to every kind ' of terrour. The people, roufed and agitated, ' form tumultuous affemblies; and, giving ' way to their impetuofity, precipitate them-' felves into danger-for fear neither calculates ' nor reafons !' He concluded with moving an address to the king, representing, that the people were extremely alarmed by the affembling of fuch a number of troops, and the preparations made to form camps during this feason of fcarcity; and to remonstrate respecting the conduct of those, who sought to deftroy the confidence that ought to fubfift between the king and the reprefentatives of the people-a confidence, which alone can enable them to fulfil their functions, and cftablish the

(150)

the reform expected from their zeal by a fuffering nation.

This fpeech produced the defired effect; and the motion being carried, Mirabeau was requested to prepare an address for their confideration.

The purport of the address was an abridgement of the above speech; respectful; nay, even affectionate; but spirited and noble.

Yet this remonstrance, fo well calculated to preferve the dignity of the monarch, and appeale the agitation of the public, produced no other effect than a fupercilious anfwer, that only tended to increase the want of confidence, to which difgust gave a new edge. For, inftead of attending to the prayer of the nation, the king afferted, that the tumultuous and fcandalous fcenes, which had paffed at Paris, and at Verfailles, under his own eyes, and those of the national assembly, were fufficient to induce him, one of whole principal duties it was to watch over the public fafety, to station troops round Paris.-Still, he declared, that, far from intending to interrupt their freedom of debate, he only wifhed to preferve them even from all apprehenfion of tumult and violence. If, however, the

the necessary prefence of the troops continue to give umbrage, he was willing, at the request of the assembly, to transfer the statesgeneral to Noyon or Soiffons; and to repair himself to Compiégne, in order to maintain the requisite intercourse with the affembly. This answer fignified nothing; or, rather, it formally announced, that the king would not fend away the troops. Obvious as was the meaning, and contemptible as was the diffimulation; yet, as it came from the fovereign, the fountain of fortune and honours, fome of the fupple hands of the deputies applauded .- But, Mirabeau was not to be cajoled by fuch shallow fallacy. 'Gentlemen,' faid he, impatiently, ' the goodness of the * king's heart is fo well known, that we might tranquilly confide in his virtue, did he always 'act from himfelf .-- But, the affurances of the king are no guarantee for the conduct of his ministers, who have not ceased to ' millead his good disposition .- And have we ' yet to learn, that the habitual confidence of ' the french in their king is lefs a virtue than " a vice, if it extend to all parts of the ad-" ministration ?

'Who amongft us is ignorant, in fact, that 'it is our blind, giddy inconfideration, which has led us from century to century, from fault to fault, to the crifis that now afflicts us, and which ought at laft to open our eyes, if we have not refolved to be headftrong children and flaves, till the end of time?

' The reply of the king is a pointed refufal. ⁵ The ministry would have it regarded only ⁴ as a fimple form of affurance and goodnefs; ' and they have affected to think, that we * have made our demand, without attaching " much intereft to it's fuccefs, and only to ap-· pear to have made it. It is neceffary to ' undeceive the ministry-Certainly, my opi-' nion is, not to fail in the confidence and re-' fpect which we owe to the virtues of the ' king; but I likewife advife, that we be no ' more inconfistent, timid, and wavering in 'our measures .--- Certainly, there is no need ' to deliberate on the removal propofed; for, ' in fhort, notwithstanding the king's answer, " we will not go to Noyon, nor to Soiffons-• We have not demanded this permiffion; nor " will we, becaufe it is fcarcely probable, that ' we should ever defire to place ourselves bef tween

tween two or three bodies of troops; those ' which invest Paris, and those which might ' fall upon us from Flanders and Alface. We ' have demanded the removal of the troops-' that was the object of our address!-We • have not afked permiffion to flee before them; • but only that they fhould be fent from the ' capital, And it is not for ourfelves, that we ' have made this demand; for they know ' very well, that it was fuggefted by a concern ' for the general interest, not by any fenti-' ment of fear. At this moment, the prefence ' of the troops diffurbs the public order, and ' may produce the moft melancholy events.---"Our removal, far from preventing, would, • on the contrary, only aggravate the evil. It is ' necessary, then, to reftore peace, in fpite of • the friends of diforder; it is neceffary, to be • confistent with ourfelves; and to be fo, we have only to adhere to one line of conduct, ' which is to infift, without relaxing, that the ' troops be fent away, as the only fure way ' to obtain it.'

This fpeech, delivered on the 11th of july, produced no further decision in the affembly, though it kept the attention of the members fixt to a point.

But

But things were now drawing rapidly to a crifis; for this very day Necker, who had been retained in place, only to hoodwink the people, was difmiffed, with an injunction not to mention his difmiffion; and to leave the kingdom in twenty-four hours. These orders he fervilely obeyed; and, with all the promptitude of personal fear, faid, without the least emotion, to the nobleman, who brought the king's commands, ' we shall meet this evening at the council;' and continued to converfe, in his usual strain of smoothness, with the company at dinner. Miferable weaknefs ! This man, who profeffed himfelf the friend of the people, and who had fo lately promifed ' to live or die with them,' had not, when brought to the teft, fufficient magnanimity to warn them where danger threatened-For he must have known, that this difmission was the fignal of hoftilities : yet, fleeing like a felon, he departed in difguife, keeping the fecret with all the caution of cowardice.*

The next day, the appointment of the new ministry, men particularly obnoxious to the

^{*} Such is ever the conduct of foi-difant patriots.

public, made it known to the people; who viewed with melancholy horrour the awful horizon, where had long been gathering the ftorm, now ready to burft on their devoted heads. The agitation of the public mind, indeed, refembled a troubled fea; which, having been put in motion by a raging tornado, gradually fwells, until the whole element, wave rolling on wave, exhibits one unbounded commotion. All eyes were now opened, all faw the approaching blaft; the hollow murmurs of which had infpired a confuled terrour for fome time paft.

It had been proposed on the 10th, at the *Hôtel-de-Ville*, as a regulation of the *Garde-Bourgeoife*, that twelve hundred men should be raifed at a time, to be relieved every week; and the capital having been divided, at the election, into fixty districts, only twenty would be called out of each. And it was further resolved, that the districts should rest canbodied until the entire evacuation of the troops, excepting those who formed the common compliment of the guards. The following day it was decreed; an address was voted to the national affembly, to request their mediation with the king, to fanction immediately the

(13б)

the city inilitia; and the fittings of the committee were adjourned till monday, the 13th. But fome of the electors, having heard on funday, that the populace were all repairing to the *Hotel-de-Ville*, haftened there about fix o'clock in the evening, and found the hall indeed crowded with people of all conditions. A thoufand confused voices demanded arms, and orders to found the *tocfin*.

At eight o'clock, the patrol guard was relieved, at the *Hôtel-de-Ville*, and the multitude prefied on the foldiers to difarm them; redoubling the cry for arms at the moment; and even threatened to fet fire to the hall. But, flill obferving fome refpect for fubordination, they demanded, a little imperioufly, it is true, an order, in virtue of which, the citizens might arm themfelves to repulfe the danger that menaced the capital—and amidft thefe clamours, feveral precipitate reports painted, in the most lively colours, this danger.

One of the crowd faid, that, no fooner had the news of the difinifion of Necker reached Paris, than the people haftened to a feulptor's, and, feizing the bufts of that minifter, and of the duke of Orleans, they were now actually carrying them through the ftreets :—Another

informed them, that the multitude had ruffied into the different theatres, at the hour of opening them, and required, that they should be instantly shut;* and that in confequence all the fpectators had been fent away :--- A third announced four cannons, placed at the entrance of the Champs Elyfées, with their cannoneers ready to light their matches, which were to begin the combat; and that these four cannons were fupported by a regiment of cavalry, which, advancing under the command of the prince de Lambesc to the place of Louis 15th, was flationed by the bridge that leads to the Thuilleries. He added alfo, that a cavalier of this regiment, paffing by a foldier of the french guards, had fired his piftol at him; and, that the prince de Lambese himself had galloped into the garden, fabre in hand, followed by a detachment, who put to flight the old men, women, and children, that were peaceably taking their cuftomary walk; nay, that he had actually killed, with his own hand, an old man, who was escaping from the tumult. The reporter, it is true, forgot

• This is an event much more important at Paris, than it would be in London.

[158]

to notice, that the populace had begun to pelt the prince with the ftones, that were lying ready, near the buildings which were not finished. Startled, perhaps, by this resistance, and despissing the mob, that he expected, only by his prefence, to have intimidated, in a delirium, most probably, of terrour and astonishment, he wounded an unarmed man, who shed before him. Be that as it may, this wanton outrage excited the indignation neceffary to fire every spirit.

The electors being still pressed for arms, and unable to furnish them, at eleven o'clock decreed, that the diffricts should be immediately convoked; and that they would repair to all the posts of armed citizens, to beg them, in the name of their country, to avoid all species of riot.-But this was not the moment to talk of peace, when all were making ready for battle .--- The tumult now became general. To arms! To arms! re-echoed from all quarters-and the whole city was instantly in motion, feeking for weapons of defence. Whilft the women and children rent the air with fhricks and lamentations, the cannons were fired; and the tochins of the different

(159)

different parish churches joined by degrees, to excite, and continue, the universal alarm.

Still all their thoughts were turned on defenfive measures, Many of the citizens, by ranfacking the warehoufes of arms, and catching up fpits and pokers, appeared with weapons in their hands to fecond their determinate countenances; and being joined by fome of the french guards, more completely accoutred, ferced those foreign mercenaries, who had first awakened their fury, to retreat, fleeing like the beafts of the defert, before the bold and generous lion. Though victorious in this midnight fray, becaufe determined to conquer, ftill they had fcarcely any fire arms; and were as inexpert in the use of those they found, as the inhabitants of capitals commonly are-But indignation made each of them, fo reftlefs was their courage, feize fomething to defend himfelf with: hammers, axes, shovels, pikes, all were fought for, and clenched in hands nerved by heroifm; yes, by true heroifm, for perfonal fafety was difregarded in the common danger. Wives affifted to beat out pikes for their husbands, and children ran about to pile up ftones in readinefs for tomorrow. To increase the apprehensions of the

(160)

the night, one of the barriers was fet on fire; and a band of defperate robbers, taking advantage of the confusion, began to pillage fome houses. To arms! was the cry of danger, and the watch-word of the city—for who could close their eyes? Whilst the toofin drowning the murmurs of rage, and distress, made the confusion folemn.

Different founds excited different emotions at Verfailles; for there the heart, beating high with exultation, gave way to the moft intemperate joy.—Already the courtiers imagined, that the whole mifchief was crushed, and that they had the affembly at their mercy.

Intoxicated by fuccefs, a little too foon reckoned on, the queen, the count d'Artois, and their favourites, vifited the haunt of the bribed ruffians, who were lurking in ambufh, ready to fall upon their prey; encouraging them by an engaging affability of behaviour, and more fubftantial marks of favour, to forget every confideration, but their commands. And fo flattered were they by the honied words, and coquetifh fmiles of the queen, that they promifed, as they drained the cup in her honour, not to fheath their fwords, till. France was compelled to obedience, and the national national affembly difperfed. With favage ferocity they danced to the found of mufic attuned to flaughter, whilft plans of death and devaftation gave the zeft to the orgies, that worked up their animal fpirits to the higheft pitch. After this account, any reflections on the baneful effects of power, or on the unreftrained indulgence of pleafure, that could thus banifh tenderness from the female boson, and harden the human heart, would be an infult to the reader's fensibility.

How filent is now Verfailles !—The folitary foot, that mounts the fumptuous ftair-cafe, refts on each landing-place, whilft the eye traverfes the void, almost expecting to fee the strong images of fancy burst into life.—The train of the Louises, like the posterity of the Banquoes, pass in folemn fadness, pointing at the nothingness of grandeur, fading away on the cold canvas, which covers the uakedness of the stamosphere gives a deeper state to the gigantic figures, that feem to be finking into the embraces of death.

Warily entering the endless apartments, half shut up, the fleeting shadow of the pensive wanderer, reflected in long glasses, that M vainly

(162)

vainly gleam in every direction, flacken the nerves, without appalling the heart; though lafcivious pictures, in which grace varnifhes voluptuoufnefs, no longer feductive, ftrike continually home to the bofom the melancholy moral, that anticipates the frozen leffon of experience. The very air is chill, feeming to clog the breath; and the wafting dampnefs of deftruction appears to be flealing into the vaft pile, on every fide.

The opprefied heart feeks for relief in the garden; but even there the fame images glide along the wide neglected walks—all is fearfully ftill; and, if a little rill creeping through the gathering mofs down the cafcade, over which it ufed to rufh, bring to mind the defeription of the grand water works, it is only to excite a languid finile at the futile attempt to equal nature.

Lo! this was the palace of the great king! —the abode of magnificence! Who has broken the charm ?—Why does it now infpire only pity ?—Why ;—becaufe nature, finiling around, prefents to the imagination materials to build farms, and hofpitable manfions, where, without raifing idle admiration, that gladnefs will reign, which opens the heart to 4 bene(163)

benevolence, and that industry, which renders innocent pleasure sweet.

Weeping-fcarcely confcious that I weep. O France ! over the veftiges of thy former oppreffion; which, feparating man from man with a fence of iron, fophifticated all, and made many completely wretched; I tremble, left I should meet some unfortunate being, flccing from the defpotifin of licentious freedom, hearing the fnap of the guillotine at his heels; merely becaufe he was once noble, or has afforded an afylum to thofe, whofe only crime is their name-and, if my pen almost bound with eagerness to record the day, that levelled the Baftille with the duft, making the towers of defpair tremble to their bafe; the recollection, that still the abbey is appropriated to hold the victims of revenge and fufpicion, palfies the hand that would fain do juftice to the affault, which tumbled into heaps of ruins walls that feemed to mock the refiftless force of time .-- Down fell the temple of despotism; but-despotism has not been buried in it's ruins !--- Unhappy country !--- when will thy children ceafe to tear thy bofom ?---When will a change of opinion, producing a change of morals, render thee truly free?---When M 2

(164)

When will truth give life to real magnanimity, and justice place equality on a stable feat ?—When will thy fons trust, because they deferve to be trusted; and private virtue become the guarantee of patriotism? Ah ! when will thy government become the most perfect, because thy citizens are the most virtuous !

CHAP. III.

(165)

CHAPTER III.

FREPARATIONS OF THE PARISIANS FOR THE DEFENCE OF THE CITY. THE GUARDS, AND CITY WATCH, JOIN THE CITIZENS. THE ARMED CITIZENS AFFOINT A COMMANDER IN CHIEF. CONDUCT OF THE NATIONAL ASSEMBLY DURING THE DISTURBANCES AT PARIS. THLY PUBLISH A DECLARATION OF RIGHT3,—AND OFFER THEIR MEDIATION WITH THE CITIZENS,— WHICH IS HAUGHTILY REFUSED BY THE KING. PROCEEDINGS AT PARIS ON THE FOURTLENTH OF JULY. TAKING OF THE BASTILLE. THE MAYOR SHOT. PROCEEDINGS OF THE NATIONAL ASSEMBLY AT VERSAILLES. APPEARANCE OF THE KING IN THE ASSEMBLY. HIS SPEECH.

EARLY in the morning of the 13th, the electors haftened to the centre of the general alarm, the bôtel-de-ville, and, urged by the neceffity of the moment, paffed the decrees, under deliberation, for the immediate embodying the garde-bourgeoife, without waiting for the requested fanction of the national assembly. The greater number then withdrew, to convoke their diffricts; whilft the few that remained endeavoured to calm the tumult, that was every moment augmenting, by informing the people of this decree ; reprefenting at the fame time, to the citizens, the cogent motives which should induce them to feparate, and each repair to his own district to be enrollcd. M 3

(166)

enrolled. But the crowd again called for arms, pretending, that there was a great number concealed in an arfenal, which nobody could point out. To quiet thefe clamours for a moment, the people were referred to the *prévot des marchands*^{*}. He accordingly came, and requefted, that the multitude would confirm his nomination to the function, which his majefty had confided to him. A general acclamation was the fignal of their confent ; and the affembled electors immediately turncd their attention to the ferious bufinefs before them.

They then eftablished a *permanent committee*, to keep up a constant intercourse with the different districts, to which the citizens were again exhorted instantly to return, with all the arms they had collected; that those arms might be properly distributed amongst the parisian militia. But, it was impossible to pursue these important deliberations, with any degree of order, for a fresh multitude was continually rushing forward, to report fresh intelligence; often false or exaggerated, and always alarming. The barriers, they were told, were on fire; a religious house had been

• The mayor.

pillaged;

pillaged; and a hoftile force was on the road, in full march, to fall upon the citizens. An immenfe number of coaches, waggons, and other carriages, were actually brought to the door of the hotel; and the demands of the concourfe, who had been ftopped going out of Paris, mingling with the cries of the multitude, eager to be led towards the troops, whofe approach had been announced, were only drowned by the more lively inftances of the deputies of the fixty districts, demanding arms and ammunition, to render them active. To appeale them, and gain time, the mayor promifed, if they would be tranquil till five o'clock in the evening, then to distribute a number of fufils; which were to be furnished by the director of a manufactory.

These affurances produced a degree of calm. Taking advantage of it, the committee determined, that the parifian militia, for the prefent, should consist of 48,000 citizens; and that the officers should be named by each diftrict. Many subordinate decrees also passed, all tending to prevent the difasters naturally produced by confusion; and to provide for the subsistence of the city. The french guards, who had during the night affisted the citizens, now came to testify their attachment to the common cause; and to beg to be enrolled with them. The commander of the city watch, a military body, likewise presented himself; to assure the committee, that the troops under his direction were disposed to obey their orders, and assist in defending the city.

Among the carriages ftopped was one of the prince de Lambesc. The people imagined, that they had caught the prince himfelf; and, when they were convinced of their miltake, it was impossible to fave the coach, though the horfes were put into a neighbouring ftable; and the portmanteau, carefully detached, was lodged in the hall. This trivial circumftance is worthy of notice, because it shows the refpect then paid to property; and that the public mind was entirely fixed on those grand objects, which abforb private paffions and interefts. Stung alfo to the quick by the infulting difregard of their claims, the people forcibly felt an indignant fense of injustice, which rendered the ftruggle heroic.

Preparations of a warlike caft were made during the whole courfe of this day; and every thing was conducted with a degree of prudence prudence fcarcely to have been expected from fuch impetuofity. Trenches were thrown up. feveral of the ftreets unpaved, and barricadoes formed in the fuburbs-Defence was the fole object of every perfon's thoughts, and deriding perfonal danger, all were preparing to fell their lives at a dear rate, furbishing up old weapons, or forging new. The old men, women, and children, were employed in making pikes; whilft the able bodied men paraded the ftreets, in an orderly manner, with most refolute looks, yet avoiding every kind of violence: there was, in fact, an inconceivable folemnity in the quick ftep of a torrent of men, all directing their exertions to one point, which diftinguished this rifing of the citizens from what is commonly termed a riot .--- Equality, indeed, was then first cftablished by an universal sympathy; and men of all ranks joining in the throng, those of the first could not be diferiminated by any peculiar decency of demeanour, fuch public spirited dignity pervaded the whole mafs.

A quantity of powder had been carried to the *botel-de-ville*, which the populace, for the most unruly always collected round this central fpot, would probably have blown up in

(170)

in feizing, if a courageous elector* had not, at the continual rifk of his life, infifted on distributing it regularly to the people. This engaged their attention a fhort time; but in the evening the demand for arms became more preffing than ever, mingled with a hoarfe cry of perfidy and treafon, levelled against the mayor; which, for a while, was filenced by the arrival of a number of military chefts, thought to contain arms, and thefe were fuppofed to be those promised by the mayor. Every poffible precaution was immediately taken by the electors, to have them speedily conveyed into the cellar, that they might be given to those who knew best how to make use of them; instead of being caught up by the unskilful. The french guards had merited the confidence of the citizens; and four members of the committee, after some deliberation, were appointed to haften to them, to request that they would come and take charge of the distribution. In short, great preparations were

* This man, the abbé Lefebure, remained all night, and the greater part of the next day, flanding over a barrel of gun-powder, perfifting to keep off the people, with undaunted courage, though feveral of them, to torment him, brought pipes to finoke near it; and one actually fired a piftol clofe by, that fet fire to his hair.

made,

made, previous to the opening of the chefts; but—when the chefts were at last opened, in the prefence of a concourse of people, and found to contain only pieces of old candlefticks, and fuch like rubbish, the impatience of the multitude, whose courage and patriotism had been played with all day, instantly changed into indignation and fury; and the sufficient of the mayor was extended to the whole committee, whom they threatened to blow up in their hall.

One of the electors, the marquis de la Salle, now observed, ' that the greatest in-• convenience in their prefent crucl fituation " was the want, of order, and fubordination; ⁴ and that a correspondence of the different ' parts of the grand machine, fo neceffary to promote expedition and fuccefs, could * not fubfift without a commander, known 'and acknowledged by the public: for * all the citizens, become foldiers, are per-' petually,' he adds, ' exposed to fpend their ' zeal and intrepidity in fuperfluous efforts; ' fometimes even counteracting their own de-' figns. It is neceffary then to name a gene-' ral of the first abilities and experience; I am 'far from thinking myfelf worthy of your choice,

(172)

choice, though I offer all that I can offer, ' my fortune and my life; and fhall willingly ' ferve in any post.' This motion produced a new difcuffion; and the duke d'Aumont was appointed commander in chief. But, he half declining it, though he tried to procraftinate his refulal, the post devolved to the marquis de la Salle, who had been unanimoufly named fecond ; and he entered immediately on the discharge of this important trust. And this nomination contributed to fupport the exertions of the committee; for in fpite of the chaotic fhock, which feemed to have thrown into confusion all the parts of this great city, the centre of union formed at the bôtel-dc-ville, by the affembling of the clectors, was in a great measure the falvation of the public. This municipal power, created by circumftances, and tacitly confented to by the citizens, effablished a great degree of order and obedience, even in the midft of terrour and anarchy. The garde-bourgeoife had been affembled in all the diffricts; and the patrols relieved with the greatest exactness. The flreets were illuminated, to prevent confusion or difmay during the night; private property was respected, and all the posts carefully superintended;

intended; but, at the barriers, every carriage and every perfon was ftopped, and obliged to go to the hôtel-de-ville to give an account of themfelves. The public particularly mistrusted the defign of those who were going to Verfailles, or coming from it. Deputations had been regularly fent, to inform the national affembly of the disturbances, which their danger and the dread of a fiege had occafioned in Paris, and of the measures purfued to reftrain the headlong fury of the people.

The national affembly, indeed, now appeared with the dignified afpect becoming the fathers of their country; feeing their own danger, without timidly fhrinking from the line of conduct, which had provoked the violence of the court: and the prefident, an old man, not being thought equal to the present toils of office, a vice-president was appointed.

To fill this post, the marquis la Fayette was chofen: a deputy for feveral reafons popular. In America, where he voluntarily rifked his life and fortune, before the french nation espoused their cause, he had acquired certain just principles of government; and these he digested to the extent of his understanding, which

(174)

which was fomewhat confined. He possefied great integrity of heart, though he was not without his portion of the national vanity. He had already diftinguished himself at the meeting of the notables, by detecting, and exposing the peculation of Calonne, and oppofing the arbitrary proceedings of the count d'Artois. Governed by the fame motives, he had proposed, likewise, during their fittings, some bold plans of reform, calculated to reduce the public revenue, and leffen the grievances of the nation, at the fame ftroke .-- Amongft these was a motion for the abolition of the Bastille, and other state prifons, throughout the kingdom; and the fuppreffion of lettres de cachet. And still having the fame objects in view, he, the very day the king's fneering reply was received (the 11th), laid before the affembly a propofal for a DECLARATION OF RIGHTS, fimilar to that of fome of the american states. The marquis de Condorcet had published a declaration of this kind, to instruct the deputies, previous to their meeting. La Fayette had transmitted a copy of his declaration of rights to the affembled electors, to be read to the people; and nothing could be better adapted to keep them firm, telling

(175)

telling them to what point they ought to adhere, than the fhort addrefs with which it commenced.—' Call to mind the fen-' timents; that nature has engraven on the ' heart of every citizen; and which take a ' new force, when recognized by all.—For a ' nation to love liberty, it is fufficient that fhe ' knows it; and, to be free, it is fufficient ' that fhe wills it *.'

Mirabeau, even whilft fupporting tenacioufly the dignity of the national affembly, felt a pang of envy, that another fhould bring forward fuch an important bufinefs, as the fketch of a new conftitution; avowedly that the world might know how they had been employed, and what they were contefling for, fhould they become the victims of their magnanimity.

It was impoffible now for the whole affembly not to fee in the change of the ministry the danger at hand, the approach of which fome had affected to treat as a chimera. Determined, however; to continue their labours, in the very face of fuch hostile preparations; yet taking every prudent precaution to fecure their

• Lally Tolendal faid of La Fayette, at this time, that • he fpoke of liberty as he had defended it.'

(176)

their fafety, they fent to inform the king of the diffurbances at Paris; and to point out the evils which menaced the flate, if the troops that invested the metropolis were not feat to more distant quarters :--- offering, at the fame time, to throw themfelves between the army and the citizens, to endeavour to ward off the calamities that were likely to enfue. But the king, obftinately bent to fupport the present measures, or controlled by the cabal, replied, ' that he was the only ' judge of the necessity of withdrawing the ' troops;' and, treating the offered interpofition of the deputies with the most ineffable contempt, told them, ' that they could be of ' no use at Paris, and were necessary at Verfailles, to purfue those important labours, ' which he should continue to recommend.'

This anfwer was no fooner communicated, than La Fayette moved, that the prefent miniftry fhould be declared refponfible for the confequence of their obftinacy : and the affembly further decreed, that Necker and the reft of the miniftry, who had juft been fent away, carried with them their efteem and regret : that, alarmed by the apprehensions of danger produced by the reply of the king, they would (177)

would not ceafe to infift on the removal of the troops, and the establishment of a gardebourgeoise .- They repeated their declaration, that no intermediate power can fubfift between the king and the national affembly :---and that the public debt, having been placed under the fafe-guard of french honour, the nation not refufing to pay the interest of it, no power had a right to utter the infamous word-bankruptcy.-In fhort, the affembly declared, that they perfifted in their former decrees :--- and that the prefent refolves fhould be prefented to the king, by the prefident, and printed for the information of the public.

Still the court, defpifing the courageous remonstrances of the assembly, and untouched by the apprehenfions of the people, which feemed to be driving them to the defperation that always conquers, ftimulated the king to perfift in the profecution of the measures, which they had prevailed on him to adopt. The affembly, thus rendered vigilant by the various tokens, that the crifis was arrived, which was to determine their perfonal and political fate, in which that of their country N was

was involved, thought it prudent to make their fittings permanent. Animated and united by the common danger, they reminded each other, 'that, fhould they perifh, their country 'ftill furviving would recover it's vigour; ' and that their plans for the good of the pub-' lic again warming the hearts of frenchmen, ' a brave and generous people would erect on ' their tomb, as an immortal trophy, a con-' ftitution folid as reafon,' and durable as ' time :--whilft their martyrdom would ferve ' as an example, to prove, that the progrefs ' of knowledge and civilization is not to be ' flopped by the maffacre of a few indivi-' duals.'

Whatever might have been the object of the court, refpecting the national affembly, which was probably the flaughter or imprifonment neceffary to difperfe them, and difconcert their theories of reform, it is certain, that their fituation wore the most threatening afpect; and their efcape was owing to the courage and refolution of the people; for the breast of the cabinet was too callous, to feel either respect or repugnance, when emoluments and prerogatives were in question.

It was a circumstance favourable to the people, and the caufe of humanity, that the want of common forefight in the court prcvented their guarding against refistance. For fo negligent were they, that the citizens, who were early in the morning of the 14th every where fcouring about in fearch of arms, requested of the committee an order to demand those they heard were stored up at the hotel des invalides; and one of the electors was accordingly fent with them, to defire the governor to give up to the nation all the arms and ammunition committed to his care. He replied, that a body of citizens having already been with him, he had fent to Verfailles for orders, and entreated them to wait till the return of the courier, whom he expected in the course of an hour or two. This answer at first fatisfied the people, who were preparing to wait contentedly, till one of them observing, that this was not a day to lofe time, they infifted on entering immediately; and instantly made themselves masters of all the arms they found, to the amount of 30,000 muskets, and fix pieces of cannon. A confiderable quantity of different forts of arms N_2 were

(180)

were also carried away from the garde meuble. by a lefs orderly party; and fell into the hands of vagabonds, who always mix in a tumult, mercly becaufe it is a tumult. A hundred and fifty perfons of this description had been difarmed the preceding night at the bôtcl-de-ville, where they had dropped alleep on the flairs and benches, flupified by the brandy they had ftolen : but, when they awoke, and requefted work, not having any money or bread, they were fent to affift in the making of pikes, and the fabricating of other weapons, which required little skill. None of the citizens appeared, in fact, without fome weapon, however uncouth, to brandish defiance, whilst fixty thousand men, enrolled and distributed in different companies, were armed in a more orderly, though not in a more warlike manner. The army of liberty now, indeed, assumed a very formidable appearance; yet the cabinet, never doubting of fuccefs, neglected in the thoughtleffnefs of fecurity, the only way left to oblige the rouled people to accept of any terms.

Paris, that immenfe city, fecond, perhaps, to none in the world, had felt a fcarcity of bread (181)

bread for fome time, and now had not fufficient flour to fupport the inhabitants four days to come *.

If, therefore, the marefehal Broglio had cut off the fupplies, the citizens would have been reduced to the alternative of flarving, or marching in confusion to fight his army, before they could have been difciplined for a regular action. But directed only by the depraved fentiments of tyranny, they deemed N 3 affaffination

* The fupplying of Paris with provision always depended on a nice arrangement of circumstances, capable of being controlled by the government of the fate. It is not like London, and other great cities, the local polition of which was previously pointed out by nature, and of which the welfare depends on the great and perpetual movements of commerce, which they themselves regulate. To cut off the provision from London, you must block up the port, and interdict in an open manner an intercourse, on which the wealth of the nation in a great measure depends. Paris, on the contrary, might be famished in a few days by a secret order of the court. All the people of the place would feel the effect, and no perfon be able to afcertain the caufe. Thefe confiderations render it eafy to account for the continued scarcity of provision in Paris during the fummer of 1789. No perfon can doubt, but the court viewed the revolution with horrour; and that, among the measures which they took to prevent it, they would not overlook fo obvious an expedient, as that of cutting off the fupplies from the capital; as they supposed the people would lay the blame on the new order of things, and thus be difgusted with the revolution.

(182)

affaffination the most speedy method of bringing the contest to an end favourable to their defigns. Unaccustomed to govern freemen, they dreamt not of the energy of a nation shaking off it's fetters; or, if their classical reveries had taught them a respect for man, whilst reading the account of that brave handful of spartans, who drove back, at the straits of Thermopylæ, millions of marshalled flaves; they had no conception, that the cause of liberty was still the same, and that men obeying her impusse will always be able to result the attacks of all the enervated mercenaries of the globe.

The imaginations of the parifians, full of plots, created hourly many of the objects of terrour from which they flarted; though the troops being in motion around Paris naturally produced many falfe alarms, that their fufpicious temper might have exaggerated fufficiently, without the help of invention. Various accounts of maffacres and affaffinations were confequently brought to the *bôtel-de-ville*, which inflamed the people, though afterwards they proved to be the idle rumours of fear. Thus much, however, appeared certain; a fquadron of huffars had actually been feen 3 hovering hovering about the entrance of the fauxbourg Saint-Antoine, who disappeared when two companies of the french guards approached. The people of the fame fauxbourg obferved alfo, that the cannons of the Baftille were turned towards their ftreet. On receiving this information, a mellage was fent from the committee to the governor of the Bastille, to expostulate with him; and one to each of the diffricts, defiring them to found an alarm throughout, to break up the pavement of the ftreets, dig ditches, and oppofe every obstacle, in their power, to the entrance of the troops. But, though the accounts of the hoftile demeanour of fome of the detachments in the fkirts of Paris excited terrour, there was still reason to doubt the real disposition of the foldiery; for a confiderable number, belonging to different regiments, had prefented themfelves at the barriers with arms and baggage, declaring their decided intention to enter into the fervice of the nation. They were received by the diffricts, and conducted to the hôtel-de-ville : and the committee distributed them amongst the national troops, with the precaution neceffary to guard against the furprife of treason.

'The deputation, fent to the Bastille, now_ returned, to give an account of their miffion. They informed the committee, that the people, rendered furious by the menacing polition of the cannon, had already furrounded the walls; but that they had entered without much difficulty, and were conducted to the governor, whom they had requefted to change the difpolition of his cannons; and that the reply he gave was not as explicit as they could have wished. They then demanded to pass into the fecond court, and did not without great difficulty obtain permiffion. The little drawbridge, they continued, was let down; but the great one, which led to this court yard was raifed, and they entered by an iron gate, opened at the call of the governor, In this court they had feen three cannons ready for action, with two cannoneers, thirty-fix fwifs, and a dozen of invalids, all under arms; and the staff officers were also affembled.-They immediately fummoned them, in the name of the honour of the nation, and for the fake of their country, to change the direction of the cannons; and, at the inftance even of the governor himfelf, all the officers and foldiers fwore, that the cannons fhould not be fired, or would they make any ufe of their arms, unlefs they were attacked. In fhort, another deputation from one of the diffricts had likewife been received with great politenefs by the governor; and while they were taking fome refreshment, he had actually ordered the cannons to be drawn back; and a moment after they were informed, that the order was obeyed.

To calm the people, these very men defcended the ftair-cafe of the bôtel-de-ville, to proclaim the affurances they had received of the amicable intentions of the governor; but, whilft the trumpet was founding to demand filence, the report of a cannon from the quarter of the Bastille was heard; and at the fame moment, an immenfe crowd precipitated themfelves into the fquare, fronting the hotel, with the cry of treason. And to support the charge, they brought with them a citizen, and a foldier of the french guards, both wounded. The rumour was, that fifteen or twenty more, wounded at the fame time, were left to be taken care of, in different houses on the way; for that the governor, Delaunay, had let down the first draw-bridge to engage the people to approach, who were demanding 5

demanding arms; and that they, entering with confidence on this invitation, had immediately received a difcharge of all the mufketry of the fortrefs. This report, confirmed by the prefence of the two wounded men, demonstrated to the committee the perfidy of the troops who guarded the Baftille, and the neceffity of fending fuccour to those, who, without order or fufficient force, had commenced the attack. Mean time the fury of the people was directed against the mayor, who endeavoured by various fubterfuges to appeale the rage which had been excited by his vain promifes of procuring arms. He had, it is truc, feveral times difperfed the multitude by fending them to different places with orders for arms, where he knew they were not to be found; and now, to filence the fufpicions that threatned to break out in fome dreadful acts of violence, involving the whole committee in the fame deftruction, he offered to make one of the third deputation ; the fecond appearing to be detained, to remonstrate with Delaunay, and try to prevent an effusion of blood. A drum and colours were ordered to attend them, becaufe it was fupposed, that the want of some fignal had prevented

(187)

prevented the others from executing their commission.

Shortly after their departure, however, the fecond deputation returned, and informed the committee, that, in their way to the Bastille, they had met a wounded citizen, carried by his companions, who informed them, that he had received a fhot from a fufil, fired from the Bastille into the street St. Antoine: and that immediately after they had been ftopped by a crowd, who were guarding three invalids, taken firing on their fellow citizens. Judging by these events, added they, that the danger was increasing, we hastened our steps, animated by the hope of putting a ftop to fuch an unequal combat. Arrived within a hundred paces of the fortrefs, we perceived the foldiers on the towers firing upon the ftreet St. Antoine, and we heard the report of the guns of the citizens in the court, difcharged on the garrifon. Drawing nearer, we made feveral fignals to the governor, which were either unobserved, or difregarded. We then approached the gate, and faw the people, almost all without any thing to defend themfelves, rufhing forward exposed to the brifk fire of artillery, that hailed directly down upon

upon them, making great havoc. We prevailed on those who had arms, to stop firing for a moment, whilft we reiterated our fignal of peace; but the garrifon, regardless of it, continued their discharges, and we had the grief to fee fall, by our fides, feveral of the people, whole hands we had ftopped. The courage of the reft, again inflamed by indignation, pushed them forward,---Our remonstrances, our prayers, had no longer any effect; and they declared, that it was not a deputation they now wifhed for .--- It was the fiege of the Baftille---the destruction of that horrible prifon---the death of the governor, that they demanded, with loud cries. Repulfed by these brave citizens, we partook their momentary indignation, fo fully justified by the abominable act of perfidy, with which they charged the governor.--They then repeated to us the information which has already reached you-that in the morning a crowd having approached the Bastille to demand arms, the governor had allowed a certain number to enter, and then had fired upon them. Thus the treason of the governor had been the first fignal of a war, that he himfelf had begun with his fellow citizens, and

and feemed willing to continue obstinately, fince he refused to attend to the deputation. Through all parts it was now refounded.....' Let us take the Bastille !'....And five pieces of cannon, conducted by this cry, were hastening to the action.

Some time after, the third deputation alfo came back, and recounted, that, at the fight of their white flag, one had been hoifted on the top of the Bastille, and the foldiers had grounded their arms ;---that, under the aufpices of these enfigns of peace, the deputies had engaged the people, in the name of the permanent committee, to retire to their diffricts, and take the measures the most proper to re-establish tranquillity—and, that this retreat was actually taking place; the people all naturally paffing through the court where the deputation remained.-When, notwithstanding the white emblem of a pacific disposition, displayed on the tower, the deputies faw a piece of cannon planted directly at the court, and they received a fudden difcharge of mufketry, which killed three perfons at their feet-that this atrocity, at the moment they were calming the people, had thrown them into a tranfport of rage; and many of them had even held their bayonets at the breafts of the deputies :

(190)

tics; faying, ' you are alfo traitors, and have ' brought us here that we might be more ' eafily killed'---and it would have been difficult to calm them, if one of the deputies had not bid them observe, that they shared the same danger. The effervefcence then abating, they haftened back and met 300 of the french guards, followed by the cannons taken at the invalids; all marching with a quick flep, crying that they were going to take the Bastille. One of the deputies, who had been feparated from the reft, further recited ;---that having been obliged to fcramble over the dead and dying to cfcape, the people, who recognized him as an elector, defired him to fave himfelf-for that the treason was manifest. It is rather 'you, my friends, he replied, who ought to 'retire; you who hinder our foldiers and ' cannons from entering this encumbered court, ' where you are all going to perish, for no ' purpofe.' But, that they interrupted him in a transport, exclaiming-' No !-No ! our ' dead bodies will ferve to fill up the trench.' He therefore retired with the balls hiffing about his ears. These recitals, and the rumour of the fecond act of treachery, fpreading through

(191)

through the city, violently agitated minds already alive to fuspicion.

Fresh crowds continually rushed into the botel-de-ville, and again they threatened to fet fire to it, repeating how many times the mayor had deceived them. And, when he attempted to calm them by making plaufible excufes, they ftopped his mouth by faying, with one voice,--- 'he feeks to gain time by ' making us lofe our's.' Two intercepted billets also having been read aloud, addreffed to the principal officers of the Bastille, defiring them to stand out, and promising fuccour; increased the public fury, principally directed against the governor of the Bastille, the mayor, and even the permanent committee.-Outcry followed outcry, and naked arms were held up denouncing vengeancewhen an old man exclaimed, my friends, what do we here with these traitors !- Let us march to the Bastille! at this cry, as at a fignal of victory, all the people haftily left the hall, and the committee unexpectedly found themselves alone.

In this moment of folitude and terrour, a man entered with affright visible on every feature, faying, that the square trembled with the

(192)

the rage of the people; and that they had devoted all of them to death.—' Depart !' he exclaimed, running out, ' fave yourfelves ' while you can—or you are all loft !' But they remained ftill; and were not long permitted in filence to anticipate the approach of danger; for one party of people following another, brought in a number of their wounded companions :—and those who brought them, described with passion the carnage of the citizens factificed under the ramparts of the Bastille. This carnage, the military officers attributed to the disorder of the attack, and to the intrepidity of the assistants still greater than the disorder.

The accounts of the flaughter, neverthelefs, were certainly very much exaggerated; for the fortrefs appears to have been taken by the force of mind of the multitude, preffing forward regardlefs of danger. The ardour of the befiegers, rather than their numbers, threw the garrifon into confusion; for the Bastille was justly reckoned the strongest and most terrific prifon in Europe, or perhaps in the world. It was always guarded by a confiderable number of troops, and the governor had been previously prepared for it's defence; but the unexpected impetuofity of the parifians was fuch as nothing could withftand. It is certain, that Delaunay, at first, despised the attempt of the people; and was more anxious to fave from injury or pillage, a fmall elegant house he had built in the outer court, than to avoid flaughter. Afterwards, however, in the madness of defpair, he is faid to have iolled down large maffes of ftone from the platform on the heads of the people, to have endeavoured to blow up the fortrefs, and even to kill himfelf. The french guards, it is true, who mixed with the multitude, were of effential fervice in ftorming the Bastille, by advising them to bring the cannon, and take fome other measures, that only military experience could have dictated; but the enthusiafm of the moment rendered a knowledge of the art of war needless; and resolution, more powerful than all the engines and batteries in the world, made the draw-bridges fall, and the walls give way.

Whilft then the people were carrying every thing before them, the committee only thought of preventing the further effusion of blood. Another deputation was therefore nominated, more numerous than had hitherto been

(194)

been fent; and they were just fetting out on this errand of peace, when fome voices announced, that the Bastille was taken. Little attention, however, was paid them; and the news was fo improbable, that the impression made by the runnour was not fufficiently strong to flop the outrages of the mob, who still were menacing the mayor and the committee.---When a fresh uproar, heard at first at such a dislance that it could not be distinguished, whether it were a cry of victory or of alarm, advancing with the crash and rapidity of a tempest, came to confirm the unlooked for intelligence.--For the Bastille was taken !

At the inftant even the great hall was inundated by a crowd of all ranks, carrying arms of every kind.—The tumult was inexpreffible—and to increafe it, fome one called out, that the hotel was giving way, under the mingled fhout of victory and treafon ! vengeance and liberty !—About thirty invalids and fwifs foldiers were then dragged into the hall, whofe death the multitude imperioufly demanded.—Hang them ! Hang them ! was the univerfal roar.

An officer of the queen's regiment of guards (M. Elie) was brought in on the fhoulders of the

the conquerors of the Bastille, and proclaimed by them, as the first of the citizens, who had just made themselves masters of it. The efforts he used to repress the testimonies of honour, which were lavished on him, were of no avail; and he was placed, in fpite of his modefty, on a table opposite the committee, and furrounded by the prifoners, who feemed to be standing in fearful expectation of their doom. In this fituation he was crowned, and trophies of arms awkwardly placed around, to which fentiment and circumstances gave dignity. All the plate taken at the Bastille was brought to him, and his comrades preffed him, in the most earnest manner, to accept it, as the richest fpoil of the vanquished enemy. But he refuled with firmnels, explaining the motives of his refufal fo eloquently, he perfuaded all who heard him, that the fpoil did not belong to them; and that patriotifm, jealous only of glory and honour, would blufh at receiving a pecuniary recompense.-And, making a noble use of the ascendency which he had over the people, he began to recommend moderation and clemency.-But he was foon interrupted by the account of the death of Delaunay; feized in the court of the Bastille, and 02

(196)

and dragged by the furious populace almost to the *hôtel-de-ville*, before he was maffacred. ---And foon after the death of three other officers was reported.

The prifoners liftened to thefe tales with the countenances of victims ready to be facrificed, whilst the exasperated crowd demanded their inflant execution. One of the electors spoke in their favour, but was fcarcely permitted to go on. The people, indeed, were principally enraged against three of the invalids, whom they accufed of being the cannoneers, that had fired fo brifkly on the citizens. One of them was wounded, and confequently infpired more compassion. The marquis de la Salle placed himself before this poor wretch, and forcing, in fome degree, the people to hear him, he infifted on the authority which he ought to have as commander in chief; adding, that he only wished to secure the culprits, that they might be judged with all the rigour of martial law. The people feemed to approve of his reafoning; and taking advantage of this favourable turn, he made the wounded invalid pafs into another apartment.-But, whilft he was preferving the life of this unfortunate man, the mob hurried the other

other two out of the hall, and immediately hung them on the adjacent lamp-poft*. The effervescence, nevertheless, in spite of this overflowing of fury, still continued, and was not even damped by these cruel acts of retalia-Two fentiments agitated the public tion. mind----the joy of having conquered, and the defire of vengeance. Confused denunciations of treason resounded on all fides, and cach individual was eager to fhow his fagacity in discovering a plot, or fubfituted fuspicion instead of conviction with equal obstinacy. The mayor, however, had given fufficient proofs of his difpolition to fupport the court, to justify the rage which was breaking out against him; and a general cry having been raifed around him, that it was necessary for him to go to the palais royal, to be tried by his fellow citizens, he agreed to accompany the people.

Mean time the clamour against the rest of the invalids redoubled. But the french guards, who entered in groups, requested as a recompense for the fervice which they had rendered to their country the par- O_3 don

• The lamp-pofts, which are only to be found in fquares, and places where there are not two rows of houses, are much more substantial than in England. don of their old comrades; and M. Elie joined in the request; adding, that this favour would be more grateful to his heart, than all the gifts and honours which they wished to lavish on him. Touched by his eloquence, fome cried out-Pardon! and the fame emotion fpreading throughout the circle-Pardon! Pardon! fucceeded the ferocious demand of yengeance, which had hitherto fliffed fympathy. And to affure their fafety, M. Elie propofed making the prifoners take an oath of fidelity to the nation and the city of Paris : and this proposition was received with testimonies of general fatisfaction. The oath being administered, the french guards furrounded the prifoners and carried them away, in the midst of them, without meeting with any refiftance.

The committee now endeavoured to reeftablish fomething like order, for in the tumult the table had been broken down, and destruction menaced on every fide-when a man entered to inform them, that an unknown, but, indeed, a merciful hand had fhot the mayor, and thus by the only poffible mean fnatched him from the popular fury. The whole tenour of his conduct, in fact, justified the charge brought against him, and (199)

and rendered at least this effect of public indignation excufable.—So excufable, that had not the passions of the people, exasperated by defigning men, afterwards been directed to the commission of the most barbarous atrocities, the vengeance of this day could hardly be cited as acts of injustice or inhumanity.

The Baffille was taken about four o'clock in the afternoon; and after the ftruggle to fave the prifoners, fome neceffary regulations were proposed, to fecure the public fafety. The conduct of the men in office had to irritated the people, that the cry against aristocrats was now raifed; and a number of perfons of distinction were brought to the bôtel-de-ville this evening, by the reftlefs populace, who, roving about the fireets, feemed to create fome of the adventures, which were neceffary to employ their awakened fpirit. Breathlefs with victory, they, for the moment, gave a loofe to joy; but the founds of exultation dying away with the day, night brought back all their former apprehenfions; and they liftened with fresh affright to the report, that a detachment of troops was preparing to enter one of the barriers. Not, therefore, allowing themfelves to fleep on their 04

their conquering arms, this was, likewife, a watchful night; for the taking of the Baftille, though it was a proof of the courage and refolution of the parifians, by no means fecured them against the infidious schemes of the court. They had fhown their determination to refift oppreffion very forcibly; but the troops that excited their refiftance were still apparently waiting for an opportunity to deftroy them. Every citizen then hurried to his post, for their very fuccess made them the more alive to fear. The tochn was again rung, and the cannon that had forced the Baftille to furrender dragged haftily to the place of alarm. The pavement of the adjacent ftreets was torn up, with aftonishing quickness, and carried to the tops of the houfes; where the women, who were equally animated, flood prepared to hurl them down on the foldiers. -All Paris, in short, was awake; and this vigilance either frustrated the defigns of the cabal, or intimidated the hoftile force, which never appeared to have entered with earneftness into it's measures. For it is probable, that fome decifive ftroke had been concerted ; but that the officers, who expected by their prefence only to have terrified into obedience

the citizens, whofe courage, on the contrary, they roufed, were rendered irrefolute by the difaffection of the foldiers. Thus was the nation faved by the almost incredible exertion of an indignant people; who felt, for the first time, that they were fovereign, and that their power was commensurate to their will. This was certainly a fplendid example, to prove, that nothing can refist a people determined to live free; and then it appeared clear, that the freedom of France did not depend on a few men, whatever might be their virtues or abilities, but alone on the will of the nation.

During this day, while the parifians were fo active for it's fafety, the national affembly was employed in forming a committee, to be charged with digefting the plan of a conflitution, for the deliberation of the whole body: to fecure the rights of the people on the eternal principles of reafon and juffice; and thereby to guarantee the national dignity and refpectability. Towards the evening, the uncertainty of what was paffing at Paris, the mysterious conduct of the cabinet, the prefence of the troops at Verfailles, the fubfiantiated facts, and the fuspected proferiptions,

gave to this fitting the involuntary emotions. that must naturally be produced by the approach of a catafrophe, which was to decide the falvation or destruction of a state. Mirabeau, firm to his point, showed the necessity of infifting on the fending away the troops without delay; and foon after the vifcount de Noailles, arriving from Paris, informed them, that the arms had been taken from the boteldes-invalides; and that the Bastille was actually befieged. The first impulse was for them to go altogether, and endeavour to open the king's eyes; but, after fome reflection, a numerous deputation was nominated ;----to infift on the removal of the troops; and to fpeak to his majefty with that energetic franknefs, fo much more neceffary as he was deceived by every perfon by whom he was furrounded. Whilft they were absent, two perfons, fent by the electors of Paris, informed the affembly of the taking of the Baftille, and the other events of the day; which were repeated to them, when they returned with the king's vague anfwer.

A fecond deputation was then immediately fent, to inform him of these circumstances: ---To which he replied----' You more and ' more ⁶ more diffrefs my heart, by the recitals you ⁶ bring me of the miferies of Paris. But I ⁶ cannot believe, that the orders which I have ⁶ given to the troops, is the caufe of them: I ⁶ have, therefore, nothing to add to the ⁶ anfwer that you have already received from ⁶ me.⁷

This reply tended to increase the general alarm; and they determined again to prolong the fitting all night; either to be ready to receive the enemy in their facred function, or to make a last effort near the throne to fuccour the metropolis. Nothing could furpafs the anxious suspense of this situation; for the most resolute of the deputies were uneasy respecting their fate, because their personal fafety was connected with the falvation of France. Their nocturnal conversation naturally turned on the late events that had taken place at Paris; the commotions in the provinces; and the horrours of famine, ready to confume those whom a civil war spared. The old men fought for an hour of repole upon the tables and carpets; the fick refted on the benches .---All faw the fword fuspended over them, and over their country-and all feared a morrow ftill more dreadful.

Impreffed

(204)

Imprefied by their fituation, and the danger of the flate, one of the deputies (the duke de Liancourt) left his post, and fought a private audience with the king, with whom he warmly expollulated, pointing out the critical fituation of the kingdom; and even of the royal family, should his majesty perfist to fupport the prefent measures, Monsieur, the king's eldeft brother, and not only the moft honeft, but the most fensible of the blood royal, immediately coincided with the duke, filencing the reft of the cabal. They had at first treated with contempt the intelligence received of the Bastille's being taken; and now were fo flunned by the confirmation, that, at a lofs how to direct the king, they left him to follow the counfel of whoever dared to advise him .--- And he, either convinced, or perfuaded, determined to extricate himsclf out of the present difficulties, by yielding to ncceffity.

On the morning of the 15th, the national affembly, not informed of this circumftance, refolved to fend another remonstrance to the king ;---and Mirabeau, giving a sketch of the address, drew a rapid and lively picture of the exigencies of the moment, 'Tell him,'

faid he, ' that the hordes of foreigners, by ' whom we are befieged, have yesterday been ' vifited by the princes and princeffes, their ' favourites, and their minions, who, lavishing ' on them careffes and prefents, exhorted them ' to perfeverance-tell him, that the whole ' night these foreign fatellites, gorged with gold ' and wine, have, in their impious camp, ' predicted the fubjugation of France, and, ' that they invoked, with brutal vehemence, ' the deftruction of the national affembly-' tell him, that, even in his own palace, the ' courtiers have mingled in the dance to the ' found of this barbarous mufic-and, tell him, ' that fuch was the feene, which announced ⁴ St. Bartholomew.

Tell him, that the Henry, whofe memory
the world bleffes, the anceftor, whom he
ought to wifh to take for a model, allowed
provision to pass into Paris in a state of revolt, when he was in perfon besieging it;
whils ferocious counsellors are turning
back the flour, that the course of commerce
was bringing to his faithful and famished
city.'

The deputation left the hall; but was ftopped by the duke de Liancourt; who informed

(206)

formed them, that the king was then coming to reftore them to tranquillity and peace. Every heart was relieved by this intelligence; and a cynic, probably, would have found lefs dignity in the joy, than the grief of the affembly. A deputy, however, moderated thefe firft emotions, by obferving, that those tranfports formed a shocking contrast with the distress which the people had already endured. ---He added, ' that a respectful filence was ' the proper reception of a monarch during a ' moment of public forrow : for the filence of ' the people is the only lesson of kings.'

Shortly after, the king appeared in the affembly, ftanding uncovered; and without any attention to ceremony. He addreffed the representatives of the people with artful affection : for as it is impoffible to avoid comparing his prefent affectionate ftyle, with the cold contempt with which he answered their repeated remonstrances the preceding evening, it is not judging harshly to despise the affectation, and to fuggeft, that it was dictated rather by felfish prudence than by a fense of justice, or a feeling of humanity. He lamented the diforder that reigned in the capital, and requested them to think of fome method

method to bring back order and tranquillity. He alluded to the report, that the perfonal fafety of the deputies had been menaced; and, with contemptible duplicity afked, if his well-known character did not give the lie to fuch a rumour.—Reckoning then, he concluded, on the love and fidelity of his fubjects, he had given orders to the troops to repair to more diftant. quarters—and he authorized, nay, invited them, to make known his intentions to the metropolis.

This fpeech was interrupted and followed by the most lively expression of applause; though the fagacity of a number of the deputies could not poffibly have been clouded by their fympathy: and the king returning to the palace on foot, great part of the affembly efcorted him, joined by a concourse of people, who rent the air with their benedictions. The declaration of Louis, that, trufting to the representatives of the people, he had ordered the troops to withdraw from Verfailles, being fpread abroad, every perfon, feeling relieved from the oppression of fear, and unshackled from the fetters of despotism, threw off care; and the national affembly immediately appointed eighty-four of it's most refpectable

respectable members, to convey to Paris the glad intelligence; that the harraffed parifians might participate in the joy they had procured the affembly, by the most noble exertions.

Arrived at Paris, they were received with enthusiasm, as the faviours of their country; and faw there more than a hundred thousand. men in arms, formed into companies; showing the fuperiority of a nation rifing in it's own defence, compared with the mercenary machines of tyranny. The transports of the people, and the fympathy of the deputies, must have formed a highly interesting scene: fuccess elevating the heart for the moment, and hope gilding the future prospect .--- But the imagination would languidly pourtray this dazzling funshine, depressed by the recollection of the finister events, that have fince clouded the bright beams. Precluded then by melancholy reflections from rejoicing with the happy throng, it is neceffary to turn our attention to the circumstances, from which mankind may draw inftruction :--- and the first that present themselves to our notice are those which disconcerted the flagitious plan of the ministry ;- the regulations that preferved order in the metropolis;---the aftonifh-ing

ing reduction of the Bastille ;—the union of the french guards with the citizens ;—the prompt establishment of a city militia ;—and, in short, the behaviour of the people, who showed neither a thirst for pillage, nor a fondness for tumult.

The court by their criminal enterprifes had entirely diforded the political machines, that fuftained the old worn out government *; which, worm-eaten in all it's pillars, and rotten in all it's joints, fell at the firft flock never to rife again. The deftruction of the Baftille—that fortrefs of tyranny! which for two centuries had been the flame and terrour of

• 'In August 1778,' fays' Lally-Tolendal, 'the laws were 'overturned; and twenty-five millions of men without justice 'or judges;---the public treasury without funds, and with. 'out refource;---the fovereign authority was usurped by the 'ministers;---and the people without any other hope than 'the states-general;---yet without confidence in the promise 'of the king.'

And, Mounier alfo gives a fimilar fketch. We have not a fixed or complete form of government---we have not a confliction, becaufe all the powers are confounded---becaufe no boundary is traced out.---The judicial power is not even feparated from the legiflative.---Authority is difperfed; it's various parts are always in oppofition; and amidft their perpetual fhocks the rights of the lower clafs of citizens are betrayed.---The laws are openly defpifed. or rather we are not agreed what ought to be called laws.'

(210)

of the metropolis *, was the fentence of death of the old conftitution.

The junction of the three orders in fact fecuring the power of the national affembly, and making the court appear a cypher, could not fail to prove forely mortifying to it's old minions; and the fuccefs of the people on the 14th of july proclaiming their fupremacy, the courtiers, reforting to their old arts, fuggested to the king a line of conduct the most plausible and flattering to the inconfiderate partizans of a revolution; whilft it betrayed to the more difcerning a diffimulation as palpable as the motives of the advifers were flagrantly interefted. For their views being narrowed by the depravity of their character, they imagined, that his apparent acquiescence, exciting the admiration and affection of the nation, would be the fureft mode of procuring him that conlequence

* In the Bastille, it is true, were found but feven prifoners ---Yet, it ought to be remarked, that three of them had lost their reason---that, when the fecrets of the prifon-house were laid open, men started with horrour from the inspection of instruments of torture, that appeared to be almost worn out by the exercise of tyranny---and that citizens were asraid even for a moment to enter the noisome dungcons, in which their fellow-creatures had been confined for years. (211)

sequence in the government, which ultimately might tend to overthrow what they termed an upftart legiflature; and, by the appropriation of chances, reinftate the tyranny of unlimited monarchy.

This ferious farce commenced previous to that memorable epocha; and in marking the prominent features of the events that led to the difasters, which have fullied the glory of the revolution, it is impoffible to keep too near in view the arts of the acting parties; and the credulity and enthufiafm of the people, who, invariably directing their attention to the fame point, have always been governed in their fentiments of men by the most popular anarchifts. For this is the only way to form a just opinion of the various changes of men, who, fupplanting each other, with fuch aftonishing rapidity, have produced the most fatal calamities.

The cabinet, indeed, the better to difguife their fecret machinations, made the king declare, the 23d of june, that ' he annulled and ' diffolved all powers and reftrictions, which 'by cramping the liberty of the deputies ' would hinder them either from adopting the form

' form of deliberation by orders feparately, or ' in common, by the diffinct voice of the ' three orders,' abfolutely gave his fanction for conftituting the national affembly one and indivifible.--And in the fame declaration, article the 6th, he fays, 'that he will not fuffer the ^{*} cabiers, or mandates, to be regarded as dicta-' torial; for they were only to be confidered as · fimple inflructions, intrufted to the confcience ' and free opinion of the deputies, who have ' been chofen.' This was giving them unbounded latitude for their actions.-This was not only a tacit confent to their proceedings; but it was granting them all his authority to frame a conftitution.-It was legalizing their actions, even according to the arbitrary rules of the old defpotifm; and abrogating in a formal manner that imaginary authority, the fanction of which, at a former period, would have been neceffary to their existence as reprefentatives of the people.-But happily that period had paffed away; and those men, who had known no rule of action paramount to the commands of their fovereign, were now fufficiently enlightened, to demand a reftitution of their long-effranged rights ;---and a conflitution, upon which they could confolidate their liberty and national fraternity.

This imperious demand was irrefiftible; and the cabinet, unable to check the current of opinion, had recourse to those stratagems. which, leading to their ruin, has buried in the wreck all that vain grandeur elevated on the fpoil of industry, whilst it's gilding obfcured the fad objects of mifery that pined under it's shade. Lively fanguine minds, difgusted with the vices and artificial manners produced by the great inequality of conditions in France, naturally hailed the dawn of a new day, when the Baftille was deftroyed; and freedom, like a lion roufed from his lair, rofe with dignity, and calmly fhook herfelf .---With delight they marked her noble pace, without ever fuppoling that the tiger, who thirst for blood, and the whole brutal herd, must necessarily unite against her .--- Yet this has been the cafe; the dogs of war have been let loofe, and corruption has fwarmed with noxious life .--- But let not the coldly wife exult, that their heads were not led aftray by their hearts; or imagine, that the improvement of the times does not betoken a change of government, gradually taking place to meliorate the fate of man; for, in fpite of the perverfe P 3

perverse conduct of beings spoilt by the old fystem, the preponderancy of truth has rendered principles in some respects triumphant over men; and instruments of mischief have wondered at the good which they have unwittingly produced.

CHAP. IV.

(215)

CHAPTER IV.

EFFLECTIONS ON THE CONDUCT OF THE COURT AND KING. INJURIOUS CONSEQUENCES OF THE COMPLI-CATION OF LAWS. GENERAL DIFFUSION OF KNOW-LEDGE. STATE OF CIVILIZATION AMONGST THE ANCIENTS. IT'S PROGRESS. THE CROISADES, AND THE REFORMATION. EARLY FREEDOM OF BRITAIN. THE BRITISH CONSTITUTION. FATE OF LIBERTY IN EUROPE. RUSSIA. DECLINE OF THE ARISTOTELIAN PHILOSOFHY. DESCARTES. NEWTON. EDUCATION IMPROVED. GERMANY. FREDERIC II. OF PRUSSIA.

THE effect produced by the duplicity of courts must be very great, when the viciflitudes, which had happened at Verfailles, could not teach every perfon of common sense, that the moment was arrived, when fubterfuge and treachery could no longer escape detection and punishment; and that the only poffibility of obtaining the durable confidence of the people was by that ftrict attention to justice, which produces a dignified fincerity of action. For after the unravelling of the plot, contrived to cheat the expectation of the people, it was natural to fuppofe, that they would entertain the moft wakeful fufpicion of every perfon who had been privy to it.

It would have been fortunate for France, and the unhappy Louis, if his counfellors could have profited by experience. But, ftill purfuing the old track, bounding over the mine, the burfting of which had for a moment disconcerted them, we shall find, that the continual diffimulation of the king, and the ftratagems of his advifers, were the principal, though perhaps not the fole caufe of his ruin. He appears to have fometimes miftrufted the cabal; yet, with that mixture of facility and obstinacy in his character, the concomitants of indolence of mind, he allowed himfelf to be governed without attempting to form any principle of action to regulate his conduct. For if he had ever really defired to be useful to his people, and to lighten their accumulated burdens, as has been continually infifted, he was aftonishingly defective in judgment not to fee, that he was furrounded with fycophants, who fattened on their hearts blood, using his own hand to brand his name with infamy. It may poffibly be urged in reply, that this yielding temper was a proof of the king's benign defire to promote the felicity of his fubjects, and prevent the horrours of anarchy. To confute fuch remarks, it is only

2

only necessary to state, that the preparations which had been made to diffolve the national affembly, and to reduce the people to entire fubjection, if they were not his immediate contrivance, must have had his fanction, to give them efficiency; and that the tergiverfation, which he employed on this occasion. was fufficient to make every other transaction of his reign fuspected. And this will be found to be the cafe in all the fteps he afterwards took to conciliate the people, which were little regarded after the evaporation of the lively emotions they excited; whilft the want of morals in the court, and even in the affembly, made a prevailing miftruft produce a capricioufnefs of conduct throughout the empire. Perhaps, it is vain to expect, that a depraved nation, whatever examples of heroifm, and noble inftances of difinterested conduct, it may exhibit on fudden emergencies, or at the first ftatement of an useful reform, will ever purfue with steadiness the great objects of public good, in the direct path of virtuous ambition.

If the calamities, however, which have followed in France the taking of the Bastille, a noble effort, be attributed partly to ignorance,

(218)

or only to want of morals, the evils are in no degree leffened; neither does it juftify the conduct of the virulent oppofers of those manly exertions inspired by the voice of reafon. The removal of a thousand grinding oppressions had been demanded;—and promised, to delude the public; who finding, at last, that the hopes, which had softened their misery, were likely to be blasted by the intrigues of courtiers, can we wonder, that the worm these courtiers were trying to crush, turned on the foot prepared to stamp it to nothing.

The complication of laws in every country has tended to bewilder the underftanding of man in the fcience of government; and whilft artful politicians have taken advantage of the ignorance or credulity of their fellow citizens, it was impoflible to prevent a degeneracy of morals, becaufe impunity will always be a ftimulus to the paffions. This has been the caufe of the infincerity, which has fo long difgraced the courts of Europe, and pervading every clafs of men in their offices or employ, has extended it's poifon throughout the higher orders of fociety; and it will require a fimplification of laws, an eftablifhment of equal rights, rights, and the refponfibility of minifters, to fecure a juft and enlightened policy. But till this be effected, it ought not to furprize us, fhould we hear the mock patriots of the day declaiming about public reform, merely to anfwer finifter purpofes; or fhould we chance to difcover, that the moft extolled characters have ben actuated by a miferable felfifhnefs, or prompted by corroding refentment, to exertions for the public good; whilft hiftorians have ignorantly attributed the political advantages, which have been attained by a gradual improvement of manners, to their refolution, and the virtuous exercife of their talents.

And we ought not to be difcouraged from attempting this fimplification, becaufe no country has yet been able to do it; fince it feems clear, that manners and government have been in a continual and progreffive flate of improvement, and that the extension of knowledge, a truth capable of demonstration, was never at any period fo general as at prefent.

If at one epocha of civilization we know, that all the improvements which were made in arts and fciences were fuddenly overturned, both in Greece and Rome, we need not inquire,

quire, why fuperficial reafoners have been induced to think, that there is only a certain degree of civilization to which men are capable of attaining, without receding back to a ftate of barbarifm, by the horrid confequences of anarchy; though it may be neceffary to observe, that the causes which produced that event can never have the fame effect again :--becaufe a degree of knowledge has been diffuled through fociety by the invention of printing, which no inundation of barbarians can cradicate. Befides, the improvement of governments do' not now depend on the genius of particular men; but on the impetus given to the whole fociety by the difcovery of useful truths. The opposers then of popular governments may tell us, if they pleafe, that Themistocles had no motive in faving his country, but to gratify his ambition; that Cicero was vain, and Brutus only envious of the growing greatness of Cæfar.-Or, to approach our own times ;---that, if the fupercilious Wedderburne had not offered an indignity to Franklin, he never would have become an advocate for american independence; and that, if Mirabeau had not fuffered in prifon, he never would have written against the lettres de cachet, or espoused the cause of the people.--All of which assertions I am willing to admit, because they exactly prove what I wish to enforce; namely, that---though bad morals, and worfe laws, have helped to deprave the passertions of men to such a degree, as to make the benefits which society have derived from the talents or exertions of individuals to arise from selfiss considerations, still it has been in a state of gradual improvement, and has arrived at such a pitch of comparative perfection, that the most arbitrary governments in Europe, Russia excepted, begin to treat their such a selfiss as human beings, feeling like men, and with some powers of thinking.

The moft high degree of civilization amongft the ancients, on the contrary, feems to have confifted in the perfection the arts, including language, attained; whilft the people, only domefticated brutes, were governed and amufed by religious fhows, that ftand on record as the moft egregious infult ever offered to the human underftanding. Women were in a ftate of bondage; though the men, who gave way to the moft unbridled exceffes, even to the outraging of nature, expected that they fhould be chafte; and took the only method method to render them fo in fuch a depraved flate of fociety, by ruling them with a rod of iron; making them, excepting the courtezans, merely household, breeding animals.

The flate of flavery, likewife, of a large proportion of men, tended probably, more than any other circumflance, to degrade the whole circle of fociety. For whilft it gave that air of arrogance, which has falfely been called dignity, to one clafs, the other acquired the fervile mien that fear always impreffes on the relaxed countenance. It may be delivered, I fhould imagine, as an aphorifm, that when one leading principle of action is founded on injuffice, it fophifficates the whole character.

In the fystems of government of the ancients, in the perfection of the arts, and in the ingenious conjectures which supplied the place of science, we see, however, all that the human passions can do to give grandeur to the human character; but we only see the heroisin that was the effect of passion, if we except Aristides. For during this youth of the world, the imagination alone was cultivated, and the fubordinate understanding merely exercifed to regulate the taste, without extend-

(223)

ing to it's grand employ, the forming of principles.

The laws, made by ambition rather than reafon, treated with contempt the facred equality of man, anxious only to aggrandize, first the flate and afterwards individuals: confequently, the civilization never extended beyond polifhing the manners, often at the expence of the heart, or morals; for the two modes of expression have, I conceive, precisely the fame fignification, though the latter may have more extent. To what purpofe then do femi-philosophers exultingly show, that the vices of one country are not the vices of another; as if this would prove, that morality has no folid foundation ; when all their examples are taken from nations just emerging out of barbarifm, regulating fociety on the narrow fcale of opinions fuggefted by their paffions, and the necessity of the moment? What, indeed, do these examples prove ? Unless they be allowed to fubftantiate my observation, that civilization has hitherto been only a perfection of the arts; and a partial melioration of manners, tending more to embellifh the fuperiour rank of fociety, than to improve the fituation of all mankind. Sentiments 5

timents were often noble, fympathies justyet the life of most men of the first class was made up of a feries of unjust acts, because the regulations thought expedient to cement fociety, did violence to natural juffice. Venerable as age has rendered many of thefe regulations, cold fubftitutes for moral principles, it would be a kind of facrilege not to ftrip them of their gothic vefts. And where then will be found the man who will fimply fay-that a king can do no wrong; and that, committing the vileft crimes to fully his mind, his perfon still remains facred ?---Who will dare to affert, that the prieft, who takes advantage of the dying fears of a vicious man, to cheat his heirs, is not more defpicable than a highwayman ?---or that obedience to parents fhould go one jot beyond the deference due to reason, enforced by affection?-And who will coolly maintain, that it is just to deprive a woman, not to infift on her being treated as an outcast of fociety, of all the rights of a citizen, becaufe her revolting heart turns from the man, whom, a hufband only in name, and by the tyrannical power he has over her perfon and property, fhe can neither love nor respect, to find comfort in a more congenial

congenial or humane bosom? These are a few of the leading prejudices, in the prefent conftitution of fociety, that blaft the bloffoms of hope, and render life wretched and ufelefs-And, when fuch were tolerated, nay, reckoned facred, who can find more than doubtful traces of the perfection of man in a fystem of affociation pervaded with fuch abufes? Voluptuoufnefs alone foftened the character down to tenderness of heart; and as tafte was cultivated, peace was fought, rather because it was convenient, than because it was just. But, when war could not be avoided, men were hired by the rich to fecure to them the guiet enjoyment of their luxuries; fo that war, become a trade, did not render ferocious all those who directly, or indirectly waged it.

When, therefore, the improvements of civil life confifted almost entirely in polishing the manners, and exercising the transient sympathies of the heart, it is clear, that this partial civilization must have worn itself out by destroying all energy of mind. And the weakened character would then naturally fall back into barbarism, because the highest degree of sensual refinement violates all the Q genuine genuine feelings of the foul, making the understanding the abject flave of the imagination. But, when the advances of knowledge shall make morality the real basis of social union, and not it's shadow the mask of solfithness, men cannot again lose the ground so furely taken, or forget principles, though they may accomplishments.

And that a civilization founded on reafon and morality is, in fact, taking place in the world, will appear clear to all thofe, who have confidered the atrocious vices and gigantic crimes, that fullied the polifh of ancient manners. What nobleman, even in the flates where they have the power of life and death, after giving an elegant entertainment, would now attract the deteftation of his company, by ordering a domeftic to be thrown into a pond to fatten the fifh.*—What tyrant would dare, at this time, to poifon his brother at his own table; or ftab his enemy's mother, not to mention his own, without co-

* The cruelties of the half civilized romans, combined with their unnatural vices, even when literature and the arts were most cultivated, prove, that humanity is the offspring of the understanding, and that the progress of the sciences alone can make men wifer and happier. louring over the deed? and do not the exclamations against boxing matches, in England, alfo prove, that the amphitheatre would not now be tolerated, much less enjoyed? If the punishment of death be not yet abolished, tortures worfe than twenty deaths are exploded, merely by the melioration of manners. A human being is not now forced to feed the lamp that confumes him; or allowed vainly to call for death, whilft the flesh is pinched off his quivering limbs. Are not, likewife, many of the vices, that formerly braved the face of day, now obliged to lurk, like beafts of prey, in concealment, till night allows them to roam at large. And the odium which now forces feveral vices, that then paffed as merely the play of the imagination, to hide their heads, may chafe them out of fociety, when justice is common to all, and riches no longer stand in the place of sense and virtue. Granting then to the ancients that favage grandeur of imagination, which, clashing with humanity, does not exclude tenderness of heart, we should guard against paying that homage to fentiment, only due to principles formed by reason.

Their

Their tragedies, this is still but a cultivation of the paffions and the tafte, have been celebrated and imitated fervilely; yet, touching the heart, they corrupted it; for many of the fictions, that produced the most striking ftage effect, were absolutely immoral. The fublime terrour, with which they fill the mind, may amuse, nay, delight; but whence comes the improvement? Befides, uncultivated minds are the most fubject to feel astonishment, which is often only another name for fublime fenfations. What moral leffon, for example, can be drawn from the ftory of Ocdipus, the favourite fubject of fuch a number of tragedies ?--- The gods impel him on, and, led imperioufly by blind fate, though perfectly innocent, he is fearfully punifhed, with all his haples race, for a crime in which hl. will had no part.

Formerly kings and great men openly defpiled the justice they violated; but, at prefent, when a degree of reason, at least, regulates governments, men find it necessary to put a gloss of morality on their actions, though it may not be their fpring. And even the jargon of crude fentiments, now introduced into conversation, flows to what fide leans

leans vanity, the true thermometer of the times.—An affectation of humanity is the affectation of the day; and men almost always affect to posses the virtue, or quality, that is rising into estimation.

Formerly a man was fafe only in one civilized patch of the globe, and even there his life hung by a thread. Such were the fudden viciffitudes, which, keeping the apprehention on the firetch, warmed the imagination, that clouded the intellect. At prefent a man may reafonably expect to be allowed tranquilly to follow any fcientific purfuit; and when the understanding is calmly employed, the heart imperceptibly becomes indulgent. It is not the fame with the cultivation of the arts. Artifts have commonly irritable tempers; and, inflaming their passions as they warm their fancy, they are, generally speaking, licentious; acquiring the manners their productions tend to fpread abroad, when tafte, only the refinement of weakened fenfations, stifles manly ardour.

Tafte and refined manners, however, were fwept away by hordes of uncivilized adventurers; and in Europe, where fome of the feeds remained, the flate of fociety flowly Q_{3} meliorating

meliorating itfelf till the feventcenth century, nature feemed as much defpifed in the arts, as reason in the sciences. The different profeffions were much more knavish than at prefent, under the veil of folemn flupidity. Every kind of learning, as in the favage state, confified chiefly in the art of tricking the vulgar, by impreffing them with an opinion of powers, that did not exist in nature-The pricft was to fave their fouls without morality; the phyfician to heal their bodies without medicine; and justice was to be administered by the immediate interpolition of heaven :---all was to be done by a charm. Nothing, in fhort. was founded on philosophical principles; and the amusements being barbarous, the manners became formal and ferocious. The cultivation of the mind, indeed, confisted rather in acquiring languages, and loading the memory with facts, than in exercifing the judgment; confequently, reafon governed neither law, nor legiflation; and literature was equally devoid of tafte. The people were, ftrictly fpeaking, flaves; bound by feudal tenures, and ftill more oppressive ecclesiaftical reftraints; the lord of the domain leading them to flaughter, like flocks of fheep; and the ghoftly father drawing

(231)

drawing the bread out of their mouths by the idleft impofitions. The croifades, however, freed many of the vaffals; and the reformation, forcing the clergy to take a new ftand, and become more moral, and even wifer, produced a change of opinion, that foon appeared in humanizing the manners, though not in improving the different governments.

But whilst all Europe was enflaved, fuffering under the caprice or tyranny of defpots, whole pride and reftlefs ambition continually diffurbed the tranquillity of their neighbours; the britons, in a great degree, preferved the liberty that they first recovered. This fingular felicity was not more owing to the infular fituation of their country, than to their fpirited efforts; and national profperity was the reward of their exertions. Whilft, therefore, englishmen were the only free people in existence, they appear to have been not only content, but charmed with their conftitution; though perpetually complaining of the abufes of their government. It was then very natural, in fuch an elevated fituation, for them to contemplate with graceful pride their comparative happinefs; and taking for granted, that it was the model of perfection, they never feero Q 4

(232)

feem to have formed an idea of a fyftem more fimple, or better calculated to promote and maintain the freedom of mankind.

That fystem, so ingenious in theory, they thought the most perfect the human mind was capable of conceiving; and their contentions for it's support contributed more to perfuade them, that they actually possessed an extensive liberty, and the best of all possible governments, than to secure the real possible governments, that to secure the real possible governments, that the habeas corpus act passed; or before the revolution of 1688, but the temper of men; it is a fufficient demonstration, that it was a government resting on principles emanating from the consent, if not from the sense of the nation.

Whilft liberty had been confumed by the lafcivious pleafures of the citizens of Venice and Genoa;—corroded in Switzerland by a mercenary ariftocracy;—entombed in the dykes of the covetous Hollanders;—driven out of Sweden by an affociation of the nobles;—and hunted down in Corfica by the ambition of her neighbours;—France was infenfible to her value;—Italy, Spain, and Portugal, cowering under a contemptible bigotry, which fapped the remains of the rude liberty they had enjoyed, formed no political plans ;---and all Germany was not only enflaved, and groaning beneath the weight of the most infulting civil tyranny, but it's shackles were riveted by a redoubtable military phalanx .--- Despotism, in fact, had existed in that vaft empire for a greater length of time than in any other country;-whilft Ruffia ftretched out her arms with mighty grafp, embracing Europe and Afia. Sullen as the amphibious bear of the north; and fo chilled by her icy regions, as to be infenfible to the charms of focial life, the threatened alternate destruction to every flate in her vicinity. Huge in her projects of ambition, as her empire is extensive, the despotism of her court feems as infatiable, as the manners of her boors are barbarous.-Arrived at that flage of civilization, when the grandeur and parade of a palace are mistaken for the improvement of manners, and the falfe glory of defolating provinces for wildom and magnanimity, the tzarina would fooner have abandoned her favourite plan of imitating the conduct of Pcter the great, in labouring to civilize her kingdom, than have allowed freedom to find a firm

firm feat in her dominions to affift her. She has vainly endeavoured, indeed, to make the fweet flowers of liberty grow under the poifonous fhade of defpotifm; giving the ruffians a falfe tafte for the luxuries of life before the attainment of it's conveniences. And this hafty attempt to alter the manners of a people has produced the worft effect on their morals: mixing the barbarifm of one flate of fociety, deprived of it's fincerity and fimplicity, with the voluptuoufnefs of the other, void of elegance and urbanity, the two extremes have prematurely met.

Thus purfued and miftaken, liberty, though fill exifting in the fmall ifland of England, yet continually wounded by the arbitrary proceedings of the britifh miniftry, began to flap her wings, as if preparing for a flight to more aufpicious regions—And the angloamericans having carried with them to their place of refuge the principles of their anceftors, fhe appeared in the new world with renovated charms, and fober matron graces.

Freedom is, indeed, the natural and impreferiptible right of man; without the enjoyment of which, it is impoffible for him to become either a reafonable or dignified being. Freedom

Freedom he enjoys in a natural state, in it's full extent : but formed by nature for a more intimate fociety, to unfold his intellectual powers, it becomes necessary, for carrying into execution the main objects, which induces men to establish communities, that they should furrender a part of their natural privileges. more effectually to guard the most important. But from the ignorance of men, during the infancy of fociety, it was eafy for their leaders. by frequent ulurpations, to create a despotifm, which choking up the fprings that would have invigorated their minds, they feem to have been infenfible to the deprivations under which they lived; and exifting like mere animals, the tyrants of the world have continued to treat them only as machines to promote their purposes.

In the progrefs of knowledge, which however was very tardy in Europe, becaufe the inen who ftudied were content to fee nature through the medium of books, without making any actual experiments themfelves, the benefits of civil liberty began to be better underftood : and in the fame proportion we find the chains of defpotifm becoming lighter. Still the fyftematizing of pedants, the ingenious genious fallacy of priefts, and the fupercilious meannefs of the literary fycophants of courts, who were the diftinguished authors of the day, continued to perplex and confound the underftandings of unlettered men. And no fooner had the republics of Italy risen from the asso of the roman jurisforudence, than their principles were attacked by the apostles of Machiavel, and the efforts made for the revival of freedom were undermined by the infidious tencts which he gave to his prince.

The arts, it is true, were now recovering themselves, patronized by the family of the Medicis; but the fciences, that is, whatever claimed the appellation, had ftill to ftruggle with aristotelean prejudices; till Descartes ventured to think for himfelf; and Newton, following his example, explained the laws of motion and gravity, difplaying the mechanifm of the univerfe with wonderful perfpicacity; for the analyfis of ideas, which has fince diffufed fuch light through every branch of knowledge, was not before this period applied even to mathematics. The extension of analytical truths, including political, which at first were only viewed as splendid theories, now began to pervade every part of Europe; fteal-

fealing into the very feminaries of learning in Germany, where formerly scholastic, dry theology, laborious compilations of the wanderings of the human understanding, and minute collations of the works of the ancients, had confumed the fervour of youth, and wafted the patience of age. The college and the court are always connected :--- and literature beginning to attract the attention of feveral of the petty fovereigns of the empire, they were induced to patronize those daring men who were perfecuted by the public for attacking religious or political prejudices; and allowing them an afylum at their courts, they acquired a relish for their conversation. The amusements of the chace then yielding to the pleafures of colloquial disquisition on subjects of tafte and morals, the ferocity of northern defpotifm began imperceptible to wear away, and the condition of it's flaves to become more tolerable.

Education, in particular, has been fludied; and the rational modes of infiruction in ufeful knowledge, which are taking place of the exclusive attention formerly paid to the dead languages, promife to render the germans, in the course of half a century, the most enlightened people in Europe. Whilst their fimplicity

(238)

plicity of manners, and honefty of heart are in a great degree preferved, even as they grow more refined, by the fituation of their country; which prevents that inundation of riches by commercial fources, that deftroys the morals of a nation before it's reafon arrives at maturity.

Frederic the Ild of Pruffia, with the moft ardent ambition, was neverthele's as anxious to acquire celebrity as an author, as he was fame as a foldier. By writing an examination of Machiavel's Prince, and the encouragement he gave to literary talents and abilities, he contributed very much to promote the acquirement of knowledge in his dominions; whilft, hy granting his confidence to the philofophical Hertzberg, the administration of his government grew confiderably milder.

His fplendid reputation as a foldier continued to awe the reftlefs ambition of the princes of the neighbouring flates, which afforded an opportunity to the inhabitants of the empire to follow, during the reign of tranquillity, those literary purfuits, which became fashionable even at the half civilized court of Petersbourg. It now, indeed, appeared certain, that Germany would gain in future (239)

future important political advantages; for men were beginning to prefume to think, and feanned the conduct of the fupercilious Joseph with freedom, treating his vanity with contempt.

It is by thus teaching men from their youth to think, that they will be enabled to recover their liberty; and ufeful learning is already to far advanced, that nothing can ftop it's progrefs :--- I fay peremptorily nothing; for this is not the era hefitatingly to add, fhort of fupernatural events. And though the unjuftifiable proceeding of the english courts of justice, or rather of the arbitrary chief judge Mansfield, who eftablished it as a law precedent, that the greater the truth the greater the libel, tended materially to prevent the authors of the american war from being attacked for those tyrannical steps, that ultimately tended to ftop the progress of knowledge and the diffemination of political truth; yet the clamour which was raifed against that unpopular war is a proof, that, if justice ilept, liberty of thought had not forfaken the ifland.

The overweening prefumption, however, of men ignorant of true political keience; who who beheld a nation profperous beyond example, whilft all the neighbouring flates were languifhing, and knew not how to account for it; foolifhly endeavouring to preferve this profperity, by mad attempts to throw impediments in the way of those very principles, which had raifed Great Britain to the elevated rank she has attained in Europe, ferved only to accelerate their diffusion. And France being the first among the nations on the continent, that had arrived at a civilization of manners, which they have termed the only art of living, we find was the first to throw off the yoke of her old prejudices.

It was at this crifis of things, that the defpotifm of France was completely overturned, and twenty-five millions of human beings unloofed from the odious bands, which had for centuries benumbed their faculties, and made them crouch under the most ignominious fervitude—And it now remains to obferve the effect of this important revolution, which may fairly be dated from the taking of the Bastille.

HISTORICAL AND MORAL VIEW

OF THE

FRENCH REVOLUTION.

BOOK III.

CHAPTER I.

A DEPUTATION OF THE NATIONAL ASSEMBLY ARRIVES AT PARIS. BAILLIE CHOSEN MAYOR, AND LA FAY-ETTE COMMANDER IN CHIEF OF THE NATIONAL GUARDS. RESIGNATION OF THE MINISTRY. NECKLR RECALLED. THE KING VISITS PARIS. CHARACTER OF THE PARISIANS. THE REVOLUTION URGED ON PREMATURELY. EMIGRATIONS OF SEVERAL OF THE NOBILITY AND OTHERS. CALONNE ADVISES THE FRENCH PRINCES TO STIR UP FOREIGN POWERS AGAINST FRANCE. FOULON KILLED.

THE prefence of the deputies had diffufed throughout the capital the moft intoxicating joy—for where is joy expressed with fuch infantile playfulness, fuch entire forgetfulness of to-morrow, as at Paris ? and the citizens, with their usual burst of gratitude, which always refembles adoration, made choice of Baillie, the first acting president of the national R affembly,

(242)

affembly, for mayor, and of La Fayette for commander in chief of the national guards: the name now given to the garde-bourgeoife. and the other foldiers incorporated with them. But the rapture of the parifians, as transient as lively, dwindled, as their fpirits were exhausted, into the murmurs of fuspicion .--- The ministry, faid they, who were chosen to deprcfs us, are not yet difinified; and the troops, that were to have been their inftruments of mischief, still hover round Paris, and are even augmented by the arrival of two fresh regiments at St. Denis. A rumour was fpread, that a convoy of flour had been intercepted by the order of the ministers, in it's way to Paris; and fome diffurbances at the Baftille had given colour to a report, that they had attempted to make themfelves once more masters of this important fortres. The night of the 15th was then another devoted to watchfulnefs and anxiety; and in the morning a deputation was fent to the national affembly, praying them to demand the difmiffion of the prefent ministry, and the recall of Necker.

The affembly took the fubject into deliberation; but ftill attentive to *etiquette*, they debated (243)

hated about the decorum of interfering with the appointment of the executive power. This roufed the genius of Mirabeau; and the bubbles of fear, and the ftraw-like objections of timidity, were carried away by the torrent of his eloquence. The difcuffion grew warm; yet for the prefent occasion foon became of little importance, becaufe the ministry, finding that they could not stand the brunt of the ftorm, refigned; Necker alfo, in whom the public had ftill the most implicit confidence, was invited to return ;--and the king, appearing to be anxious to give every proof of his defire to establish general tranquillity, fignified, that he wished to visit Paris. A fhort time after they were officially informed that the troops were promptly removing to more diftant quarters. The national affembly accordingly fent fome of their members to communicate to the parifians this welcome intelligence, to prepare for the reception of the king by calming the fears of the people.

And he, adhering to his purpofe, left Verfailles the next day (the 17th), though his family ridiculoufly endeavoured to diffuade him; infinuating, that he ought not to truft his

(244)

his facred perfon to the mercy of an enraged multitude; whilst rumours of projected affaffinations were repeated before him, with exaggerated comments. But, being a man of confiderable animal courage, and now almost perceiving, that all the evils with which he was ftruggling had been produced by his headftrong advisers, he seemed determined, at least for the prefent, not to be governed by their dangerous councils. And he had even the fagacity to forefee, that, convulfed as the kingdom was, they would occafion a civil war, and his life might then be still more exposed. In this inftance, as we shall find in many others, Louis appears to have been directed by a kind of glimmering inftinct of propriety; for at the prefent junclure it was particularly difcreet, confidering the little effect the pageantry of the court had produced at the feance royale, to meet the people without the parade of robes or guards. And, in fact, the hundred deputies who followed him, were now the only retinue that would have appeared refpectable in the eyes of the people. What too must have been his furprife, in fpite of all he had heard, to pass through an immenfe avenue of armed parifians with fuch

(245)

a new afpect .--- Till now he had always feen a timid multitude flying before the watch. giving vent to their vengeance in vain fongs. he faw them triumphant, moving orderly along, calling out on every fide, during the procession, for a constitution and laws! marching in unifon with their reflections, they advanced, but flowly; for, almost afraid to hope, they proceeded with the meafured ftep of thought, or rather fadnefs; and the people, whofe mind was still agitated, as the fwell of the fea continues after the form has fublided, uttered not the fhout of gladnefs--vive le roi ;--- but the menacing memento---nive la nation.

This was as ominous a found, as the woe! woe! refounding through the filent fireets of a befieged city—for it was equally the voice of fate, proclaiming the will of the people, difgufted with courts, and fufpicious even of the king. Louis feems to have been forcibly ftruck by the energy every where difplayed; and not more by the cloquent difcourfes addreffed to him at the hôtel-de-ville, than by the countenance of each citizen : for the fire of liberty had already lighted up in every R 3 face

(246)

face the ferene luftre of manly firmnefs .--- So impreffed, indeed, was his mind by the whole fcene, that, when the animated fpeakers were filent, he exclaimed in reply-'My people! " my people, may always rely on my love.'---And taking the national cockade from the hands of the mayor, he appeared at the window with his heart in his eyes, as if eager to convince the multitude of his fincerity : and perhaps confcious, that, first fubmitting to neceffity, he now yielded to feeling. At thefe words, the repetition of which flew like lightning from rank to rank, the whole concourse of people caught the electrical fympathy .----Vive-le-roi was shouted from every guarter; and revived affection glowed with the fresh fervour, that effaces the remembrance of doubts, and makes the fear of having been unjust, the most powerful spring of tendernefs. And perfuading themfelves, for the moment, that the difpolition of the king was not fo much at variance with their happiness as his conduct, they poured bleffings on him, bestowing all their execrations on his counfellors.

Pleafure, now almost mounting to a feverish height, set all Paris quickly in motion; and the (247)

the found of the thundering artillery was the fwift harbinger of the tidings of reconciliation to Verfailles, where the royal family muft have been anxioufly alive to the events of the day.

These fudden transitions from one extreme to another, without leaving any fettled conviction behind, to confirm or eradicate the corroding diftruft, could not be feen in fuch a ftrong light any where as at Paris, becaufe there a variety of caufes have fo effeminated reafon, that the french may be confidered as a nation of women; and made feeble, probably, by the fame combination of circumflances, as has rendered these infignificant. More ingenious than profound in their refearches; more tender than impaffiened in their affections; prompt to act, yet foon weary; they feem to work only to escape from work, and to reflect merely how they shall avoid reflection. Indolently reftlefs, they make the elegant furniture of their rooms, like their houfes, voluptuoufly handy. Every thing in fhort, fhows the dexterity of the people, and their attention to prefent enjoyment,

And io paffive appears to be their imagination, it requires to be roufed by novelty; and R 4 then,

then, more lively than ftrong, the evanefcent emotions fcarcely leave any traces behind From being devoted to pleasure in them. their youth, old age is commonly paffed in fuch merely animal gratifications, that a refpectable looking aged man or woman is very rarely to be feen. Independent, likewife, of the vanity which makes them wifh to appear polite, at the very moment they are ridiculing a perfon, their great fusceptibility of disposition leads them to take an interest in all the fensations of others, which are forgotten almost as soon as felt. And these transient gufts of feeling prevent their forming those firm refolves of reafon, that, bracing the nerves, when the heart is moved, make fympathy yield to principles, and the mind triumph over the fenfes.

Befides, the climate of France is fo genial, and the blood mounted fo cheerily in the veins, even of the opprefied common people, that, living for the day, they continually basked in the funshine, which broke from behind the heavy clouds that hung over them.

It is impossible, after tracing the horrid confpiracy formed by the court against the lives (249)

lives and liberty of the people, not to feel the most ineffable contempt for that kind of government, which leaves the happiness of a nation at the mercy of a capricious minister of state. The awful and interesting lesson, which the developement of this treachery afforded, was fuch as ought to have made an indelible impreffion on their minds .-- It was a leffon, the very thought of which ftops for a moment the genial current of the heart.---It was a leffon, that fhould be repeated to mankind, to bring home to their very fenfes a conviction of the lengths to which a depraved and abfolute government will go, for the fake of holding fast it's power.-It was, in fhort, a deduction of experience, which will teach posterity that life, and every thing dear to man, can be fecured only by the prefervation of liberty.

The want of decifion in the character of Louis feems to have been the foundation of all his faults, as well as of all his misfortunes; and every moment fresh occasions to make the observation arife as we trace his misconduct, or compassionate his fituation.

To give a striking instance, it is only necelfary to turn our attention to the fatal effects that

that flowed from his confenting to affemble an army of foreigners, to intimidate the ftatesgeneral. He could not refift the court, who counfelled this measure; or filence the mifgivings of his heart, which made him averfe to the troops taking any decifive ftep, that might lead to flaughter. And ftill governed by thefe undifciplined feelings, when he difmiffed the army, he purfued the advice of the very cabal, that had led him into this errour; giving way to the wifhes of the people, yet diffembling with them even in the act of reconciliation. Thus, for ever wavering, it is difficult to mark any fixt purpofe in his actions; excepting that which does him honour-the defire to prevent the fhedding of blood. This principle has, in general, directed his conduct; though the short-fighted measures of timid humanity, devoid of strength of mind, turned all his efforts to a very contrary effect.

From the prefence of these troops, and their abortive attempt to crush liberty in the egg, the shell was prematurely broken, and the enthusias of frenchmen excited before their judgment was in any confiderable degree formed. Intoxicated by conquest, each began to defcant on the exifting abufes, to flow his own clevernefs in pointing out the remedy : and arms being once in the hands of the people, it was difficult to perfuade them to give them up for the occupations of peace. It is true, had the national affembly been allowed quietly to have made fome reforms, paving the way for more, the Bastille, though tottering on it's dungeons, might yet have flood crect.-And, if it had, the fum of human mifery could fcarcely have been increafed. For the guillotine not finding it's way to the fplendid fquare it has polluted, ftreams of innocent blood would not have flowed, to obliterate the remembrance of falfe imprifonment, and drown the groans of folitary grief in the loud cry of agony-when, the thread of life quickly cut in twain, the quivering light of hope is inftantly dashed out-and the billows fuddenly clofing, the filence of death is felt !--- This tale is foon told.--- We hear not of years languished away in misery, whilst diffolution by inches palfies the frame, or difturbs the reason: yet, who can estimate the fum of comfort blafted; or tell how many furvivors pine the prey of an imagination diltracted by forrow ?

The character of the french, indeed, had been fo depraved by the inveterate defpotifm of ages, that even amidst the heroifm which diftinguished the taking of the Bastille, we are forced to fee that fufpicious temper, and that vain ambition of dazzling, which have generated all the fucceeding follies and crimes. For, even in the most public-spirited actions, celebrity feems to have been the fpur, and the glory, rather than the happiness of frenchmen, the end.-This observation inforces the grand truth on mankind, that without morality there can be no great ftrength of understanding, or real dignity of conduct. The morals of the whole nation were deftroyed by the manners formed by the government .--- Pleafure had been purfued, to fill up the void of rational employment; and fraud combined with fervility to debafe the character ;--- fo that, when they changed their fystem, liberty, as it was called, was only the acme of tyranny---merely with this difference, that, all the force of nature being roufed, the magnitude of the evil promifed, by fome mighty concuffion, to effect it's own cure.

The reunion of the king and people not only routed, but terrified, the cabal; and as cowardly cowardly in adverfity, as prefumptuous in prosperity, they immediately took to flight different ways, and even difguifed. One man, who had long been obnoxious to the people on account of inordinate covetoufnefs, and vulgar tyranny, not foftened by the graceful condescensión of the nobility, caused it to be reported, that he was dead. The renowned marefchal Broglio fought an afylum at Luxemburgh, whilst madame Polignac fled to Basle. Thus went into exile an amiable woman, who had been the inftrument of the ambition of a family, that rapaciously availed themselves of her great favour with the queen, whole strange predilection for handfome women blighted the reputation of every one, whom fhe diftinguished.

The count d'Artois, with feveral others of the blood royal and principal nobility, likewife thought it prudent to leave the kingdom for the prefent; either to provide for their fafety, or to feek vengeance. At Bruffels they met the unquiet Calonne, who, having heard of the difmiffion of Necker, was lured back by the first glimpfe of hope. For withing to wipe away the indignity, which he had to impatiently brooked; and fondly believing, that that the army had had fufficient time to quafh the verbal difputes of the nation; he was haftening towards France, to be ready to come in for his fhare of the triumph.

To his country this meeting has proved a fource of evil, that could only have been hatched in fuch an unprincipled brain, fertile in plans of mifchief, and prone to puzzle the caule which he wanted force to subvert. His last effort for power had been to obtain a feat in the flates-general. And, had not the remembrance of his former administration stood in his way, it is probable he would have fucceeded, and there have become a flaming patriot, could he have been the leader of a party; for he poffeffed the flowy talents neceffary to procure inftantaneous applaufe in a popular affembly-a deceiving, rather than a commanding cloquence. Mirabeau. on the contrary, feems to have had from nature a ftrong perception of a dignified propriety of conduct; and truth appearing to give earnestness to his arguments, his hearers were compelled to agree with him out of respect to themselves. Leaving then plausibility far behind, he always flood forth as the fturdy champion of reason; even when, lay ing

ing down his club, he loitered to dally with the Whilft therefore Mirabeau was imagination. teaching the national affembly dignity *, the resentment of the vain-glorious Calonne, fharpened to the keeneft edge by difappointment, made him fuggeft to those creft-fallen princes, the neceffity of engaging foreign aid, to rcinstate the king in his former plenitude of power, and to heal their wounded pride. Unfortunately, the plaufibility of his manners, and the ingenuity of his arguments, awakened their fears, and nourifhed their prejudices; and quickly perfuaded to affert what they wished to believe, they protefted against the conduct of the national affembly; infinuating, that the body of the people did not fupport their pretenfions. The delusion, however, did not reft here; for he even convinced them, that, if the appeal made to the national honour of the french did not recall crowds to their chivalrous allegiance, it would not be a difficult tafk to engage all the powers of Europe in behalf of his most christian majesty, by showing them, that,

* Mirabeau appears to have been continually hurt by the want of dignity in the affembly.---By the inconfilency, which made them stalk as heroes one moment, with a true theatrical stride, and the next cringe with the stexible backs of habitual flaves.

(256)

that, if freedom were once established in France, it would soon extend beyond it's confines, bounding over the Alps and Pyrenees.

Such are the opposite fentiments, or rather conduct of court parafites, and men ftruggling to be free, that it is fufficient to contrast The deputies, whofe lives had been them. threatened, and their perfons grofsly infulted, not only excufed the ill advifed monarch for the countenance which he had given to the violation of the moft facred principles; but expressed a conciliatory disposition to all parties. The mob, it is true, in the heat of rage, inhumanly butchered two of the vile inftruments of defpotifm. But this violence offered to justice ought not to be attributed to the temper of the people, much lefs to the connivance of the national affembly, who acted with a degree of magnanimity, at this time, of which it can never be enough lamented that they have fince loft fight. The behaviour however of the hardened children of oppreffion in all countries is the fame; whether in the amphitheatre at Rome, or around the lantern-post in Paris.

The king's eldeft brother alone remained with the court, a man with more refources

of understanding in himfelf, than the rest of his family; yet, making it a point of honour to be treated like his younger brother the count d'Artois, he contributed by his rapacity to drain the royal treasure, though fuch an expensive variety of amusements was not necessary to give a zeft to his pleafures.

The noble depredators had now escaped; yet Foulon, the minister, the most desperate and pufillanimous of the gang, was taken, in fpite of his mock funeral.---I purpofely ufe the word gang; for a fqueamish delicacy with respect to terms makes us fometimes confound characters to fuch a degree, that the great villain is not fligmatized with the epithet affociated with the idea of a gallows; becaufe, by the groffeft fubverfion of reason, the aggravation of guilt has fo palliated the punishment, that the head, which would have difgraced a halter, has been respectfully fevered on a block.

Once feized, no authority could prevent the murder of this miferable wretch; and the fame evening the intendant of Paris, his fonin-law, met a death still more shocking, being prolonged

(258)

prolonged by the humane interpolition of the respectable mayor, and La Fayette, in his favour.

Strange, that a people, who often leave the theatre before the cataftrophe, should have bred up fuch monfters! Still we ought to recollect, that the fex, called the tender, commit the most flagrant acts of barbarity when irritated.-So weak is the tendernefs produced merely by fympathy, or polifhed manners, compared with the humanity of a cultivated underftand-Alas !---It is morals, not feelings, ing. which diftinguish men from the beasts of prey! These were transactions, over which, for the honour of human nature, it were to be wifhed oblivion could draw the windingfheet, that has often enwrapped a heart, whofe benevolence has been felt, but not known. But, if it be impossible to erase from the memory these foul deeds, which, like the stains of deepeft dye revived by remorfe in the confcience, can never be rubbed out-why dwell circumftantially on the exceffes that revolt humanity, and dim the lustre of the picture, on which the cye has gazed with rapture, often

(259)

often obliged to look up to heaven to forget the mifery endured on earth? Since, however, we cannot ' out the damned fpot,' it becomes neceffary to obferve, that, whilft defpotifin and fuperflition exift, the convulfions, which the regeneration of man occafions, will always bring forward the vices they have engendered, to devour their parents.

Servility, deftroying the natural energy of man, stifles the noblest fentiments of the foul. -Thus debafed, heroic actions are merely directed by the head, and the heart drops not into them it's balm, more precious than the trees of Arabia ever diffilled! Ought we then to wonder, that this dry substitute for humanity is often burnt up by the fcorching flame of revenge? This has now actually been the cafe; for there has been feen amongst the french a fpurious race of men, a fet of cannibals, who have gloried in their crimes; and tearing out the hearts that did not feel for them, have proved, that they themfelves had iron bowels. 'But, if the anger of the peo-' ple be terrible,' exclaims Mirabeau, ' it is • the S 2

(260)

the fang froid of defpotifin, that is atrocious; those fystematic cruelties, which have
made more wretches in a day than the popular infurrections have immolated in a
courfe of years! * We often fear,' adds he,'
the people, because we have injured them;
and thus are forced to fetter those we opprefs.'

The example of the capital was followed by the provinces; and all the citizens flew to arms, whilft the foldiers grounded their's, fwearing not to ftain their hands with the blood of their fellow citizens. Added to the account of the confpiracy to diffolve the ftates-

* • Let us compare,' he further adds, • the number of in-• nocents facificed by miftake, by the fanguinary maxims of • the courts of criminal judicature, and the minifterial venge-• ance exercifed fecretly in the dungeons of Vinceanes, and • in the cells of the Baftille, with the fudden and impetuous • vengeance of the multitude, and then decide on which fide • barbarity appears. At the moment when the hell created • by tyranny for the torment of it's viftims opens itfelf to the • public eye; at the moment when all the citizens have been • permitted to defeend into those gloomy caves, to poize the • chains of their friends, of their defenders; at the moment • when the registers of those iniquitous archives are fallen • into all hands; it is neceflary, that the people should be ef-• fentially good, or this manifestation of the atrocities of mi-• niflers would have rendered them as cruel as themselves!"

general

general, and maffacre their representatives, a number of idle rumours of present danger tended to make the country people not only eager to guard against they fearcely knew what, but also defirous to enter into the adventures, and share the honours of the parifians.

In all civil wars, perfonal vengeance mixing with public, or taking advantage of it, has directed the dagger of the affaffin: and in France it ought particularly to have been dreaded ; becaufe, when fear induces a man to fmother his just refentment, the festering wound is only to be cured by revenge. It is then highly probable, that most of the barba. rities in the towns were the effervescence of private anger, or the fport of depraved, uncultivated minds, who found the fame pleafure in tormenting men, as mifchievous boys in difinembering infects; for public indignation, directed against aristocratical tyranny, was elfewhere, in general, difplayed only in burning the country caftles, and the archives of nobility. But, in the country, indeed, men rarely commit fuch crimes, as lift up their reptile heads in the capital, where the rank S 3 atmosphere

atmosphere affords the noxious particles neceffary to give virulence to the poison. The vices of villagers are, in fact, rather the rich exuberance of the paffions, than the vile dregs of exhausted nature,

CHAP. II.

(263)

CHAPTER II.

THE DUKE OF LIANCOURT CHOSEN PRESIDENT. THE PIC-PLE ARM FOR THE DEFENCE OF THE COUNTRY. TUP MUNICIPAL OFFICERS APPOINTED UNDER THE OLD GOVERNMENT SUPERSEDED BY COMMITTEES. SOME PEOPLE TREACHEROUSLY DESTROYED BY SPRINGING A MINE AT A CIVIC FEAST. THE GENEVESE RESIDENT TAKEN UPBY THE PATROL. THE FRENCH SUSPICIOUS OF THE DESIGNS OF BRITAIN. NECKER RETURNS. GENERAL AMNESTY RESOLVED BY THE ELECTORS OF PARTS. DEBATE ON A DECLARATION OF RIGHTS. CLARATION OF RIGHTS SEPARATE FROM THE CONSTI-TUTION DETERMINED ON. SACRIFICES MADE BY THE NOBLES, CLERGY, &C.

THE duke of Liancourt, whole warning voice had made the king look around him, when danger was at his heels, was now chofen prefident. At this moment the obstacles, which at first clogged the exertions of the affembly, feemed to have been overcome: still fresh ones starting up threw a damp on their exultation; and the apprehensions of a famine, real or factitious, were not the leaft alarming, though the most frequent.

New confpiracies were already formed on the borders of France, by the princes, and those who had subsisted by the corruptions of the

the old fystem. But this only proved a stimulus; becaufe the nation, being determined to fecure the rights it had fo fuddenly regaincd, raifed new regiments in every part of the country, and was foon in a fituation to repel any attack, which it was poffible for all Germany to have made; the only quarter from which the fugitive princes, at that period, could expect affiftance. So rapid was the fpirit, fo general the momentum, that in the course of a week upwards of three millions of men in arms were formed into companies by a common interest resembling an electrical fyinpathy. Such was the quick fucceffion of events-Such the unanimous fenfe of the nation; and fuch the formidable force which inftantly oppofed itfelf to the impotent threats of departing despotifm. History will record this memorable era, when the difciplined forces of the most puissant tyranny vanished before the force of truth, though ftill but half unveiled; obliging the haughty fycophants to fearch for shelter in the recesses of a forest, whither they stole under cover of the night from the prefence of an injured people.

The conduct of the garde bourgeoife, during the progress of the revolution, without varnishing nifhing over the excelles produced by chulitions of zeal, is of itfelf fufficient to prove, that a national militia fhould every where take place of flanding armies, did not experience invariably atteft, that the laws were never refpected by men, whofe bufinefs is war, unlefs they are reduced to mere machines by defpotifm.

The old municipal officers, moftly fufpected, becaufe nominated by the friends of the court, were now obliged to give place to committees elected by the common voice. Thefe taking the administration of public bufinefs into their hands, a new order of things began every where to prevail. Still, however, the diffurbed imagination of the people was filled with plots, to which fome myflerious and fatal incidents gave life.

The municipality of Soiffons informed the national affembly, that troops of banditti had cut down the corn before it was ripe, and obliged the villagers to take refuge in the towns. But on further inquiry, it appeared, that this report arofe from a fimple quarrel of the peafants amongft themfelves, which had alarmed fome labourers, who flew to the neighbouring

(266)

neighbouring town, imagining that they had thousands of banditti at their heels.

Paris was allo diffurbed by an idle rumoun of a riot at St. Denis; fo ferioufly affirmed by thofe, who declared that they had been eyewitneffes of the violence, that troops and cannon were fent, but they could find no traces of the diffurbance.

Another, more ferious, had exafperated the people against the nobility, and roufed the indignation of the national assembly. A nobleman and counsellor of the parliament gave a civic feast in his castle to the inhabitants of his village; from which, on fome pretext, he was absent. All was joy and festivity; but in the midst of the dance of gladness, the fudden explosion of a mine spread around affright and death.—Hearing of this treachery, the people, catching up their rustic weapons, firebrands, hastened to the neighbouring castles; fome of which they burnt, others they demolished by pulling them down.

The recital of this atrocity produced a great effect in the national affembly; and, fays Mirabeau, ' though great affemblies are often much ' too fusceptible of theatrical emotions; and this

(267)

this narration was accompanied with circumftances, of which the invention is feldom
prefumed; and though it was alfo attefted
by a public officer; yet the atrocity of the
crime gave it an air of improbability.' This wanton act of barbarity, which the hiftorian alfo would fain believe a monftrous chimera of heated brains, was, neverthelefs, as well fubftantiated, as fuch a fact could be; which nothing, but the confeffion of the guilty party, can render abfolutely certain, becaufe it feems equally foolifh and barbarous.

These diforders, warmly represented by Lally-Tolendal, determined the affembly, on the 23d of july; to publish a proclamation, inviting all good citizens to the maintenance of order; and declaring, that to try and punish for all crimes of *leze-netion* was the fole prerogative of the national affembly, till, by the conftitution which it was about to eftablish, a regular tribunal should be instituted, for the trial of fuch offences. After endeavouring to excuse the violence, or, more properly fpeaking, to account for it, Mirabeau obferved to the affembly, ' that they ought to be ^{*} thoroughly convinced, that the continuation ⁶ of this formidable dictator would expose li-' berty berty to as much rifk as the stratagems of ' her enemies. Society,' he continues, ' would ' foon be diffolved, if the multitude, accuf-' tomed to blood and diforder, placed them-' felves above the magiftrates, and braved the ' authority of the law. Inftead of running to ' meet freedom, the people would foon throw ' themselves into the abys of fervitude; for ' danger too often rallies men round the fland-• ard of abfolute power; and in the bofom of ' anarchy, a defpot even appears a faviour. ' For Carthage is not yet deftroyed; there re-' mains a mass of instruments to impede our ' operations, and to excite divisions in an ' affembly, that has only been united by ' danger.'

Some triffing incidents, fwelled into importance by fuppolition, kept alive the inventive miltruft of the nation, to which fome innocent victims were facrificed, without allaying it's brooding propenfity to produce, like jealoufy, the evil it feared. Sufpecting every body, and a little vain of authority, the patroles of parifian citizens fometimes officioufly arrefted whomever they thought fit, without affigning a fufficient caufe; and among the reft, they ftopped the refident in France from

Geneva,

Geneva. Three letters were found on him; and one of them being addreffed to the count d'Artois, rendered fufpicious the circumftance of his tearing a fourth.

The letters were fent by the mayor of Pdris to the affembly; and the facts laid before them afforded Mirabeau an opportunity, to difplay his eloquence on a fubject, that 1ecalled to his mind abufes, which had formerly touched himfelf-the violation of private correfpondence.-Though this did not appear to be exactly the prefent queftion; for they were not intercepted letters, but letters to which chance had annexed fome fufpicious characters, to point them out for infpection. The defpotifm of opening indiferiminately all letters, to enable the government to judge of the character and fentiments of each individual, is too obvious to need animadverfion-And who, indeed, will not exclaim against the tyranny, be it even parental, that dares to fteal into the fecrets of the heart; or the impertinent curiofity, that feeks for information only to diverfify an idle life? The latter may be termed petty larceny; yet often the peace of whole families is invaded by these cowardly thefts, and quarrels are rendered irreconcilable,

by giving air to angry expressions, the utlerance folely of the paffion of the moment. The allowing letters, alfo, furreptitioufly obtained, to appear as evidence, in courts of juffice, is a grofs violation of the first principle of law ; becaufe no letters can lawfully be opened, but as other fufpected things are fought for-after information given to a magistrate, But, when feals are broken at the difcretion of an individual, and brought forward to criminate a perfon, it is to the full as unjust, as to make a man plead against himself-And for justice to be awarded in confequence of an act of injustice, is an abuse that demands investigation. But the prefent was not a cafe in point. It was not a clandestine ranfacking of all letters, to fearch for the clue of fome fuspected plot; or like the reading of the correspondence of a babbling confpirator, after the danger was over, whole letters might contain a lift of timid accomplices, who would be driven to defperation by publicity. However, the decided turn was given to the question by the bishop of Langres observing, that all ages had applauded the generofity of Pompey, who committed to the flames the letters, which the fenators had addreffed to Sertorius. The mania 2

- - -

(271)

mania of initating the romans on this began to appear, producing one of those instances of false magnanimity, that always arise from imitation: yet so trifling, indeed, in it's prefent confequence, that it would fearcely deferve to be ridiculed, much less censured, had not the same affectation afterwards brought forth more ferious and even fatal follies.

The temper also of the parifians, who mix in the world very early in life, leads them to imagine, that they have acquired the profound knowledge of the fprings of human paffions, which enables a fagacious man almost to forefee future events, only becaufe they have often detected the weaknesses of the human heart. This made them now fuppofe, that the court of Great Britain was about to profit by their inteftine troubles. The phrafeology had long been in both countries, that they were the natural enemies of each other; and the miftruftful french quickly imagined, that the english meant immediately to take vengeance for their interference in favour of the americans, by feizing fome of their West-India islands. The duke of Dorfet, in his justification of England, only changed the object of mistrust, by giving rife to some vague conjectures

(272)

jectures respecting a conspiracy for delivering Bress into the hands of the english; and, as there was no clue to lead to the discovery of the traitors, feveral nobles of Brittany, probably innocent, were arrested.

Thefe were, neverthelefs, but flight impediments; for the invigorating voice of the awakened nation gave energy to the affembly, who now named committees to expedite the prefent bufinefs, preparatory to their grand tafk of framing a conftitution. The authority and refpectability of the affembly being acknowledged, they attentively confidered the ftate of the kingdom; and, mindful of the prefent diffrefs of the people, iffued orders for the free circulation of provision, which had been obstructed by the ancient forms, fo opposite to the true principles of political economy.

At this juncture, Necker, ftill efteemed by the nation, unfortunately returned. Intoxicated by popularity, this minifter had not fufficent prudence to decline the honours, which he could not fupport by that dignity of conduct the prefent crifis required. In his way to Paris, having heard, that the life of the baron de Benzenval, commandant of the fwifs guards,

guards, who had been with Broglio, was in danger, he humanely interpoled to flop the hand of violence; and fo far he deferves praife. But when, arrived at Paris, he was received, by the lively inhabitants, as the tutelar genius of France, this apotheofis had it's ufual effect; and affuming the demi-god, at the Hotel-de-Ville, he was not content to preferve this victim from the public fury, without recommending a general amnefty; a measure which was as inconfiderately adopted, as propofed. For the electors pretending to iffue laws for the whole nation, gave great umbrage to the parifians, who had winked at the firetch of their power, which the prefling exigency of circumstances required, during the moment danger menaced the capital. The wild current thus turned, the men, who in the morning had declared, ' that liberty was fafe, fince 'Necker was allowed to watch over her,' now accufed him of ambition, and a defire to keep well with the court, by facilitating the return, or escape, of it's minions. Such in fact was the inconftancy of a people, always running after theatrical fcenes, that the tocfin was rung to denounce Necker as a courtier in one quarter of the city, at the very time the Palais T Royal

(274)

Royal was illuminated to celebrate his return as a patriot.

The bufinefs, however, being referred to the national affembly, with a modifying explanation, they decided it mildly, paying the refpect due to the good intentions from which it proceeded, though they did not pretend to fanction the hafty refolve of the electors.

After this tumult had fubfided the narrow capacity of the minister did not allow him to take a determined part in the grand work, in which the deputies were engaged. His mind had not fufficient ftrength to burft the fhackles of it's old opinions; and, acting with his ufual commercial calculations, he feems to have been one caufe of the divisions, which began to agitate an affembly, united rather by circumstances than by fentiments. Besides, the fudden emancipation of the people occafioned a delirium of joy, which required to be managed with the greatest delicacy. A vigorous ministry was certainly necessary to check the licentious spirit manifesting itself continually by acts of violence, in fo many parts of the kingdom, where tumults and affaffinations were the effects of the giddinefs of unexpected fuccefs. Whilft complaining ef

(275)

of the old government, every man in his fphere feemed to be eager to try how he himfelf could govern, and make up for the time he had delegated his authority. Befides, the procraftination of the relief looked for as the immediate confequence of the Revolution, however unavoidable, made the people not only murmur, but, difregarding all reafon, attempt to gain more by force than could, for a long time, be granted by juffice—even had juffice been unbiafed by felf-intereft.

The nation called for a conftitution; and the affembly debated about the declaration of rights inherent to man, and those he gives up when he becomes a citizen, on which they defigned to rest it, as an explanatory support.

Several members argued, that the declaration ought to conclude, and not precede the conftitution; infifting, that it was dangerous to awaken a *fomnambulift* on the brink of a precipice; or to take a man to the top of a mountain, to fhow him a vaft country that belonged to him, but of which he could not immediately claim the posseffion. It is a 'veil,' faid they, 'that it would be imprudent to raise fuddenly.—It is a fecret, that it is T_2 'neceffary

(276)

neceffary to conceal, till the effect of a good
conftitution puts them into a fituation to hear
it with fafety *.'

But Barnave terminated the fitting, though the queftion was ftill in debate, by obferving, ' that the declaration of rights was in two ' respects practically useful ;---first, as it fixed • the fpirit of the legislation, in order that it ' might not vary in future ;----and, fecondly, as it would direct the reprefentatives of the na-^s tion in the formation of laws, in all the de-* tails of legiflation, the completion of which • could only be the work of time. As to the • apprehention expressed of the people abusing ' these rights, when they acquire a knowledge 6 of them, it is,' faid he, ' futile, -- and we need ' only turn over the page of hiftory, to lole thefe vain fears; for we shall constantly find the people tranquil in the fame pro-⁶ portion as they are enlightened.'

Poizing thus the pillars of equal liberty, the difcuffion was the next day interrupted by the report made by the committee appointed for the purpofe of digefting the information fent to the affembly, of the melancholy

* These members seem to have formed a just estimate of the french character.

(277 }

choly intelligence which they daily received from the provinces.- " The taxes, the rents 'were no longer paid, the revenue was ex-'hausted, the laws were without force; and 'the focial ties almost broken.' To'remedy fo many evils, the committee proposed to the affembly to publish, as soon as possible, a folemn declaration to teftify their deep fense of the mifery of the provinces, and their difapprobation of the non-payment of taxes and rents; and to declare, that, till the affembly had time to confider the decrees neceffary to be paffed to regulate these objects, there did not exist any cause to justify similar refufals. This proposition occasioned a warm debate.

Some of the deputies reprefented, that the feudal laws were too iniquitous,—the taxes too unequally affeffed—the wretchednefs too general, to hope for any happy effect from fuch a declaration—it would foon fall into oblivion, as had done the proclamation for peace :—it would aggravate the mifery of the flate, by manifefting the impotence of the national affembly :—it would irritate even the people, who had need of comfort ; and of whom they could not, without a kind of T_3

derifion, in their present circumstances, require the payment of taxes, of which they knew well that each of them felt the injustice.

Others did not fail to infift on the danger of letting the diforder increase; on the facrednefs of property; and on the immenfe deficit with which the nation was menaced; adding, that the national affembly would become contemptible, if it did not take the most vigorous measures .--- They further dilated on the necesfity of re-establishing the authority of the courts of juffice ;--- and other arguments of the fame tendency, which would have been more conclusive, more useful, if the fupporters of the declaration had brought forward the shadow of a mode to assure it's execution. The debate from being warm, became bitter, till it was at length refolved, that a declaration fhould be iffued for the fecurity of property, and that the remaining propofals of the committee should be difcussed the next evening, the 4th of august.

But, before they feparated, the affembly was informed, that Broglio had ordered all the arms, deposited at the town-house of Thionville, to be carried away.—This step appeared appeared to them the height of imprudence, at a moment when the community was obliged to arm itfelf to watch over the public fafety.

The following morning it was decided by a great majority, that there fhould be a declaration of rights feparate from the conftitu-The fitting of the evening was imtion. patiently expected, and the oppofers of a new proclamation flattered themfelves, that they fhould fecure the general fuffrage, by making it appear, that patriotifm demanded great facrifices; and that inftead of the vain formality of an exhortation, foon defpifed by the people, it was necessary to carry real offerings to the altar of peace.-This was the purport of a speech made by one of the nobles, the viscount de Noailles; who showed, in a very forcibie manner, ' that the king-' dom, at this moment, fluctuated between ' the alternative of the destruction of fociety, ' or of a government which would be admired ' and imitated by all Europe. How is this 'government to be obtained ?' faid he, 'how ' are the relaxed ties of fociety to be ftrength-' ened ? By calming the people,' he continues, by letting them fee, that we are really em-' ployed T4

* ployed for their good; and that we refift ' them only where it is manifeftly conducive • to their intereft, that they should be refisted. · -- To attain then this tranquillity, fo necef-' fary, I propofe:

' 1ft. That it be declared, before the proclamation digefted by the committee, that • the representatives of the nation have de-' cided to levy the impost, henceforward, in · proportion to the income of each indivi-· dual.

' 2dly. That all the public charges shall, in future, be equally fupported by the whole community.

' 3dly, That all the feudal claims shall be redeemable, on a fair valuation.

'4thly, That all the manorial claims, the ' mains-mortes, and other perfonal fervices, ' shall be done away, without any ranfom.

' 5thly. That the manorial rents in poultry, ' and other kinds of provision, shall be re-⁴ deemable by the proprietor or contractor, at " a just valuation."

The duke d'Aiguillon feconded this motion, which had been warmly applauded; or rather made another tending to the fame end. For dreading the fuppression of his pension, when

when the Livre Rouge should be reviewed, he fuddenly, from being a minion of the old court, became a loud patriot. And further to evince his zeal in the caufe of liberty, he declared, ' that the infurrection found it's ex-' cufe in the vexations to which the people 'were fubject. The lords of manors,' he observes, 'feldom commit the excelles of 'which their vaffals complain; but their ' agents are often devoid of humanity, and the ' wretched husbandmen, subject to the bar-' barous feudal laws still in force, groan under ' the reftriction to which they become the 'victims. At this happy era, when united ' for the public good, and difengaged from all ' perfonal intereft, we are going to labour for * the regeneration of the flate, it feems to me, ' gentlemen, that it is necessary, before efta-' blifhing this conftitution, fo defired by the ' nation, to prove to all the citizens, that our ' intention is to establish, as foon as possible, ' that equality of rights which alone can affure ' their liberty,'

It too frequently happens, that men run from one extreme to another, and that defpair adopts the most violent measures. The french people had long been groaning under the lash

of a thousand oppressions; they were the hewers of wood, and drawers of water, for the chosen few. It was, therefore, to be apprehended, after they had once thrown off the yoke, which had imprinted on their character the hateful fcars of fcrvitude, that they would expect the most unbridled freedom, detesting all wholefome reftraints, as reins they were not now bound to obey. From obferving, perhaps, that this was the difpolition of the times, the political empirics have continually inflamed the foibles of the multitude, by flattering them. Thus the nobility, whofe order would probably lofe most by the revolution, made the most popular motions, to gain favour with the people; tickling the fpirit they could not tame. Thus also we have feen the desperate leaders of factions felecting ingeniously the terms fans-culottes, citoyen, and egalité, in order to cajole the minds of the vulgar; and hence it has happened, that, in proportion as this cajolery was more highly feafoned, the power of ruling has defcended to the most desperate and impudent of the finatterers in politics; whilft public anarchy, and private difcord, have been productive of the dreadful cataftrophes, and wanton outrages, which

(283)

which have given fuch home thrusts to the dignity of freedom.

The feudal claims that infult humanity. and fhow how near man is to the brute creation when laws are first made, were afterwards attempted to be enumerated; but a general cry of indignation and horrour prevented the deputy from finishing the frightful picture of human debasement and brutality. The veftiges of these direful oppressions, however, were still held dear by these very men, who, not having the compass of morality to direct their politics, were humane rather through weakness of nerves than foundnefs of understanding,

Be this as it may, the motion of the viscount de Noailles excited a sudden enthufiafm, mixed with anger. The members of the privileged orders, like children, fccmed to fay, by their actions, if you force me to give up this toy, it is fair that you should refign your fugar-plumb .--- One gave a blow in the face; and the retort courteous was a back-handed ftroke. For a member, that the duke d'Aiguillon should not be generous at the expence of others, proposed the immediate suppression of all places and emoluments granted 2

granted fo profusely by the court, as the heaviest burthen of the people--because obliged to support with their necessaries the luxuries of the great; who, detained as a kind of guards at court, were not only prevented from enlivening the provinces by their prefence, but distressed them by drawing away their produce. Distinguishing, however, between the pensions obtained by intrigue, and those that were the reward of actual fervices, --he moved, that the former should be suppressed.

A motion was then made, that not only feudal rights, but all the jurifdiction of the lords of manors, cftablished on the same arbitrary ground, should be abolished.

The prefident now, according to rule, perceiving that no one attempted to fpeak againft the motion, was proceeding to put it to the vote---but he paufed, reproaching himfelf for attempting to put an end-to fuch an interefting difcuffion before fuch among the clergy, as wifhed to fpeak, had had an opportunity of declaring their fentiments.

This artful compliment roufed the bifhop of Nancy to declare, ' that, the continual and ' fympathizing witneffes of the mifery of the people,

(285)

people, the clergy undoubtedly fighed after
an opportunity to contribute to their relief;
and that the motion anticipated their defire:
yet, to fhow their entire approbation of it,
he must be permitted to propose in addition,
that the price of the ransom of ecclesiastical
feudalities should not be converted to the
profit of the actual incumbent; but thrown
into a fund for the relief of the poorer part
of the body.'

The bifhop of Chartres, after approving of the facrifices already made, demanded, that the fuppreffion of the game laws fhould be joined to them. This worthy prelate painted the injuffice of those laws, not less abfurd than oppreffive, which force the farmer to be the tranquil spectator of the ravages of his harvest; condemning him to endure cruel punishments, if he follow the first impulse of nature, which would lead him to kill the animals that injure him. A number of the nobility concurred in these fentiments; for who would be out-done in heroism? and demanded the renunciations of these unnatural privileges.

The prefident de Saint-Fargeau now role, to demand an explanation relative to the taxes

(286)

of which the clergy and nobility offered to divide the weight. 'We have given,' faid he. ' hopes to the people; but we ought to give ' them fomething more fubftantial; we have ^e decreed, that, provisionally, the taxes should · continue to be paid as they have been hither-' to; that is to fay, we have referved to the ^e clergy and the nobility the benefit of their exemptions, till they are expressly revoked. · ----Why do we delay to pronounce this revo--• cation, fo ftrictly imposed in almost all our ' instructions ?--- I propose, therefore, that not only for the last fix months, but from the • very commencement of the year, all privi-· leged perfons, without exception, fupport their proportional part of the public im-' poft.'

As the discussion of the propositions of the viscount de Noailles advanced, the necessity of effacing all the traces of servitude became more and more obvious; and all the members secmed eager to point out to their colleagues the new facrifices, that ought to be made to the good of their country. One demanded the suppression of the exclusive right to warrens;—another that of fisherics; a third

(287)

third the fale of offices, and that justice should be administered gratuitously.

The parish prieft of Soupes, in the name of his brethren, joined the oblations of the poor to the hecatombs, of which the most part cost nothing to those who proposed them; ' he declared, that, animated by a desire to ' contribute to the relief of the people, they ' would relinquish, from the present time, all ' their casual (or surplice) fees.' This offer, made with great simplicity of heart, affected the affembly; nor could a very different proposal, made by the duke du Châtelet, respecting the buying up of the tithes, efface it entircly.

The transition to gaiety, when a member afked permiffion to offer alfo his fparrow, was very natural in a people, who always mix a degree of farcaftic pleafantry, the goodhumoured face of which first appears, with the most ferious things. However, after the laughter ceased,—he continued to make his demand more feriously, by observing, that an object, trifling in appearance, was a real grievance to the husbandmen; he moved, therefore, for the total demolition of all the *kove-cotes* throughout the kingdom.

The

The refpectable duke de la Rochefoucault, after having applauded all thefe propositions, remarked, that the king had given the example of freeing the ferfs in his demefnes; and that the moment was come, to extend this benefit to all the kingdom. This benevolent citizen did not ftop here; but added a wish, that, before the close of the feffions, the affembly would take into confideration the fate of the unhappy victims of covetous ness, retained in flavery under another hemisphere.

A member now made a motion, that excited tellimonics of the most fincere fatisfaction from the alfembly; it was to augment the flipends of the parish pricits, the most respectable part of the clergy.

Several dignitaries of the church, poffeffing two or more benefices, unwilling to be left behind in generofity, followed with a declaration, that, conformable to the canons, they were refolved to limit themfelves to a fingle one.

The deputies of the provinces enjoying peculiar privileges receiving a hint, that the appellation of french citizens, all partaking the fame rights, was the most glorious they could bear, itnmediately came forward to renounce renounce them. A number of propositions, more or lefs important, brought up the rear. The suppression of the first fruits; the rights of wardenship; and the abrogation of those barbarous vows, which fetter unfortunate beings for life.—In fhort, full and entire liberty for the non-catholics .--- Admission of all the citizens into all offices, ecclesiaftical, civil, and military .--- Abolition of the plurality of ecclesiaftical penfions .--- And then, not forgetting their national character, it was proposed, that a medal should be struck in commemoration of this night #; and a decree alfo paffed, conferring gratuitoufly on the king the august title, it might favour of a style that fcarcely befits the dignity of hiftory, to lay nick-name, of RESTORER OF FRENCH LIBERTY. A deputation was accordingly appointed to carry this new mark of homage to the king, and to request his prefence at a folemn Te Deum, to be celebrated throughout the kingdom .--- And behold night closed on the renowned 4th of august !

It is not poffible, fays a journalist of the day, to give a diffinct description of the U scenes

* Some french wags have laid a great strefs on these decrees passing after dinner, fcenes which were continually fhifting during this fitting.---The vivacity of the fentiments, the quick transition from a generous emotion to an epigrammatical fenfation, the diforder which made fenfibility predominate over legiflative dignity---the reciprocal miftruft, and the combat of generofity---all diversified by the amiable and feducing enthusiafm, fo characteristic of the nation, made this an epocha in the history of the revolution, on which the contemplative mind, accustomed to consider the varied character of man, will ponder.

Another observation, also, naturally occurs; for it is just to remark, as a proof of the crudeness of the political notions, not to mention principles, of these legislators, that all talked of *facrifices*, and boasted of generofity, when they were only doing common justice, and making the obvious practical comment on the declaration of rights, which they had passed in the morning.—If such were the rights of man—they were more or less than men, who with-held them; and the refignation, rather a refumption of their reason than a facrifice of their property, was called for, the moment they acknowledged the fovereignty

(291)

reignty of the people by becoming their representatives.

It is very poffible, that the next morning the different parties could fcarcely believe, that they had more than the imperfect recollection of a dream in their heads. So quick, indeed, had been the determinations of the meeting, which encroached on the midnight hour, that they had not the fober caft of thought to give them dignity. They feem in reality to have been mostly the effect of paffion, of ambition, or a vain defire of vengeance; for those who were led only by enthusiasm, and the vanity of the moment, esteemed their conduct as highly extravagant, when they had time to cool. But the commons, who had the deepest views, knew to what they had urged them, and would not let them recede.

It is true, the abolition of these privileges and powers had been strictly enjoined, in the instructions given to the deputies by their conftituents; but, it is doubtful, whether they would have been attended to, had not the most fagacious foreseen, that the neglect might occasion a civil war. Knowing, that then property would not be cautiously re-U 2 fpected,

fpected, they began by attacking that of their prefumptuous adversaries; and actually furprifed the affembly into the unanimous renunciation of all revenues arifing from feudal dues, and even into the abolition of tithes. The nobility, alfo, who faw, that they should gain more by the suppression of tithes, than they should lose by the facrifice of the obnoxions manorial fees, came into the fame fystem. The steps likewise taken to increase the falaries of the indigent clergy, the most numerous part of the body in the affembly, fecured their influence. And by deftroying the monopoly of municipal and judicial employments, the fupport of the cities was obtained.-Thus the national affembly, without a struggle, found itself omnipotent. Their only enemies were individuals, feemingly of importance, it is true, as they had been accuftomed to lead the great corporate bodies; but what was their empire, when all their former fubjects were withdrawn from their control? of these enemies, the church dignitaries were of the most confequence; but, after the confifcation of ecclefiaftical property, it would have been impossible for the court, even fuppofing a counter-revolution, to provide

(293)

vide for them; as they would have been a dead weight on the royalists.

Unfortunately, almost every thing human, however beautiful or fplendid the fuperftructure, has, hitherto, been built on the vile foundation of felfishness; virtue has been the watch-word, patriotifin the trumpet, and glory the banner of enterprize; but pay and plunder have been the real motives. I do not mean to affert, that there were not any real patriots in the affembly .--- I know there were many. By real patriots, I mean men who have studied politics, and whose ideas and opinions on the fubject are reduced to principles; men who make that fcience fo much their principal object, as to be willing to give up time, perfonal fafety, and whatever fociety comprehends in the phrafe, perfonal interest, to secure the adoption of their plans of reform, and the diffusion of knowledge.

But most of the leaders of the national affembly were guided by the vulgar import of the word, a vain defire of applause, or deep schemes of emolument. The Lameths, for instance, who had been the obsequious flaves of the queen, were among the hottest U_3 advocates

(294)

advocates for popular power; and throughout the affembly there were traces of a fimilar fpirit.

During the first struggle, the national assembly bly and the people were divided into republicans and royalists; but we shall find, from the moment all danger of disturbance appeared to be over, the higher class were receding from the patriots, and recruiting from the royalists, to form for themselves, under the appellation of the *impartiaux*, the elements of a growing ariflocracy.

(295)

CHAPTER III.

REFLECTIONS ON THE MEMBERS OF THE NATIONAL ASSEMBLY. SECESSION OF SEVERAL PSEUDO-PATRI-OTS. SOCIETY RIPE FOR IMPROVEMENT THROUCH-OUT EUROPE. WAR NATURAL TO MEN IN A SAVACE STATE. REMARKS ON THE ORIGIN AND PROGRESS OF SOCIETY. THE ARTS-PROPERTY-INEQUALITY OF CONDITIONS-WAR. PICTURE OF MANNERS IN MODERN FRANCE.

THE despotisin of the former government of France having formed the most voluptuous, artificial characters, in the higher orders of fociety, makes it lefs extraordinary to find the leading patriots men without principles or political knowledge, excepting what they had cafually gleaned from books, only read to while away an idle hour not employed in pleafure. So fuperficial indeed was their acquaintance with any fubject that demanded thought-and fo great the degeneracy of their manners, it was natural for every man of reflection to infer, that a confiderable length of time must elapse before the new order of things, which they were about to ereate, could attain stability. But this was

U4

not

not a difcouraging confideration, when it was obvious, that important advantages had already been gained by the people; and by the improvement of morals, which would neceffarily follow, it was to be prefumed, that the cvils, the old fyftem produced, would vanish before gradual amendments; whils, by a practical knowledge of political and civil liberty, the great objects of the revolution would be afcertained; namely, just laws, and equal liberty.

The depravity of the higher clafs, and the ignorance of the lower refpecting practical political fcience, rendered them equally incapable of thinking for themfelves; fo that the meafures which flattered the foibles, or gratified the weaknefs of either, were fure to have great influence in producing a fchifm in the public mind'; which gave an opportunity to the enemies of the revolution to impede it's courfe, 'And the number of the lower clafs having it's due weight, when they became free, the most daring innovators became the greatest favourites with the public, to whofe will every prudential confideration was obliged to yield.

Much had been gained on the 4th of august by the nation : the old forms of 5 feudal

This difpolition to intrigue, and want of fincerity, fo generally remarked in the French character, laid the foundation of univerfal diftruft; and the coalefced parties, who had not been actuated by a love of liberty, or regard for the profperity of the kingdom, but dexteroufly fell in with the fpirit of the day, were not aware, that a watchful, fufpicious multitude, would be as likely to miftruft them in their turn, as the court, which had thriven on the ruin of their happinefs. This was a blindnefs fo grofs, that it appears not a little wonderful, after confidering the different characters, characters, who fucceeded each other in the miniftry, or directed the helm of the flate, that men fhould not acquire fufficient judgment to adopt the integrity of conduct, with which alone people in their fenfes, awake to their intercft and rights, will ever be fatisfied.

For a vain glorious ambition, mixing with the abortions of giddy patriotifm, acts as the most fatal poifon to political disquisitions, during feafons of public ferment. The folid views of deep thinkers are adapted to the fpirit of the times, and the ftate of reafon of their compeers. And if they find, that the current of opinion, in overturning inveterate prejudices, and the decayed walls of laws, that no longer fuit the manners, threatens the destruction of principles the most facred; they ought firmly to wait at their post, until, the fervour abating, they could, by diverting the ftream, gradually reftrain it within proper bounds .- But such patriotifin is of flow growth; requiring both a luxuriant public foil, and to be foftered by virtuous emulation, Yet this emulation will never flourish in a country where intriguing fineffe, fupplying the place of exalted merit, is the fureft ladder to diffincdiffinction. It was by debafing artifices, under the old government, that men obtained favour and confequence; and whilft fuch men, men who were educated and offified by the ancient *regimen*, act on the political ftage of France, mankind will be continually diffreffed and amufed by their tragic and comic exhibitions.

Art applied to art, and stratagem against stratagem, may produce, for a time, alternate defeats; but ultimately the most cunning will triumph.

Vanity had made every frenchman a theorift, though political aphorifms were never afcertained under the reign of tyranny or caprice. The fagacious part of the nation, it is true, clearly perceived, that the period was arrived, when a revolution was inevitable; but felfifnefs being incompatible with noble, comprehensive, or laudable views, it is not wonderful, keeping in fight the national foible, that at the meeting of the ftatesgeneral every deputy had his particular plan to fuggeft. Few of the leaders embraced the fame; and acting, without coalefcing, the most violent measures were fure to be the most applauded. We shall find also, that some of the most strenuous advocates for reforming abules. abufes, and eftablifhing a confliction, when their favourite fyftems were exploded, peevifhly retired in difguft: and by afterwards venting it, have hurried into action a race of monfters, the moft flagitious that ever alarmed the world by the murder of innocents, and the mockery of juffice; and whilft the profanation of her temple, befprinkled with blood, has branded with an indelible ftigma the fanguinary brutes, the deferters cannot efcape without a fhare of the odium.

Contemplating the progress of the revolution, a melancholy reflection is produced by observing, that almost every precipitate event has been the confequence of a tenacity and littleness of mind in the political actors, whilst they were affecting a roman magnanimity of conduct—to which they appear to have been as great strangers, as they were destitute of legitimate patriotism, and political science.

We have first feen Calonne, in order to fecure his popularity and place, proposing an equalization of taxes; and, when he found that his confequence and power were lost, abandoning his country in disgust, and employing the most unwarrantable means to involve his fellow citizens in all the horrours of a civil war. We shall find, likewise, several other declaimers, for their subsequent conduct obliges me to confider them in no better light, when their plans were difregarded, if not acting the fame fhameful part, yet leaving their posts; their patriotifm expiring with their popularity.---And it will be only neceffary to keep in mind the conduct of all the leading men, who have been active in the revolution, to perceive, that the difasters of the nation have arisen from the fame miferable fource of vanity, and the wretched ftruggles of felfifinefs; when the crifis required, that all enlightened patriots fhould have united and formed a band, to have confolidated the great work; the commencement of which they had accelerated. In proportion as these defertions have taken place, the best abilities which the country contained have difappeared. And thus it has happened, that ignorance and audacity have triumphed, merely because there were not found those brilliant talents, which, pursuing the ftraight forward line of political economy, arreft, as it were, the fuffrage of every well disposed citizen .- Such talents existed in France: and had they combined, and directed their views by a pure love of their

their country, to one point; all the difafters. which in overwhelming the empire have deftroyed the repose of Europe, would not have occurred to difgrace the caufe of freedom.

Every great reform requires fystematic management; and however lightly weak daring heads may treat the gravity of fuch a remark, the pacific progress of every revolution will depend, in a very material degree, on the moderation and reciprocity of conceffions made by the acting parties. It is true, that in a nation chiefly celebrated for wit fo much prudence could fcarcely be expectedyet that is not a fufficient reafon for condemning all the principles, that produced the revolution: for liberty cannot be confidered as belonging exclusively to any particular climate, or temper of mind, as a phyfical effect. It was peculiarly urgent, indeed, to form fuch a coalition, to counteract the dangerous confequences of old prejudices. The stubborn habits of men, whom perfonal interest kept firm to their ground, it was morally certain would interrupt the tranquil march of the revolution : it would have been prudent then for men, who agreed in the main objects, to have overlooked trifling differences of opinion, till

till they were fecured: and of this feveral members feem to have been aware.*

Had the conduct of men been fincere, and had they really purfued that fraternity, about which they fo continually declaimed; they might, in confolidating the rights of french citizens, have established every political advantage, which the then state of reason was capable of adopting for the immediate benefit

* Lally-Tolendal, in particular; for giving his opinion on the fubject of two chambers, he faid :--- ' It is not doubtful 'at prefent, and for this first assembly, that a fingle chamber is preferable, and perhaps necessary-There are fo many difficulties to be furmounted, fo many prejudices • to be conquered, fo many facrifices to be made, fuch old habits to root out, so great a power to control; in a word . fo much to deftroy, and almost all to create anew. This " moment, gentlemen, which we are fo happy as to have feen, • of which it is impossible a description can be given-when · private characters, orders of men, and provinces, are vying with each other, who will make the greatest facrifices to the * public good-when all prefs together at the tribune, to · renounce voluntarily, not only odious privileges, but even • those just rights, which appear to you an obstacle to the fraternity and equality of all the citizens. This moment, egentlemen, this noble and rich enthusias which hurries ' you along, this new order of things which you have begun -all this-most affuredly, could never have been produced · but from the union of all perfons, of all opinions, and of 4 all hearts.'---

of fociety. But refentment burfting forth, which had long lain concealed (the effect of fervitude and contumely), joined with the vanity of excelling all other nations in the fcience of government, to produce an infolent audacity of conduct, which, aiming at overturning every thing, difcouraged the wavering, and frightened the timid. Defigning knaves then conceived the plan of rifing to eminence by the accumulating foibles of the multitude, who, loofened from all reftraint, were eafily caught by the infidious arts of the most contemptible anarchifts.

The object of those monsters, who were meditating the violation of the facered ties of honour and humanity, was early perceived by the more penetrating; but instead of opposing themselves to their designs, they for the most part became initiated into their clubs; whils others, more haughty, though perhaps less under the direction of principles,---if there were any among them,--emigrated, leaving their country verging towards the whirlpool of civil discord, and all it's concomitant wretchedness.

It is neceffary for us to attend clofely to these confiderations, in order to be enabled to form form a just opinion of the various revolutions which have fucceeded each other :---because, from a fuperficial view of things of this nature, we frequently attribute to the passions, or innate turpitude of man, what was mercly the effect of moral depravity. Hence it has happened, that fo many of the admirers of the revolution, in its infancy, now talk of extravagant innovations, tending to overturn all the barriers of justice,--to trample on the feelings of humanity, and to destroy every thing fplendid and beautiful,---the production of ages, industry, taste, and learning.

But this revolution did not intereft frenchmen alone; for it's influence extending throughout the continent, all the paffions and prejudices of Europe were inftantly fet afloat. That most favoured part of the globe had rifen to an aftonishing pre-eminence, though every where it's inhabitants have had to contend with diffinctions the most unnatural, and prejudices the most veteran. But, having overcome those formidable obstacles to the happinels of her citizens, fociety feems to have arrived at that point of civilization, when it becomes neceffary for governments to meliorate it's condition, or a diffolution of their Х

their power and authority will be the confequence of a wilful difregard of the intimations of the times. This is a truth, which the people have perceived; but which the parafites of courts, and the advocates for defpotifm have not been willing to believe. And befides, their fupport, it might be faid exiftence, being attached to the continuation of thofe favage abufes, they have fought with unufual intrepidity in their defence. Thus wars have been the bufinefs of courts, in which they have artfully interefted the paffions of the people.

Mcn in a favage ftate, without intellectual amufements, or even fields or vineyards to employ them, depending for fubfiftance on the cafual fupply of the chace, feem continually to have made war, one with another, or nation with nation; and the booty taken from their enemics formed the principal object of conteft, becaufe war was not, like induftry, a kind of abridgement of their liberty. But the focial feelings of man, after having been exercifed by a perilous life, flow over in long ftorics, when he reaches garrulous old age. Whilft his liftening progeny wondering at his feats, their hearts are fired with the ambition of equaling their fire. His foul alfo warmed by fympathy, feeling for the diftreffes of his fellow creatures, and particularly for the helplefs ftate of decrepit age; he begins to contemplate, as defirable, affociations of men, to prevent the inconveniencies arifing from lonelinefs and folitude. Hence little communities living together in the bonds of friendship, fecuring to them the accumulated powers of man, mark the origin of fociety: and tribes growing into nations, fpreading themfelves over the globe, form different languages, which producing different interes, and mifunderstandings, excite diftruft.

The invention of the arts now affords him employment; and it is in proportion to their extension that he becomes domestic, and attached to his home. For whilst they were in their infancy his result is temper, and favage manners, still kept alive his passion for war and plunder; and we shall find, if we look back to the first improvement of man, that as his ferocity wore away, the right of property grew facred. The prowess or abilities of the leaders of barbarians gave them likewise an ascendency in their respective dynasties; which gaining strength in proportion to the ignorance of the age, produced the diflinctions of men, from which the great inequality of conditions has originated; and they have been preferved long fince the neceffity has ceafed to exift.

During the reign of ignorance, the difagreements of flates could be fettled only by combats; and the art of dexteroufly murdering feems to have decided differences, where reafon fhould have been the arbitrator. The cuftom then of fettling difputes at the point of the bayonet, in modern Europe, has been juftified by the example of barbarians; and whilft fools continually argue from the practice of inhuman favages, that wars are neceffary evils, courts have found them convenient to perpetuate their power : thus flaughter has furnifhed a plaufible pretext for peculation.

Fortunately, in fpite of the various impediments that have thwarted the advancement of knowledge, the bleffings of fociety have been fufficiently experienced to convince us, that the only folid good to be expected from a government must refult from the fecurity of our perfons and property. And domeftic felicity has given a mild lustre to human happinels fuperiour to the falle glory of fanguinary **4** devaftadevaftation, or magnificent robberies. Our fields and vineyards have thus gradually become the principal objects of our care—and it is from this general fentiment governing the opinion of the civilized part of the world, that we are enabled to contemplate, with fome degree of certainty, the approaching age of peace.

All that could be done by a body of manners, without a foul of morals, to improve mankind, had been tried in France—The refult was polifhed flavery; and fuch an inordinate love of pleafure, as led the majority to fearch only for enjoyment, till the tone of nature was deftroyed. Yet fome few really learned the true art of living; giving that degree of elegance to domeftic intercourfe, which, prohibiting grofs familiarity, alone can render permanent the family affections, whence all the focial virtues fpring.

It is a miftake to fuppose that there was no fuch thing as domestic happiness in France, or even in Paris. For many french families, on the contrary, exhibited an affectionate urbanity of behaviour to each other, feldom to be met with where a certain easy gaiety does not fosten the difference of age and condi-

tion.

tion. The hufband and wife, if not lovers, were the civilest friends and the tenderest parents in the world-the only parents, perhaps, who really treated their children like friends: and the most affable masters and mistresses. Mothers were also to be found, who, after fuckling their children, paid a degree of attention to their education, not thought compatible with the levity of character attributed to them; whilft they acquired a portion of tafte and knowledge rarely to be found in the women of other countries. Their hospitable boards were constantly open to relations and acquaintance, who, without the formality of an invitation, enjoyed there cheerfulness free from restraint; whilst more select circles clofed the evening, by difcuffing literary fubjects. In the fummer, when they retired to their manfion houfes, they fpread gladnefs around, and partook of the amufements of the peafantry, whom they vifited with paternal folicitude. These were, it is true, the rational few, not numerous in any countryand where is led a more useful or rational life?

In the provinces, likewife, more fimplicity of manners prevailing, their morals were more

pure: though family pride, as in England, made the most noble house the royal family of each village, who vifited the grand court only to import it's follies. Befides, in France. the women have not those factitious, fupercilious manners, common to the english; and acting more freely, they have more decifion of character, and even more generofity. Rouffeau has taught them also a ferupulous attention to perfonal cleanlinefs, not generally to be feen elfewhere: their coquetry is not only more agreeable, but more natural: and not left a prey to unfatisfied fenfations, they were lefs romantic indeed than the englifh; yet many of them poffeffed delicacy of sentiment.

It is, perhaps, in a ftate of comparative idlenefs—purfuing employments not abfolutely neceffary to fupport life, that the fineft polish is given to the mind, and those perfonal graces, which are inftantly felt, but cannot be defcribed: and it is natural to hope, that the labour of acquiring the fubfiantial virtues, neceffary to maintain freedom, will not render the french less pleafing, when they become more respectable. ... -•

HISTORICAL AND MORAL VIEW

OF THE

FRENCH REVOLUTION.

CHAPTER I.

OFINIONS ON THE TRANSACTIONS OF THE FOURTH OF AUGUST. DISORDERS OCCASIONED BY THOSE TRANS-ACTIONS. NECKER DEMANDS THE ASSEMBLY'S SANC-TION TO A LOAN. A LOAN DECRFED. TITHES AEC-LISHED. DEBATE ON THE DICLARATION OF RIGHTS. THE FORMATION OF A CONSTITUTION. DEBAFE ON THE EXECUTIVE POWER. THE SUSPENSIVE VLTO APOPTED. PRETENDED AND REAL VIEWS OF THE COM-BINATION OF DESPOTS AGAINST FRANCE. DEBATL ON THE CONSTITUTION OF A SENATE. MEANS OF PEACEABLY EFFECTING A REFORM SHOULD MAKE A PART OF EVERY CONSTITUTION.

THE numerous offerings made to their country by the deputics, on the 4th of august, excited loud applause; but not without a mixture of farcastic censure, and murmurs of disapprobation.

Some blamed the decrees, which, faid they, have facrificed the property of feveral thoufand

housand families to the vain defire of popularity .--- Others complained of the neglect of those forms, by which every affembly, that afpires at putting fome maturity into it's decrees, ought to direct it's debates ;---they difapproved of an afternoon fitting;--of the rapid fucceffion of fubjects, not allowing time for any to be weighed ;---of the multiplicity of them ;---and of the continual acclamations, which rendered a calm difcuffion phyfically impoffible.-- 'What !' they continued, ' shall the most important business al-' ways be treated with the levity, which cha-⁴ racterized us before we deferved to be ' termed a nation? Eternally the fport of our • vivacity, a happy turn decides with us the • most ferious point; and gay fallies are ever our fubflitutes for arguments.---We do "madly the wifest things; and even our e reason is always connected by some filament or other to inconfistency.-The national ' affembly had been a long time reproached for dwelling on triffing objects; and not ^e attending fufficiently to the promotion of e general good.-When fuddenly-in a fingle ' night, more than twenty important laws are ' decided by an uproar. So much done, in • fuch 5

(315)

' fuch a fhort time, is fo aftonishing, that it ' appears like a dream.'

In reply it was faid-' Why deliberate. when all are agreed ?-Does not a ge-' neral good always appear felf-evident ?---• Was it not fufficient to declare these patriotic ' propositions to prove their justness?-The ' first perfon, who pointed out a new tribute ' to the public interest, only gave utterance to ' what we all before felt-there was no need then of difcuffion or eloquence, to make ' that be adopted, which had already been • refolved by the greater number of the depu-' ties, and commanded by the awful autho-' rity of the nation, in their mandates.-The ' affembly might have proceeded more me-' thodically; but the refult could not have ' been more advantageous. It feemed as if ' all the old effects, all the mouldering titles • of feudal oppressions were then put up to 'auction; and the kind of mistrust of the ' different orders, which provoked reciprocal " conceffions, was ftill for the public good."

The nobles and clergy of the provinces, who had not been carried away by the enthusiafm of the 4th of august, felt themselves particularly aggrieved. Those who were recently recently noble did not like to mix again on equal terms in towns where they had received the homage paid to princes; and the people, eager to exercife their liberty, began to hunt down the game, regardlefs of the mifchief they did to the ftanding corn. The very conceffions of the nobility feemed to roufe the vengeance it ought to have allayed; and the populace vented their rage by burning the caftles, which had been, as it were, legally difmantled of their feudal fortifications.

The clergy, in particular, complained, that their deputies had exceeded all bounds in voting away the private property of the body; for they would not allow, that tithes came within the description of feudal tenures. The want of provision, likewife, tended to make the people clamour about prefent grievances, without fuffering the profpect of future comfort and respectability to have it's due force towards calming their minds. All, therefore, flew to arms, and three millions of men wearing the military garb, fhowed the natural disposition of the nation; and their present refolve, no longer to couch fupinely under oppression. Many excesses were the confequence of this fudden change; and it is notorious, (317)

notorious, that the people, in some inflances, became the influments of the routed party ; who continued to use every firstagem to render the nation diffatisfied with the revolution.

It is the nature of man, either in a favage ftate or living in fociety, to protect his property; and it is wife in a government to encourage this fpirit. For the example now difplayed by France is a notable proof of the inexpediency of standing armies, fo long as the people have an intereft in fupporting the political fyftem under which they live. The national affembly, aware of this, invited the militia and the municipalities, to endeavour to quell the diforders which did violence to perfons and property; and they were particularly requefted to take the most watchful care, that the convoys of wheat and flour were not flopped by the idle and lawlefs. For feveral of the most fatal tumults had originated from this caufe.

The decrees of the 4th of august, were then brought forward to be examined and explained; and fome attempts were made to argue away the effence of many of the vaunted facrifices.—But the difcuffion was interrupted,

(318)

to attend to bufinefs of a more preffing nature. The prefent state of the nation was most alarming; and the ministers, not knowing how to act under the new trammels of refponfibility, came to reprefent to the affembly ;- that the laws were without force ;the courts of justice without activity ;---and they requested them, immediately to point out the coercive measures necessary to give to the executive authority the influence it had loft .---' For,' observed they, 'whether the irritated fense of the abuses, which the king wishes ^c to reform, and you defire to proferibe for • ever, have led the people aftray; or, the de-^c claration of an universal regeneration have fhaken the various powers upon which the * focial order repofed-or whatever, in fact, • be the caufe, gentlemen, the truth is, that • public order and tranquillity are diffurbed in ⁴ almost every part of the kingdom.³

Necker, afterwards, having explained the deplorable flate of the finances, the extraordinary expences, and the diminution in the produce of the revenue, demanded, in the name of the king, that the affembly would fanction a loan of thirty millions of livres, to fulfil the engagements, and difcharge the inevitable

(319)

vitable expenditure of the two approaching months; by which time, he prefumed, the conftitution would be nearly eftablished. Thinking alfo, that the patriotism of moneylenders was not to be reckoned upon, he proposed to add to the five per cent. he mentioned some allurements of speculation, to quicken the determination of the lenders—and he further inferred, that private interest would then tend to quiet the kingdom, whilst they were advancing in the formation of the constitution, which was to fecure it's future tranquillity, and provide a permanent revenue.

This propofal produced the moft warm and loud applaufe.—One member propofed, that the loan fhould inftantly be voted in the prefence of the minister, as a mark of their entire fatisfaction—another offered fix hundred thousand livres as a fecurity, that he would raise the loan in his own province. This effervescence, fo contagious, which is after all only physical fensibility, excited by a commotion of the animal spirits, proves, that a considerable length of time is necessary to accustom men to exercise their rights with deliberation; that they may be able to defend themselves from a kind of inflinctive confi-

(320)

confidence in men ; and to make them fubilitute refpect for principles, to a blind faith in perfons, even of the most diftinguished abilities.—But to elevate a numerous affembly to this calm grandeur; to that permanent dignity, which represses the emotions of the moment, demands, it is probable, a more advanced flate of reason.

Lally Tolendal fupported the necessity of adopting the measures proposed for the obtaining a loan to fupply the exigencies of government, which were become very urgent; and he refuted the objection, made by feveral deputies, who were against the grant, that in their inftructions they had been firicily enjoined not to fanction any tax or loan before the conflitution was formed. On this fide Mirabeau ranged himfelf; for with all his great talents and superiority of genius, he could not avoid envying inferiour abilities, when they attracted the least popularity. He therefore, with plaufible rhetoric, but fhallow arguments, oppofed the loan; and with great parade moved, that the deputies should offer their individual credit, inftead of departing from the very letter of their instructions. This was one of those instances of pretended difin(321)

difinterestedness, or false patriotism, calculated to dazzle the people, whilst it involved the nation in fresh embarrass.

The plan was referred to the confideration of the committee, appointed to make financial reports : and they accordingly acknowledged the neceffity of a prompt fupply ; but thought, that the loan might now be obtained without the additional advantages, which Necker mentioned as a neceffary bait. The difcuffion was then renewed with great heat, and even perfonality ; till at laft the intereft of the loan was fixed at four and an half per cent. ; and to flip through the knot they were afraid to cut, it was to be fanctioned under the wing of the decrees of the 4th of auguft.

It did not, however, prove productive; for in the courfe of three weeks, only two millions, fix hundred thoufand livres were fubferibed. And this delay of bufiness induced the affembly to adopt, with less feruple, another proposal for a fresh loan, instead of the one that did not promise to answer, at a rate less advantageous to the nation: or rather they yielded to the necessity, into which they had plunged themselves; and less the mode of obtaining it to the executive power, in spite of their former objection. But it was

ngt

(322)

not an eafy task to inspire the bankers and money-holders with sufficient faith in the new government, to induce them to come forward to support it; besides, the previous discussion had converted caution into timidity; and the more desperate the state of the finances appeared, the stronger grew the sufpicion, that threw infurmountable obstacles in the way of a temporary relief.

Settling the precife terms of the decrees, which were to abolifh feudal vaffalage, the queftion refpecting the including of tithes was agitated with most earnestness; and the objections urged against the abolition were not only ingenious, but reasonable *. The abbé Sieyes spoke with great good fense, afferting, ' that the tithes were not a tax ' levied on the nation; but a rent-charge, for ' which a proper allowance had been made to ' the present possess of the estates, to not ' one of whom they actually belonged. He, ' therefore, infisted, that, if the facrifice were

* It is worthy of remark, that the divine right of tithes was never infilted on,' fays a french writer, < even by the clergy, during this debate. Yet the year before, when the fame question was brought forward in the irish house of parliament, great fires was laid on this gothic idea of their origin.'

neceffary,

'neceffary, it ought to be made to the pub-' lic, to relieve the people, and not to enrich ' the proprietors; who were, generally ipeak-'ing, of the most opulent part of the com-'munity.' He advifed the affembly to be on their guard, left avarice, under the maik of zeal, should deceive them, leading the nation to reward rather than indemnify the nobility. The fact was, that the landed intereft were only refigning obfolete privileges, which they fcarcely dared exercife, to fecure a folid advantage. Society has hitherto been conftructed in fuch a vicious manner, that to relieve the poor you must benefit the rich. The prefent fubject was a delicate one; the abolition of tithes would remove a very heavy vexatious clog, that had long hung on the neck of industry; yet it were to be wished, that it could have been fettled in fuch a way as not to have fecured a great pecuniary advantage to the nobility. For though it was phyfically impoffible, to make this facrifice to fociety at large immediately; becaufe the proprietors, and more particularly the leafeholders of the eftates, could not have redeemed the tithes, without diftreffing themfelves to a degree, that would nearly have Y 2 ftopped itopped the course of husbandry; not to mention agricultural improvements, fo necessary in France, and to be looked for as the fruit of liberty :---yet a gradual tax on the original landlord would have prevented the nobility from being the great gainers by their fo much extolled difinterestedness, in their fallacious facrifice of privileges. Becaufe, for all real property they were to be reinburfed; and for the obnoxious feudal tenures, fuch as perfonal fervitude, with others they were ashamed to enumerate as being due from man to man, the tithes were an ample indemnity; or more properly fpeaking clear profit, except to those who parted with the plumes which raifed them above their fellows with great regret. It was, indeed, very difficul: to separate the evil from the good, that would redound to the nation by the doing away of this tax.—The clergy, however, cut the debate fhort, by refigning their right, offering to truft to the justice of the public for the ftipend in return neceffary to enable them to fupport the dignity of their function.

On the 13th, therefore, the whole discuffion closed; for the other articles did not admit of much disputation. The president accordingly (325)

cordingly waited on the king, who received his new title with the decrees, to which he afterwards made fome objections, though the affembly confidered them as virtually fanctioned *.

A committee of five had been employed to digest a declaration of rights, to precede the conflitution. The opinion of those, who thought that this declaration ought to have been kept back, has already been alluded to; yet the fubject feems to require a little further confideration. And, perhaps, it will appear just to feparate the character of the philosopher, who dedicates his exertions to promote the welfare, and perfection of mankind, carrying his views byond any time he choofes to mark; from that of the politician, whofe duty it is to attend to the improvement and interest of the time in which he lives, and not facrifice any prefent comfort to a prospect of future perfection or happiness. If this definition be just, the philosopher naturally becomes a paffive, the politician an active character. For though the defire of loudly proclaiming the

* It is observable, that the satisfaction of the people was by no means equal to the discontent manifested by the privileged orders.

Υз

grand principles of liberty to extend them quickly, be one of the most powerful a benevolent man, of every description of mind, feels; he no sooner wishes to obey this impulse, than he finds himself placed between two rocks. —Truth commands him to fay all; wisdom whispers to him to temporize.—A love of justice would lead him to bound over these cautious restraints of prudence; did not humanity, enlightened by a knowledge of human nature, make him dread to purchase the good of posterity too dearly, by the misery of the present generation.

The debates respecting the adoption of the declaration of rights became very spirited; and much heterogeneous matter was introduced, to lengthen the discussion, and heat the disputants, as the different articles were reviewed. The article respecting religion particularly arrested the attention of the association of the association of the structure one of those tumultuous feenes, which have so often disgraced their deliberations. The intolerant fentiments uttered; and even the infertion of some amendments, which could not, without a contradiction in terms, find a place in a declaration of rights; proved, that the affembly

contained a majority, who were still governed by prejudices inimical to the full extent of that liberty, which is the unalienable right of each citizen, when it does not infringe on the equal enjoyment of the fame portion by his neighbour *. The most fensible part of the affembly afferted, that religion ought not to be mentioned, unless to declare, that the free exercife of it was a right in common with the free utterance of all opinions; which came under civil cognizance only when they affumed a form, namely, when they produced effects, that clashed with the laws; and even then it was the criminal action, not the paffive opinion, which was proferibed by the penalty of punifiment.

In this declaration are found the principles of political and civil liberty, introduced by a very folemn exordium :-Declaring ' that, as ' ignorance, forgetfulnefs, and contempt of the ' rights of men, are the fole caufes of public ' grievances, and of the corruption of govern-' ments, the affembly had refolved to re-efta-

* See the article 10. 'No man ought to be molefied on ' account of his opinions, not even on account of his religi-' ous opinions, provided his avowal of them does not diffurb ' the public order established by law.' blifh, in a folemn declaration, the natural,
impreferiptible, and facred rights of man;
in order that this declaration, conftantly
prefent to all the members of the focial
body, may continually remind them of their
rights, and of their duties; that, having it
in their power every moment to compare
the acts of the legiflative and executive
authorities with the purpofe of all political
inftitutions, they may the more refpect
them; and that the remonstrances of the
citizens, founded, in future, on fimple and
incontestible principles, may always tend to
fupport the constitution, and to promote the

Some temporary bufinefs, towards reftoring public tranquillity, and to give force to the laws, infulted by the licentious conduct of men inebriated merely by the expectation of freedom, fcented from a-far, being difpatched, the formation of a conftitution became the ftanding labour of the affembly.

The first question naturally fell under this head—what share of power ought the king to be allowed to posses in the legislature? This was an important confideration for men, who were all politicians in theory; and many of of whom, having fuffered under the abfolute fway of the king's minifters, full felt the finart of their opprellion, and a contempt for the power that authorized their dominion: whilf the blind zealots for the indefeable rights of kings, though they were ashamed of the phrafe, heated the imagination of their party, by the most inflated encomiums on the benefits arifing from extensive kingly prerogatives, and vapid remarks on the british constitution, and other forms of government, obvioufly to difplay their erudition. The most noify indecorus debates enfued, and the affembly feemed to meet rather to quarrel than deliberate. A division the most decided confequently took place; which, under different appellations, and profelling different principles, has ever fince continued to convulfe the fenate; if the legiflative affembly, or the convention, deferve a name fo dignified.

In difcuffing whether the royal fanction fhould be neceffary to the validity of the acts of the legiflative body, a variety of extraneous fubjects, and others prematurely brought forward, fo entangled the main queftion, as to render it difficult to give a clear and brief account

(330)

account of the debates; without lending a degree of reafonablenefs to them, that the manner of arguing, rudely perfonal, and, loudly uncivil, feemed to deftroy. For good lungs foon became more neceffary in the affembly than found arguments, to enable a fpeaker to filence the confusion of tongues ; and make known his opinion to men, who were eager only to announce their own. Thus modest men had no chance to be heard. though perfuafion dwelt on their lips: and even Mirabeau, with his commanding eloquence, and juftness of thought, procured attention as much by the thundering emphafis, which he gave to his periods, as by his ftriking and forcible affociation of ideas.

As a nation, the french are certainly the most eloquent people in the world; their lively feelings giving the warmth of paffion to every argument they attempt to fupport. And fpeaking fluently, vanity leads them continually to endeavour to utter their fentiments, without confidering whether they have any thing to recommend them to notice, befide a happy choice of expressions. Only thinking then of fpeaking, they are the most impatient of hearers, coughing, hemming, and fcraping 5

fcraping with their feet, most audibly, to beguile the time. Laying afide alfo, in the affembly, not only their national politeness. but the common reftraints of civility; good manners feldom fupply the place of reafon, when they are angry. And as the flighteft contradiction fets them on fire, three parts out of four of the time, which ought to have been employed in ferious inveftigation, was confumed in idle vehemence. Whilft the applauses and hiffes of the galleries increased the tumult; making the vain still more eager to mount the stage. Thus every thing contributing to excite the emotions, which lead men only to court admiration, the good of the people was too often facrificed to the defire of pleafing them. And fo completely was the tide of their affection for the king turned, that they feemed averfe to his having any portion of legiflative authority in the new conflictution.

The duke de Liancourt divided the queftion respecting the share of power he was to enjoy as a part of the government. 1/t. Is the royal fanction indispensably necessary, to give the actual force of law to the decrees of the national affembly ? 2dly. Ought the king to be

(332)

an integrant portion of the legiflature? In England the phrafe royal affent has been adopted, as expressive of a positive act; but the french, rather choosing to diffinguish the same act of power by a negative, fixed on the latin word veto, I forbid. And then it became a queftion, how far this veto ought to extend, supposing the prince to be invested with it.— Was it decisively to obstruct the enaction of a law passed by the legislative body ? or only to suffer the anew election ?

The affembly in this inftance feem to have acted with strange confusion of mind, or a total ignorance of the nature of a mixed government : for cither the queftion was nugatory, or a king ufeless. Lally-Tolendal, Mounier, and Mirabeau, argued for the absolute veto .--- ' Two powers,' fays Mirabeau, ' are neceffary to the existence of the ' body-politic, in the orderly difcharge of it's ' functions :--- To will--- and to act. By the ' first, fociety establishes the regulations which ' ought all to confpire to one end-the good ' of all :- By the fecond, thefe regulations * are carried into execution ; and public autho-'rity is exerted, to make fociety triumph • over 2

• over the obstacles, which might arife from • the opposite wills of individuals. In a great • nation, these two powers cannot be exer-• cifed by the people : whence comes the • neceffity of representatives, to exercise the • faculty of willing, or the legislative power; • and also of another species of representation, • to exercise the faculty of acting; or, the • executive power.'

He further infifts, that ' the poffeffion of ' this power is the only way to render a king ' ufeful, and to enable him to act as a check ' on the legiflative body: the majority of ' which might tyrannize in the moft defpotic ' manner, even in the fenate, to the very ' expulsion of the members, who dared to ' thwart the measures they could not ap-' prove. For under a weak prince, a little ' time and address alone would be necessary, ' to establish legally the dominion of an army ' of ariftocrats; who, making the royal autho-' rity only the passive instrument of their ' will, might replunge the people into their ' old state of debasement.

• The prince, therefore, being the perpetual • representative of the people, as the deputics • are

(334)

• are their representatives elected at certain • periods, is equally their fafe-guard.

• No perfon exclaims against the veto of the • national affembly; which is, in reality, • only a right the people have confided in • their representatives, to oppose every pro-• position, that would tend to re-establish • ministerial despotism. Why then object to • the veto of the prince, which is but another • right, especially confided in him by the peo-• plc, because he and they are equally interested • to prevent the establishment of an aristo-• cracy?

He proceeds to prove, ' that, whilft the 'legiflative body is refpectable, the veto of ' the king cannot do harm, though it is a ' falutary check on their deliberations; and ' granting, that the influence of the crown ' has a tendency to increase, a permanent ' affembly would be a fufficient counterpoise ' for the royal negative. Let us,' he concludes, ' have an annual national affembly, ' let ministers be made responsible; and the ' royal fanction, without any specified restric-' tions, but, in fact, perfectly limited, will be ' the palladium of national liberty, and the most

(335)

• most precious exercise of the liberty of the • people.

Having fuffered by the abufe of abfolute power, many of the deputies, afraid to entruft their conftitutional monarchs with any, opposed the veto; left it should palfy the operations of the national affembly, and bring back the old defpotifm of the cabinet. The discussion likewise extending beyond it's walls, was as fuperficially and as warmly treated by those, who thought only of the old government, when they talked of framing a new one. And as the people were now led by hot-headed men, who found it the fhortest way to popularity, to deliver exaggerated elogiums on liberty, they began to look for a degree of freedom in their government, incompatible with the present state of their manners; and of which they had no perfect idea. It is not then furprifing, that it should become a mark of patriotifm, to oppose the veto; though Mirabeau never gave a stronger proof of his, than in fupporting it; convinced that it was the intereft of the people he was espousing, whilst he risked their favour.

The

The will of the public was, in reality, for decided, that they would fearcely allow the *veto* to be mentioned; and the affembly, to ficer a middle courfe, adopted the *fufpenfive veto*; after confidering fome other important elements of the conflictution, which feemed to them to be intimately connected with the royal prerogative.

Certainly a few of the most judicious deputics must have perceived the impolicy of the fuspensive veto; and they could only have agreed to fall into the measure, under an idea that the minds of the people not being completely ripe for a total change of government-from absolute despotisin to complete republicanifm, it was politically neceffary still to maintain the shadow of monarchy. ' To af-' fign,' fays one of the deputies, ' a term to ' the veto, is at last to force the king to exe-• cute a law of which he difapproves : and ^e making him thus a blind and paffive inftru-' ment, a fecret war is fomented between him * and the national affembly. It is, in fhort, • to refuse him the vcto; though those who * refufe it have not the courage openly to fay, that France has no longer any need of a • king.'

But, from the commencement of the revolution, the mifery of France has originated from the folly or art of men, who have fourred the people on too fast; tearing up prejudices by the root, which they should have permitted to die gradually away. Had they, for example, allowed the king to have enjoyed the fhare in the government promifed by the abfolute vete, they would have let him gently down from the altitude of unlimited fway, without making him feel the ground he loft in the descent. And this femblance of his former authority would have gratified him ; or rather, breaking his fall, have induced him to fubmit patiently to other reftraints, lefs humiliating to him, though more beneficial to the people. For it is evident from experience, and might have been forefeen, that the determination on this question was one grand fource of the continual bickerings of the affembly with the court and ministry; who took care to make the king fee, that he was fet up as an idol, merely to receive the mock respect of the legislative body, till they were quite fure of the people.

Could it, indeed, have been afcertained, that Louis, or rather the queen, would have

tainely

tamely born with fuch a diminution of power, this meafure might have been deemed prudent : becaufe it was then morally certain, that the monarchy would have expired naturally with the diffolution of the king. But, when the pride and reftlefs fpirit of the queen were well known; and that it was probable, from the whole tenour of her former life, the would contrive to have the ministry composed of the most dissolute and headstrong men; it must appear the height of folly only to have left the king the power of perplexing their proccedings, after they had piqued his pride. And when, to give, as it were, efficiency to the confpiracies, which would naturally be formed by the courtiers, to recover the authority reft from them, we find they afterwards voted fuch an enormous fum to defray the civil lift, as was fufficient to move like puppets hundreds of the corrupt french; it must be confessed, that their abfurdity and want of difcernment appear not lefs reprehensible, than the subfequent conduct of the court flagitious.

The conflictutional committee had given it as their opinion, that the contested veto did not concern the national affembly then existing; which, being a conflictuting body, it was 5 their

their duty to fee that the conflictution was accepted, not fanctioned. This report carries with it an air of imbecility, which renders it almost incredible : for, if the affembly were determined to oblige the king to accept their decrees, they had better have told him fo with becoming dignity, and made provision for his retiring from a post in which he was useles. Instead of this, he was in a manner shuffled off the throne; and treated with cruelty as well as contempt. It would have been at leaft ingenuous, and might be deemed magnanimous, had they allowed him to retire with a third of the flipend, which they afterwards voted him, when he continued to appear like a theatrical king, only to excite the pity of the vulgar, and to ferve as a pretext for the defpots of Europe to urge in justification of , their interference. The liberating an imprifoned monarch was a plaufible motive, though the real one was obvioufly to ftop the progrefs of principles, which, once permitted to extend themselves, would ultimately fap the foundation of their tyranny, and overturn all , the courts in Europe. Pretending then only to have in view the reftoration of order in France, and to free an injured king, they aimed Z 2

(340)

aimed at crushing the infant brood of liberty.

Similar fentiments must have occurred to every thinking perfon, who ever ferioufly reflected on the conduct of the germanic courts, which has actually deftroyed the tranquillity of Europe for centuries past. War is the natural confequence of their wretched fyftems of government.-They are fupported by military legions; and without wars they could not have veteran foldiers. Their aggrandifement then, and half-lived pleafures, caft in a mould of ceremony, fpring out of the miferies, and are foftered by the blood of human beings; whom they have facrificed with as much fang froid, fending them in herds to flaughter, as the hard-hearted favage romans viewed the horrid spectacle of their prizefighters; from the bare idea of which the mind turns, difgusted with the whole empire, and particularly with the government that dared to boaft of it's heroifm and respect for juffice, when not only tolerating, but encouraging fuch enormities.

To the fympathizing princes of the continent, therefore, the king fhould have been given up: or, if it were necessary to humour

2

the prejudice of the nation, and fiill fuffer frenchmen to have a most christian king, or grand monarque, to amufe them by devouring capons or partridges before them; it would have been but just, both in reason and policy, to have allowed him fuch a portion of liberty and power, as would have formed a confisient -government. This would have prevented those clamours, which were fure to draw together an hoft of enemies, to impede the fettlement of rational laws; flowing from a conftitution, that would peaceably have undermined defpotifin, had it been allowed gradually to change the manners of the people. Though had this power been granted, it might have been productive perhaps of great inconveniences; as it is not likely, that a court accustomed to exercife unbridled fway would contentedly have co-operated with the legislature, when posselling only reafonable prerogatives.

Some apprehensions of this kind may have occurred to the affembly: though it rather appears, that they were either influenced by a ridiculous pride, not being willing to take the british constitution, fo far as it respected the prerogative, for their model; or intimidated by the people, who, during the long debate, had

outrage-

(342)

outrageoufly expressed their will, and even handed about a lift of proferiptions, in which the vetoifts were denounced as traitors worthy of death. Be this as it may, they determined on a half-way measure, that irritated the court without appeasing the people. Having previously decreed, that the national affembly should be permanent, that is always existing, instead of being dissolved at the close of every fession, they resolved, that the veto of the king should fuspend the enaction of a law only during two legislatures. 'The wisdom of this 'law,' fays Rabaud, 'was universally acknow-'ledged:' though the folly of it rather merited universal reprobation.

From the manner indeed, in which the affembly was conftituted, it was to be dreaded, that it's members would not long fuftain the dignity, with which they commenced the career of their bufinefs : becaufe the party, that oppofed with fuch bitternefs the junction of the three orders, ftill oppofing with rancorous heat, and wily ftratagems, every meafure propofed by the really patriotic members, were indirectly feconded by the infincere and wavering ; who, having no motive to govern their conduct, but the moft deteftable felfifhfelfiftnefs, the offspring of vanity or avarice, always took the fide beft calculated to gratify the crude wiftes of the multitude. And this unyoked multitude, now fuddenly initiated into the fcience of civil and natural rights, all become confummate politicians, began to control the decifions of a divided affembly, rendered timid by inteffine broils.

There were besides many circumstances, which tended to make any attempt to counteract this influence very difficult. At the mecting of the states-general, the whole court-party, with the greater proportion of both the nobility and clergy, were in opposition to the third eftate : and though the number of the latter was equal to that of the other two orders, they had alfo to contend with the inveterate prejudices of ages. The court had thought only of devifing means to crush them; and had the foldiery acted with the blind zeal common to men of this profession, it would of itself have been fufficient to have completely difconcerted their views, This conduct of the cabinet, and the discovery of the atrocious confpiracy, which had been formed against the people and their idolized representatives, provoking the resentment and vengeance Z 4

vengeance of the nation, palfied all authority, and rendered the laws that had emanated from it contemptible. To oppose this torrent of opinions, like an impetuous current, that after heavy rains, defying all refistance, bears away on it's raging bosom every obstacle, required the most enlightened prudence and determined resolution.

So much wildom and firmnels feldom fall to the lot of any country : and it could fcarcely have been expected from the depraved and volatile french; who proudly, or ignorantly, determining to follow no political track, feem to have fixed on a fyftem proper only for a people in the higheft ftage of civilization :--a fystem of itself calculated to diforganize the government, and throw embarraffments into all it's operations. This was an errour fo grofs, as to demand the feverest animadversions. For this political plan, ever confidered as utopian by all men who had not traced the progrefs of reafon, or calculated the degree of perfectibility the human faculties are capable of attaining, was, it might be prefumed, the most improper for the degenerate fociety of France. The exertions of the very admirers of the revolution were, likewife, far from being ing permanent ; and they could hardly have been expected to poffefs fufficient virtue to fupport a government, the duration of which they at leaft feared would be fhort. The men termed experienced believed it phyfically impoffible ; and no arguments were cogent enough to convince them of the contrary : fo that, they leaving the tafk to mock patriots and enthufiafts, a frefh odium has been thrown on principles, which, notwithftanding are gaining ground. Things muft be left to their natural courfe ; and the accelerating progrefs of truth promifes to demonftrate, what no arguments have hitherto been able to prove,

The foundation of liberty was laid in the declaration of rights; the first three articles of which contain the great principles of natural, political, and civil liberty.—First, that men are born, and always continue, free, and equal in respect to their rights :—civil diffinetions, therefore, can be founded only on public utility. Secondly, the end of all political affociations is the prefervation of the natural and impreferiptible rights of man : which rights are—liberty, property, fecurity, and refisiance of oppreffion. Thirdly, the pation is the fource

fource of all fovereignty : no body of men. no individual, can then be entitled to any authority, which is not derived from it. The first article, establishing the equality of man, ftrikes at the root of all useless diffinctions :--the fecond, fecuring his rights against oppreffion, maintains his dignity :--- and the third, acknowledging the fovereignty of the nation, confirms the authority of the people.-Thefe are the effential points of a good government : and it is only necessary, when these points are afcertained by a nation, and folemnly ratified in the hearts of it's citizens, to take care, in the formation of a political fyftem, to provide against the abuse of the executive part; whilft equal caution should be observed, not to destroy it's efficiency, as on that depend it's justice, vigour, and promptitude, The other articles are explanatory of the nature and intent of these rights, and ought to have had more attention paid to them, when the structure was raifed, to which they ferved as a bafis,

Whilft defining the authority of the king, or rather determining, that he fhould have no authority, unlefs the option of diffurbing the legiflation deferve that name, they debated bated the question of two chambers with equal inconfideration, and all the puerile felffufficiency of ignorance. The oppofers of two chambers, without allowing, that there was any political wifdom in appointing one house of reprefentatives to reconfider the refolves of the other, ridiculed the idea of a balance of power, and inftanced the abufes of the english government to give force to their objections. At the fame time fcaring, that the nobles of the court would contend for an hereditary fenate, fimilar to the british house of peers; or, at leaft, for a feat during life, paramount to the reprefentatives who they determined fhould be elected every two years; they fought to bring the bufinefs to a fpeedy ifiue. The very division of the nobility ferved to haften it, and ftrengthened the arguments of the popular members ; who finding that they could rely on the concurrence of the parish priest, whose wifhes in favour of the unity of the affembly were quickly betrayed by the opinions of their leading orators, demanded the dccifion of a queftion, that had been agitated in the most tumultuous manner.

Mirabeau wished to prove, that the decision of the question respecting the permanency of the

the affembly had prejudged that of the two chambers ; and the plan of a fenate, proposed by the conflitutional committee, only excited fresh apprchensions, that the ancient hydra would again rear it's head. They reprefented this fenate as the cradle of a new ariftocracy; as a dangerous counterpoize to popular violence, because it would still foster the prejudicès, which produced inequalities amongst men, and give continual play to the overbearing paffions, that had hitherto degraded mankind. And to fnow previoufly their entire difintereftedness, as well as fear of allowing the exercise of power to become familiar, much lefs necellary to any members of the community, they unanimoully voted, that for each legiflature, the name given to the meeting of the reprefentatives, a total change of the deputies should take place.

The very nobility, in fact, were far from being united in fupport of two chambers. The order was a numerous one: and to eftablifh an equality of privileges, it was neceffary, that they fhould all concur to elect the upper chamber, as the reprefentatives of the whole body; whilft the nobles of the court, and of the ancient houses, fecretly indulged the hope of effablishing a peerage; which would not only raife them above the commons, but keep at a proper distance the upstart nobility, with whom they had heretofore impatiently jostled. There was even another cause of jealousy: for it was prefumed, that the forty-feven nobles, who first joined the assembly, would now be rewarded. In short, the idle fears and more contemptible vanity of the different parties now operated for much in favour of an indivisible fenate, that the question was decided by a great majority, to the intire fatisfaction of the public, who were almost as eager for one chamber, as averfe to the veto.

The deputies, who oppofed the upper chamber to promote the good of fociety, did it from a belief, that it would be the afylum of a new ariftocracy; and from a total ignorance, or obfcurity of ideas, refpecting it's utility. Whilft the opprefilions of the feudal fyftem being ftill prefent to the minds of the people, they confidered a divifion of the legiflative body as inconfiftent with the freedom and equality they were taught to expect as the prime bleffings of a new conftitution. The very mention of *two chambers* carried them back to the old difpute, refpecting the negative

negative of the different orders; and feemed to fubvert the revolution. Such fears, degenerating into weaknefs, can only be accounted for by recollecting the many cruel thraldoms, from which they had fo recently escaped. Besides, the remembrance of their former fervitude, and the refentment excited by the late ftruggle to prove they were men, created in their enthusiastic imaginations such a multitude of horrours, and fantaftic images of new dangers, as did not allow them to exercise the full powers of their reafon. So that to convince them of the propriety of a new inftitution, and heat the supporters of it, nothing more was neceffary, than to fhow, that it was the very reverse of those maintained by the partizans of the old government.

i

The wifdom of giving to the executive part of a government an abfolute veto might very juftly have been queftioned; as it feems to be giving a power to one man to counteract the will of a whole people—an abfurdity too grofs to merit refutation. Still, whilft crowns are a neceffary bauble to pleafe the multitude, it is alfo neceffary, that their dignity fhould be fupported, in order to prevent an overweening ariftocracy from concentrating all all authority in themfelves. This feems to have been expedient, likewife, as long as the manners of barbarians remained: as favages are naturally pleafed with glafs and beads, in proportion as they afford a striking contrast to the rude materials of their own fabrication.

In the progreffive influence of knowledge on manners, both drefs and governments appear to be acquiring fimplicity; it may therefore be inferred, that, as the people attain dignity of character, their amufements will flow from a more rational fource than the pageantry of kings, or the view of the fopperies exhibited at courts. If these have been supported hitherto by childish ignorance, they seem to be lofing their influence, as the understanding of the world approaches to manhood: for, as they grow wifer, the people will look for the folid advantages of fociety; and watching with fufficient vigilance their own interest, the veto of the executive branch of the government would become perfectly useles; though in the hands of an unprincipled, bold chief magiftrate, it might prove a dangerous instrument. In forming a reprefentative plan of government it appears neceffary then to take care only, that it be fo constructed, as to prevent hafty hafty decifions; or the carrying into laws dangerous, impolitic meafures, which have been urged by popular declaimers, who are too apt to gain an afcendancy in a numerous affembly. Until the principles of governments become fimplified, and a knowledge of them be diffeminated, it is to be feared, that popular affemblies will often be influenced by the fafcinating charms of eloquence: and as it is poffible for a man to be eloquent without being either wife or virtuous, it is but a common precaution of prudence in the framers of a conftitution, to provide fome check to the evil.

Befides, it is very probable, in the fame flate of reafon, that a faction may arife, which will control the affembly; and, acting contrary to the dictates of wifdom, throw the flate into the most dangerous convulsions of anarchy: confequently, it ought to form a primary object with a constituting affembly, to prevent, by fome falutary contrivance, the mischief flowing from such fources. The obvious preventative is a fecond chamber, or fenate, which would not, it is most likely, be under the influence of the fame faction; and it is at least certain, that it's decisions would not be directed by the fame orators. The advantage would be more certain if bufincfs were not conducted in the two chambers in a fimilar manner. Thus by making the most numerous affembly the most active, the other would have more time to weigh the probable confequence of any act or decree, which would prevent those inconveniences; or, at least, many of them, the confequence of haste or faction.

This fystem in an old government is fufceptible of improvement. The minds of young men generally having more fire, activity, and invention, it would be politically wife to restrict the age of the fenators to thirty-five, or forty years; at which period of life they most likely would have gone through a certain routine of business; and become more fage, and steady, they would be better calculated to decide respecting the policy, or wisdom of the acts of the chamber of representatives.

It is true France was in fuch a flate at the time of the revolution, that a like improvement could not have been inflantly carried into execution, because the aristocratical influence was justly to be dreaded. The constituting assembly then should have remained indivisi-

(354)

ble; and as the members became in fome meafure acquainted with legiflative bufinefs, they would have prepared fenators for the upper chamber. All the future legiflatures being dividedinto two chambers, a houfe of reprefentatives, and a fenate, the members of the national affembly might have been permitted to be elected for the fenate, though they fhould not have attained the age preferibed; for the reftriction needed not to have taken place until the government found it's level, and even then, the members of the preceding houfe of reprefentatives might have been allowed to be returned for the fenate.

It has been a common'remark of moralis, that we are the least acquainted with our own characters. This has been literally the case with the french: for certainly no people stand in such great need of a check; and, totally destitute of experience in political science, it must have been clear to all men of sound understanding, that some such plan alone would have enabled them to avoid many stal errours.

The first efforts of the national assembly were truly magnanimous; but the character of the men was too light, to maintain the fame

(355)

fame heroifm, when not warmed by paffiontoo giddy, to support with grave dignity the splendour of fudden glory. Their vanity was also unbounded; and their false estimate of difinterestedness of conduct, whilst they betrayed puerility of fentiment, was not among the least of the misfortunes, which have befallen that unhappy country. Their hearts had been too long fophisticated, to fuggest the best mode of communicating freedom to millions; and their heads were still less calculated to lay down a practicable plan of government, adapted to the flate of knowledge of the age. So much fo, that they feem to have felected from books only the regulations proper for a period of perfect civilization.

The revolutions of flates ought to be gradual; for during violent or material changes it is not fo much the wildom of measures, as the popularity they acquire by being adapted to the foibles of the great body of the community, which gives them fucces.—Men are most easily led away by the ingenious arguments, that dwell on the equality of man, and these are always employed by the different leaders of popular governments.

Whilft

- Whilf the most ingenious theorist, or desperate partizans of the people, take advantage of this infirmity of our nature, the confequences must fometimes prove destructive to fociety, if they do not end in the most dreadful anarchy. For when the members of a state are not directed by practical knowledge, every one produces a plan of polity, till the confusion becomes general, and the nation plunges into wretchednefs, purfuing the schemes of those philosophers of genius who, advancing before their age, have sketched the model of a perfect fystem of government. Thus it happened in France, that Hume's idea of a perfect commonwealth, the adoption of which would be eligible only when civilization has arrived at a much greater degree of perfection, and knowledge is more generally diffused than at the prefent period, was neverthelefs chofen as the model of their new government, with a few exceptions, by the constituent assembly: which choice doubtless proceeded from the members not having had an opportunity to acquire a knowledge of practical liberty. Some of the members, it is true, alluded to the improvements made by

by the americans on the plan of the english conftitution; but the great majority, despising experience, were for forming, at once, a system much more perfect. And this felffufficiency has produced those dreadful outrages, and attacks, made by the anarchists of that country, on personal liberty, property, and whatever else fociety holds facred.

These melancholy confiderations seem to me to afford irrefragable arguments, to prove that it is necessary for all governments, which have for their object the happiness of the people, to make the power of altering peaceably a fundamental principle of their constitution.

Still, if the attempt to carry prematurely into execution the fublime theory, which has occupied fome of the beft heads to form, have afforded an opportunity to fuperficial politicians, to condemn it as abfurd and chimerical, becaufe it has not been attended with immediate fuccess, the advocates for the extenfion of truth and reason ought not to despair. For when we contemplate the flow improvement, that has been made in the science of government; and, that even the system of the british constitution was considered, by some of the most enlightened ancients, as the subhand the state of the system of the state of the most enlightened ancients, as the sublimest ł

limest theory the human mind was able to conceive, though not reducible to practice, they should not relax in their endeavours to bring to maturity a polity more simple—which promises more equal freedom, and general happiness to mankind.

(359)

CHAPTER II.

ABSERVATIONS ON THE VETO. THE WOMEN OPPER UP THEIR ORNAMENTS TO THE PUBLIC. DERATE WHETHER THE SPANISH BRANCH OF THE BONS COULD REIGN IN FRANCE. CONDUCT OF THE KING RESPECTING THE DECREES OF THE FOURTH OF AUGUST. VANITY OF THE FRENCH. DEBATES ON QUARTERING A THOUSAND REGULARS AT VER-BAILLES. INDIVIDUALS OFFER THEIR JEWELS AND PLATE TO MAKE UP THE DEFICIENCY OF THR LOAN. THE KING SENDS HIS RICH SERVICE OF PLATE TO THE MINT. NECKER'S PROPOSAL FOR EVERY CITIZEN TO GIVE UP & FOURTH OF HIS INCOME. SPEECH OF MIRABEAU ON IT. HIS ADDRESS TO THE NATION.

AFTER the national affembly had determined, that the legiflative body fhould confift of one house, to be renewed every two years, they appear to have had fome sufficient of the impolicy of the decree; but not allowing themselves time to comprehend the use of a senate taken from the body of the people, they attempted to solve the fears, some moderate men entertained, of the bad confequences which might arise from the decisions of an impetuous assertion the decisions of an assertion the decisions of an assertion the decisions of an impetuous assertion the decisions of an assertion the decisions of as a set the decisions of as a set the decision the decisions of as a set the decision the decision the decisions of as a set the decision the de

(360)

would occasion, was a sufficient counterpoise. They represented the king's veto as the negative archetype of the national will; adding, that it would be the duty of the fovereign to examine with vigilance the justice or wildom of their decrees; and by the exertion of his power prevent the hafty eftablishment of any laws inimical to the public good. So eafy is it for men to frame arguments, to cover the homely features of their own folly-fo dangerous is it to follow a refined theory, however feafible it may appear, when the happiness of an empire depends on it's fuccefs; and fo inconfiderately did the national affembly act in this great bufinefs, that they did not wait even to determine the precife meaning of the word fanction.

If the king then represented the negative will of the nation, which the affembly pretended to fay he did; and if he possessed the fupreme wifdom and moderation necelfary to guaranty that will, which fuppoling he did not, it was a folly too grofs to require any comment; in the name of common fense -why was his veto fulpenfive ?

The truth is obvious,-the affembly had not fufficient courage to take a decided part, -They

-They knew, that the king and court could not be depended upon; yet they had not the magnanimity to give them up altogether. They justly dreaded the depravity and influence of the nobles; but they had not the fagacity to model the government in fuch a manner, as would have defeated their future confpiracies, and rendered their power nugatory; though they had the example of the Thirteen States of America before them, from which they had drawn what little practical knowledge of liberty they poffeffed.-But, no; the regeneration of France must lead to the regeneration of the whole globe. The political fystem of frenchmen must ferve as a model for all the free flates in the universe !---Vive la liberté was the only cry-and la bagatelle entered into every debate-whilft the whole nation, wild with joy, was hailing the commencement of the golden age.

The women too, not to be outdone by the roman dames, came forward, during this difcuffion, to facrifice their ornaments for the good of their country. And this fresh example of public spirit was also given by the third estate; for they were the wives and daughters of artizans, who first renounced their ţ

their female pride—or rather made one kind of vanity take place of another. However, the offering was made with theatrical grace; and the lively applauses of the assembly were reiterated with great gallantry.

Another interruption had likewife occurred, of a more ferious nature.—For after they had decreed, with an unanimous voice—That the perfon of the king is facred and inviolable, that The throne is indivisible; that the crown is hereditary, in the males of the reigning family, according to the order of primogeniture, to the perpetual exclusion of females, a deputy proposed, that, before going any further, they should decide "whether the branch reigning in Spain could "reign in France, though it had renounced " the crown of the latter kingdom by the most " authentic treaties."

Several of the most respectable members represented, that this was a delicate business, with which it was impolitic to meddle at present, and as unnecessary as imprudent. Mirabeau was of this opinion; but when he found, that much time was likely to be confumed in idle debates, and contemptible vehemence, he endeavoured to cut the matter short by moving a new question—namely, ' that ' no

.

" no one could reign in France, who was not " born in the kingdom."

But nothing could prevent the agitation of the fame fubject for three days; prolonged either by the fears of one party, or the defire of another to embroil the affembly, and retard the formation of a conftitution. Mirabeau made feveral fevere, but just remarks, on the character of Louis XIV, whose ambition had produced the dispute; and reprobated with dignity, their manner of treating a people, as if they were the property of a chief. Should any difficulty arise, in future, he maintained, that the nation would then be competent to judge of it; and had an equal right to determine the fuccession, as to choose a new system of government.

The affembly, though generally fo inattentive to the fuggestions of found policy, despising moderation, became now beyond measure scrupulous. Some deputies reprefented the danger of alienating to the english the commerce of Spain, by disgussing it's court; and others anticipated the intestine troubles, which a doubt respecting the unchangeable descent of the crown might produce. At last they resolved to add to the declaration, respecting the monarchy, that they

(364)

they did not mean to make the decree, by any means prejudge the effect of renunciations.

Whilft they were fettling thefe things in the affembly, the refractory nobles and clergy were intriguing to prevent the king from giving his affent to the promulgation of the decrees of the 4th of august. The royal fanction had been demanded before the import of the word was fcanned; and the court taking advantage of this ambiguity, made the king pretend he mifunderstood the demand; and imagined that they merely asked for his opinion, and not to know his will. Inftead then of a fimple monofyllable, he replied by a memoire. He approved, in general, of the fpirit of these determinations; but entered into an investigation, more or less copious, of every article. He weighed the advantages and inconveniences; and pointed out precautions and modifications, which appeared to him necessary to realize the former and prevent the latter, He objected particularly to the abolition of fome rents; which, though fubstitutes for perfonal fervice, were now actual property; he fuggested some difficulty that might attend the abolition of tithes; and hinted, that the german princes, who had possessions

ý

poffeffions in Alface, fecured to them by treaty, might refent the infringement. In answer to the last objection, a member observed, that the inhabitants of this province, who had long been finking under the weight of these privileges, daily augmented by the connivance of ministers, had inferted an article in their instructions expressly demanding the abolition of this destructive fystem; which reduced them to defpair, and forced them continually to emigrate. Several of the deputies wished to have the king's reply referred to the examination of a committee; yet, a great majority infifting, that the decrees of the 4th of august were not new laws, to be carried into force by the executive power, but abufes which it was abfolutely neceffary to clear away before the formation of the constitution, demanded their immediate promulgation. Accordingly they refolved, that the prefident should wait on the king and request him immediately to order the promulgation of the decrees; affuring him at the fame time, that the national affembly, when confidering each article feparately, would pay the most scrupulous attention to the observations communicated by his majefty.

(366)

This imperative petition had the defired effect, and the king acceded, the 20th of feptember, to their will, fanctioning decrees he did not approve.

This was the first glaring inftance of the conflituting affembly acting contrary to it's pretensions; and the king, long in the habit of diffembling, always yielding to the pressure of remonstrances, no matter from what quarter they came, with criminal infincerity acknowledging himself a cipher, laid the foundation of his own infignificancy, by ordering the promulgation of decrees, which he believed were incompatible with justice, and might involve the french monarchy in difagreeable disputes with foreign princes, when peace was particularly necessary to calm it's internal convulsions.

If a chief magistrate be of any confequence to a flate, his wifdom ought to appear in the dignity and firmnels of his actions.—But, if he be confidered as the fountain of justice and honour, and do not possible the abilities and magnanimity of a common man, in what a wretched light must he be viewed by the eyes of discernment and common fense?— And, if the framers of a constitution create a power that must continually act at variance with itself, they not only undermine the pillars of their own fabric, but they infert the ficion of a difease the most destructive to truth and morals.

After complying with this compulsatory request, Louis, who, finding that he was left without any share of power, seems to have thought very little of his fufpenfive veto, determined to play a part that would give an air of fincerity to his prefent conduct, whilfthis object was fecretly to favour the efforts of the counter-revolutionist; and if possible effect his own escape.-But, in the mean time, he endeavoured to make fuch use of it as might prevent the total derangement of the old system, without unveiling his fecret views, and intentions. It is difficult to determine which was the most reprehensible, the folly of the affembly, or the duplicity of the king. If Louis were without character, and controlled by a court without virtue, it amounted to a demonstration, that every infidious mean would be employed by the courtiers to reinftate the old government; and recover, if poffible, their former splendour and voluptuous ease. For, though they were difperfed, it was notorious

torious to all France, nay, to all Europe, that a conftant correspondence was kept up between the different parties, and their projects concerted by one of the most intriguing of difappointed men *. It was obvious, therefore, to Mirabeau, that the king ought to be gained over to the fide of the people; and made to confider himfelf as their benefactor, in order to detach him from the cabal. But in this respect he was unfortunately over-ruled. This mixture of magnanimity, and timidity, of wifdom and headftrong folly, displayed by the affembly, appears, at the first view, to involve fuch a contradiction, that every perfon unacquainted with the french character would be ready to call in queftion the truth of those undeniable facts, which crowd on the heels of each other during the progrefs of the great events, that formed the revolution. A fuperficial glance over the circumftances, will not enable us to account for an inconfiftency, which borders on improbability.---We must, on the contrary, ever keep in our thoughts, that, whilft they were directed in their political plans, by a wild, half comprehended theory, their

• Calonne.

fentiments were still governed by the old chivalrous fense of honour, which diffusing a degree of romantic herois into all their actions, a false magnanimity would not permit them to question the veracity of a man, on whom they believed they were conferring favours; and for whom they certainly made great allowance, if they did not forgive him for countenancing plots, which tended to undermine their favourite softem.

It is, perhaps, the characteristic of vanity, to become enamoured with ideas, in proportion as they were remote from it's conception, until brought to the mind by caufes fo natural, as to induce it to believe, that they are the happy and fpontaneous flow of it's own prolific brain. Their fplendour then eclipfing his judgment, the man is hurried on by enthusiasm and self-sufficiency, like a ship at fea, without ballaft or helm, by every breath of wind: and, to carry the comparison still further, should a tempest chance to rife in the state, he is swallowed up in the whirlpools of confusion, into the very midst of which his conceit has plunged him; as the vessel, that was not prepared to stem the violence Bb

(370)

violence of a hurricane, is buried in the raging furge.

The occasions of remarking, that frenchmen are the vainest men living, often occur, and here it must be infisted on; for no sooner had they taken possession of certain philosophical truths, perfuading themfelves, that the world was indebted to them for the difcovery, than they feem to have overlooked every other confideration, but their adoption. Much evil has been the confequence; yet France is certainly highly indebted to the national affembly for establishing many constitutional principles of liberty, which must greatly accelerate the improvement of the public mind, and ultimately produce the perfect government, that they vainly endeavoured to conftruct immediately with fuch fatal precipitation.

The confideration of feveral other articles of the conftitution was continually interrupted, and not more by the variety of bufinels, which came under the cognizance of the affembly, than by the want of a proper artangement of them. Much time was loft in difputing about the choice of fubjects of deliberation; and the order in which they ought ought to proceed. The bufinefs of the day was perpetually obliged to give place to epifodical fcenes; and men, who came prepared to difcufs one queftion, being obliged to turn to another, loft in fome measure the benefit of reflection, and the energy, fo different from the enthusiafm of the moment, with which a man supports a well digested opinion.

Two or three flight debates had arifen on the fubject of quartering a thousand men, of the regular troops, at Verfailles. The commandant of the guards had requested permiffion of the municipality; pointing out the necessity for the fecurity of the town, the national affembly, and the perfon of the king. The neceffity did not appear fo obvious to the public, and, in fact, the demand feemed calculated to provoke the tumults, against which they were so officiously guarding. Mirabeau alfo obferved, ' that the * executive power had undoubtedly a right to ' augment the military force, in any particular ⁶ place, when private information, or urgent ' circumstances, appeared to require it; and ' that the municipality had, likewife, a right ' to demand the troops they judged neceffary; B b 2 · VCE 'yet he could not help thinking it fingular, " that the ministers should have entrusted the • municipality with a fecret, which they did not communicate to the affembly, who • might be fuppofed at leaft as anxious to take • every precaution for the fafety of the town ' and the king's perfon.' To these pertinent remarks no attention was paid; and a letter from the mayor of Paris, informing the affembly, that a great number of the districts of the metropolis had remonstrated against the introduction of regular troops into Verfailles, to awe the national guards, was equally neglected; whilft a letter to the prefident, in the name of the king, informing him, that he had taken the different measures necessary to prevent any diffurbances in the place where the national affembly were fitting, was thrown aside without any comment.

The loan ftill failing, feveral individuals made magnificent prefents; facrificing their jewels and plate, to relieve the wants of their country. And the king fent his rich fervice to the mint, in fpite of the remonstrances of the affembly.—The difinterestedness of this action, it is absurd to talk of benevolence, may fairly be doubted; because, had he escaped,

ł

escaped, and the escape was then in contemplation, it would have been confiscated; whilf the voluntary offer was a popular step, which might serve for a little time to cover this design, and turn the attention of the public from the subject of the reinforcement of the guards to the patriotism of the king.

These donations, which fcarcely afforded a temporary fupply, rather amufed than relieved the nation; though they fuggested a new plan to the minister. Necker, therefore, incapable of forming any great defign for the good of the nation, yet calculating on the general enthusiasm, which pervaded all descriptions and ranks of people, laid before the affembly the ruinous state of the finances, proposing at the fame time, as the only mode of remedying the evil, to require of the citizens a contribution of one-fourth of their income. The affembly was ftartled by this propofal, but Mirabeau, believing that the people would now grant whatever their reprefentatives required, prevailed on the affembly, by a lively reprefentation of the perilous ftate of the kingdom, to adopt the only plan of falvation which had yet been fuggeftedinfifting, that this was the only expedient to avoid Bb 3

avoid an infamous national bankruptcy. "Two centuries of depredations and pillage," he exclaimed, ' have hollowed out an im-• menfe gulph, in which the kingdom will foon be fwallowed. It is neceffary to fill " up this frightful abyfs. Agreed !--- Choofe • out the rich, that the facrifice may fall on * the fewer citizens; but, determine quickly! • There are two thousand notables, who have fufficient property to reftore order to your finances, and peace and profperity to the kingdom. Strike; immolate without pity • these victims !-- precipitate them into the • abyls-it is going to close on them-ye draw back, with horrour--ye men! pufil-· lanimous and inconfiftent !--- and fee ye not in decreeing a bankruptcy, or, which is ftill ⁴ more contemptible, rendering it inevitable, • ye are fullied by an act a thousand times * more criminal ?'

But it is impossible to do justice to this burst of eloquence, in a translation; besides, the most energetic appeals to the passions always lose half their dignity, or, perhaps, appear to want the support of reason, when they are cooly perused.—Nothing produces conviction like passion—it seems the ray from heaven, heaven, that enlightens as it warms.—Yet the effect once over, fomething like a fear of having been betrayed into folly clings to the mind it has most ftrongly influenced; and an obscure fense of shame lowers the spirits that were wound up too high.

From the whole tenour of this speech it is clear, that Mirabeau was in earnest; and that he had fired his imagination, by confidering this plan as an act of heroifm, that would ennoble the revolution, and reflect lafting honour on the national affembly. In this extemporary flow of eloquence, probably the most fimple and noble of modern times, mixed none of the thetoric which frequently entered into his fludied compositions; for his periods were often artfully formed ;---but it was the art of a man of genius. He proposed to the affembly to address their constituents on this occafion; and he was accordingly requested to prepare an address for their confideration.

His address to the nation is, indeed, a master-piece; yet, being written to persuade, and not spoken to carry a point immediately, and overwhelm opposition, there is more reasoning in it; and more artful, though less B b 4 forcible, forcible, appeals to the paffions. And, though this expedient appears to be the moft wild that folly could have blundered upon, the arguments ought to be preferved with which it was gloffed over.

To expect a man to give the fourth of what he lived on; and that in the course of fifteen months, leaving it to him to make the estimate, was expecting that from virtue, which could only have been produced by enthusiasm. All the ancient acts of heroism were excited by the fpur of prefent danger; and of this kind of virtue the french were equally capable ; yet, though the plan afforded them an opportunity to give a splendid proof of their patriotifm, it by no means answered; because, it being the effect rather of temper than of principle, felfifhness had time to find a plaufible pretext to elude it; and vanity is feldom willing to hide it's good works in the common measure.

As the removing the national affembly to Paris forms an epocha in the hiftory of the revolution, it feems proper to close this chapter with Mirabeau's address.

• The deputies of the national affembly • fufpend a while their labours to lay before • their

(377)

their conflituents the wants of the flate, and
to call upon their patriotifm to fecond the
measures, which a country in danger demands.

It were betraying you to diffemble. Two
ways are open—the nation may ftride forward to the most glorious pre-eminence, or
fall head-long into a gulph of misfortune.

A great revolution, the very plan of
which fome months ago would have appeared chimerical, has taken place amongft
us, Accelerated by unforefeen circumftances,
the momentum has fuddenly overthrown
our ancient inflitutions. Without allowing
us time to prop what muft be preferved, or
to replace what ought to be deftroyed, it
has at once furrounded us with ruins.

⁶ Our efforts to fupport the government are ⁶ fruitlefs, a fatal numbnefs cramps all it's ⁶ powers. The public revenue is no more; ⁶ and credit cannot gain ftrength at a moment, ⁶ when our fears equal our hopes.—This fpring ⁶ of focial power unbent, has weakened the ⁶ whole machine; men and things, refolu-⁶ tion, courage, and even virtue itfelf, have ⁶ loft their tenfion. If your concurrence do ⁶ not fpeedily reftore life and motion to the bodybody-politic, the grandeft revolutions, pcrifning with the hopes it generated, will
mingle again in the chaos, whence noble
exertions have drawn it; and they, who
fhall ftill preferve an unconquerable love of
liberty, will refuse to unworthy citizens
the difgraceful confolation of refuming their
fetters.

Since your deputies have buried all their * rivalry, all their contending interests, in a * just and necessary union, the national assem-• bly has laboured to establish equal laws for • the common fafety. It has repaired great errours, and broken the links of countlefs • thraldoms, which degraded human nature: • it has kindled the flame of joy and hope in • the bosoms of the people, the creditors of earth and nature, whole dignity has been · fo long tarnished, whose hearts have been fo long difcouraged; it has reftored the · long-obscured equality of frenchmen, eftab-^{*} blifhed their common right to ferve the flate, to enjoy it's protection, to merit it's rewards: in fhort, conformably to your inftructions, it is gradually erecting, on the • immutable basis of the imprescriptible rights • of man, a conftitution mild as nature, last-• ing 5

sing as justice, and the imperfections of which, • the confequence of the inexperience of it's sauthors, will eafily be repaired. We have ⁶ had to contend with the inveterate prejudices f of ages, whilft haraffed by the thousand un-⁴ certainties which accompany great changes. • Our fucceffors will have the beaten track of * experience before them ; we have had only the compass of theory to guide us through * the pathlefs defert. They may labour peace-" ably; though we have had to bear up against forms. They will know their rights, and • the limits of their power : we have had to * recover the one, and to fix the other. They * will confolidate our work-they will furpafs 'us-What a recompence! Who fhall dare, ^s mean while, to affign limits to the grandeur france? Who is not elevated by hope? * Who does not felicitate himfelf on being a f citizen of it's empire ?

Such, however, is the crifis of the finances, that the ftate is threatened with diffolution before this grand order of things can find it's centre. The ceffation of the revenue has banifhed fpecie, A thoufand circumftances haften it's exportation. The fources of credit are exhausted; and the wheels " wheels of government are almost at a stand. • If patriotifin then step not forward to the ^e fuccour of government, our armies, our fleets, our fubfistence, our arts, our trade, • our agriculture, our national debt, our coun-• try itfelf, will be hurried towards that cataf-* trophe, when the will receive laws only from ^e diforder and anarchy-Liberty would have eglanced on our fight, only to difappear for ever, only to leave behind the bitter con-' fciousness, that we did not merit the possesfion. And to our shame, in the eyes of the ' universe, the evil could be attributed folely • to ourfelves. With a foil fo fertile, industry · fo productive, a commerce fo flourishing, and fuch means of profperity-what is this embarrassment of our finances? Our wants ' amount not to the expence of a fummer's · campaign-and our liberty, is it not worth ' more than those fenseless struggles, when • even victory has proved ruinous ?

The prefent difficulty overcome, far from
burdening the people, it will be eafy to
meliorate their condition. Reductions, which
need not annihilate luxury; reforms, which
will reduce none to indigence; a commutation
of the oppreflive taxes, an equal affeffment
of

of the impoft, together with the equilibrium
which muft be reftored between our revenue
and our expenditure; an order that muft be
rendered permanent by our vigilant fuperintendency.—Thefe are the fcattered objects of
your confolatory perfpective.—They are
not the unfubftantial coinage of fancy; but
real, palpable forms—hopes capable of
proof, things fubordinate to calculation.

• But our actual wants—the paralyfis of our • public ftrength, the hundred and fixty extra • millions neceffary for this year, and the • next—What can be done? The prime mi-• nifter has proposed as the great lever of the • effort, which is to decide the kingdom's fate, • a contribution proportional to the income of • each citizen.

Between the neceffity of providing inftantly for the exigencies of the public, and
the impoffibility of inveftigating fo fpeedily
the plan before us; fearing to enter into a
labyrinth of calculations, and feeing nothing
contrary to our duty in the minister's propofal, we have obeyed the dictates of our confciences, prefuming they would be yours.
The attachment of the nation to the author
of the plan, appeared to us a pledge of it's

fuccefs; and we confided in his long experience, rather than truft to the guidance of
our fpeculative opinions.

• To the conficience of every citizen is left • the valuation of his income : thus the effect • of the measure depends on your own pa-• triotifm. When the nation is burfting from • the nothingnels of fervitude to the creation • of liberty—when policy is about to concur • with nature in unfolding the inconceivable • grandeur of her future defliny—shall vile • paffions oppose her greatnels? interest ftay • her flight? and the falvation of the ftate • weigh lefs than a perfonal contribution?

ţ

• No; fuch madnels is not in nature; the • paffions even do not liften to fuch treacher-• ous reckonings. If the revolution, which • has given us a country, cannot roule fome • frenchmen out of the torpor of indifference, • at leaft the tranquillity of the kingdom, the • only pledge of their individual fecurity, will • influence them. No; it is not in the whirl • of univerfal overthrow, in the degradation of • tutelary authority, when a crowd of indigent • citizens, flut out from the work-fhops, will • be clamouring for impotent pity; when the • foldiery difbanded will be forming itfelf into • hungry hungry gangs of armed plunderers, when
property will be violated with impunity, and
the very existence of individuals menaced—
terrour and grief waiting at the door of every
family—it is not amidst fuch complicated
wretchedness, that these cruel and felfish men will enjoy in peace the hoards
which they denied their country. The only
diffinction that awaits them, in the general
wreck, will be the universal opprobrium
they deferve, or the useless remorfe that will
corrode the inmost receffes of their hearts.

• Ah ! how many recent proofs have we • of the public spiritedness, which renders all ' fuccefs fo eafy ! With what rapidity was . formed the national militia, those legions of · citizens armed for the defence of the coun-⁴ try, the prefervation of tranquillity, and the • maintenance of the laws ! A generous emu-'lation has beamed on all fides. Villages, * towns, provinces, have confidered their pri-* vileges as odious diffinctions, and folicited • the honour of depriving themfelves of pe-. ⁶ culiar advantages, to enrich their country. * You know it : time was not allowed to draw 'up the mutual conceffions, dictated by a ' purely patriotic fentiment, into decrees; fo • impatient

(384)

* impatient was every class of citizens to re-

fore to the great family whatever endowed
fome of it's members to the prejudice of
others.

• Above all, fince the embarraffinent of our ⁶ finances, the patriotic contributions have increafed. From the throne, the majefty of • which a beneficent prince exalts by his virtues, has emanated the most striking exam-• ple.—O thou, fo justly the dearly belove. • of thypeople-king-citizen-man of worth ! "it was thine to caft a glance over the mag. enificence that furrounded thee, and to con-• vert it into national refources. The objects • of luxury which thou hast facrificed, have • added new luftre to thy dignity; and whilft • the love of the french for thy facred perfon « makes them murmur at the privation, their • fenfibility applauds thy magnanimity; and * their generofity will repay thy beneficence • by the return it covets, by an imitation of * thy virtues, by purfuing thy courfe in the • career of public utility.

How much wealth, congealed by oftentation into ufelefs heaps, fhall melt into
flowing ftreams of profperity ! How much
the prudent economy of individuals might
contribute

(385)

contribute to the reftoration of the kingdom !
How many treafures, which the piety of our
forefathers accumulated on the altars of our
temples, will forfake their obfcure cells without changing their facred deftination ! " This
I fet apart, in times of profperity;" fays religion; " it is fitting that I difpenfe it in the
day of adverfity. It was not for myfelf—
a borrowed luftre adds nothing to my greatnefs—it was for you, and the ftate, that I
levied this honourable tribute on the virtues
of your forefathers."

"Who can avoid being affected by fuch 'examples? What a moment to difplay our ' refources, to invoke the aid of every corner ' of the empire !--- O prevent the fhame, with which the violation of our engagements, 'our most facred engagements, would stain • the birth of freedom ! Prevent those dreadful flocks, which, in overturning the most folid inftitutions, and fhattering the most ' established fortunes, would leave France co-• vered with the fad ruins of a shameful hurricane. How miltaken are those, who at a [•] certain diftance from the capital contemplate " not the links, which connect public faith with • national profperity, and with the focial con-+ traft ! Cc

(386)

tract ! They who pronounce the infamous
term bankruptcy, are they not rather a herd
of ferocious beafts, than a fociety of men
juft and free ? Where is the frenchman who
will dare to look his fellow citizens in the
face, when his confcience fhall upbraid him
with having contributed to empoifon the
existence of millions of his fellow creatures ?
Are we the nation to whose honour it's enemies bear witnes, who are about to fully the
proud diffinction by a BANKRUPTCY ?-Shall we give them cause to fay, we have
only recovered our liberty and ftrength to
commit, without shuddering, crimes which
paled even the check of despotient?

• Would it be any excuse to proteft, that • this execrable mischief was not premedi-• tated ? Ah ! no : the cries of the victims, • whom we shall featter over Europe, will • drown our voice. Act then !- Be your • measures swift, strong, fure. Dispel the • eloud, that lowers over our heads, the gloom • of which sheds terrour into the hearts of the • creditors of France.- If it burst, the devaf-• tation of our national resources will be more • tremendous than the terrible plague, which • has lately ravaged our provinces.

(387)

• How will our courage in the exercise of • the functions, you have confided to us, be " renewed ! With what vigour shall we la-^s bour in forming the conftitution, when fe-• cured from interruption ! We have fworn to ' fave our country-judge of our anguish, " whilft it trembles on the verge of deftruc-⁶ tion. A momentary facrifice is fufficient : "a facrifice offered to the public good, and • not to the encroachments of covetoulnels. "And is this eafy explation of the faults and ' blunders of a period, fligmatized by politi-' cal fervitude, above our ftrength ? Think ' of the price which has been paid for ' liberty by other nations, who have flown * themfelves worthy of it :---for this, rivers of • blood have ftreamed-long years of woe, 'and horrid civil wars, have every where * preceded the glorious birth !---Of us no--' thing is required, but a pecuniary facrificeand even this vulgar offering is not an im-• poverishing gift :---it will return into our bosom, to enrich our cities, our fields; ' augmenting our national glory and prof-" perity.'

Cc2

CHAPTER III.

REFLECTIONS ON THE NEW MODE OF RAISING SUP-Plies. No just system of taxation yet esta-Blished. Paper Money. Necessity of gradual Reform.

THE talk certainly was very difficult, at this crifis, for a minister to give fatisfaction to the people, and yet fupply the wants of the state; for it was not very likely that the public, who had been exclaiming against the incessant demands of the old government, would have been pleased with new burdens, or patiently endured them. Still it is always the height of folly in a financier, to attempt to supply the exigencies of government by any but specific and certain means: for such vague measures will ever produce a *deficit*, the consequences of which are most pernicious to public credit and private comfort.

A man, who has a precife fum to live upon, generally takes into his effimate of expences a certain part of his income as due to the government, for the protection and focial advantages it fecures him. This proportion of his income being commonly the fame from period period to period, he lays it by for that particular purpofe, and contentedly enjoys the remainder. But, fhould a weak minister, or a capricious government, call on him for an additional fum, because the taxes have proved unproductive, either through the inability of some of the members of the state, or that they were laid on articles of confumption, and the confumption has not been equal to the calculation; it not only deranges his schemes of domestic economy, but may be the cause of the most series.

A man who has a limited income, and a large family, is not only obliged to be very industrious to fupport them, but he is likewife neceffitated to make all his arrangements with the greatest circumspection and exactness; because a trifling loss, by involving him in debt, might lead to his ruin, including that of his family. The rich man, indeed, feldom thinks of these most cruel misfortunes; for a few pounds, more or lefs, are of no real importance to him. Yet the poor man, nay even the man of moderate fortune, is liable to have his whole fcheme of life broken by a circumstance of this kind, Cc3 and

(390)

and all his future days embittered by a perpetual ftruggle with pecuniary vexations.

Governments, which ought to protect, and not opprefs mankind, cannot be too regular in their demands; for the manner of levying taxes is of the highest importance to political economy, and the happiness of individuals. No government has yet established a just fystem of taxation *: for in every country the expences of government have fallen unequally on the citizens; and, perhaps, it is

• In Holland almost all the taxes are collected in the fhape of excise.

In France, formerly, the taxes were generally internal.; but, fince the mode established of making a revenue of 300,000,000 l. by the land and house tax part of the 580,000,000 l. estimated to be the peace establishment, it appears, that this was too great a proportion to be obtained in that way. Hence the revenue of France has lately failed in a great degree.

In America the taxes of the federal government have been lately established folely on the customs, that is to fay, on goods imported. These operate two ways; encouraging home manufactures, and discouraging the manufactures of other countries.

Great Britain has levied her revenue on cuftoms both inwards and outwards; on excife, principally internal; on famps, which operate both internally and externally; and on fixed objects, as well as internal confumption, (as fait). not possible to render them perfectly equal, but by laying all the taxes on land, the mother of every production.

In this pofture of affairs, the enthuliafm of the french in the caufe of liberty might have been turned to the advantage of a new and permanent fystem of finance. An able, bold minister, who posses the confidence of the nation, might have recommended with fuccess the taking of the national property under the direct management of the assessing; and then endeavouring to raise a loan on that property, he would have given respectability to the new government, by immediately procuring the supplies indispensably necessary not only to keep it, but to put it in motion.

In times of civil commotion, or during a general convultion, men who have money, and they are commonly most timid and cautious, are very apt to take care of it, even at the expence of their interest; and, therefore, it was to be prefumed, that the monied men of France would n ot have been very ready to fubscribe to the different loans proposed by the minister, unless the fecurity had been obvious, or the speculative advantages exorbitant. But if Necker, whom the prudent C c 4 ł

nfurer adored as his tutelar god, had faid to the nation ' there is a property worth 4,700,000,000 l. independent of the property of the emigrants, take it into your · immediate possefion ; and, whilst the fales • are going on, give it as a guarantee for the · loan you want. This just and dignified ^e measure will not only relieve your present eneceffities, but it will be fufficient to enable • you to fulfil great part of your former engage-"ments." There would have been then no need of the eloquence of Mirabeau; reason would have done the business; and men, attending to their own interest, would have promoted the public good, without having their heads turned giddy by romantic flights of heroifm.

The immediate and inceffant wants of a ftate must always be fupplied; prudence therefore, requires, that the directors of the finances should rather provide by anticipation for it's wants than suffer a *deficit*. The government being once in arrears, additional taxes become indispensable to bring forward the balance, or the nation must have recourse to paper notes; an expedient, as experience has shown, always to be dreaded, because

by

by increasing the debt it only extends the evil. And this increasing debt, like a ball of fnow, gathering as it rolls, foon attains a wonderful magnitude. Every state, which has unavoidably accumulated it's debt, ought, provided those at the helm with to preferve the government, and extend the fecurity and comforts of it's citizens, to take every just measure to render the interest secure, and to fund the principal; for as it augments, like the petrifying mais, it stands in the way of all improvement, fpreading the chilling miferies of poverty around-till the evil baffling all expedients, a mighty crafh produces a new order of things, overwhelming, with the ruins of the old, thousands of innocent victims.

The precious metals have been confidered as the beft of all possible figns of value, to facilitate the exchange of commodities, to fupply our reciprocal wants : and they will ever be neceffary to our comfort, whilst by the common confent of mankind they are the standards of exchange. Gold and filver have a specific value, because it is not easy to accumulate them beyond a certain quantity. Paper, on the contrary, is a dangerous expedient, except under a well established government : and even then the business ought to be conducted with great moderation and fagacity.—Perhaps it would be wife, that it's extent should be consistent with the commerce of the country, and the quantity of species actually in it— But it is the spirit of commerce to stretch credit too far. The notes, also, which are issued by a state before it's government is well established, will certainly be depreciated; and in proportion as they grow precarious, the gold and filver, which was formerly in circulation will vanish, and every article of trade, and all the comforts of life, will bear a higher price.

These are confiderations, which ought to have occurred to the french minister, and have led him to take decided measures. The interest of the national debt was 255,395,141 /. by a report for the year 1792.—Necker, by his account dated the 1st of may, 1789, states the income at 475,294,000 /. and the expences at 531,533,000 /. : consequently there was a deficiency of 56,239,000 /. ; and it was not probable, it could not even be expected, that during the convulsions of a revolution, the taxes would be regularly paid : the debt, then, then, and the demands of the flate, must increase.

The credit of every government greatly depends on the regulation of it's finances : and the most certain way to have given stability to the new fystem, would have been by making fuch arrangements as would have infured promptitude of payment. No minister ever had it fo much in his power to have taken measures glorious for France, beneficial to Europe, happy for the people of the day, and advantageous to posterity. No epocha, fince the inflated fystem of paper (the full blown bladders of public credit, which may be deftroyed by the prick of a pin) was invented. ever appeared fo favourable as that juncture in France, to have overturned it completely: and by overlooking thefe circumstances, the nation has probably loft most of the advantages, which her finances might have gained by the revolution.

Such mistakes, whilst they involve in them a thousand difficulties, prove the necessity of gradual reform; left the light, fuddenly breaking-in on a benighted people, should overpower the understanding it ought to direct. The line in which Necker had been accustomed cuftomed to move, by reftraining what little energy his mind was capable of exerting, precluded the possibility of his feeing the faint lines marked on an expansive scale, which afforded the data for calculations; and the nation, confiding to him the direction of a business for which he had not sufficient talents, seems to have contemplated in imagination a prospect, which has not yet been realized; and whilst expectation hovered on it's margin, the dazzling scenery was obscured by clouds the most threatening and tremendous.

These are evils that from the beginning of time have attended precipitate and great changes. The improvements in philosophy and morals have been extremely tardy. All fudden revolutions have been as fuddenly overturned, and things thrown back below their former state. The improvements in the fcience of politics have been still more flow in their advancement than those of philosophy and morals; but the revolution in France has been progressive. It was a revolution in the minds of men; and only demanded a new system of government to be adapted to that change. This was not generally perceived; and the politicians of the day ran wildly from one extreme to the other, without recollecting, that even Mofes fojourning forty years in the wildernefs could but conduct the jews to the borders of the promifed land, after the first generation had perished in their prejudices; the most inveterate fins of men.

This is not a difcouraging confideration. Our anceftors have laboured for us; and wc. in our turn, must labour for posterity. It is by tracing the mistakes, and profiting from the discoveries of one generation, that the next is able to take a more elevated fland. The first inventor of any instrument has scarcely ever been able to bring it to a tolerable degree of perfection; and the discoveries of every man of genius, the optics of Newton excepted, have been improved, if not extended, by their followers.-Can it then be expected, that the science of politics and finance, the most important, and most difficult of all human improvements; a science which involves the paffions, tempers, and manners of men and nations, estimates their wants, maladies. comforts, happiness, and misery, and computes the fum of good or evil flowing from focial inftitutions; will not require the fame gradations, and advance by fteps equally flow

(393)

to that flate of perfection neceffary to fecure the facred rights of every human creature?

The vanity and weaknels of men have continually tended to retard this progrefs of things: ftill it is going forward; and though the fatal prefumption of the headftrong french, and the more deftructive ambition of their foreign enemies, have given it a check, we may contemplate with complacent ferenity the approximation of the glorious era, when the appellations of fool and tyrant will be fynonymous.

HISTORICAL AND MORAL VIEW

OF THE

FRENCH REVOLUTION.

BOOK V.

CHAPTER I.

BRROUR OF THE NATIONAL ASSEMBLY IN NEGLECTING TO SECURE THE FREEDOM OF FRANCE. IT'S CONDUCT **COMPARED WITH THAT OF THE AMERICAN STATES. NECESSITY OF FORMING A NEW CONSTITUTION AB SOON AS AN OLD GOVERNMENT IS DESTROYED. THE DE-CLARING THE KING INVIOLABLE A WRONG MEASURE. SECURITY OF THE FRENCH AGAINST A COUNTER-REVOLUTION. THE FLIGHT OF THE KING MEDI-TATED.**

THE conduct of the affembly in lofing fo much time—the most precious time to fecure the happiness of their country, and enable the present generation to participate in the bleffings they were preparing for posterity, instead of having to encounter all the miseries of anarchy, can never be fufficiently lamented. France had already gained her freedom; the nation had already afcertained certain certain, and the most important, political truths: it ought, therefore, to have been the next confideration, how these were to be preserved, and the liberty of the empire confolidated on a basis that time would only render more firm.

Moderate men, or real patriots, would have been fatisfied with what had been gained, for the present, allowing the rest to follow progreffively. It was the most political and the most reasonable way to secure the acquifition. In this fituation France had to contend with the prejudices of half Europe, at least, and to counteract the influence of the infidious intriguers, who were opposing themselves to her regeneration; to facilitate which the affembly ought to have made it one of their main objects to render the king contented with the change; and then the machinations of all the underminers of the revolution, would not have loofened one fundamental ftone, to endanger the rifing edifice.

Such is the difference between men acting from a practical knowledge, and men who are governed entirely by theory, or no principle whatever. Most of the United States

of America formed their separate constitutions within a month, and none took more than three, after the declaration of their independence by congress. There certainly was a vast distinction between these States, then the colonies of Great Britain, and France after the 14th of july; but both countries were without a government. America with an enemy in the heart of their empire, and France threatened with an attack. The leading men of America, however, knew, that there was a necessity of having fome kind of government, and feem to have perceived the eafe, with which any fubsequent alterations could be effected. The members of the national affembly, on the contrary, found themselves furrounded with ruins; and aiming at a flate of perfection for which the minds of the people were not fufficiently mature; affecting likewife to be directed by a magnanimous difinterestedness, they not only planted the germ of the most dangerous and licentious spirit, but they continued to irritate the desperate courtiers, who, having determined to oppose stratagem to force, and not fucceeding, refted all their future hopes on the king's escape.

The liberty of the prefs, which had been virtually established, at this period, was a fuccefsful engine employed against the affembly. And to a nation celebrated for epigrammatic fancy, and whofe tafte had been fo refined by art, that they had loft the zeft of nature, the fimplicity of fome of the members, their awkward figures, and ruftic gait, compared with the courtly mien, and eafy affurance of the chevaliers of Verfailles, afforded an excellent fubject. Some of these fatires were written with confiderable wit, and fuch a happy turn of caricature, that it is impoffible not to laugh with the author, though indirectly ridiculing the principles you hold facred. The most respectable decrees, the most important, and ferious difcuffions, were twifted into jefts; which divided the people without doors into two diftinct parties; one, speaking of the assembly with fovereign contempt, as a fet of upfarts and babbling knaves; and the other, fetting up new thrones for their favourites, and viewing them with blind admiration, as if they were a fynod of demi-gods. The contenancing of this abufe of freedom was illjudged. The different parties were already fuffi-

ļ

fufficiently heated; yet it would have been impossible, perhaps, to have restrained the temper of the times, fo ftrong is the intoxication of a new folly, though it would have been easy for the affembly to have passed a decree respecting libels. But so ardent was become their paffion for liberty, that they were unable to diferiminate between a licentious use of that important invention, and it's real utility. Treating then with an untimely difdain the many abufive publications, which were fold within the very walls where they were fitting, they were not aware of the effect which they produced on the minds of mock heroes, who, having no principle but honour, were ready to risk their lives to footh diftreffed beauty, no matter what produced it; or to alleviate the fufferings of a king, though the confequence of his turpitude or tergiversation.

After the wreck of a government the plan of a new conftitution ought to be immediately formed, that is, as foon as circumftances will poffibly admit, and prefented to the citizens for their acceptance; or rather the people fhould depute men for that purpofe, and give them a limited time for framing one. Dd 2 A con-

(404)

A conflictution is a flandard for the people to rally round. It is the pillar of a government, the bond of all focial unity and order. The invefligation of it's principles makes it a fountain of light; from which iffue the rays of reafon, that gradually bring forward the mental powers of the whole community. And whenever the wheels of government, like the wheels of any other machine, are found clogged, or do not move in a regular manner, they equally require alteration and improvement : and thefe improvements will be proportionably perfect as the people become enlightened.

The authority of the national affembly had been acknowledged nearly three months previous to this epocha, without their having taken any decided steps to secure these important ends. Indeed it does not appear to have been their suff object. They seem not to have known, or at least not to have been apprehensive, that, in proportion to the length of time that the people are without an established government, anarchists gain an ascendency over their minds; and it then becomes no easy task to form a constitution adapted to their wayward tempers.

When a few fundamental principles are ascertained, and the state has determined that they shall form the basis of it's polity, it feems to be no difficult matter to give motion to the new fprings of government. It is true, that many of the prejudices of frenchmen were still inveterate, and in some meafure influenced them; and it is also certain, that their total ignorance of the operations of any rational fystem of government was an impediment to this motion; but it is nevertheless to be prefumed, that, the liberty of frenchmen having been previoufly fecured by the eftablishment of the declaration of rights, if the affembly had formed fome kind of a conftitution, and proposed it to the nation, and to the king, if he were confidered as forming a part of it, for their acceptation, the difpute between the people and court would have been brought to a speedy issue; and the public attention directed to a point would have given dignity and respectability to their proceedings. If fuch measures had been followed, and it appears a little strange they were not, most probably the king and court, perceiving that their future confequence wholly depended on their acquiescence with Dd 3

ţ

with the flate of reason, and temper of the times, would have relinquished all those abfurd and dangerous projects for overturning the rising political fabric of the nation, which anarchy fostered.

It is the pillars of a building, which indicate it's durability, and not the minor beams that are inferted through them, in order to rear the structure. The natural, civil, and political rights of man are the main pillars of all focial happines; and by the firm establishment of them, the freedom of men will be eternally fecured. The moment, therefore, a state has gained those important and facred privileges, it is clear, that it ought to form fome kind of government, grounded upon this firm and broad bafis, that being the only poffible way to give them permanency. But the conftituent affembly, unmindful of the dreadful effects beginning to flow from an unbounded licentiousness, continued to purfue a romantic fublimity of character, dangerous to all fublunary laws; whilft most intereftedly attentive to things that should have been fubordinate to their first object, they were led into a procrastination, which in it's

(407)

it's confequence has been fatal in the ex-

The decree which made the king inviolable, passed on the 15th of september, at the time the crown was declared hereditary, and the empire indivisible, was the most idle, if not the most dangerous measure, both for him and France, which could have been devifed. The former life of Louis had exhibited a feries of follies, and difplayed an infincerity not to be tolerated, much lefs encouraged ; and it was likely, if this doctrine, a relict of the abasement of ignorance, that kings can do no wrong, should be carried into a law, forming part of the constitution. that he would avail himfelf of the decree of the affembly to cover his contempt of the national fovereignty. When kings are confidered by the government of a country merely as ciphers, it is very just and proper, that their ministers should be responsible for their political conduct : but at the moment when a flate is about to effablish a constitution on the basis of reason, to undermine that foundation by a master-piece of absurdity, appears a folecism as glaring as the doctrine itself is laughable, when applied to an enlightened Dd4 policy.

policy. In fact, whilft Mirabeau contended for the infallibility of the king, he feems to have had no right from reason to deride those who respected that of the church : for, if the government must necessarily be supported by a pious fraud, one was as respectable as the other,

The bigotry of Louis was well known; nay, it was notorious, that he employed his confessor to erafe from his tender conscience the remembrance of the vices he refolved to indulge, and to reconcile the meaneft diffimulation with a fervile fear of the Being whofe first attribute is truth.-This man, whole bestiality had been carefully pampered by the queen and count d'Artois, because in those moments of revelry, prolonged to the moft difgufting excels of gluttony and intoxication, he would fanction all their demands, was made in his perfon and conduct facred and unimpeachable. This was the extreme folly of weakness. But, when it is also kept in view, that, at the very period when he was declared inviolable, he was fuspected, in concert with the court, to be actually meditating his flight, there feems to be a pufillanimity in it as contemptible as the

(409)

pretended dignity of the affembly was ridiculous.

True firmnels confilts in doing whatever is just and reasonable, uninfluenced by any other confideration. The defining the power of the crown in the affembly to be fubordinate to the authority of the people must have appeared to the kings of Europe a dangerous encroachment on their indefeafible rights :---a herefy tending to undermine their privileges, should fuch audacity pass unchastized, and to deftroy the fplendour of royalty by prefuming to control it's omnipotence. It was then fcarcely to be expected, that their refentment would be appealed by fhielding the perfon of Louis against the danger of intrigue and violence. It was not, indeed, the prefervation of the life of this unfortunate man, that interested them fo fensibly as to appall the fycophants of Europe.-No; it was the attack made on defpotifm; and the attempt to draw afide the fplendid curtain which concealed it's folly, that threw them into a general ferment and agitation. This agitation could not fail to infpire the court of Verfailles with hope, and they ftood prepared to take advantage of the gathering florm, as eagerly

eagerly as a diffreffed mariner, who has long laid becalmed, perceiving at length a gentle heaving of the fea, and feeling the undulating motion of his bark, forefees the approaching breeze, and fpreads his fails to catch the first breath of wind. The effect of the feigned or real pity of many of the admirers of the old fystem, who were deeply wounded by the wrong done, as they infifted, to their king, was to be dreaded; for it was not to be fupposed, that the chivalrous spirit of France would be destroyed in an instant, though fwords had ceafed to leap out of their fcabbards when beauty was not deified. It was then undoubtedly to be feared, that they would risk their lives and fortunes to support the glory of their mafter, and their own notions of honour: and the affembly, by making Louis not accountable for any of his actions, however infincere, unjust, or atrocions, was affording all his abettors a shelter, encouraging at the fame time his hypocrify, and relaxing the little energy of character, which his misfortune feemed to be calling into play.

Mistaken lenity in politics is not more dangerous than a false magnanimity is palpa-

ble

ble littleness in the eyes of a man of fimple integrity. Befides, had the representatives of the people confidered Louis merely as a man, it is probable he would have acted more like one. Instead of palliating the matter, they should, on the contrary, have proclaimed to all Europe, with a tone of dignified firmnefs, that the french nation, willing for themselves, regardless of the rights and privileges of others, though refpecting their prejudices, finding that no compromife could be formed between the court and people, whofe interest neither justice nor policy ever required should be distinct, do not confider themfelves accountable to any power or congress on earth, for any measure they may choose to adopt in framing a constitution to regulate their own internal polity. That treating their monarch like a man, and not as a mere idol for state pageantry, they would wifh, by eftablishing the dignity of truth and justice, to give stability to the freedom of frenchmen, and leave a monument in their inftitution's to immortalize a fincere and acquiescing king. But that, though their ideas might differ greatly from those of their neighbours, with whom they defired to live on the moft

most amicable terms, they would purfue the path of eternal reafon in confolidating the rights of man; and by a striking example lay the foundation of the liberty of the whole globe, of that liberty which had hitherto been confined to the small island of England, and enjoyed imperfectly even there.

The house of Austria was at this period engaged in a war with the turks, which obliged it to withdraw most of it's troops from Flanders; and the intelligence, that the flemings, highly discontented with the innovations, which the vain weathercock Joseph the Second had made in their form of worthip, were on the eve of an infurrection, more against the folly of the man than the despotism of his court, calmed the fears of the french, as to the danger of being immediately attacked by Germany. This fecurity, for they had no dread of Sardinia, made them confider the poffibility of a counter-revolution being effected by foreign enemies as far from alarming. It is true, there was not any just cause of apprehension, unless they took into the calculation, that the policy of Europe for ages past had been subject to sudden changes; a state of profound tranquillity giving

ing place to fanguinary scenes of confusion, and inhuman butcheries-often about fuch triffing infults and idle pretentions, as individuals would be ashamed to make a pretext for quarrelling; and having reafon to expect thefe changes as long as the fyftems of courts preserve their existence, France could not reckon, with any degree of certainty, on the continuation of peace .- Neither did the national affembly appear to have calculated upon it: for they undoubtedly betrayed fymptoms of pufillanimity, when they fuffered their conduct to be in the fmalleft degree influenced by the apprehension of a combination of the crowned heads of Europe to replace the royal diadem of France, should the most brilliant of it's jewels be touched by profane hands.

These fears, perhaps, were the secret cause, combined with the old habit of adoring the king, as a point of honour, and loving the court, as an affair of taste, that induced them to preserve the shadow of monarchy in the new order of things. It's preservation might have been politically necessary; because, before abolishing any ancient form, it is necesfary to secure whatever political good may have flowed from it, and guard against being exhausted

(414)

exhausted by cutting off an excreicence. But, if the continuance of a king in the new fystem were expedient to avert present evil, they should have allowed him the power neceffary to give energy to the government : and making him responsible for the rectitude of his actions, the man would have had a fair trial, and posterity, judging of his conduct, would have been enabled to form a just estimate of a kingly government.

Machiavelian cunning, however, still directed the movements of all the courts of Europe; and these political moles, too well perceiving the timidity that was mixed with the bluftering courage of the affembly, only waited for a favourable feason to overturn the rifing edifice. Their agents had private instructions to promote the escape of Louis, as the fureft mode of making a decided fchilm in the national politics; and they firmly believed, that the affection still sublishing for his christian majesty would facilitate the exeeution of their plan. The court also prefuming on the divisions and lenity of the affembly, took the most indefatigable pains to foster in the mind of the public, nay, in that of all Europe, pity for the degraded perion of the king,

king, and deteftation of the facrilege, which had been committed on the dignity of royalty. Their continual theme was the ignominious ftate to which the most mild of the Bourbons was reduced, by men, who usurped the reins of goverment, and trampled on the honours of that august and ancient family. Restraining the authority of a throne, which supported the most abominable tyranny, they were shaking the defpotifm, which held in bondage nine-tenths of the inhabitants of the world. These were alarming fignals to a certain class of men, to the drones and myrmidons who live on the fpoil and blood of industry and innocence. The intrusion of knowledge, which was fure to render them an ufclefs fet of beings in fociety, was to be prevented by ingenious clamours, whilft a great number of weak, well-meaning people, and fill more knaves, enlifted under their banner.

The univerfal damp, which the revolution had given to the courts of Europe, producing among them a lively fympathy for the fombre atmosphere of Verfailles, a general forrow was confequently expressed by all their minions, and expressed with unfeigned concern; for the want of the usual routine of amusements tended ę.

tended to make it real. Hope, indeed, begain again to animate them, when the king was prevailed on to concert his cleape; yet their eagerness to accelerate his departure for the frontiers, where they purposed to erect the royal standard, to avail themselves of the proximity of german connections, was in a great degree the cause of defeating that illcontrived defign.

A defign formed very early, and fystematically purfued, was probably rendered entirely abortive by the obftinacy of the court; who ftill perfifted to cherifh the belief, that the public opinion was changed only for the moment, and that their deeply rooted love of royalty would bring them back to what they termed their duty, when the effervescence excited by novelty had fubfided. And thinking, that the cordial reception given by the parifians to the foldiery had contributed to estrange them, and effect the revolution, they determined to regain their loft ground, and dazzle them by feafts, instead of stealing on their affections by holpitality .--- Still, bearing Impatiently their humiliating fituation, the courtiers could not help vauntingly exposing their project; and the babbling of joy fhowed the

(417)

the weaknefs of the heads, that could fo foon be intoxicated by hope.

A preparatory ftep was thought neceffary to awaken a fenfe of allegiance in the breafts of the people, and to promote a divifion amongst them, if not their entire concurrence, after the cabinet should have fecurely in their possession the person of the king; and this division would then enable them to calculate their firength, and act accordingly. For this purpole, in fpite of the comments that had been made on the festivity at Verfailles, which feemed before to infult the mifery of the people, and greatly tended to provoke the exertions that overturned the Bastille and changed the whole face of things, they projected another entertainment to feduce the military, encouraged to throng round the court, whilft famine was at the very gates of Paris. But previoufly the old french guards, who had been incorporated with the garde bourgeoife, began to manifest some symptoms of discontent at not being allowed to guard the perfon of the king. Whether they confidered their honour as wounded, or were fpirited up to afpire at regaining this privilege, is not decided ; but it is clear, that the court, either Еe

15.

1

either to facilitate the entrance of fresh troops, or from a real dislike to men, who had taken such an active part in disconcerting their first plot, opposed their wish; and even the municipality, as has been already noticed, was induced to request, that a regiment of fresh troops might be called in to guard the person of the king, and keep the peace, which this trifling dispute, swelled into an infurrection in the report, threatened to disturb.

The king's body-guards, whole time of fervice expired the first of october, were still retained with those who came to replace them; and an immense crowd of supernumeraries continued daily to increase this corps, which had not yet fworn allegiance to the nation. The officers, in particular, flocked to Verfailles, amounting to between eleven or twelve hundred, constantly parading together. The universal topic was commiferation of the king's fate, and infinuations respecting the ambition of the affembly. Yet, oven there the court party feemed to be prevailing : a prefident attached to loyalty was elected; and Mirabeau's remonstrances, respecting the augmentation of the troops, were difregarded.

Mean

(419)

Mean time, not only the officers of the new regiment, but those of the national guards, were careffed by the court, whilft the citizens, with more fagacity, were lavish of their attention to the foldiers. The cabinet had not fufficient difcernment to perceive, that the people were now to be led, not driven; and the popular promoters of anarchy, to ferve their private interest, availed themselves, unfortunately, but too well of this want of judgment.—Thus whilst one party, declaiming on the necessity of order, feemed to be endeavouring to rivet on them the chains of fervitude, the other lifted them above the law with vain glorious notions of their fovereignty .--- And this fovereignty of the people, the perfection of the fcience of government, only to be attained when a nation is truly enlightened, confifted in making them tyrants; nay the worft of tyrants, because the inftruments of mifchief of the men, who pretended to be fubordinate to their will, though acting the very part of the ministers whom they execrated.

CHAPTER II.

ERTERTAINMENT AT VERSAILLES. THE NATIONAL COCKADE TRAMPLED UNDER FOOT. A MOB OF WOMEN PROCEED TO THE HOTEL - DE - VILLE-AND THENCE TO VERSAILLES. THE KING'S REFLY TO THE NA" TIONAL ASSEMBLY'S REQUEST, THAT HE WOULD SANCTION THE DECLARATION OF RIGHTS AND THE FIRST ARTICLES OF THE CONSTITUTION. DEBATES ARRIVAL OF THE MOB AT VERSAILLES. THE KING RECEIVES A DEPUTATION FROM THE WOMEN, AND SANCTIONS THE DECREE FOR THE FREE CIRCU-LATION OF GRAIN. THE ASSEMBLY SUMMONED. PAYETTE ARRIVES WITH THE PARISIAN MILITIA. THE PALACE ATTACKED BY THE MOB-WHO ARE DIS-PERSED BY THE NATIONAL GUARDS. REFLECTIONS ON THE CONDUCT OF THE DUKE OF ORLEANS.

ON the first of october, in consequence of these fresh machinations, a magnificent entertainment was given in the name of the king's body-guards; but really by some of their principal officers, at the opera-house of the castle. The affectation of excluding the dragoons, distinguished for their attachment to liberty, seemed to show, but too plainly, the end in view, rendered still more conspicuous by the unusual familiarity of persons of the first rank with the lowest foldiers.

(421)

When their heads were heated by a fumptuous banquet, by the tumult of an immenfe crowd, and the great profusion of delicious wines and *liqueurs*, the conversation, purposely turned into one channel, became unrestrained, and a chivalrous scene completed the folly. The queen, to testify her fatisfaction for the homage paid to her, and the wisse expressed in her favour, exhibited herself to this halfdrunken multitude; carrying the dauphin in her arms, whom the regarded with a mixture of forrow and tenderness, and feeming to implore in his favour the affection and zeal of the foldiers.

This acting, for it is clear that the whole was a preconcerted bufinefs, was still more intoxicating than the wine.—The exclamation vive le roi, vive la reine, resounded from all fides, and the royal healths were drunk over drawn fwords, whilst that of the nation was rejected with contempt by the bodyguards. The music, the choice could not have been the effect of chance, played the well known air—O Richard ! O my king ! the universe abandons thee*! and during this

· O Richard, O mon roi,

• L'univers t'abandonne !'

Ee 3

moment

moment of fascination some voices, perhaps bribed for the occasion, mingled executions against the assembly. A grenadier even darted from the midst of his comrades, and accusing himfelf of having been unfaithful to his prince, endeavoured, feveral times, to plunge his fword into his bosom. His held arm was not indeed allowed to fearch for the difloyal heart; but fome blood was permitted to flow-and this theatrical difplay of fenfibility, carried to the highest pitch, produced emotions almost convulsive in the whole circle, of which an english reader can scarcely form an idea. The king, who is always reprefented as innocent, though always giving proofs that he more than connived at the attempts to recover his power, was likewife prevailed on to thow himself at this entertainment. And some of the fame foldiery, who had refused to fecond the former project of the cabal, were now induced to utter infults and menaces against the very authority, they then supported. 'The national cockade,' exclaimed Mirabeau, ' that emblem of the defenders of · liberty, has been torn in piece's, and ftamped • under foot; and another enfign put in it's • place.—Yes; even under the eye of the mo-'narch,

A

• narch, who allowed himfelf to be ftyled-

· Restorer of the rights of his people, they have

" dared to hoift a fignal of faction."

The fame fcene was renewed two days after, though with lefs parade; and invitations for a fimilar treat were given for the following week.

The rumour respecting them, which reached Paris, contained many exaggerated circumflances; and was regarded as the commencement of fresh hostilities, on the part of the court. The cry now was, that the flunned aristocracy had again reared it's head; and that a number of old officers, chevaliers of St. Louis, had figned a promife to join the body-guards in a new attempt. This lift was faid to contain thirty thousand fignatures; and idle as the tale was, it feemed to be confirmed by the appearance of white and black cockades, which inconfiderate individuals difplayed at the rifk of their lives. These, faid the parifians, are the first indications of a projected civil war-the court with only to have the king fafe to head them before they fpeak out :- he ought, therefore, to be removed to Paris, inferred the politicians of the palais royal. The exafperating of the people in this

Ee4

manner

manner was certainly the most absurd blundering folly that could have ruined a party, who apparently faw the neceffity of dividing the people in order to conquer them. It was, in fact, a species of madnels, and can be accounted for only by recollecting the ineffable contempt really felt by the court for the canaille, which made them still imagine the revolution to be only a temporary convulsion, not believing it possible, in spite of the daily events, that they could be crushed by the mass they despised. Their prefumption proceeded from their ignorance, and was incurable.

The queen was fuppoled to be at the head of this weak confpiracy, to withdraw the foldiery from fiding with the people. She had prefented colours to the national guards of Verfailles, and when they waited on her to express their thanks, she replied, with the most winning affability, ' the nation and ' the army ought to be as well affected to the ' king as we ourselves are. I was quite ' charmed with what passed on thursday.' This was the day of the feast.

Patients and a second

A fcarcity of bread, the common grievance of the revolution, aggravated the vague fears of the parifians, and made the people fo defperate, perate, that it was not difficult to perfuade them to undertake any enterprize; and the torrent of refentment and enthuliafin required only to be directed to a point to carry every thing before it. Liberty was the conftant watch word; though few knew in what it confifted.—It feems, indeed, to be neceffary, that every fpecies of enthuliafm fhould be fermented by ignorance to carry it to any height. Myftery alone gives full play to the imagination, men purfuing with ardour objects indiftinctly feen or underftood, becaufe each man fhapes them to his tafte, and looks for fomething beyond even his own conception, when he is unable to form a juft idea.

The parifians were now continually brooding over the wrongs they had heretofore only enumerated in a fong; and changing ridicule into invective, all called for redrefs, looking for a degree of public happines immediately, which could not be attained, and ought not to have been expected, before an alteration in the national character seconded the new system of government.

From the enjoyment of more freedom than the women of other parts of the world, those of France have acquired more independence

(426)

of fpirit than any others; it has, therefore, been the fcheme of defigning men very often fince the revolution, to lurk behind them as a kind of fafeguard, working them up to fome defperate act, and then terming it a folly, becaufe merely the rage of women, who were fuppofed to be actuated only by the emotions of the moment. Early then on the fifth of october a multitude of women by fome impulfe were collected together; and haftening to the *bôtel-de-ville* obliged every female they met to accompany them, even entering many houfes to force others to follow in their train.

1411 11

1 - 46-

The concourfe, at first, confisted mostly of market women, and the lowest refuse of the streets, women who had thrown off the virtues of one fex without having power to affume more than the vices of the other. A number of men also followed them, armed with pikes, bludgeons, and hatchets; but they were strictly speaking a mob, affixing all the odium to the appellation it can possibly import; and not to be confounded with the honest multitude, who took the Bastille.—In fact, such a rabble has feldom been gathered together; and they quickly showed, that their movement was not the effect of public spirit. They

They first talked of addressing the committee appointed by the municipality to fuperintend the operations necessary to obtain provision for the city, and to remonstrate refpecting their inattention or indifference to the public calamity. Mean time a new cord was fixed to the notorious lamp-iron, where the amusement of death was first tolerated. The national guards, forming a hedge of bayonets to prevent the women from entering the hotel, kept them in fuspense a few moments.---When, uttering a loud and general cry, they hurled a volley of ftones at the foldiers, who, unwilling, or ashamed, to fire on women, though with the appearance of furies, retreated into the hall, and left the paffage free. They then fought for arms ; and breaking open the doors of the magazines, foon procured fufils, cannons, and ammunition; and even took advantage of the confusion to carry off money and notes belonging to the public. In the interim fome went to fearch for the volunteers of the Bastille, and chose a commander from among them to conduct the party to Verfailles; whilft others tied cords to the carriages of the cannons to drag them along .-- But thefe, being mostly marine artillery, did not follow with the alacrity neceffary ¢

neceffary to accord with their wifnes; they, therefore, ftopped feveral coaches, forcing the men to get out and the ladies to join them; fastening the cannons behind, on which a number of the most furious mounted, brandishing whatever weapon they had found, or the matches of the cannons. Some drove the horfes, and others charged themfelves with the care of the powder and ball, falling into ranks to facilitate their march. They took the road by the Champs Elifées about noon, to the number of four thousand, efcorted by four or five hundred men, armed with every thing on which they could lay their hands.

Mean time the *tocfin* founded from all parts; the french guards, ftill urged on by wounded pride, loudly declared, that the king ought to be brought to Paris; and many of the citizens, not on duty, concurred with the reft of the national guards in the fame opinion, particularly those accustomed to attend the harangues at the Palais Royal. La Fayette, refusing to accompany, endeavoured to calm them. But finding, that the tumult increased, and that prayers were giving place to menaces, he offered to make known to the king, king, at their head, the wifnes of the capital, if the municipality gave him orders to this effect. Their council was now affembled; yet prolonging the deliberation till between four and five o'clock in the afternoon, the people became fo very impatient, that it was thought prudent to allow them to fet out: and the exclamations of the populace proved how eafy it was to govern, or lead them aftray, by every fresh hope.

Few events have happened at Paris, that have not been attributed by the different parties to the machinations of the leaders on the other fide; to blacken whofe characters, when they had the upper hand, the most audacious falfehoods have been industriously circulated; the detection of which has induced many calm observers to believe, that all the accounts of plots and confpiracies were fabricated in the fame manner; not confidering, that even the univerfality of these sufficients was a proof of the intriguing character of the people, who from a knowledge of themfelves became thus mistrustful of others. It was currently reported, that very confiderable fums had been distributed amongst the mob, before it marched to Verfailles; and, though many fabulous

fabulous stories of showers of gold have since been retailed by the credulous, this feems, from their fublequent conduct, to have had fome foundation : for nothing like the heroifm, the difinterestedness, appeared, which, in most other risings of the parisians, has formed a striking contrast with their barbarity; fometimes fufficient to oblige us, lamenting the delutions of ignorance, to give the foft name of enthuliafm to cruelty; refpecting the intention, though detefting the effects. Now, on the contrary, acting like a gang of thieves, they gave colour to the report-that the first instigators of the riot were hired affaffins.-And hired by whom? -The public voice repeats, on every fide, the defpicable duke of Orleans, whofe immense estate had given him an undue influence in the bailliages, and who ftill exercifed all the means that cunning could devife, and wealth produce, to revenge himfelf on the royal family. He was particularly incenfed against the queen, who having treated him with the contempt which he doubtlefs merited, and even influenced the king to banish him to one of his country feats, when he uttered fome popular fentiments, he continued to nourish the moft

7

ł

?

most implacable hatred to her person, whilst the changing sentiments of the nation respecting the present branch of his family excited in him hopes, that would at once have gratified both his revenge and his ambition.

There is no calculating the mifchief which may be produced by a revengeful cunning knave, poffeffing the forcible engine of gold to move his projects, and acting by agency, which, like a fubterraneous fire, that for a long time has been putting the combuftible matter into a ftate of fufion, burfts out unexpectedly, and the fudden eruption fpreads around terrour and deftruction.

The agents of defpotifm, and of vengeful ambition, employed the fame means to agitate the minds of the parifians; and covered as they now are with foul flains, it is an acknowledgement due to their original good difpofition, to note, that at this period they were fo orderly it required confiderable management to lead them into any grofs irregularity of conduct. It was, therefore, neceffary for the duke's inftruments to put in motion a body of the most desperate women; fome of whom were half famished for want of bread, which had purposely been rendered 5 fcarte to facilitate the atrocious defign of murdering both the king and queen in a broil, that would appear to be produced folely by the rage of famine.

The shameless manner in which the entertainment of the officers of the body-guards had been conducted; the indifcreet vifit of the queen to interest the army in the cause of royalty, coming in artfully after the rabble of foldiers had been allowed to enter; together with the imprudent expressions of which she afterwards made use; ferved as pretexts. nay, may have been fome of the caufes of these women suspecting, that the dearth of bread in the capital was owing to the contrivance of the court, who had fo often produced the fame effect to-promote their finister purposes. They believed then, that the only fure way to remedy fuch a grievous calamity, in future, would be to implore the king to refide at Paris: and the national militia, composed of more orderly citizens, who thought the report of a premeditated escape was not without foundation, imagined, that they should nip a civil war in the bud, by preventing the king's departure, and separate him effectually from

۱.

(433)

from the cabal, to whom they attributed all his mifconduct.

Whilft the multitude were advancing, the affembly were confidering the king's reply to their request to fanction the declaration of rights, and the first articles of the constitution, before the supplies were granted. The reply was couched in terms fomewhat vague, yet it's meaning could not be mifunderstood.---He observed, that the articles of the constitution could be judged of only in their connection with the whole; nevertheless he thought it natural, that at the moment the nation was called upon to affift the government by a fignal act of confidence and patriotifm, they fhould expect to be re-affured refpecting their principal intereft.- " Accordingly,' he continues, ' taking it for granted, that the first • articles of the conftitution, which you have ^e prefented to me, united to the completion ' of your labours, will fatisfy the wifhes of 'my people, and fecure the happiness and • prosperity of the kingdom, conformably to 'your defire I accept them; but with one ⁴ pofitive condition, from which I will never ⁶ depart ; namely, that from the general re-[•] fult of your deliberations the executive power fhall Ff

±.'

ĩ

" shall have it's entire effect in the hands of • the monarch. Still it remains for me to "affure you with franknefs, that, if I give • my fanction of acceptance to the feveral * articles, which you have laid before me, it ' is not because they indiscriminately give me an idea of perfection; but I believe it lauda-• ble in me to pay this respect to the wishes 'of the deputies of the nation, and to the ' alarming circumstances, which so earnestly ' prefs us to defire above all things the • prompt re-eftablishment of peace, order, and ⁴ confidence.

· I shall not deliver my fentiments respect-'ing your declaration of the rights of man ⁴ and of citizens. It contains excellent maxims ' proper to direct your deliberations; but • principles fusceptible of application, and even of different interpretations, cannot be 'juftly appreciated, and have only need of • being fo when their true fenfe is determined ' by the laws, to which they ought to be the · bafis.'

In the fubterfuge employed in this answer, the profound diffimulation of the king appears; and that ' pitiful respect for falle honour,' which makes a man boggle at a naked naked untruth, even when uttering a number of contemptible prevarications. Thus did he at first struggle against every concession, against granting any real freedom to the people; yet afterwards unable to maintain his ground, he impotently gave way before the storm he had raised, every time losing a part of the authority which depended on opinion.

The affembly manifested an universal difcontent. One of the members remarked, that the king withheld his acceptance of the declaration of rights; and only yielded to circumftances in accepting the conftitutional articles : he, therefore, moved, that no taxes should be levied, before the declaration of rights and the conftitution should be accepted, without any refervation.-Another afferted, that the king's reply ought to have been counter-figned by one of the ministers. What an abfurdity ! yet the inviolability of the king standing in their way, it feemed to be neceffary to fecure ministerial responsibility, to render it null; not only to prevent the ministers from finding shelter behind it, but to make it utterly useless to the king, who was thus, literally speaking, reduced to a cipher. Mirabeau, Ff 2

(436)

Mirabeau, however, after alluding with energy to the entertainment, which, out of derifion, had been termed patriotic, made three or four motions. One was, ' that no ' act emanating from the king fhould be de-' clared without the fignature of a fecretary ' of state.'---So inconfistent was the man, who argued with fuch eloquence for the abfolute veto :--- Another was, ' that his majefty would ' pleafe to be explicit; and not by a con-· ditional confent, extorted by circumftances, · leave any doubt of his fincere concurrence 'in the mind of the people.' It was also noticed, to corroborate the inference, that the king was only yielding, for the moment, to opinions which he hoped to fee exploded, that the decree for the circulation of grain had been altered before the publication, and the usual preamble, for fuch is our pleasure, formed a strange contrast with an acknowledgement of the legislative rights of the nation. Robefpierre, particularly, maintained, that the nation had not any need of the effiftance of the monarch to conftitute itself-that the king's reply was not an acceptance, but a cenfure; and, confequently, an attack on the rights of the people.

This

This feemed virtually the opinion of the affembly, though Mirabeau's foft ftyle of expreffing their will was adopted. It was particularly in this decifion, that the deputies difplayed a great degree of the weakness, which miftakes temerity for courage, and the shadow of justice for verity .--- And affecting to fay, to reconcile a contradiction, that the authority of kings is fuspended as often as the fovereign is occupied in framing the elements of the conflitution, or altering fundamental laws, they demonstrated the inconfistency of their own fystem, and acknowledged it's abfurdity; which is still more flagrantly shown in Mirabeau's irrational declaration, that, 'by a pious ' fiction of the law, the king cannot himfelf ' deceive; but the grievances of the people demanding victims, these victims are the " minifters."

At this juncture of the debate the tumultuous concourfe of women arrived at Verfailles: but it must not be unnoticed, that there was a number of men with them, difguifed in women's clothes; which proves, that this was not, as has been afferted, a fudden impulse of necessity. There were besides men in their own garb armed like ruffians, Ff_3 with

(438)

with countenances anfwerable, who, fwearing vengeance against the queen and the body-guards, seemed to be preparing to put their threats in execution. Some barbarians, volunteers in guilt, might perhaps have joined, spurred on solely by the hope of plunder, and a love of tumult; but it is clear, that the principal movers played a sure game.

The women had taken two routes; and one party, without arms, prefented themfelves at the gate of the affembly, whilft the other cluftered round the palace waiting for them. The avenues were already filled with bodyguards, the flanders regiment was drawn up in ranks; in fhort, the foldiers were gathered together quickly in one quarter, though the people of Verfailles were exceedingly alarmed, and particularly by the appearance of the vagabonds, who followed the female mob.

With fome difficulty the women were prevailed on to allow a few to enter orderly into the affembly, with a fpokefinan to make known their demand; whils crowds, taking refuge in the galleries from the rain, prefented there the strange fight of pikes, fufils, and and tremendous flicks bound with iron. Their orator represented the grievances of the people, and the neceffity of continually providing for their fublistence : he expressed the concern of the parifians on account of the flow formation of the constitution, and attributed this delay to the opposition of the clergy. A bishop then prefided in the absence of Mounier, the prefident, who had been dispatched by the affembly with their expoftulatory petition to the king. A deputy, to fpare him the embarrafiment of a reply to the infinuation against his order, reprimanded the petitioner for calumniating that refpectable He accordingly made an apology, body. yet justified himself by declaring, that he only reported the purport of the discontentment of Paris. They were informed, in reply, by the vice-prefident, that a deputation was already fent to the king, requesting his fanction of a decree to facilitate the interiour circulation of grain and flour : and finding, that it was impoffible to attend to the business of the day, he adjourned the affembly, without waiting for the return of the prefident.

The women about the palace entered into conversation with the foldiers, some of whom F f 4 faid

(440)

faid, ' that were the king to recover all his ' authority, the people would never want ' bread!' This indifcreet infinuation exafperated them; and they replied in the language, that is proverbial for being the most abusive. A fray also ensuing, brought on by a dispute relative to the affair of the cockades, one of the body guards drew his sword, which provoked a national guard of Versailles to give him a blow with his musket, that broke his arm.

The national troops were eager to convince the mob, that they were equally offended at the difrespect paid to the emblem of liberty; and the flemish regiment, though they were in battle array, made the women let their rings drop into their guns, to be convinced that they were not charged : faying, 'It was ⁴ true, they had drunk the wine of the body guards; but what did that engage them to " do ? They had also cried, vive le roi, as the * people themfelves did every day; and it • was their intention to ferve him faith-• fully, but not against the nation l'-with other fpeeches to the fame effect ;---adding, * that one of their officers had ordered a thoufand cockades; and they knew not why • they

• they were not diffributed !' Enraged by the tenour of this difcourfe, a body-guard's man ftruck one of the foldiers talking thus, who, in return, fired on him, and fractured his arm. All was now confusion; and every thing tended to render the body guards more odious to the populace.

The king arrived in the midst of it from hunting, and admitted at the fame time the deputation from the national affembly, and an address from the women. He received the latter with great affability, teftified his forrow on account of the fcarcity of bread at Paris, and immediatly fanctioned the decree, relative to the free circulation of grain, which he had just received from the assembly. The woman who fpoke, attempting to kifs his hand, he embraced her with politenefs, and difmiffed them in the most gentleman-like manner. They immediately rejoined their companions, charmed by the reception they had met with; and the king fent orders to the guards not to make use of their arms. The count d'Estaing, the commander in chief, announced likewife to the militia of Verfailles, that the body-guards would the next day take the oath of allegiance to the nation,

(442)

nation, and put on the patriotic cockade. • They are not worthy,' was the indignant growl of the multitude.

Some women now returning to Paris, to report the gracious behaviour of the king, were unfortunately maltreated by a detachment of body-guards, commanded by a nobleman; and the volunteers of the Bastille coming to their assistance, two men, and three horses, were killed on the spot. These fame irritated women meeting, likewise, the parisian militia, on their way to Versailles, gave them an exaggerated description of the conduct of the guards.

The court now taking the alarm, fearing that their plan would be defeated, by the king's being obliged to go to Paris, urged him immediately to fet out for Metz, and the carriages were actually prepared. It is fearcely credible that they would have gone fo far without his concurrence.

One loaded coach had been permitted to go out of the gate; but the national troops beginning to fufpect what was going forward, obliged it to re-enter. The king then, with his ufual addrefs, finding his efcape at that time impracticable, and not withing to fhed blood blood in forcing his way, made a merit of neceffity, and declared he would rather perifh than fee the blood of frenchmen ftreaming in his quarrel ! So eafy is it for a man, versed in the language of duplicity, to impose on the credulous; and to impress on candid minds a belief of an opinion that they would gladly receive without any doubting allay, did not other circumstances more strongly contradict the perfuasion. This declaration, however. which was re-echoed with great eagerness, was confidered as a manifest proof of the purity of his intentions, and a mark of his fixed adherence to the caufe which he affected to espouse. Yet, to prove the contrary, it is only neceffary to obferve, that he put off the acceptance of the declaration of rights, and the first articles of the constitution, till after the attempt to escape was fruftrated: for it was near eleven o'clock when he fent for the prefident, to put into his hands a fimple acceptation, and to request him to convoke the affembly immediately, that he might avail himfelf of their counfel at this crifis; alarmed by the mob without, who, exposed to all the inclemency of the weather, It being a very wet and ftormy night, were uttering

(4.14)

uttering the most horrid imprecations against the queen and the body-guards.

A drum inftantly fummoned the affembly : and La Fayette arriving with his army in lefs than an hour after, the prefident was again called for, who returned to the affembly with the king's affurance, that he had not even thought of leaving them, nor would he ever feparate himfelf from the reprefentatives of the people.

La Fayette had previously assured the king of the fidelity of the metropolis, and that he had been expressly fent by the municipality of Paris to guard his august perfon. A rumour had prevailed, ever fince the arrival of the women, that the parisian militia were coming to fecond them; but as the commune of Paris had not determined till late in the afternoon, the meffenger from La Fayette to the palace could not have reached Verfailles long before him: but the court fuppoling that they would come, and having heard of the wifh of the parifians to bring the king to Paris, where they had always fpies to give them the earlieft notice of what was going forward, pressed him to fet out without loss of time; still they were actuated folely by the

the defire of getting him away, and not from any apprehension that his life was in danger.

After tranquilizing the king, La Fayette joined the parifian militia in the avenue, to inform them, that the king had fanctioned the decree of the affembly for expediting the more fpeedy circulation of provisions; that he accepted, without any refervation, of the declaration of rights, with the first articles of the constitution, declaring at the fame time his unshaken refolution to remain among his people; and that he confented alfo to have a detachment of the national troops of Paris to contribute to guard his perfon.

Joy now took place of dread at Verfailles; and the citizens diffributed their addreffes amongft the foldiers, offering them lodgings; they having been previoufly requefted, by the beating of a drum, to receive as many of the parifian militia as they poffibly could. The reft, after paffing feveral hours in arms round the palace, fought for fhelter, as the morning began to dawn, in the churches. Every thing appearing quiet, the haraffed king and queen were prevailed on to feek the repofe they needed; and La Fayette, about five in the morning, retired to his chamber,

(446)

to write to the municipality an account of his proceedings, before he likewife endeavoured to fnatch a little reft.

Scarcely an hour after, the reftles mob, great part of which had taken refuge in the hall and gallerics of the affembly, began to prowl about. The most decent of the women, who had been prefied into the fervice, ftole away during the night. The reft, with the whole gang of ruffians, rushed towards the palace, and finding its avenues unguarded, entered like a torrent; and fome among them, most probably, conceived, that this was the moment to perpetrate the crime for which they had been drawn from their lurkingholes in Paris.

Infulting one of the body-guards who oppoled their entrance, he fired, and killed a man. This was a fresh pretext for entering to search for the murderer, as he was termed by these rioters; and driving the guards before them up the grand stair-case, they began to break into the different apartments, vowing vengeance against the body-guards, in which were mingled the bitterest curses, all levelled at the queen.

Catching

Catching one unfortunate guard by himfelf, he was dragged down the ftairs; and his head, inftantly fevered from his body, was mounted on a pike, which rather ferved to irritate than glut the fury of the monfters, who were ftill hunting after blood or plunder.

The most desperate found their way to the queen's chamber, and left for dead the man who courageously disputed their entrance. But she had been alarmed by the tumult, though the miscreants were not long in making their way good, and, throwing a wrapping-gown around her, ran, by a private passage, to the king's apartment, where she found the dauphin; but the king was gone in quest of her: he, however, quickly returning, they waited together in a horrid state of sufference. Several of the guards, who endeavoured to keep back the mob, were wounded; yet all this happened in a very short space of time.

The promptitude and rapidity of this movement, taking every circumftance into confideration, affords additional arguments in fupport of the opinion, that there had been a premeditated defign to murder the royal family.

mily. The king had granted all they asked the evening before; fending away great part of the multitude delighted with his condefcenfion; and they had received no fresh provocation to excite this outrage. The audacity of the most desperate mob has never led them, in the prefence of a fuperiour force, to attempt to chastife their governors; and it is not even probable that banditti, who had been moved by the common causes of fuch infurrections, fhould have thought of murdering their fovereign, who, in the eyes of the greater number of frenchmen, was still shrouded by that divinity, tacitly allowed to hover round kings, much lefs have dared to attempt it.

La Fayette was quickly roufed; and, fending his *aides-de-camp* to allemble the national guards, he followed the ruffians with equal celerity. They had actually forced the king's apartment at the moment he arrived; and the royal family were liftening to the increasing tumult as the harbinger of death,—when all was hufhed,—and the door opening a moment after, the national guards entered refpectfully, faying they came to fave the king;—' and we will fave you too, gentlemen,'

(449)

men,' added they, addressing the bodyguards, who were in the chamber.

The vagabonds were now purfued in their turn, and driven from room to room, in the midft of their pillage, for they had already begun to ranfack that fumptuoufly furnished palace. From the palace they repaired to the stables, still intent on plunder, and carried away fome horses, which were as quickly retaken. Every where they purfued the bodyguards, and every where the generous parifian troops, forgetting their piqued pride and personal animosity, hazarded their lives to fave them.—Till, at length, order was petfectly established.

Such was the termination of this moft mysterious affair; one of the blackest of the machinations that have fince the revolution difgraced the dignity of man, and fullied the annals of humanity. Disappointed in their main object, these wretches beheaded two of the guards, who fell into their hands; and hurried away towards the metropolis, with the *infignia* of their atrocity on the points of the barbarous instruments of vengeance showing in every instance, by the difference

(450)

of their conduct, that they were a fet of monsters, distinct from the people.

Whilft nature fludders at imputing to any one a plan fo inhuman, the general character and life of the duke of Orleans warrant the belief, that he was the author of this tumult. And when we compare the fingularly ferocious appearance of the mob, with the brutal violation of the apartment of the queen, there temains little doubt, but that a defign was on foot against the lives of both her and the king.—Yet in this, and most other instances, the man has wanted courage to confummate his villany, when the plot he had been following up was ripe.

It is, perhaps, not the leaft noble faculty of the mind, to queftion the motives of action, which are repugnant to the feelings of nature, outraging the most facred feelings of the human foul. But it is the development of a character, that enables us to estimate it's depravity; and had the conduct of that wretch ever varied, the veil of mystery might still have remained unrent, and posterity, hearing of the judgment of the châtelet, would have believed Egalité innocent. The court had become highly obnoxious to the nation, and with with it the king was implicated, in fpite of the efforts of Mirabeau, and some other favourites of the people, to render him refpectable; fo that there wanted not a plaufible reason for suspecting, that the duke might afpite at obtaining the regency, though Louis was neither malfacred, nor allowed to efcape. But the prefent scheme being disconcerted, fear, for a while, damped his ambition : and La Fayette, finding that these sufficients still formed a pretext to excite commotions, with a view to quiet the minds of the parifians, seconded the importunities of the duke, who wished to visit England, till the affait blew over. The king, therefore, was prevailed on to give him a nominal commission, to be made use of as a plea to obtain liberty of absence from the affembly, of which he was a member.

He was certainly very apprehensive of an investigation of the business; and revenge and ambition equally giving way to perfonal fear, he left his colleagues to finish the constitution, and his agents to recover his fame, by representing the story as a calumny of the royalist, against whom the public were sufficiently enraged to credit any aspersion. The bold tone he affumed the july following was far from being a proof of his innocence; becaufe it was not very probable, that a cunning man fhould take his measures in fuch a critical affair without due precaution.—On the contrary, he would labour to fink fo entirely into the back-ground of the plot, as to render it difficult, if not impoffible, for him to be perceived. And this was practicable to a man, who was willing, in the promotion of his purpose, to diffipate the most fplendid fortune.

To a difpolition for low intrigue was added alfo a decided preference of the groffeft libertinifm, feafoned with vulgarity, highly congenial with the manners of the heroines, who composed the fingular army of the females.

Having taken up his abode in the centre of the palais royal, a very fuperb fquare, yet the laft in which a perfon of any delicacy, not to mention decorum, or morality, would choofe to refide; becaufe, excepting the people in trade, who found it convenient, it was entirely occupied by the most shameles girls of the town, their hectoring protectors, gamesters, and sharpers of every denomination. In short, by the vilest of women; by wretches, who who lived in houses from which the stript bodies, often found in the Seine, were supposed to be thrown *---and he was confidered as the grand fultan of this den of iniquity. Living thus in the lap of crime, his heart was as tainted as the foul atmosphere he breathed.---Incapable of affection, his amours were the jaundiced caprices of fatiety; and having proved in the affair of Keppel and d'Orvilliers, that he wanted the courage of a man, he appears to have been as fit for dark under-hand affaffinations as he was unequal to any attempt flowing from virtuous ambition.

That a body of women should put themfelves in motion to demand relief of the king, or to remonstrate with the assembly respecting their tardy manner of forming the conftitution, is fcarcely probable; and that they should have undertaken the business, without being instigated by designing perfons, when all Paris was disfatisfied with the conduct and the procrassing the assembly, is a belief which the most credulous will hardly swallow,' unless they take into their view, that the want of bread was the bye word used by

• They used to lie to be owned in a confpicuous part of the city.

thole, who in a great measure produced it; for perceiving the turn the public mind was taking, they drove the mob on to perpetrate the mischief long defigned, under the fanction of national indignation.

It is evident, that the court was not concorned, however defirous the eabinet might have been to render the people difcontented with the new order of things; for they feem to have been entirely occupied with the fcheme, on which they built the most fanguine expectation, of-prevailing on the king to retire to Metz. Befides, the courfe the project took is a circumstantial evidence, that, defigned against Versailles, it was not meditated there.

That the Châtelet fhould not have been able to fubftantiate any proof of his guilt, is not in the leaft extraordinary.—It is only neceffary to be acquainted with the general propenfity of the french to intrigue, to know, that there is no fervice, however dangerous, or purpofe, however black, for which gold will not find a man. There were wretches, who would have confidered exile as an efcape from the continual dread of menaced detection, could they carry with them a fum to commence fnence anew their fraudulent practices in another country; and money the duke did not fpare to gratify his paffions, though fordidly mean when they were out of the question.

His remaining alfo in England for fuch a length of time, merely to avoid diffurbing the tranquillity of the ftate, when it was poffible, that by it's diforder and agitation he might gain a fceptre, cannot be credited; becaufe it is well known, that he never facrificed any felfish confideration to the general good. Such examples of felf-denial and true patriotifm are uncommon, even from the most virtuous men; and it is idle to imagine, that a man, whom all the world allowed to be vicious, should risk the popularity, which he had been at fuch pains to acquire, unless it were to guard his life.

On his return, neverthelefs, finding that all was fafe, he appeared in the affembly, provoking the inquiry from which he had before fkulked; and braving detection, when the danger was paffed, he had the addrefs to perfuade the public of his innocence. Nay, the mock patriots of the day, pretending to defpife princes, were glad to have a prince on their fide. The report, that Mirabeau, always an avowed advocate for a limited monarchy, was concerned in the plot, was certainly a calumny; becaufe it is notorious, that he had an habitual contempt for the duke, which had even produced a decided coolnefs fome time before. And, if any collateral proof of his innocence were neceffary, it would be fufficient to add, that the abbé Maury, his competitor in eloquence, and opponent in opinion, declared there was no ground for his impeachment.

It is unfortunate, indeed, that fome of the villains employed were not immediately interrogated. The foldiery, in chafing them from one quarter to another, gave proofs not only of their intrepidity, but attachment to the new government; and the only reprehenfible part of their conduct was fuffering the murderers to escape, instead of apprehending as many as they could, and bringing them to condign punishment. Such an omifion, it was to be feared, would produce the most fatal confequences, becaufe impunity never fails to stimulate the wretches, who have arrived at such a pitch of wickedness, to commit fresh, and, if poffible, still more atrocious crimes; and it is by fuspending the decrees of justice, that

that hardened mifcreants, made fo by oppreffion, give full fcope to all the brutality of their fanguinary difpositions.

This neglect, in their turn, was not the leaft reprehenfible or fatal errour, produced by the factions of the affembly. The crifis demanded vigour and boldnefs.-The laws had been trampled on by a gang of banditti the most desperate-The altar of humanity had been profaned--The dignity of freedom had been tarnished-The fanctuary of repose, the afylum of care and fatigue, the chafte temple of a woman, I confider the queen only as one, the apartment where the configns her fenfes to the bosom of fleep, folded in it's arms forgetful of the world, was violated with murderous fury-The life of the king was affailed, when he had acceded to all their demands-And, when their plunder was inatched from them, they maffacred the guards, who were doing their duty .--- Yet these brutes were permitted triumphantly to escape-and dignified with the appellation of the people, their outrage was in a great meafure attempted to be excufed by those deputies, who fometimes endeavoured to gain an undua

undue influence through the interpolition of the mob.

At this moment the affembly ought to have known, that the future respectability of their laws must greatly depend on the conduct they purfued on the prefent occasion; and it was time to flow the parifians, that, giving freedom to the nation, they meant to guard it by a ftrict adherence to the laws, that naturally iffue from the fimple principles of equal justice they were adopting; punishing with just feverity all fuch as should offer to violate, or treat them with contempt. Wifdom, precifion, and courage, are the permanent supports of authority-the durable pillars of every just government, and they only require to be, as it were, the porticos of the structure, to obtain for it, at once, both the admiration and obedience of the people. To maintain fubordination in a flate by any other means is not merely difficult, but, for any length of time, impoffible.

They ought to have flood up as one man in fupport of infulted juffice; and by directing the arm of the law, have fmothered in embryo that fpirit of rebellion and licentioufnefs, which, beginning to appear in the metropolis, tropolis, it was to be feared would attain herculean ftrength by impunity, and ultimately overturn, with wanton thoughtlefsnefs, or headftrong zeal, all their labours. Yet, fo contrary was their conduct to the dictates of common fenfe, and the common firmnefs of rectitude of intention, that they not only permitted that gang of affaffins to regain their dens; but inftantly fubmitted to the demand of the foldiery, and the peremptory with of the parifians—that the king fhould refide within the walls of Paris.

The firmnels of conduct, which the reprefentatives of a people should always maintain, had been wanting in the affembly from the moment their power had been acknowledged; for instead of being directed by any regular plan of proceeding, a line equally marked out by integrity and political prudence, they were hurried along by a giddy zeal, and by a burlesque affectation of magnanimity; as puerile as the greater part of their debates were frivolous. Whilst their vanity was gratified by the lively applauses lavished on their inflated and popular declamation, they fet fire to the foibles of the multitude, teaching their desperate demagogues to become their rivals in this fpecies fpecies of eloquence, till the plans of the leaders of clubs, and popular focieties, were generally admired and purfued.

The will of the people being fupreme, it is not only the duty of their representatives to respect it, but their political existence ought to depend on their acting conformably to the will of their constituents. Their voice, in enlightened countries, is always the voice of But in the infancy of fociety, and reafon. during the advancement of the fcience of political liberty, it is highly neceffary for the governing authority to be guided by the progrefs of that fcience; and to prevent, by judicious measures, any check being given to it's advancement, whilst equal care is taken not to produce the miferies of anarchy by encouraging licentious freedom. The national affembly, however, delighted with their blooming honours, suffered themselves to be hurried forward by a multitude, on whom political light had too fuddenly flashed, and feemed to have no apprehension of the danger, which has fo fatally refulted from their tame acquiefcence.

The people of Paris, who have more than their portion of the national vanity, believed that they had produced the revolution; and thinking

thinking themfelves both the father and mother of all the great events, which had happened fince it's commencement, and that the national affembly, whole conduct indeed betrayed fymptoms of an understanding not adult, ought to be directed by their leadingftrings, frequently declared, that liberty would not be fecured, until the court and the affembly were brought within the walls of the capital. This was the fubject of club debates, decided with legiflative pompofity, on the rumour of the intended evalion of the king; and the infult offered to the national cockade, the first of october, brought them to the determination-that it was proper he should be there.-Such was their will, the capital cf the nation-now fovereign. Forefeeing alfc, as they had already dreaded, that the only fccurity for infant freedom would be to guard the court, and place in the centre of information their infant representatives; whom they alternately idolized and fuspected.

The decorum of manners in a people, long fubordinate to the authority of their magiftrates, had on feveral occasions, and even on the fifth of october, controlled the impetuous populace, who had undertaken, or joined in the the enterprize; and confidering the manner in which they were pushed on, it is extraordihary, that they did not commit greater dépredations. For with all their brutality, and eagerness to plunder the palace, they did not attempt to pillage Versailles, though half famissed.

The army of La Fayette indeed, principally composed of citizens, behaved not only in an irreproachable manner; but the celerity of their movements, their obedience to the difcipline which they had fo promptly acquired, joined to the clemency and moderation they difplayed, excited the gratitude and respect of all parties.—Still, trembling for the rights that had been fo gloriously fnatched out of the clinched hand of despotisin—it was the wish of all the leaders to have the king at Paris. It was in fact the general fentiment at Paris, and of the greater part of the nation.

That city, which had contributed fo effentially in effecting the revolution, viewed with anxiety the influence of a party fpirit in the affembly, though themfelves fplit into feveral political fects, who almost execrated each other. And finding, that the indecision of the members had given fresh hopes to the court, court, which at last might render their cmancipation merely a dazzling meteor, they were reftlefsly bent on having the king and affembly more immediately in their power. The report, likewise, of Louis's intended escape; which had he effected, it was probable, that he would have been in the next place prevailed on to join the difcontented princes and nobles, thus producing a fchifm in the kingdom, that must infallibly have brought on not only a cruel civil war, but have embroiled them with all the different powers of Europe; was a still more urgent motive : for whilst they were constantly affecting to believe in the goodness of his heart, they never showed by their conduct, that they had any confidence in his fincerity .-- Their opinion of the affembly was equally unfixed.-One day a deputy was extolled as the hero of liberty, and the next denounced as a traitorous penfioner of defpotifm.

These fentiments were dangerous to the authority of the new government; but they were sentiments which never would have been promulged, even had they existed, had the assembly acted with integrity and magnanimity. Because, though the people do not al-

ways

ways reafon in the most logical or rhetorical fyle, yet they generally perceive in what confists the defects of their legislators. And in every free government, when the deputies of the state, convened to form laws, do not act with precision and judgment, they will be fure to lose their respectability; and the confequence will be a diffolution of all authority.

It appears to amount to a certainty, that the affembly did not at that time poffefs the implicit confidence of the people, by their demanding, that the king fhould be obliged to refide within the barriers of the capital.— It was furely as poffible to guard him at Verfailles as at Paris; and if it were neceffary, that he fhould be kept as a prifoner of ftate, or hoftage, the government was the proper authority to determine how, and where: and in giving up this neceffary privilege of authority, they furrendered their power to the multitude of Paris.

Or rather a minority of the affembly, who wifhed to be removed to the capital, by exciting and humouring the people, directed the majority; and in the fame manner has the dignity of the reprefentative body ever fince been

been trampled under foot by fcliifhnefs, or the blind zeal of vanity .-- It is in reality from this epocha, not forgetting fuch a leading circumftance, that the commencement of the reign of anarchy may be fairly dated. For, though a tolerable degree of order was preferved a confiderable time after, because a multitude long accustomed to fervitude do not immediately feel their own ftrength; yet they foon began to tyrannize over one part of their reprefentatives, flimulated by the other. They, however, continued to respect the decrees of the national affembly especially as there were rarely any paffed on which the public opinion had not been previoully confulted, directed as it was by the popular members, who gained their conftant fuffrage by the stale trick of crying out for more freedom. It was the indispensable duty of the deputies to respect the dignity of their body-Instead of which, for finister purposes, many of them in^aructed the people how to tyrannize over the affembly; thus deferting the main principle of reprefentation, the respect due to the majority, This first grand defertion of the principles, which they affected to adopt in all their purity, led to public mifery; involving thefe Ηh fhort(466)

fhort-fighted men in the very ruin they had themfelves produced by their mean intrigues.

The authoritative demand of the parifians was firking fo directly at the freedom of the affembly, that they must either have been confcious of wanting power, or they had no conception of dignity of action, otherwise they would not have fuffered the requisition of the people to have been complied with. Yet they feem to have confidered it, if it be not paradoxical to affert it, as an advancement of their independence; or, perhaps, as giving fecurity to their authority, childishly proud of regulating the business of the nation, though under the influence of the parifian despotism.

It is true, fuch things are the natural confequence of weaknefs, the effects of inexperience, and the more fatal errours of cowardice. And fuch will always be the effects of timid, injudicious measures. Men who have violated the facred feelings of eternal juffice, except they are hardened in vice, are never afterwards able to look honess men in the face; and a legislature, watched by an intelligent public, a public that claims the right of thinking for itself, will never after go beyond it, or pass one decree which is not likely to be popular.

To confult the public mind in a perfect state of civilization, will not only be neceffary, but it will be productive of the happiest confequences, generating a government emanating from the fenfe of the nation, for which alone it can legally exist. The progress of reason being gradual, it is the wildom of the legislature to advance the fimplification of it's political fystem, in a manner best adapted to the state of improvement of the understanding of the nation. The fudden change which had happened in France, from the most fettering tyranny to an unbridled liberty, made it fcarcely to be expected, that any thing should be managed with the wifdom of experience: it was morally impoffible. But it is neverthelefs a deplorable reflection, that fuch evils must follow every revolution, when a change of politics equally material is required.-Thus it becomes more peculiarly the duty of the historian to record truth; and comment with freedom.

Every nation, deprived by the progress of it's civilization of strength of character, in H h 2 changing changing it's government from abfolute defpotifm to enlightened freedom, will, moft probably, be plunged into anarchy, and have to ftruggle with various fpecies of tyranny before it is able to confolidate it's liberty; and that, perhaps, cannot be done, until the manners and amufements of the people are completely changed.

The refinement of the fenfes, by producing a fusceptibility of temper, which from it's capriciousness leaves no time for reflection, interdicts the exercise of the judgment. The lively effusions of mind, characteristically peculiar to the french, are as violent as the impreffions are transitory; and their benevolênce evaporating in fudden gufts of fympathy, they become cold in the fame proportion as their emotions are quick, and the combinations of their fancy brilliant. People who are carried away by the enthulialin of the moment, are most frequently betrayed by their imagination, and commit fome errour, the conviction of which not only damps their heroifm, but relaxes the nerve of common exertions. Freedom is a folid good, that requires to be treated with reverence and refpect.--

1

fpect.—But, whilft an effeminate race of heroes are contending for her fmiles, with all the blandifhments of gallantry, it is to their more vigorous and natural posterity, that the will confign herfelf with all the mild effulgence of artles charms.

CHAPTER III.

THE MOB DEMAND THE KING'S REMOVAL TO PARIS. THIS CITY DESCRIBED. THE KING REPAIRS TO THE CAPITAL, ESCORTED BY A DEPUTATION OF THE NATIONAL ASSEMBLY AND THE PARISIAN MILITIA. THE KING'S TITLE CHANGED. PROCEEDINGS OF THE NATIONAL ASSEMBLY. REFLECTIONS ON THE DECLARATION OF RIGHTS.

AFTER the wild tumult, on the morning of the 6th of october, abated, the king showed himself to the people, in the balcony, and the queen followed with the dauphin in her arms. At first, he vainly attempted to fpeak; but La Fayette informed the people, that his majefty came forward to assure them, that it should be the business of his life to contribute to the happiness of his people. The king at Paris, exclaimed a voice, which was quickly re-echoed by the crowd. ' My " children,' replied the king, ' you wish me to be at Paris, and I will go; but it is on ' the condition, that my wife and family ac-" company me." A loud fhout of vive le roi testified the extacy of the moment. The king made a fign to demand filence; and then, with

with tears in his eyes addreffed them again. - Ah! my children, run to the relief of "my guards.' Immediately two or three appeared in the balcony with the national cockade in their hats, or the cap of liberty on their heads. The king threw his arms round one of them, and the people following his example embraced those whom they had taken prisoners in the court. One fentiment of gladness feemed to animate the whole concourse of people; and their sensibility produced as mad demonstrations of joy as lately had been difplayed of ferocity. The foldiery all mingled together, exchanging fwords, hats, or shoulder belts---exhibiting in the most firiking manner the prominent features of the french character.

Meanwhile the affembly, inftead of infantly examining into the particulars of that alarming convultion, and exerting themfelves to cause a proper respect to be paid to the fovereignty of the law, childishly gave way to the universal transport: instead of confidering the peremptory with of the people to remove the king to Paris as a distrust of their wildom, as well as of the veracity of the court, which was in fome measure the Hh_4

cafe, they unanimously agreed to the motion of Mirabeau, feconded by Barnave, 'that • the king and affembly should not be fepa-• rated during the prefent feffions.' Mirabeau, and other popular members, were probably glad to have the perfon of the king fecured, without being obliged to appear, in an oftenfible manner, in the affair; because they always endeavoured to keep a little hold on the court, whilft they led the people. Such are the pitiful shifts of men, who are not guided by the compass of moral principles. which alone render the character dignified or confiftent. Readily then acquiefcing in a measure the most fatal and contemptible, they decreed, that the affembly was infeparable from the perfon of the king, and fent a deputation to inform him of this refolve, previous to his departure.

That Louis, finding all his projects for the prefent defeated, and after fuch a narrow efcape for his life, fhould readily have acceded to the demand of the multitude, is not in the leaft extraordinary.—But, that the reprefentatives of the nation fhould, without refiftance or remonstrance, have furrendered their authority, and thrown themfelves headlong long into the heart of a city, which could be fuddenly agitated, and put into the moft diforderly and dangerous commotion, by the intrigues or folly of any defperate or factious leader of the multitude—fuffering themfelves to be environed by it's wall, flut in by it's barriers—in a word—choofing to live in a capacious prifon; for men forced, or drawn into any fuch fituation, are in reality flaves or prifoners,—almost furpasse belief. This abfurd conduct, in fact, can be accounted for only by confidering the national character, and the different though equally interested views, of the court and popular parties, in the affembly.

Independent of the additional incenfe of praife, with which Mirabeau wifhed to be continually regaled, in the metropolis, he had a decided preference for it, frequently afferting, that it was the only place where fociety was truly defirable; the people and place, in fpite of their vices and follies, equally attaching the tafte they cultivated.

Exclaiming against capitals, the impartial observer must acknowledge, that much has been done to render this a superb monument of human ingenuity.

(474)

The entrance into Paris, by the Thuilleries, is certainly very magnificent. The roads have an expansion that agrees with the idea of a large luxurious city, and with the beauty of the buildings in the noble fquare, that first attracts the travellers eye. The lofty trees on each fide of the road, forming charming alleys, in which the people walk and lounge with an easy gaiety peculiar to the nation, feem calculated equally to fecure their health and promote their pleasure. The barriers, likewife, are stately edifices, that tower with grandeur, rendering the view, as the city is approached, truly pictures fue.

But-thefe very barriers, built by Calonne, who liked to have Paris compared with Athens, excite the most melancholy reflections.—They were first erected by despotism to fecure the payment of an oppressive tax, and fince have fatally affisted to render anarchy more violent by concentration, cutting off the possibility of innocent victims escaping from the fury, or the mistake, of the moment. —Thus miscreants have had fufficient influence to guard these barriers, and caging the objects of their fear or vengeance, have flaughtered them; or, violating the purity of justice,

tice, have coolly wrefted laws haftily formed to ferve finister defigns-changing it's facred fword into a dagger, and terming the affaffin's stab the stroke of justice, because given with the mock ceremonials of equity, which only rendered the crime more atrocious. The tyrant, who, bounding over all reftraint, braves the eternal law he tramples on, is not half fo detestable as the reptile who crawls under the shelter of the principles he violates. Such has been the effect of the enclosure of Paris: and the reflections of wounded humanity difenchanting the fenfes, the elegant structures, which ferved as gates to this great prison, no longer appear magnificent porticoes.

Still the eye of tafte refts with pleafure on its buildings and decorations : proportion and harmony gratify the fight, whilft airy ornaments feem to tofs a fimple, playful elegance around. The heavens too fmile, diffufing fragrance : and as the inhabitants trip along the charming boulevard, the genial atmofphere feems inftantaneoufly to infpire the animal fpirits, which give birth to the varied graces that glide around. Cluftering flowers, with luxuriant pomp, lend their fweets, giv-

ing

1

ing a freshness to the fairy scene-nature and art combining with great felicity to charm the fenfes, and touch the heart, alive to the focial feelings, and to the beauties most dear to fancy.

Why flarts the tear of anguish to mingle with recollections that fentiment fofters-even in obedience to reason ?-For it is wife to be happy !---and nature and virtue will always open inlets of joy to the heart. But how quickly vanishes this prospect of delights ! of delights fuch as man ought to tafte !--- The cavalcade of death moves along, fhedding mildew over all the beauties of the fcene, and blafting every joy! The elegance of the palaces and buildings is revolting, when they are viewed as prifons, and the fprightliness of the people difgusting, when they are hastening to view the operations of the guillotine, or carelessly passing over the earth stained with blood. Exasperated humanity then, with bitterness of foul, devotes the city to deftruction; whilft turning from fuch a neft of crimes, it feeks for confolation only in the conviction, that, as the world is growing wifer, it must become happier; and that, as the cultivation of the foil meliorates a climate, the improvement of the

2

1

長ろ

the understanding will prevent those baneful excelles of passion which pollon the heart.

A deputation of the national affembly accompanied the royal family to Paris, as well as the parifian militia. A number of the women preceded them, mounted on the carriages which they had taken in their way to Verfailles, and on the cannons, covered with national cockades, and dragging in the dirt those that were confidered as fymbols of aristocracy. Soon after they fet out, either by chance, or, which is more probable, purfuant to a plan contrived by fome perfon in power, forty or fifty loads of wheat and flour fell into the procession, just before the king, giving weight to the exclamation of the populace, that they had brought the baker and his family to town.

The affembly continued to fit at Verfailles till the nineteenth; and feveral interefling debates were entered upon, particularly one brought forward by the bifhop of Autun, refpecting the appropriation of the effates of the clergy to fupply the exigences of the government. The abolition of *lettres de cachet* was confidered, and a frefh organization of the municipalities propofed; but as none of thefe these motions were carried before they were more fully discussed at Paris, it seems best to bring the different arguments on those important subjects under one point of view.

Settling the articles of the conflitution, however, which previoully occupied them, feveral frivolous difcuffions, refpecting the ftyle of expression to be adopted to fignify the king's acceptance of their decrees, were lengthened out with warmth, and puerile objections made to ancient forms—that were merely forms. After some disputation, the title of the monarch was changed from king of France, with the rest of the formule, for that of king of the French; because Rousseau had remarked, perhaps fastidiously, that the title ought to express rather the chief of the people, than the master of the foil.

The intended removal of the affembly to Paris alfo produced feveral warm debates. This refolution, indeed, excited, not without reafon, apprehensions in the breafts of fome of the deputies, relative to their perfonal fafety, should they, in future, venture to oppose any of the motions of the popular party, which that party instructed the mob of Paris to fupport.

The prefident, Mounier, pleading his bad fate of health, begged to be difmiffed; and Lally-Tolendal, thinking that he could not ftem the torrent, retired from public bulinefs at the fame time. A great many of the members hinting their fears, that the affembly would not be free at Paris, on various pretexts demanded fuch a number of passports, as to make the prefident express fome apprehension left the affembly fhould thus indirectly diffolve itself; whilft other deputies uttered a profufion of indecent farcafins on a conduct, which the behaviour of the populace, and even of these very orators, seemed to justify. Mirabeau, who fo earneftly defired to be at Paris, ridiculed with unbecoming bitternefs every opposition made to the removal of the affembly; yet, listening to the representation, that the allowing fo many malecontents to retire into the provinces might produce dangerous fermentations, he proposed that no paffport fhould be granted, till the deputy who demanded it had made known his reason for fo doing to the affembly, A letter from the king, notifying his intention of reliding most part of his time at Paris, and expressing his affurance, that they did not mean to separate themfelves themselves from him, now requested them to fend commissioners to Paris, to search for a proper place, where they might in future hold their session. They accordingly determined to go thither, conformably to the decree of the fixth of october, when a convenient situation should be found.

After this determination, several members gave an account of the grofs infults they had received at Paris. One in particular, who was not obnoxious to the public, narrowly escaped with life, only because he was miftaken for a deputy against whom the mob had vowed vengeance. Another, who had also been infulted, with proper spirit moved, that a decree respecting libels should instantly be paffed. ' Are we,' he afked, ' to be led • to liberty only by licentioufnefs? No; the • people, deceived and intoxicated, are ren-• dered furious. How many times (he added) • have I lamented the impetuolity of this alfembly, who have accustomed the public, feated in our galleries, to praife, to blame, • to deride our opinions, without understand-• ing them.—And who has infpired them with * this audacity?' - He was interrupted by figns of disapprobation; and personalities now difgraced

į

difgraced the debate, in which Mirabeau mingled fatirical obfervations and retorts, that did more credit to his abilities than to his heart. But, a day or two after, recollecting himfelf, he prefented the plan of a decree to prevent riots, which he introduced, by faying, that it was an imitation, though not a copy, of the English riot act.

The evening before the departure of the affembly for Paris, paffports being still demanded with earnestness, a decree was made, ^t that paffports fhould be granted only for a " fhort and determinate time, on account of • urgent bufinefs; and that unlimited paffports, • in cafes of ill health, should not be granted ^e before the deputies were replaced by their ^e fubftitutes;' and further, cutting a knot that might have revived old claims and animolities, had it been brought forward alone, they decreed, ' that in future the fubstitutes • fhould be nominated by the citizens at large; ' and that, eight days after the first fession at • Paris, there should be a call of the house; • fuspending till then the confideration of the ⁴ propriety of printing and fending to the pro-• vinces the lift of the absent deputies.'

The constraining fo many members to remain at their posts, and condemning a man to a state of ignominious servitude, whilst they were talking of nothing but liberty, was as contemptibly little, as the policy was injudicious. For if the king pretended to acquiesce in their measures the better to difguife his real intention, which doubtlefs was to fly as foon as he could find an opportunity, or was at liberty, what did they gain ? For as they must have known, that his emancipation would be the confequence of his acceptance of the conflitution, his imprifonment could only tend to retard, their operations: yet they had neither the magnanimity to allow him to depart with an handsome stipend, if such were his wish ; nor to grant him fuch a portion of power, in the new conftitution, as would, by rendering him respectable in his own eyes, have reconciled him to the deprivation of the reft. But, as things were fettled, it was morally certain, that, whenever his friends were ready, a blow would be directed against them, which they were then as well prepared to meet as they could be at a fubfequent period.

2 22

Under

Under the influence of fixed fyftems, certain moral effects are as infallible as phyfical. —That every infidious attempt would be made by the courts of Europe, to overturn the new government of France, was therefore certain; and, unlefs they had all been overturned at the fame time, was as much to be expected as any effect from a natural caufe. The most likely mean then to have parried the evil would have been a decided firmnefs of conduct, which, flowing from a real love of juffice, produces true magnanimity; and not a parading affectation of the virtues of romans, with the degenerate minds of their posterity.

Precifion, wifdom, and courage, never fail to fecure the admiration and refpect of all defcriptions of people; and every government thus directed will keep in awe it's licentious neighbours. But fear and timidity betray fymptoms of weaknefs, that, creating contempt and difrefpect, encourage the attempts of ambitious defpots; fo that the nobleft caufes are fometimes ruined or vilified by the folly or indifcretion of their directors. All Europe faw, and all good men faw with dread, that the french had under-I i 2 taken to fupport a caufe, which they had neither fufficient purity of heart, nor maturity of judgment, to conduct with moderation and prudence; whilft malevolence has been gratified by the errours they have committed, attributing that imperfection to the theory they adopted, which was applicable only to the folly of their practice.

However, frenchmen have reason to rejoice, and posterity will be grateful, for what was done by the assembly.

The economy of government had been fo ably treated by the writers of the prefent age, that it was impossible for them, acting on the great fcale of public good, not to lay the foundations of many useful plans, as they reformed many grievous and grinding abufes .--- Ac-cordingly we find, though they had not fufficient penetration to forefee the dreadful confequences of years of anarchy, the probable refult of their manner of proceeding, still by following, in fome degree, the inftructions of their conftituents, who had digefted, from the bright lines of philosophical truths, the prominent rules of political fcience, they, in laying the main pillars of the constitution, established beyond a possibility of obliteration,

(485)

tion, the great principles of liberty and equality.

It is allowed by all parties, that civilization is a bleffing, fo far as it gives fecurity to perfon and property, and the milder graces of tafte to fociety and manners. If, therefore, the polishing of man, and the improvement of his intellect, become necessary to fecure these advantages, it follows, of course, that the more general fuch improvement grows, the greater the extension of human happinefs.

In a favage state man is distinguished only by fuperiority of genius, prowefs, and elo-I fay eloquence, for I believe, that quence. in this stage of fociety he is most eloquent, because most natural. For it is only in the progress of governments, that hereditary diftinctions, cruelly abridging rational liberty, have prevented man from rifing to his just point of elevation, by the exercise of his improveable faculties.

That there is a fuperiority of natural genius among men does not admit of dispute; and that in countries the most free there will always be diffinctions proceeding from fuperiority of judgment, and the power of acquiring

Liz

quiring more delicacy of tafte, which may be the effect of the peculiar organization, or whatever cause produces it, is an incontestible truth. But it is a palpable errour to fuppole, that men of every class are not equally fusceptible of common improvement : if therefore it be the contrivance of any government, to preclude from a chance of improvement the greater part of the citizens of the flate, it can be confidered in no other light than as a monstrous tyranny, a barbarous oppression. equally injurious to the two parties, though in different ways. For all the advantages of civilization cannot be felt, unless it pervades the whole mass, humanizing every description of men-and then it is the first of bleffings, the true perfection of man.

The melioration of the old government of France arole entirely from a degree of urbanity acquired by the higher class, which infensibly produced, by a kind of natural courtefy, a small portion of civil liberty. But, as for political liberty, there was not the shadow of it; or could it ever have been generated under such a system: because, whils men were prevented not only from arriving at public offices, or voting for the nomination

ž

1

of

of others to fill them, but even from attaining any diffinct idea of what was meant by liberty in a practical fense, the great bulk of the people were worfe than favages; retaining much of the ignorance of barbarians, after having poifoned the noble qualities of nature by imbibing fome of the habits of degenerate refinement. To the national affembly it is, that France is indebted for having prepared a fimple code of inftruction, containing all the truths neceffary to give a comprehensive perception of political fcience; which will enable the ignorant to climb the mount of knowledge, whence they may view the ruins of the ingenious fabric of despotism, that had fo long difgraced the dignity of man by it's odious and debafing claims.

The declaration of rights contains an aggregate of principles the most beneficial; yet fo fimple, that the most ordinary capacity cannot fail to comprehend their import. It begins by afferting, that the rights of men are equal, and that no diffinctions can exift in a wholefome government, but what are founded on public utility. Then showing, that political affociations are intended only for the prefervation of the natural and imprefcriptible rights

rights of man, which are his liberty, fecurity of property, and refiftance against oppression; and afferting alfo, that the nation is the fource of all fovereignty; it delineates, in a plain and perspicuous manner, in what these rights, and this fovereignty, confift. In this delineation men may learn, that, in the exercise of their natural rights, they have the power of doing whatever does not injure another; and that this power has no limits, which are not determined by law-the laws being at the fame time an expression of the will of the community, becaufe all the citizens of the ftate, either perfonally, or by their reprefentatives, have a right to concur in the formation.

Thus, having taught the citizens the fundamental principles of a legitimate government, it proceeds to fhow how the opinion of each may be afcertained; which he has a right to give perfonally, or by his reprefentatives, to determine the neceffity of public contributions, their appropriation, mode of affeffment, and duration.

The fimplicity of these principles, promulged by the men of genius of the last and present ages, and their justness, acknowledged

ĥ

by every description of unprejudiced men, had not been recognised by any senate or government in Europe; and it was an honour worthy to be referved for the representatives of twenty-five millions of men, rising to the sense and feeling of rational beings, to be the first to dare to ratify such facred and beneficial truths---truths, the existence of which had been eternal; and which required only to be made known, to be generally acknowledged---truths, which have been fostered by the genius of philosophy, whils hereditary wealth and the bayonet of despotism have continually been opposed to their establishment.

The publicity of a government acting conformably to the principles of reason, in contradifinction to the maxims of oppression, affords the people an opportunity, or at least a chance, of judging of the wisdom and moderation of their ministers; and the eye of discernment, when permitted to make known it's observations, will always prove a check on the profligacy or dangerous ambition of aspiring men.—So that in contemplating the extension of representative systems of polity, we have folid ground on which to reft the expectation—that wars and their calamitous effects will become lefs frequent, in proportion as the people, who are obliged to support them with their sweat and blood, are confulted respecting their necessity and confequences.

Such confultations can take place under reprefentative fyftems of government only under fyftems which demand the refponfibility of their ministers, and secure the publicity of their political conduct. The mysteries of courts, and the intrigues of their parasites, have continually deluged Europe with the blood of it's most worthy and heroic citizens, and there is no specific cure for such evils, but by enabling the people to form an opinion respecting the subject of dispute.

The court of Verfailles, with powers the most ample, was the most bufy and infidious of any in Europe; and the horrours which she has occasioned, at different periods, were as incalculable, as her ambition was unbounded, and her councils base, unprincipled, and dishonourable. If, then, it were only for abolishing her sway, Europe ought to be thankful for a change, that, by altering the political systems of the most improved quarter of the globe, must ultimately lead to univerfal freedom, virtue, and happines.

But it is to be prefumed, when the effervefcence, which now agitates the prejudices of the whole continent, fublides, the juftnefs of the principles brought forward in the declaration of the rights of men and citizens will be generally granted; and that governments, in future, acquiring reafon and dignity, feeling for the fufferings of the people, whilft reprobating the facrilege of tyranny, will make it their principal object, to counteract it's baneful tendency, by reftraining within juft bounds the ambition of individuals.

CHAP.

(492)

CHAPTER IV.

PROGRESS OF REFORM. THE ENCYCLOPEDIE. LIBERTY OF THE PRESS. CAPITALS. THE FRENCH NOT PRO-PERLY QUALIFIED FOR THE REVOLUTION. SAVAGE COMPARED WITH CIVILIZED MAN. EFFECTS OF EX-TRAVAGANCE-OF COMMERCE-AND OF MANUFAC-TURES. EXCUSE FOR THE FEROCITY OF THE PARI-SIANS.

PEOPLE thinking for themselves have more energy in their voice, than any government, which it is possible for human wifdom to invent; and every government not aware of this facred truth will, at fome period, be fuddenly overturned. Whilft men in a favage ftate preferve their independence, they adopt no regular system of policy, nor ever attempt to digest their rude code of laws into a constitution, to enfure political liberty. Confequently we find in every country, after it's civilization has arrived at a certain height, that the people, the moment they are difpleafed with their rulers, begin to clamour against them; and, finally rejecting all authority but their own will, in breaking the fhackles of folly or tyranny, they glut their refentment by the mischievous destruction of the

and in

the works of ages, only confidering them as the moments of their fervitude.

From the focial disposition of man, in proportion as he becomes civilized, he will mingle more and more with fociety. The first interest he takes in the business of his fellow-men is in that of his neighbour; next he contemplates the comfort, mifery, and happinels of the nation to which he belongs, investigates the degree of wildom and justice in the political system, under which he lives, and, striding into the regions of science, his refearches embrace all human kind. Thus he is enabled to estimate the portion of evil or good which the government of his country produces, compared with that of others; and the comparison, granting him superiour powers of mind, leads him to conceive a model of a more perfect form.

This fpirit of inquiry first manifests itself in hamlets; when his views of improvement are confined to local advantages: but the approximation of different districts leading to further intercourse, roads of communication are opened, until a central or favourite spot becomes the vortex of men and things. Then the rising spires, pompous domes, and majestic jeftic monuments, point out the capital; the focus of information, the refervoir of genius; the fchool of arts, the feat of voluptuous gratification, and the hot-bed of vice and immorality.

The centrifugal rays of knowledge and fcience now stealing through the empire, the whole intellectual faculties of man partake of their influence, and one general fentiment governs the civil and political body. In the progrefs of these improvements the state undergoing a variety of changes, the happines or mifery produced occasions a diversity of opinions; and to prevent confusion, absolute governments have been tolerated by the most enlightened part of the people. But, probably, this toleration was merely the effect of the strong focial feelings of men; who preferred tranquillity, and the profperity of their country, to a reliftance, which, judging from the ignorance of their fellow citizens, they believed would bring more harm than good in it's train. In fhort, however long a combination of tyranny has retarded the progress, it has been one of the advantages of the large cities of Europe, to light up the sparks of reafon, and to extend the principles of truth.

Such

Such is the good and evil flowing from the capitals of flates, that during the infancy of governments, though they tend to corrupt and enervate the mind, they accelerate the introduction of fcience, and give the tone to the national fentiments and tafte.

But this influence is extremely gradual; and it requires a great length of time, for the remote corners of the empire to experience either the one, or the other of these effects. Hence we have feen the inhabitants of a metropolis feeble and vitiated, and those of the provinces robust and virtuous. Hence we have feen oppositions in a city (riots as they are called) to illegal governments inftantly defeated, and their leaders hanged or tortured; because the judgment of the state was not fufficiently matured to fupport the ftruggle of the unhappy victims in a righteous cause. And hence it has happened, that the defpots of the world have found it neceffary to maintain large standing armies, in order to counteract the effects of truth and reafon.

The continuation of the feudal fystem, however, for a great length of time, by giving an overgrown influence to the nobility of France, had contributed, in no fmall degree,

to counteract the despotism of her kings. Thus it was not until after the arbitrary administration of Richelieu, who had terrified the whole order by a tyranny peculiar to himfelf, that the infidious Mazarine broke the independent fpirit of the nation by introducing the fale of honours; and that Louis XIV, by the magnificence of his follies, and the meretricious decorations of ftars, croffes, and other marks of distinction, or badges of flavery, drew the nobles from their caftles; and, by concentrating the pleafures and wealth of the kingdom in Paris, the luxury of the court became commenfurate to the product of the nation. Befides, the encouragement given to enervating pleafures, and the venality of titles, purchased either with money, or ignoble fervices, foon rendered the nobility as notorious for effeminacy as they had been illustrious for heroifm in the days of the gallant Henry.

The arts had already formed a fchool, and men of fcience and literature were hurrying from every part of the kingdom to the metropolis, in fearch of employment and of honour; and whilft it was giving it's tone to the empire, the parifian tafte was pervading Europe.

The vanity of leading the fashions, in the higher orders of fociety, is not the smallest weakness produced by the fluggishness into which people of quality naturally fall. The depravity of manners, and the fameness of pleasure, which compose a life of idleness, are fure to produce an infupportable ennui; and, in proportion to the flupidity of the man, or as his fenfibility becomes deadened, he has recourse to variety, finding a zeft only from a new creation of charms; and commonly the most unnatural are necessary to rouse fickly, fastidious senses. Still in the same degree as the refinement of fentiment, and the improvement of tafte advance, the company of celebrated literary characters is fought after with avidity; and from the prevalence of fashion, the empire of wit succeeds the reign of formal infipidity, after the squeamish palate has been rendered delicate even by the nauseous banquets of voluptuousnes.

This is the natural confequence of the improvement of manners, the harbinger of reason; and from the ratio of it's advancement throughout society, we are enabled to estimate the progress of political science. For no sooner had the disquisition of philosophical K k fubjects fubjects become general in the felect parties of amulement, extending by degrees to every rlafs of fociety, than the rigour of the ancient government of France began to foften; till it's mildnefs became fo confiderable, that fuperficial observers have attributed the exercise of senity in the administration to the wisdom and excellence of the fystem itfelf.

A confederacy of philosophers, whole opinions farnished the food of colloquial entertainment, gave a turn for inftructive and ufeful reading to the leaders of circles, and drew the attention of the nation to the principles of political and civil government. Whilst by the compilation of the Encyclopedia, the repository of their thoughts, as an abstract work, they eluded the dangerous vigilance of absolute ministers; thus in a body diffeminating those truths in the economy of finance, which, perhaps, they would not have had fufficient courage feparately to have produced in individual publications; or, if they had, they would most probably have been fuppreffed.

This is one of the few inflances of an affociation of men becoming uleful, inflead of being cramped by joint exertions. And

1::

and the second sec

the caufe is clear :---the work did not require a little party fpirit; but each had a diftinct fubject of investigation to purfue with folitary energy. His destination was traced upon a calm fea, which could not expose him to the Scylla or Charybdis of vanity or interest.

The economists, carrying away the palm from their opponents, showed that the profperity of a state depends on the freedom of industry; that talents should be permitted to find their level; that the unshackling of commerce is the only fecret to render it flourishing, and answer more effectually the ends for which it is politically necessary; and that the imposts should be laid upon the surplus remaining, after the husbandman has been reimbursed for his labour and expences.

Ideas fo new, and yet fo juft and fimple, could not fail to produce a great effect on the minds of frenchmen; who, conflictutionally attached to novelty and ingenious fpeculations, were fure to be enamoured with a prospect of confolidating the great advantages of such a novel and enlightened softem; and without calculating the danger of attacking old prejudices; nay, without ever considering, that it was a much easier task to K k 2 pull pull down than to build up, they gave themfelves little trouble to examine the gradual fleps by which other countries have attained their degree of political improvement.

The many vexatious taxes, which under the french government not only enervated the exertions of unprivileged perfons, ftagnating the live ftream of trade, but were extremely teafing inconveniences to every private man, who could not travel from one place to another without being ftopped at barriers, and fearched by officers of different deferiptions, were almost infuperable impediments in the way of the improvements of industry: and the abridgment of liberty was not more grievous in it's pecuniary confequences, than in the perfonal mortification of being compelled to observe regulations as troublefome as they were at variance with found policy.

711445 1 1

いなど、現合

C. THE STATE OF STATE

Irritations of the temper produce more poignant fenfations of difguft than ferious injurics. Frenchmen, indeed, had been fo long accustomed to these vexatious forms, that, like the ox who is daily yoked, they were no longer galled in spirit, or exhaled their angry ebullitions in a song. Still it might have been supposed, that after reflecting little, and talking talking much, about the fublimity and fuperiour excellence of the plans of french writers above those of other nations, they would become as paffionate for liberty, as a man restrained by fome idle religious vow is to poffels a mistres, to whose charms the imagination has lent all it's own world of graces.

Besides, the very manner of living in France gives a lively turn to the character of the people; for by the destruction of the animal juices, in dreffing their food, they are subject to none of that dulness, the effect of more nutritive diet in other countries; and this gaiety is increased by the moderate quantity of weak wine, which they drink at their meals, bidding defiance to phlegm. The people also living entirely in villages and towns are more focial; fo that the tone of the capital, the inftant it had a note diffinct from that of the court, became the key of the nation; though the inhabitants of the provinces polifhed their manners with lefs danger to their morals, or natural fimplicity of character. But this mode of peopling the country tended more to civilize the inhabitants, than to change the face of the foil, or lead to agricultural improvements. For it is by refiding Kk 3

refiding in the midft of their land, that farmers make the most of it, in every fense of the word-fo that the rude state of husbandry, and the awkwardness of the implements used by these ingenious people, may be imputed folely to this caufe.

The fituation of France was likewife very favourable for collecting the information, acquired in other parts of the world. Paris, having been made a thoroughfare to all the kingdoms on the continent, received in it's bosom strangers from every quarter; and itself refembling a full hive, the very drones buzzed into every corner all the fentiments of liberty, which it is possible for a people to posses, who have never been enlightened by the broad funihine of freedom; yet more romantically enthusiastic, probably, for that very reason. Paris, therefore, having not only diffeminated information, but prefented herfelf as a bulwark to oppose the despotifm of the court, standing the brunt of the fray, feems with some reason, to pride herself on being the author of the revolution.

Though the liberty of the prefs had not exilted in any part of the world, England and America excepted, still the disquisition of political

litical questions had long occupied the intelligent parts of Europe; and in France, more than in any other country, books written with licentious freedom were handed from house to house, with the circumspection that irritates curiofity. Not to lay great stress on the univerfality of the language, which made one general opinion on the benefits arising from the advancement of science and reason pervade the neighbouring flates, particularly Germany; where original compositions began to take place of that laborious erudition, which being employed only in the elucidation of ancient writers, the judgment lies dormant, or is energy called into action to weigh the import of words rather than to effimate the value of things. In Paris, likewife, a knot of ingenious, if not profound writers, twinkled their light into every circle; for being carefied by the great, they did not inhabit the homely receffes of indigence, rufficating their manners as they cultivated their understandings; on the contrary, the fineffe required to convey their free fentiments in their books, broken into the small that of innuendoes, gave an oilinefs to their conversation, and enabled them to take the lead at tables, the voluptuouinels Kk4

(504)

ouíneís of which was grateful to philosophers, rather of the epicurean than the floic sect.

It had long been the fashion to talk of liberty, and to dispute on hypothetical and logical points of political economy; and these disputations disferminated gleams of truth, and generated more demagogues than had ever appeared in any modern city.—The number exceeded, perhaps, any comparison with that of Athens itself.

The habit also of passing a part of most of their evenings at some theatre gave them an ear for harmony of language, and a fastidious taste for sheer declamation, in which a fentimental jargon extinguishes all the simplicity and fire of passion : the great number of play-houses, and the moderate prices of the pit and different ranges of boxes, bringing it within the compass of every citizen to frequent the amusement for much beloved by the french.

The arrangement of founds, and the adjustment of masculine and feminine rhymes, being the secrets of their poetry, the pomp of

[•] There are upwards of thirty fcattered throughout the city.

diction gives a femblance of grandeur to common observations and hackneyed fentiments; becaufe the french language, though copious in the phrases that give each shade of sentiment, has not, like the italian, the english, the german, a phrafeology peculiar to poetry; yet it's happy turns, equivocal, nay even concife expressions, and numerous epithets, which, when ingenioully applied, convey a fentence, or afford matter for half a dozen, make it better adapted to oratorical flourishes than that of any other nation. The french therefore are all rhetoricians, and they have a fingular fund of fuperficial knowledge, caught in the tumult of pleafure from the shallow stream of conversation; fo that if they have not the depth of thought which is obtained only by contemplation, they have all the fhrewdness of sharpened wit; and their acquirements are fo near their tongue's end, that they never mifs an opportunity of faying a pertinent thing, or tripping up, by a fmart retort, the arguments with which they have not ftrength fairly to wreftle.

Every political good carried to the extreme must be productive of evil; yet every poifon has it's antidote; and there is a pitch of luxury

ļ

luxury and refinement, which, when reached. will overturn all the abfolute governments in the world. The afcertainment of these antidotes is a tafk the most difficult; and whilst it remains imperfect, a number of men will continue to be the victims of mistaken applications. Like the empirics, who bled a patient to death to prevent a mortification from becoming fatal, the tyrants of the earth have had recourfe to cutting off the heads, or torturing the bodies, of those perfons who have attempted to check their fway, or doubt their omnipotence. But, though thousands have perished the victims of empirics, and of defpots, yet the improvements made both in medicine and moral philosophy have kept a fure, though gradual pace.-And, if men have not clearly discovered a specific remedy for every evil, physical, moral, and political, it is to be prefumed, that the accumulation of experimental facts will greatly tend to leffen them in future.

Whilft, therefore, the fumptuous galas of the court of France were the grand fource of the refinement of the arts, tafte became the antidote to ennui; and when fentiment had taken place of chivalrous and gothic tournaments, ments, the reign of philosophy fucceeded that of the imagination. And though the government, enveloped in precedents, adjusted still the idle ceremonials, which were no longer imposing, blind to the imperceptible change of things and opinions, as if their faculties were bound by an eternal froft, the progrefs was invariable; till, reaching a certain point, Paris, which from the particular formation of the empire had been fuch an useful head to it, began to be the cause of dreadful calamities, extending from individuals to the nation, and from the nation to Europe, Thus it is, that we are led to blame those, who insist, that, because a state of things has been productive of good, it is always refpectable; when, on the contrary, the endeavouring to keep alive any hoary establishment, beyond it's natural date, is often pernicious and always ufelefs.

In the infancy of governments, or rather of civilization, courts feem to be neceffary to accelerate the improvement of arts and manners, to lead to that of fcience and morals. Large capitals are the obvious confequences of the riches and luxury of courts; but as, after they have arrived at a certain magnitude tude and degree of refinement, they become dangerous to the freedom of the people, and incompatible with the fafety of a republican government, it may be queftioned whether Paris will not occasion more disturbance in fettling the new order of things, than is equivalent to the good she produced by accelerating the epocha of the revolution.

However, it appears very certain, that fould a republican government be confolidated, Paris must rapidly crumble into decay. It's rife and fplendour were owing chiefly, if not entirely, to the old fystem of government; and fince the foundation of it's luxury has been shaken, and it is not likely that the difparting ftructure will ever again reft fecurely on it's bafis, we may fairly infer, that, in proportion as the charms of folitary reflection and agricultural recreations are felt, the people, by leaving the villages and cities, will give a new complexion to the face of the country-and we may then look for a turn of mind more folid, principles more fixed, and a conduct more confistent and wirthous.

The occupations and habits of life have a wonderful influence on the forming mind; to great, that the fuperinductions of art ftop the growth of the fpontaneous fhoots of nature, till it is difficult to diffinguish natural from factitious morals and feelings; and as the energy of thinking will always proceed, in a great measure, either from our education or manner of living, the frivolity of the french character may be accounted for, without taking refuge in the old hiding place of ignorance—occult causes.

When it is the object of education to prepare the pupil to pleafe every body, and of courfe to deceive, accomplifhments are the one thing needful; and the defire to be admired ever being uppermoft, the paffions are fubjugated, or all drawn into the whirlpool of egotifm *. This gives to each perfon, however different the temper, a tincture of vanity, and that weak vacillation of opinion, which is incompatible with what we term character.

Thus a frenchman, like most women, may be faid to have no character distinguishable from that of the nation; unless little shades,

• I use this word according to the french acceptation, because we have not one to express so forcibly the same sigmissication. - minute -

There and the second and a second

(510)

and cafual lights, be allowed to conftitute an effential characteristic. What then could have been expected, when their ambition was mostly confined to dancing gracefully, entering a room with eafy affurance, and fmiling on and complimenting the very perfons whom they meant to ridicule at the next fashionable assembly? The learning to fence with skill, it is true, was useful to a people, whole falle notions of honour required that at least a drop of blood should atone for the shadow of an affront. The knack also of uttering sprightly repartees became a neceffary art, to fupply the place of that real interest only to be nourished in the affectionate intercourse of domestic intimacy; where confidence enlarges the heart it opens. Befides, the defire of eating of every difh at table, no matter if there were fifty, and the cuftom of separating immediately after the repaft, destroy the social affections, reminding a stranger of the vulgar faying-" every man for himfelf, and God for us all.' After these curfory observations, it is not going too far to advance, that the french were in fome respects the most unqualified of any people in in Europe to undertake the important work in which they are embarked.

Whilst pleasure was the fole object of living among the higher orders of fociety, it was the bulinels of the lower to give life to their joys, and convenience to their luxury. This cast-like division, by destroying all firength of character in the former, and debasing the latter to machines, taught frenchmen to be more ingenious in their contrivances for pleasure and show, than the men of any other country; whilft, with refpect to the abridgment of labour in the mechanic arts, or to promote the comfort of common life, they were far behind. They had never, in fact, acquired an idea of that independent, comfortable fituation, in which contentment is fought rather than happines; because the flaves of pleasure or power can be roufed only by lively emotions and extravagant hopes. Indeed they have no word in their vocabulary to express comfort-that state of existence, in which reason renders serene and useful the days, which passion would only cheat with flying dreams of happinels.

and the second

(512)

A change of character cannot be fo fudden as fome fanguine calculators expect: yet by the destruction of the rights of primogeniture, a greater degree of equality of property is fure to follow; and as Paris cannot maintain It's fplendour, but by the trade of luxury, which can never be carried to the fame height it was formerly, the opulent having ftrong motives to induce them to live more in the country, they must acquire new inclinations and opinions.---As a change alfo of the fyftem of education and domeiftic manners will be a natural confequence of the revolution, the french will infenfibly rife to a dignity of character far above that of the prefent race ; and then the fruit of their liberty, ripening gradually, will have a relifh not to be expected during it's crude and forced flate.

The late arrangement of things feems to have been the common effect of an abfolute government, a domineering priefthood, and a great inequality of fortune; and whilft it completely deftroyed the most important end of fociety, the comfort and independence of the people, it generated the most shameful depravity and weakness of intellect; fo that we have seen the french engaged in a business the (513)

the most facred to mankind, giving, by their enthusias fight of the samples of their fortitude at one moment, and at another, by their want of firmness and deficiency of judgment, affording the most glaring and fatal proofs of the just estimate, which all nations have formed of their character.

Men fo thoroughly fophisticated, it was to be fupposed, would never conduct any businels with steadiness and moderation: but it required a knowledge of the nation and their manners, to form a distinct idea of their difgusting conceit and wretched egotism; fo far furpass all the calculations of reason, that, perhaps, should not a faithful picture be now sketched, posterity would be at loss to account for their folly; and attribute to madness, what arose from imbecility.

The natural feelings of man feldom become fo contaminated and debafed as not fometimes to let efcape a gleam of the generous fire, an ethereal fpark of the foul; and it is thefe glowing emotions, in the inmost receffes of the heart, which have continued to feed feelings, that on fudden occasions manifest themfelves with all their priftine purity and vigour. But, by the habitual flothfulness of rusty intellects, or the depravity of the heart, lulled into hardness on the lascivious couch of pleasure, those heavenly beams are obscured, and man appears either an hideous monster, a devouring beast; or a spiritles reptile, without dignity or humanity.

Those miserable wretches who crawl under the feet of others are feldom to be found among favages, where men accustomed to exercife and temperance are, in general, brave, hospitable, and magnanimous; and it is only as they furrender their rights, that they lofe those noble qualities of the heart. The ferocity of the favage is of a diffinct nature from that of the degenerate flaves of tyrants. One murders from mistaken notions of courage; yet he respects his enemy in proportion to his fortitude, and contempt of death : the other affassinates without remorfe, whilft his trembling nerves betray the weaknefs of his affrighted foul at every appearance of danger. Among the former, men are refpected according to their abilities; confequently idle drones are driven out of this fociety; but among the latter, men are raifed to honours and employments in proportion as a talent for intrigue, the fure proof of littleness of

of mind, has rendered them fervile. The most melancholy reflections are produced by a retrospective glance over the rife and progress of the governments of different countries, when we are compelled to remark, that flagrant follies and atrocious crimes have been more common under the governments of modern Europe, than in any of the ancient nations, if we except the jews. Sanguinary tortures, infidious poifonings, and dark affaffinations, have alternately exhibited a race of monsters in human shape, the contemplation of whofe ferocity chills the blood, and darkens every enlivening expectation of humanity: but we ought to observe, to reanimate the hopes of benevolence, that the perpetration of these horid deeds has arisen from a defpotifm in the government, which reafon is teaching us to remedy. Sometimes, it is true, restrained by an iron police, the people appear peaceable, when they are only ftunned; fo that we find, whenever the mob has broken loofe, the fury of the populace has been shocking and calamitous. These confiderations account for the contradictions in the french character, which must strike a ftranger: for robberies are very rare in L12 France,

ŧ

France, where daily frauds and fly pilfering prove, that the lower clafs have as little honefty as fincerity. Befides, murder and cruelty almost always show the dastardly ferocity of fear in France; whilst in England, where the spirit of liberty has prevailed, it is usual for an highwayman, demanding your money, not only to avoid barbarity, but to behave with humanity, and even complaifance.

Degeneracy of morals, with polifhed manners, produces the worft of paffions, which floating through the focial body, the genial current of natural feelings has been poifoned; and, committing crimes with trembling inquietude, the culprits have not only drawn on themfelves the vengeance of the law, but thrown an odium on their nature, that has blackened the face of humanity. And whilft it's temple has been facrilegiously profaned by the drops of blood, which have iffued from the very hearts of the fad victims of their folly; a hardness of temper, under the veil of fentiment, calling it vice, has prevented our fympathy from leading us to examine into the fources of the atrocity of our fpecies,

(517)

fpecies, and obscured the true cause of disgraccful and vicious habits.

Since the existence of courts, whose aggrandisement has been conspicuous in the fame degree as the miferies of the debased people have accumulated, the convenience and comfort of men have been facrificed to the oftentatious display of pomp and ridiculous pageantry. For every order of men, from the beggar to the king, has tended to introduce that extravagance into fociety, which equally blafts domeftic virtue and happinefs. The prevailing cuftom of living beyond their income has had the most baneful effect on the independence of individuals of every class in England, as well as in France; fo that whilft they have lived in habits of idleness, they have been drawn into excesses, which, proving ruinous, produced confequences equally pernicious to the community, and degrading to the private character. Extravagance forces the peer to proftitute his talents and influence for a place, to repair his broken fortune; and the country gentleman becomes venal in the fenate, to enable himfelf to live on a par with him, or reimburse himfelf for the expences of electioneering, into which

(518)

which he was led by fheer vanity. The profeffions, on the fame account, become equally unprincipled. The one, whole characteriftic ought to be integrity, defcends to chicanery; whilft another trifles with the health, of which it knows all the importance. The merchant likewife enters into fpeculations fo clofely bordering on fraudulency, that common ftraight forward minds can fcarcely diftinguish the devious art of felling any thing for a price far beyond that neceffary to ensure a just profit, from sheer disconsity, aggravated by hard-heartedness, when it is to take advantage of the necessities of the indigent.

The deftructive influence of commerce, it is true, carried on by men who are eager by overgrown riches to partake of the refpect paid to nobility, is felt in a variety of ways. The most pernicious, perhaps, is it's producing an ariftocracy of wealth, which degrades mankind, by making them only exchange favageness for tame fervility, instead of acquiring the urbanity of improved reason. Commerce also, overstocking a country with people, obliges the majority to become manufacturers rather than husbandmen; and then the division of labour, folely to enrich the proprietor, renders the mind entirely inactive. The time which, a celebrated writer fays, is fauntered away, in going from one part of an employment to another, is the very time that preferves the man from degenerating into a brute; for every one must have observed how much more intelligent are the blacksmiths, carpenters, and masons in the country, than the journeymen in great towns; and, respecting morals, there is no making a comparison. The very gait of the man, who is his own master, is fo much more steady than the flouching step of the fervant of a fervant, that it is unneceffary to alk which proves by his actions he has the most independence of character.

The acquiring of a fortune is likewife the leaft arduous road to pre-eminence, and the most fure: thus are whole knots of men turned into machines, to enable a keen speculator to become wealthy; and every noble principle of nature is eradicated by making a man pass his life in stretching wire, pointing a pin, heading a nail, or spreading a sheet of paper on a plain surface. Besides, it is allowed, that all associations of men render them sensual, and consequently felfish; and whilst whilft lazy friars are driven out of their cells as ftagnate bodies that corrupt fociety, it may admit of a doubt whether large work-fhops do not contain men equally, tending to impede that gradual progrefs of improvement, which leads to the perfection of reafon, and the eftablifhment of rational equality.

The deprivation of natural, equal, civil and political rights, reduced the most cunning of the lower orders to practife fraud, and the rest to habits of stealing, audacious robberies, and murders. And why? because the rich and poor were separated into bands of tyrants and flaves, and the retaliation of slaves is always terrible. In short, every facred feeling, moral and divine, has been obliterated, and the dignity of man fullied, by a system of policy and jurisprudence as repugnant to reason, as at variance with humanity.

The only excufe that can be made for the ferocity of the parifians is then fimply to obferve, that they had not any confidence in the laws, which they had always found to be merely cobwebs to catch finall flies. Accuftomed to be punished themfelves for every trifle, and often for only being in the way of the rich, or their parafites; when, in fact, had

ş

had the parifians feen the execution of a noble, or prieft, though convicted of crimes beyond the daring of vulgar minds?—When juffice, or the law, is fo partial, the day of retribution will come with the red fky of vengeance, to confound the innocent with the guilty. The mob were barbarous beyond the tiger's cruelty : for how could they truft a court that had fo often deceived them, or expect to fee it's agents punifhed, when the fame measures were purfuing?

Let us caft our eyes over the hiftory of man, and we shall scarcely find a page that is not tarnished by some foul deed, or bloody transaction. Let us examine the catalogue of the vices of men in a favage flate, and contrast them with those of men civilized : we shall find, that a barbarian, confidered as a moral being, is an angel, compared with the refined villain of artificial life. Let us inveftigate the caufes which have produced this degeneracy, and we shall discover, that they are those unjust plans of government, which have been formed by peculiar circumstances in every part of the globe.-Then let us coolly and impartially contemplate the improvements, which are gaining ground in the for-Mm mation snation of principles of policy; and I flatter myfelf it will be allowed by every humane and confiderate being, that a political fyftem more fimple than has hitherto exifted would effectually check those assuring follies, which, by imitation, leading to vice, have banished from governments the very shadow of justice and magnanimity.

Thus had France grown up, and fickened on the corruption of a flate difeafed. But, as in medicine there is a fpecies of complaint in the bowels which works it's own cure, and, leaving the body healthy, gives an invigorated tone to the fystem, fo there is in politics : and whils the agitation of it's regeneration continues, the excrementitious humours exuding from the contaminated body will excite a general diflike and contempt for the nation; and it is only the philosophical eye, which books into the nature and weighs the confequences of human actions, that will be able to differn the cause, which has produced fo many dreadful effects.

END OF THE FIRST VOLUME.

Lately published,

RIGHTS OF WOMAN.

BY MARY WOLLSTONECRAFT.

THE SECOND EDITION :

(PRICE SIX SHILLINGS IN BOARDS.)

PRINTED FOR J. JOHNSON IN ST. PAUL'S CHURCH-YARD.

Where may be had,

- 1. MARY: A Fiction. 3s. fewed.
- 2. THOUGHTS on the EDUCATION of DAUGHTERS. 25. 6d. fewed.
